Bubble Writing

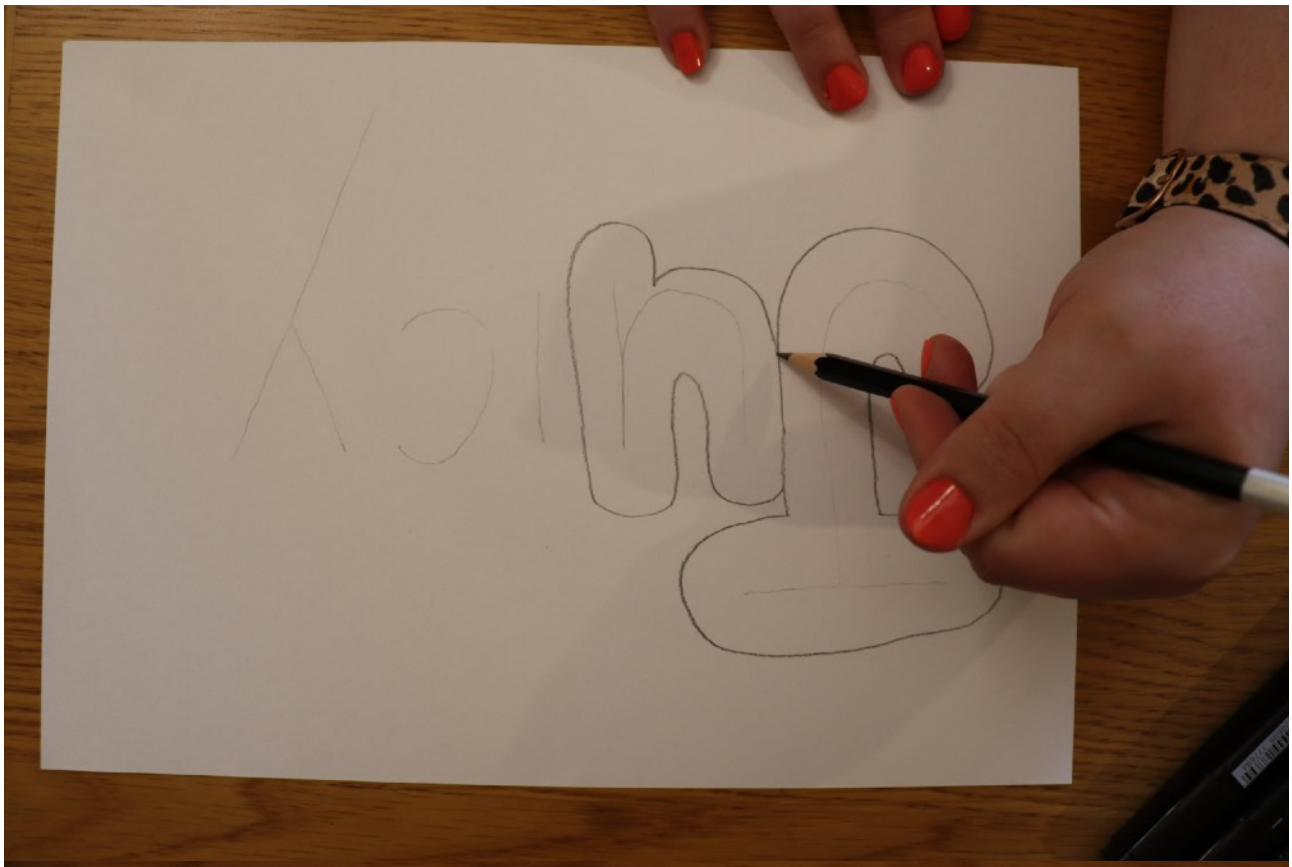

Why not create simple but bold bubble writing with this easy how to to give you inspiration!

