Cool it Art

Lambeth

Art Focus: Yayoi Kusama

Taking inspiration from Yayoi Kusama and her fascination with pumpkins and pattern - dots predominately. Why not create your own veg artwork in her style

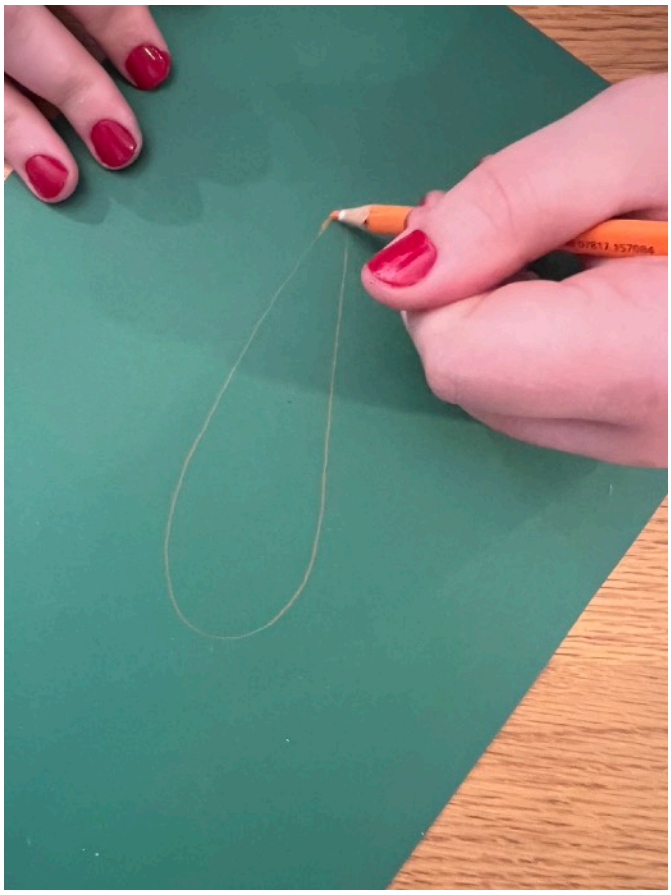

Tools and Materials:

- Coloured Paper
- Colouring Pencils

So we picked pencils that would be enough of a contrast against the green - depending on what colour paper you are using this might influence your colour scheme. We thought carrots would be fun especially with their fab carrot tops! Start sketching out your veg like so

Once your carrots are done time to fill with pattern - we thought dots for the body of the carrots would look good

Once the carrots are done think about the background - are they on a table or the ground? We need to create a contrast between the ground and the background - using different patterns and/or colours helps!

There you have it your very own
“Yayoi Kusama inspired Artwork”!

Here is another we made to inspire you!
