Art Focus: Franz Marc's Tiger

Inspired by Franz Marc's painting Tiger (pictured above) why not create your own abstract expressionist animal in that aesthetic style

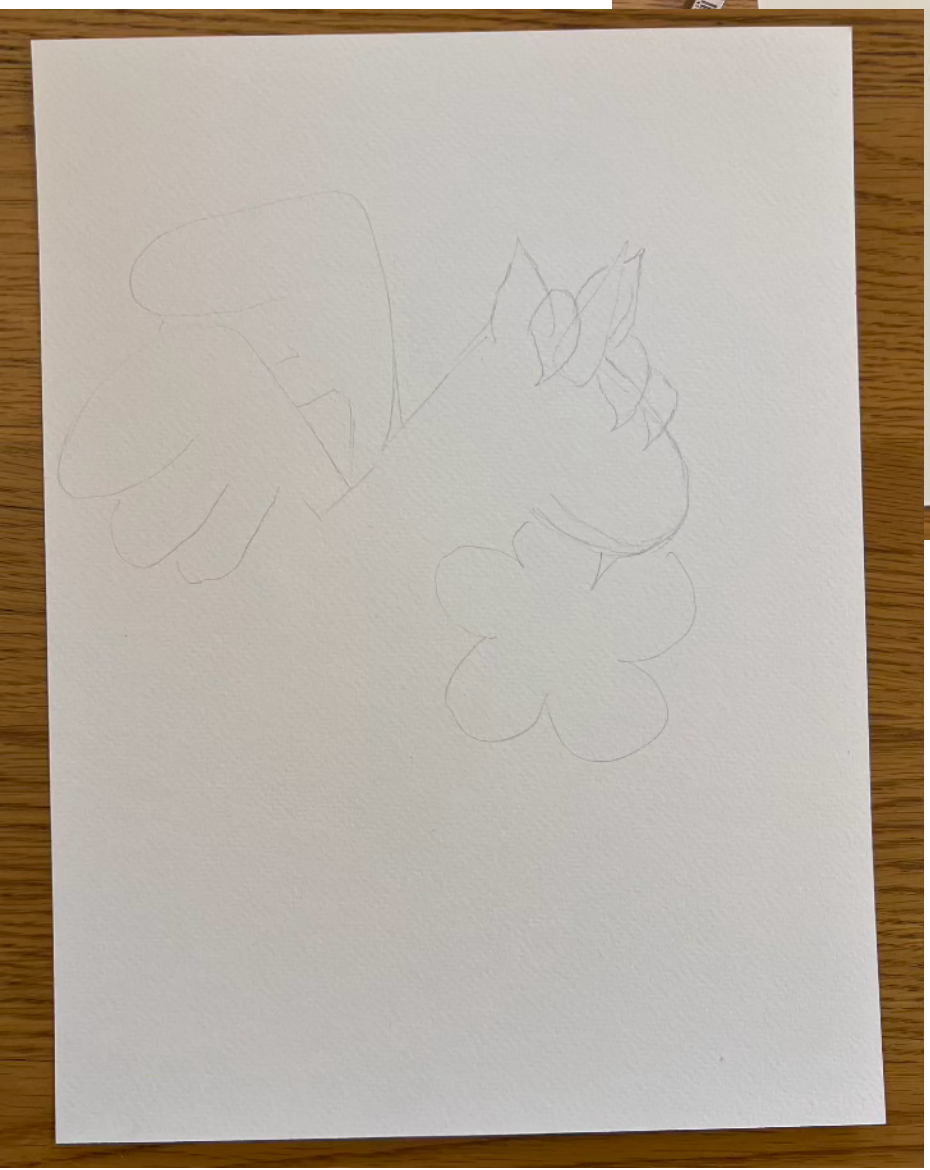

Tools and Materials:

