# Autumn Leaves

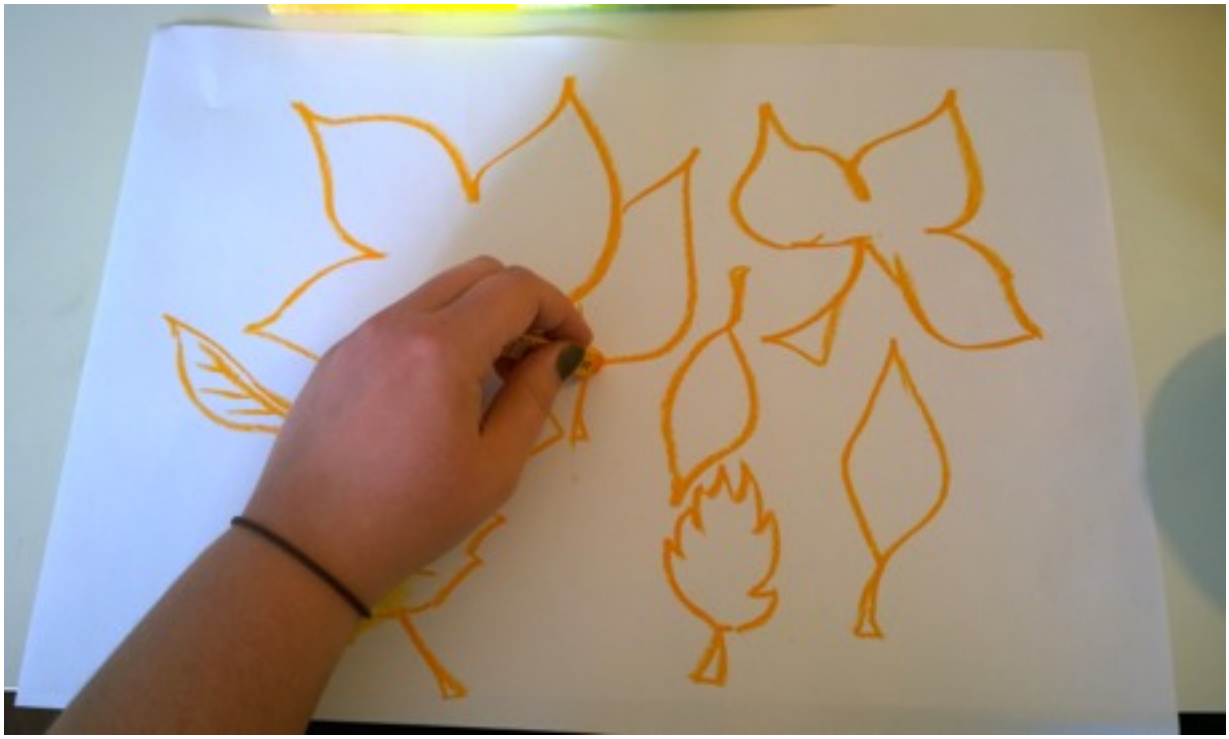

To celebrate the first day of Autumn why not draw falling Autumn leaves and their colour change

Tools and Materials:

- Chalk Pastels
- Paper

Choose some colours that you think blend together such as yellows, oranges and reds - although you could do any colours you like! Then start drawing out some leaves in the lightest of your chosen colours like so

Fill them in and use your finger to blend the chalk, you can redraw over the top to make darker lines on the leaves. Repeat with a darker colour to do leaves behind the leaves at the front - this is to add depth to your picture

You can keep on repeating the process and then fill in the background with your darkest colour - and there you have an Autumn Leaves picture

Here is another we made to give you inspiration
