CoolitArt

Automatic Abstract

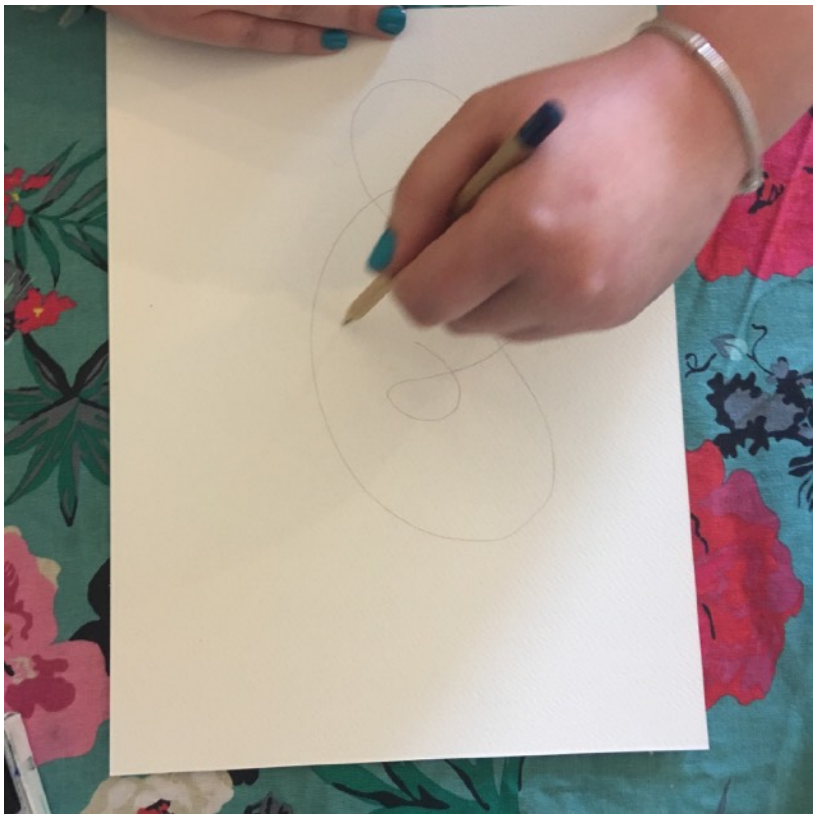

Automatic drawing was developed by the Artists known as Surrealists - as a way of expressing subconscious thought by letting the hand draw wherever it wanted - we find it a fun way of creating colourful abstracts!