- Paper
- Pencil
- Ruler
- Colouring Pencils
- Felt Tips

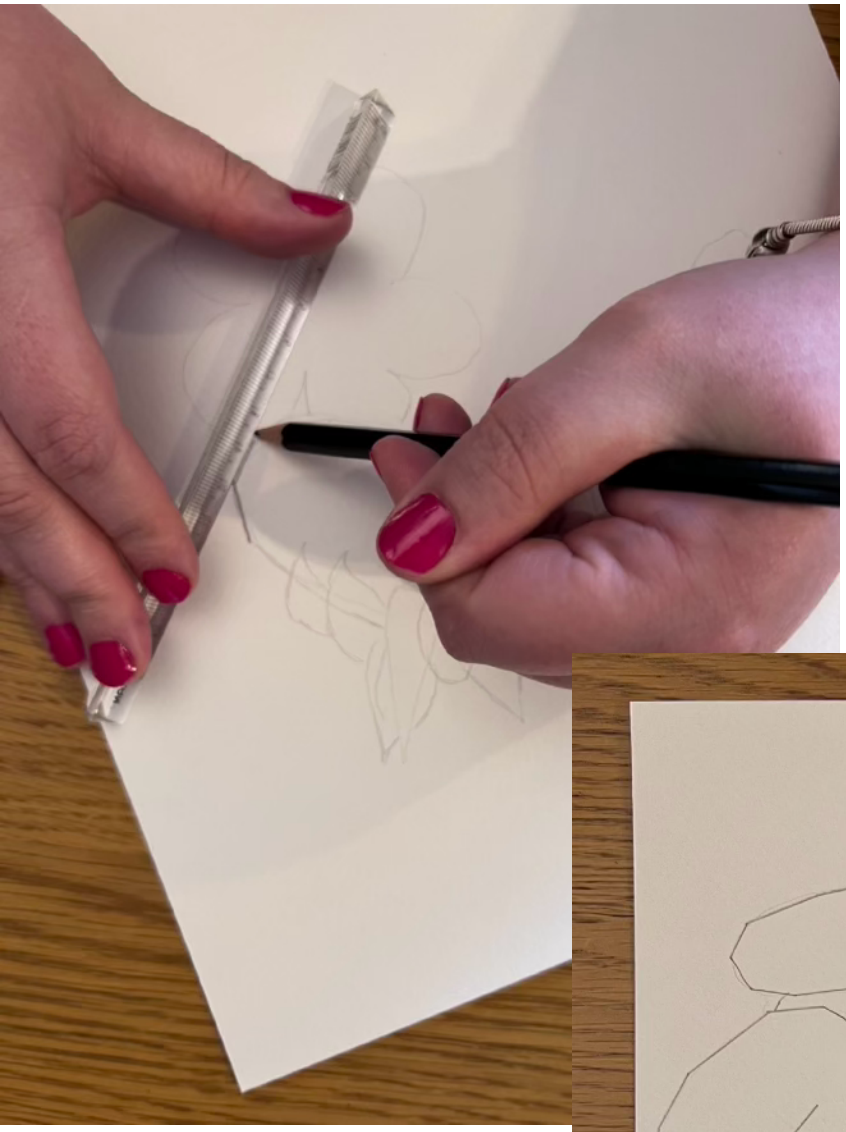

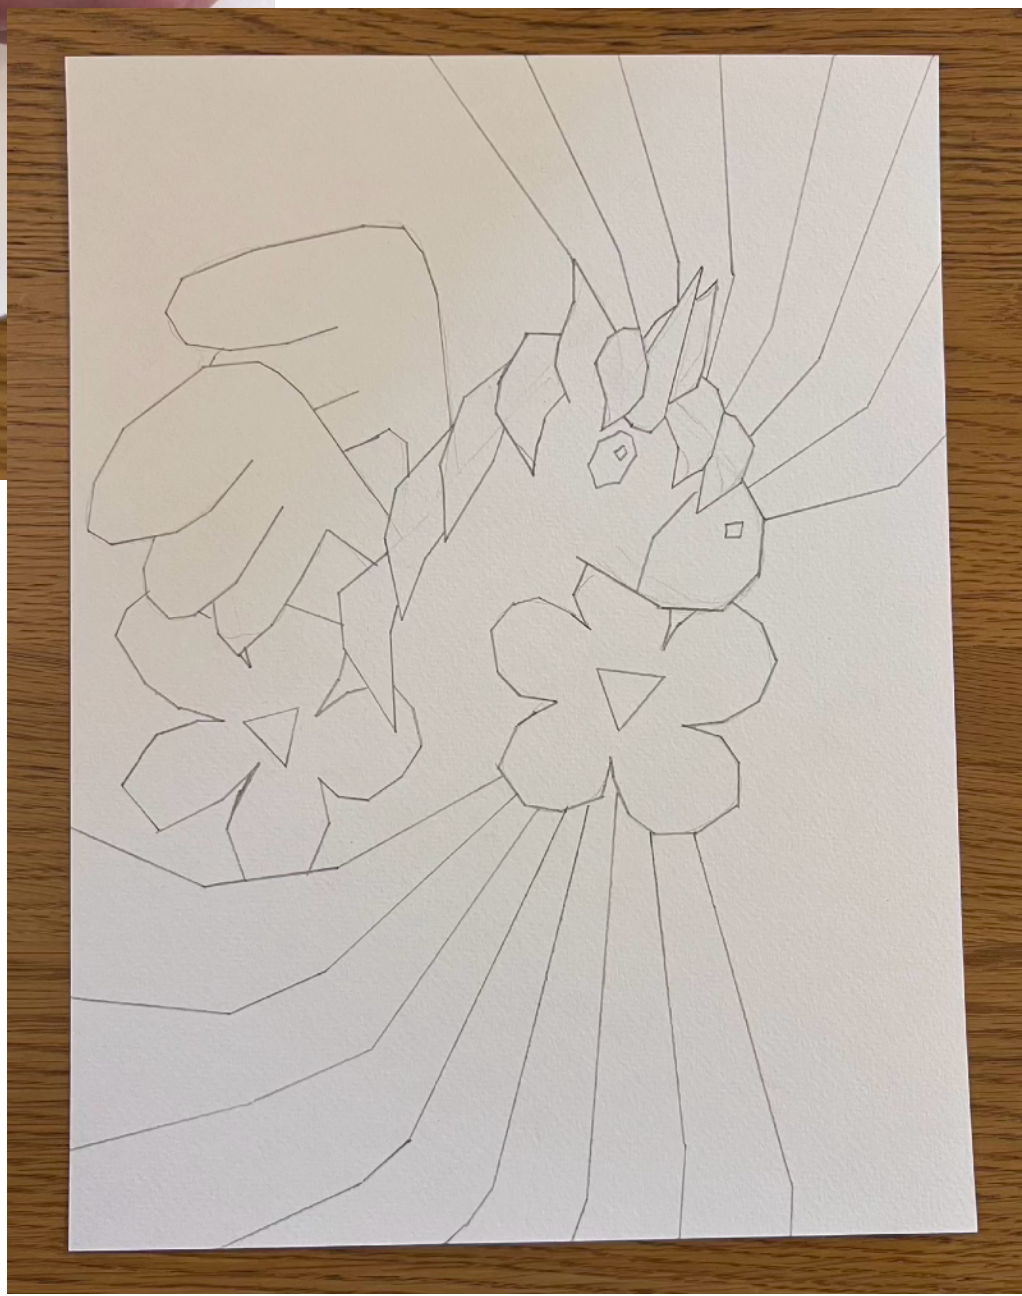

Franz Marc’s Tiger looks like it is made from all straight lines, it is hard to draw in straight lines around curves so we sketched it out first to transform into straight lines later. Don’t worry too much about the sketch just draw as you would normally just pressing the pencil lighter so it isn’t super visible