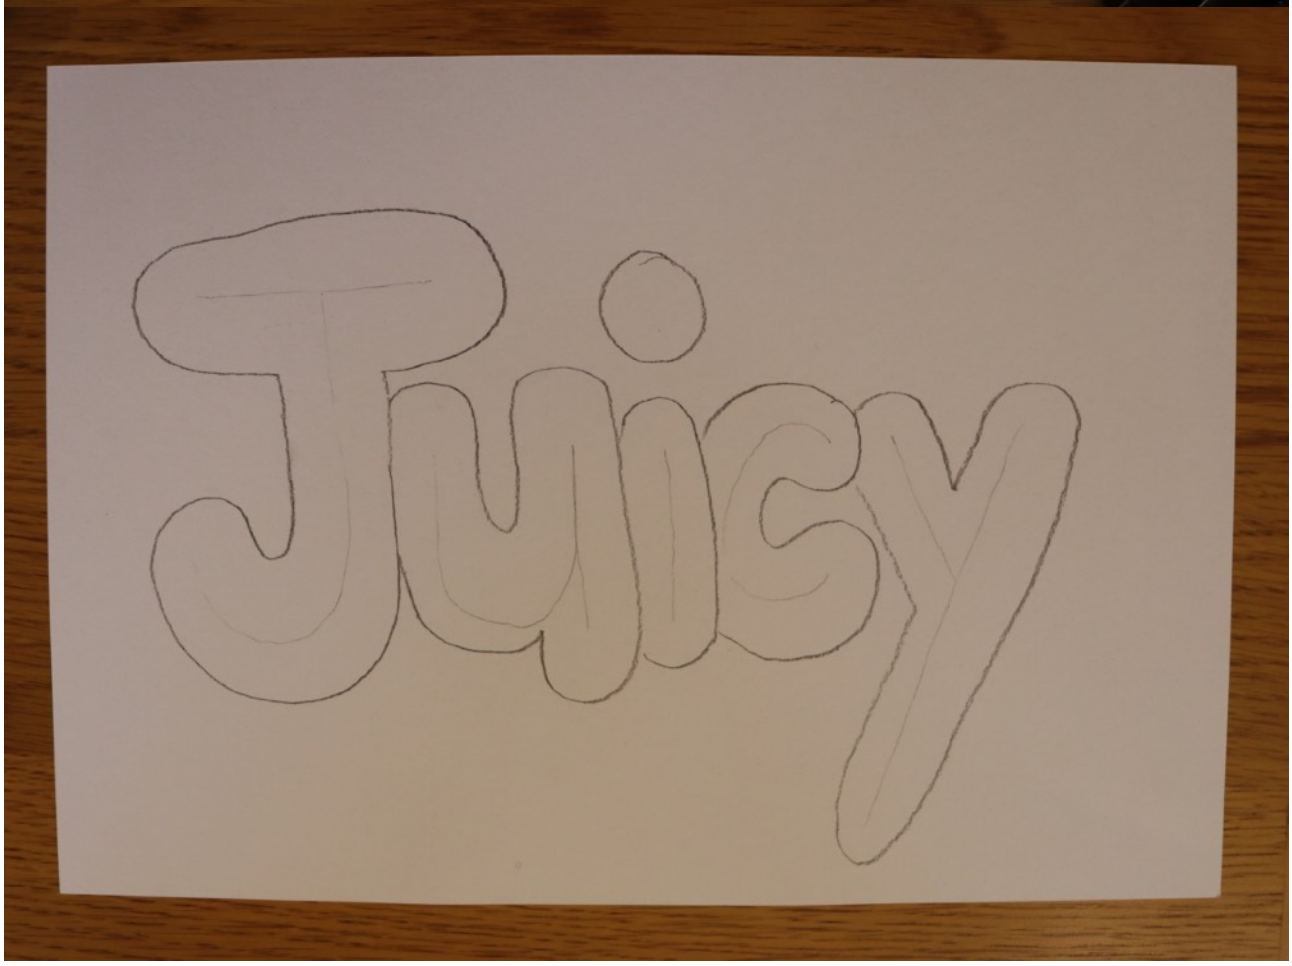

Tools and Materials:

- White Paper
- Marker Pens
- Pencil

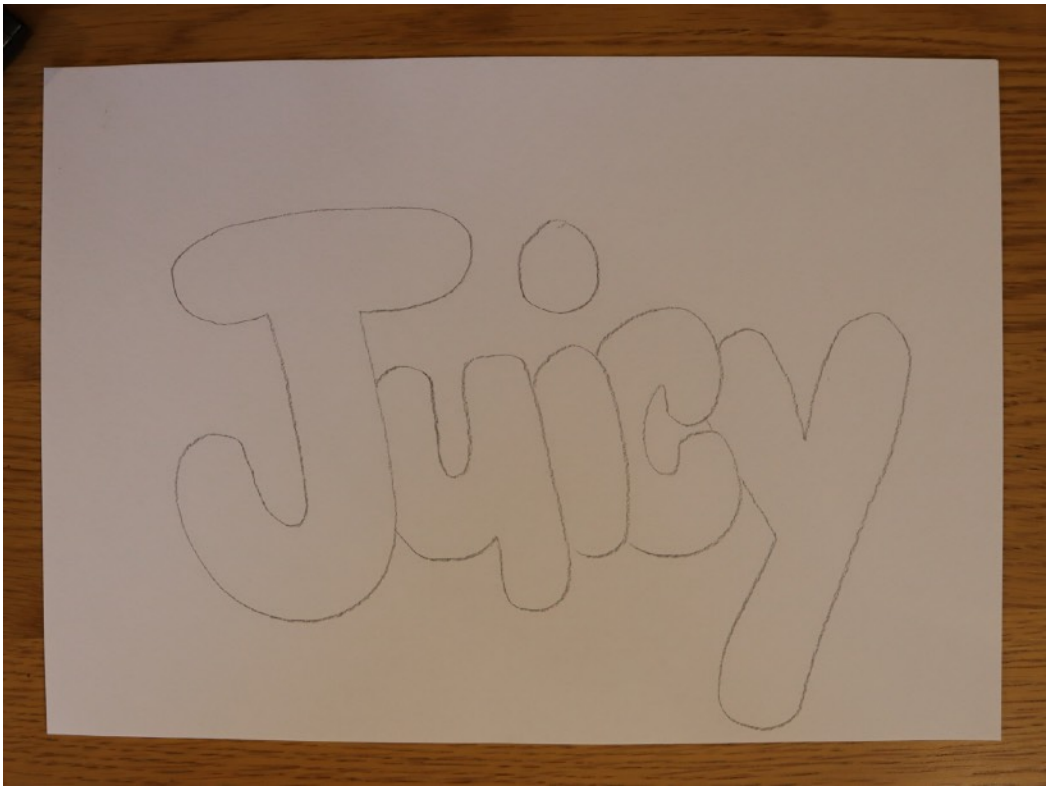

So if you haven't done bubble writing before it can be a little tricky to begin with, it can be helpful to draw the word normally on a piece of paper and then outline it with the bubble writing so you know how it looks to copy from after

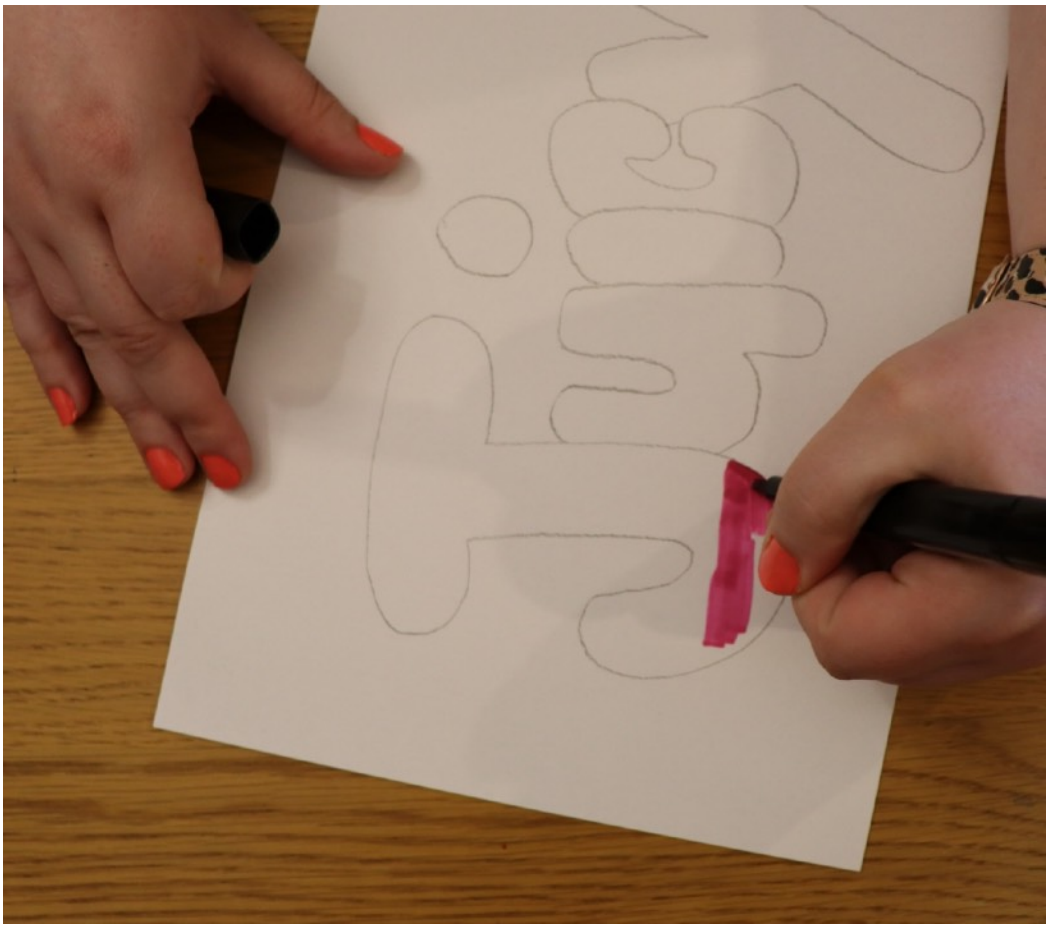

Now you know how it will look you can try drawing it again - this time without the letters in the middle

Once you are happy with your lettering you can start to colour it in - think about what colours will work together

Once you are happy with the colouring you can outline it to make it really pop, you can outline it normally or add some extra embellishments like drips or dots - whatever works best for you. It might be worth looking online to see different styles of bubble writing and graffiti for added inspiration for elements you can add.

There you have it your very own “Bubble Writing”!

Here are some other Graffiti inspired fonts we've created to inspire you!