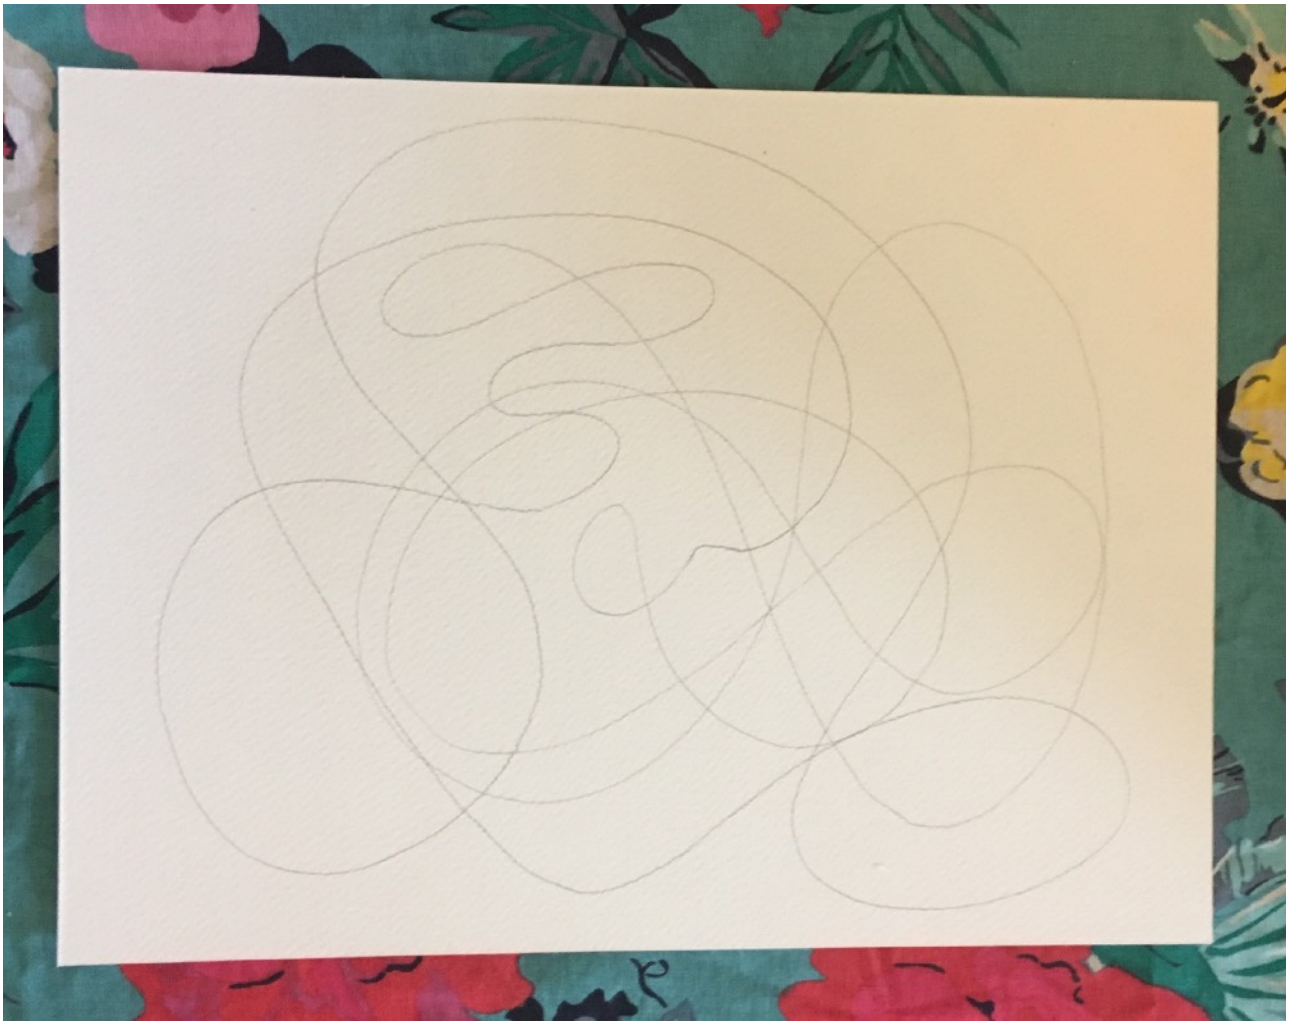

Tools and Materials:

- Paper
- Watercolours
- Water
- Pencil
- Paintbrush

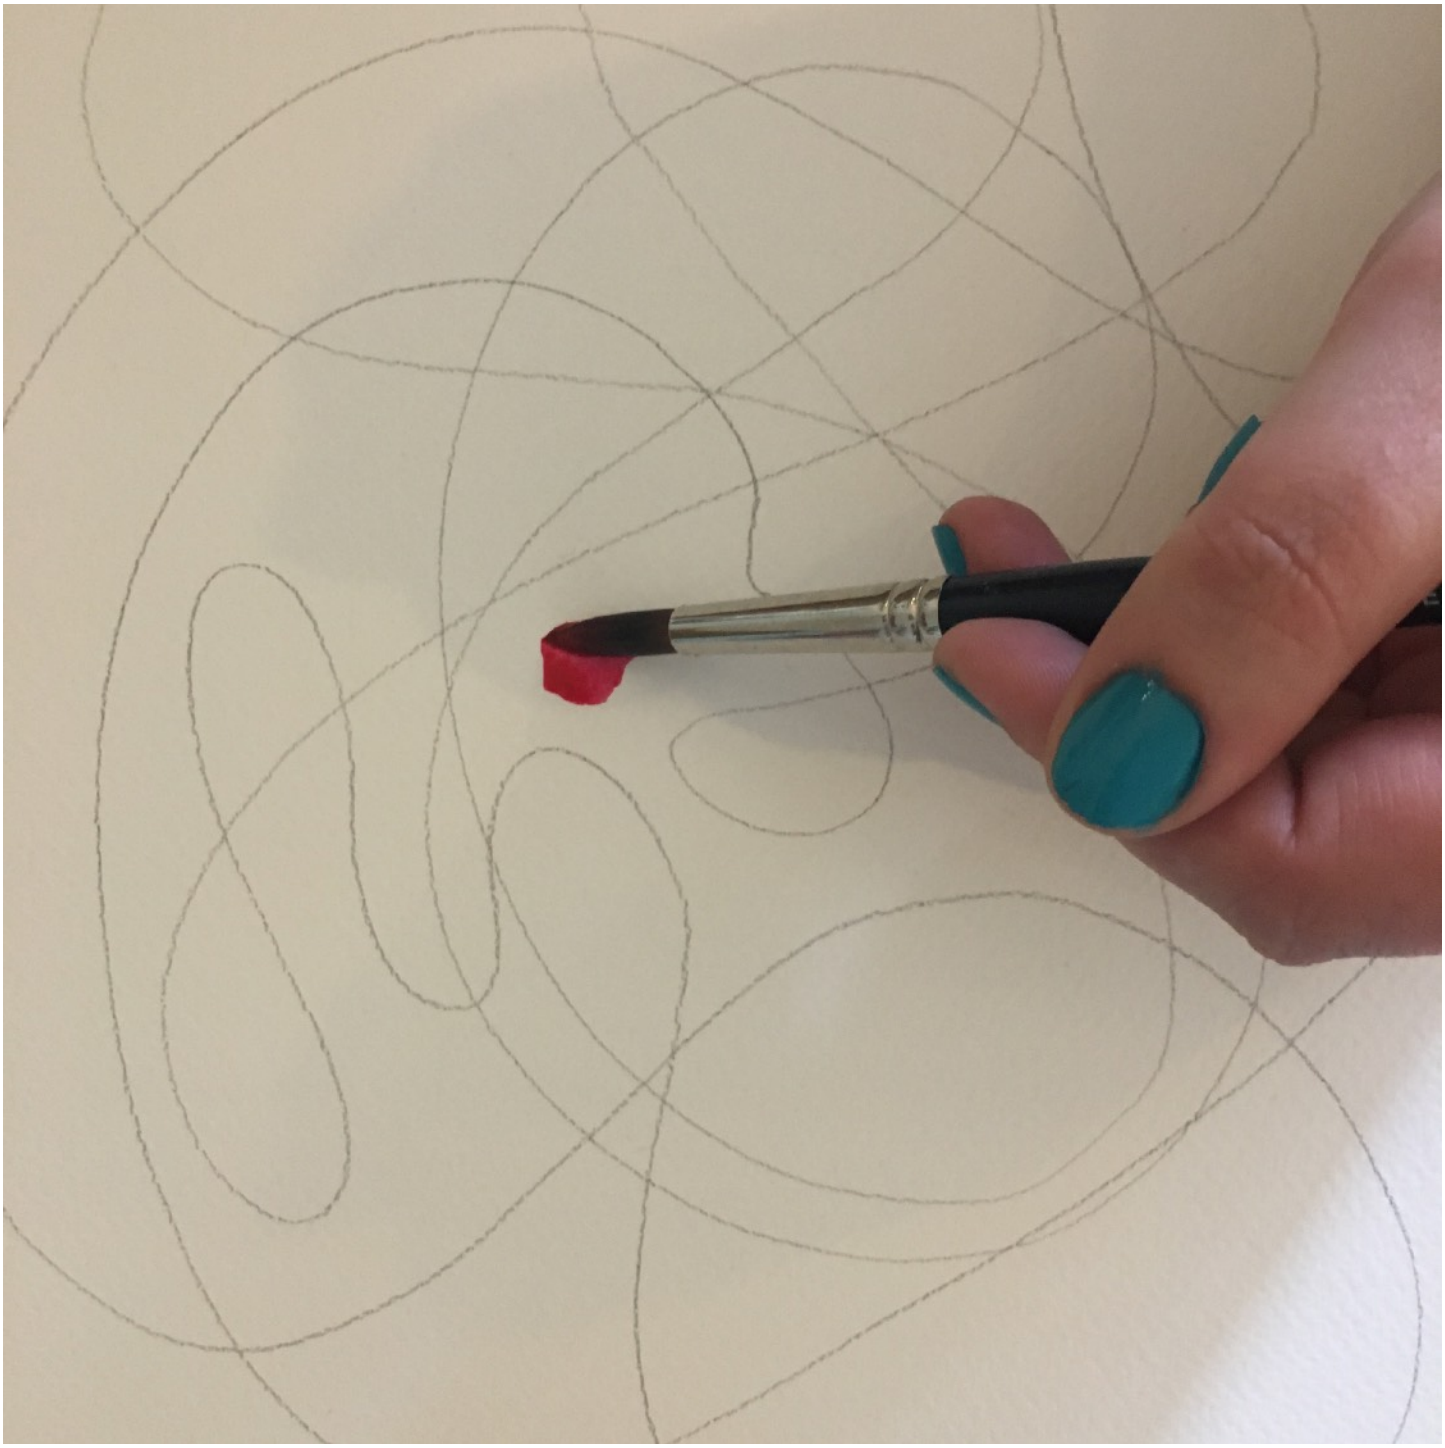

Taking your pencil to paper let the line flow and overlap on your page like so

Once you are happy with your drawing you can start to paint it to make it colourful - we stuck to a limited colour palette to make the image more bold

And there you have it your own “Automatic Abstract”

Here is another we created to inspire you!