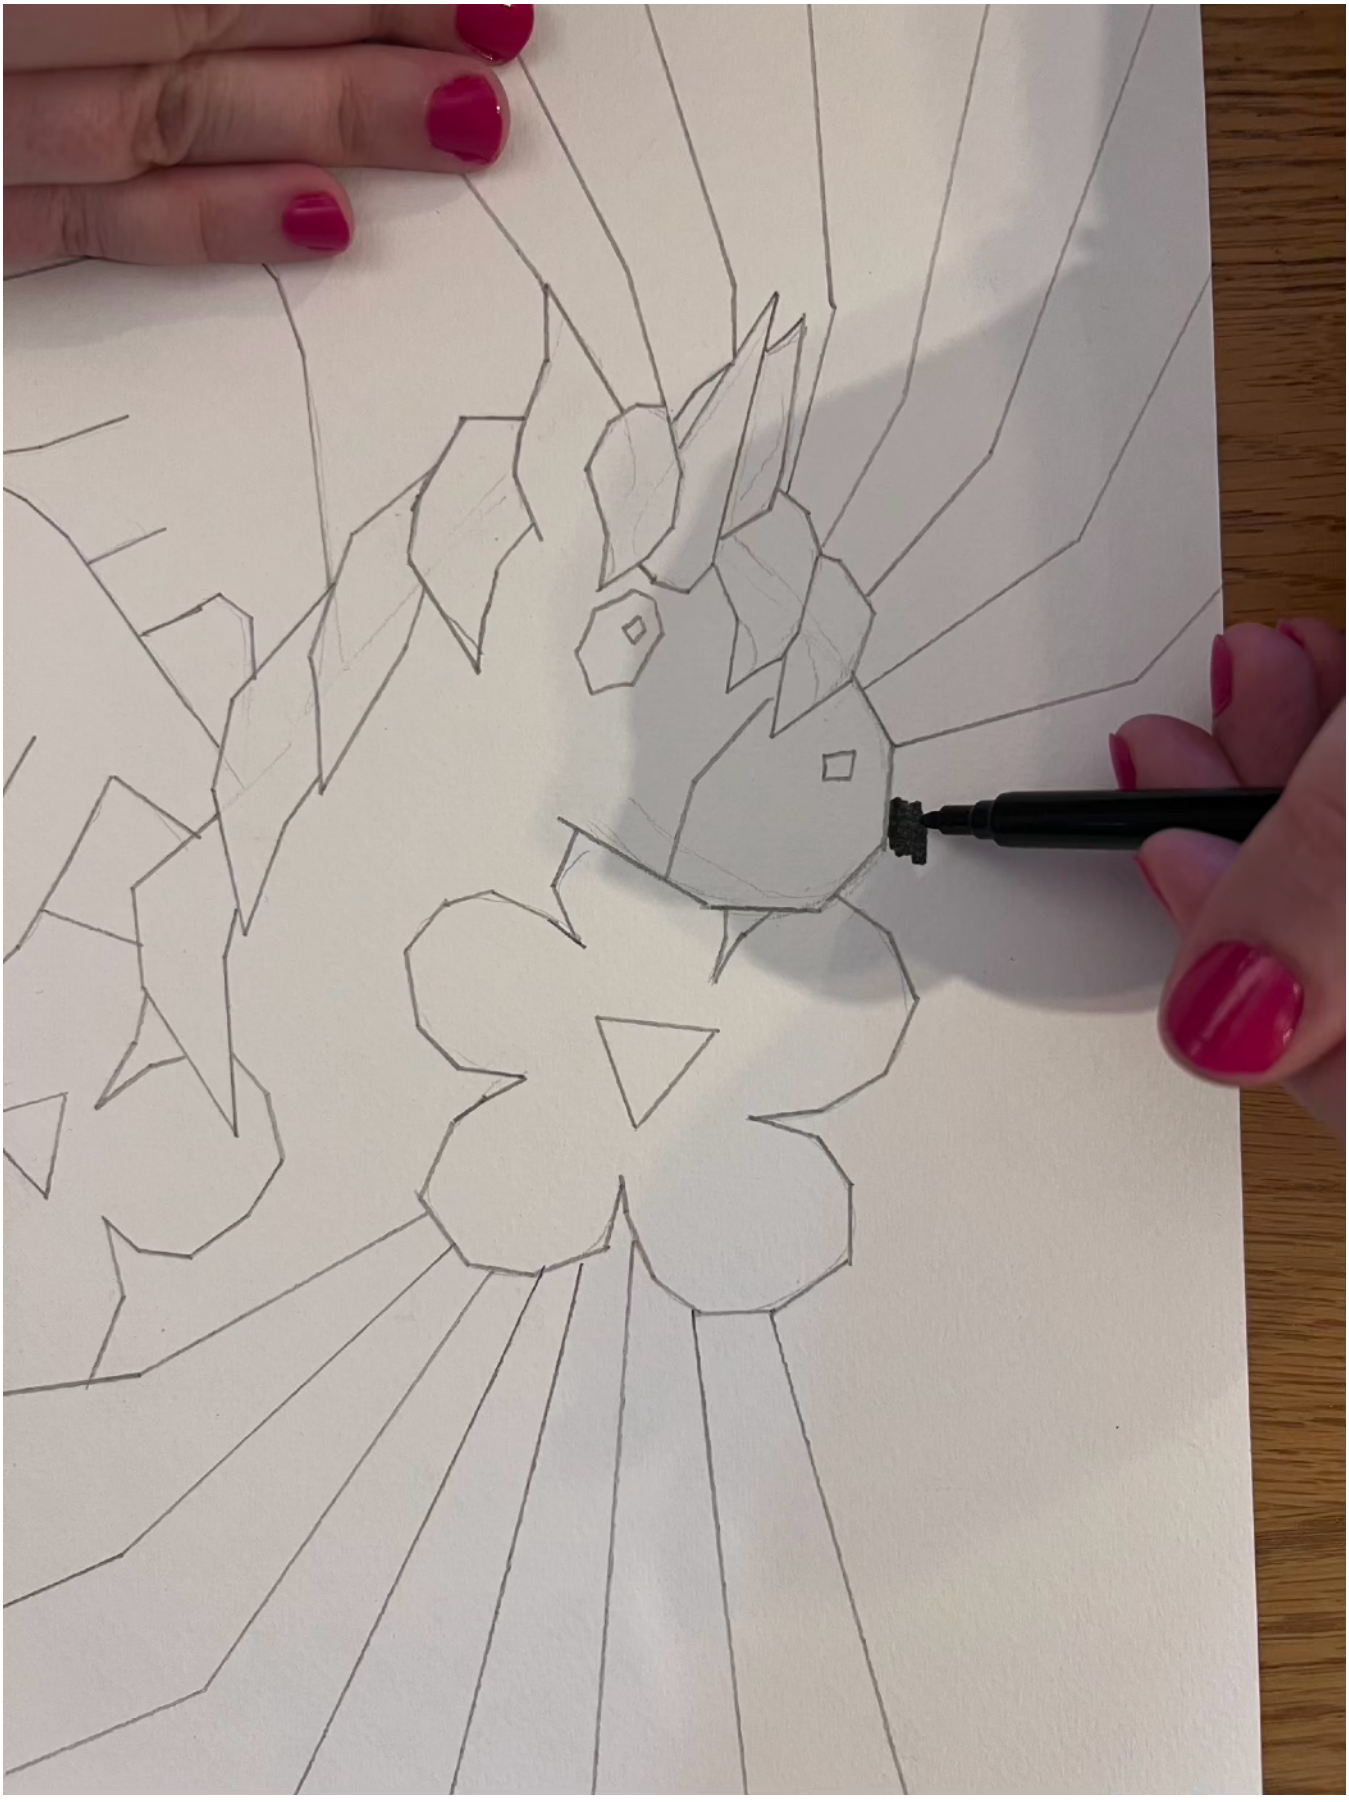

Go over the lines you’ve drawn breaking curves into lots of little straight lines angled around like so

When you are happy with it then you can colour it in we used both felt tips and colouring pencils to have a contrast and add some texture!

There you have it your very own
“Franz Marc inspired Animal”!

Here is another we made to inspire you!
