Bunting

Whether the weather be good or not you can still inject a bit of colour indoors to celebrate the summer - rain or shine - with some bunting; you can even use it for party decorations too!

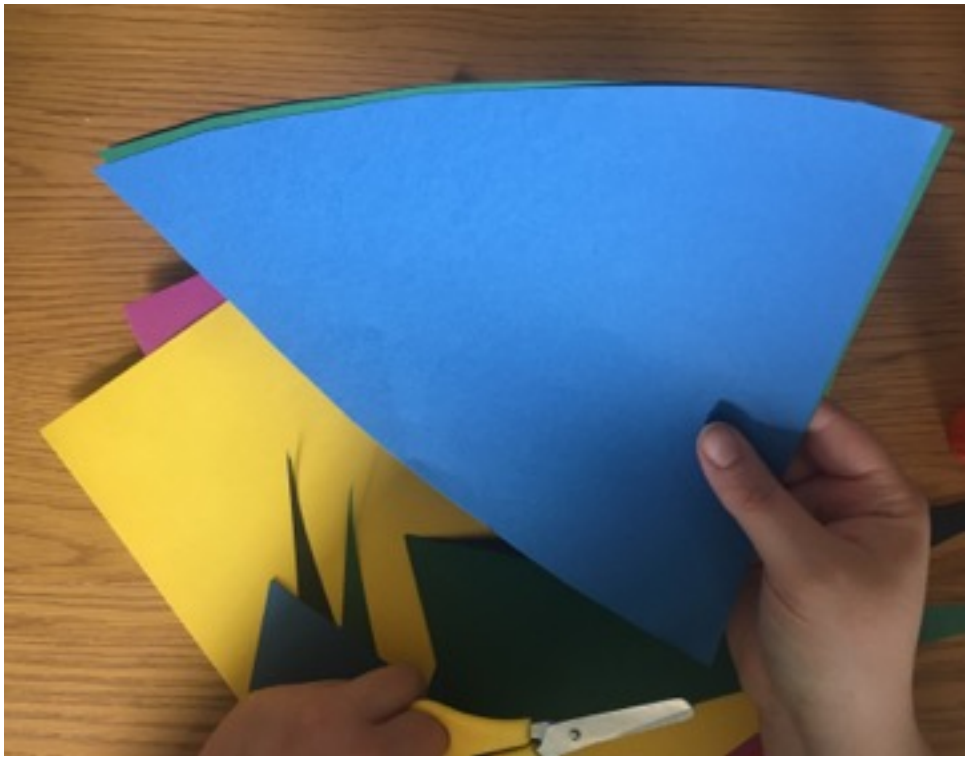

Tools and Materials:

- Coloured Paper
- Scissors
- String
- Glue Stick
- Hole Punch

To make your bunting you need to transform your paper into triangles - you can of course use a ruler we just like to cut by sight, using the middle of the short side cut diagonally up to the top two corners

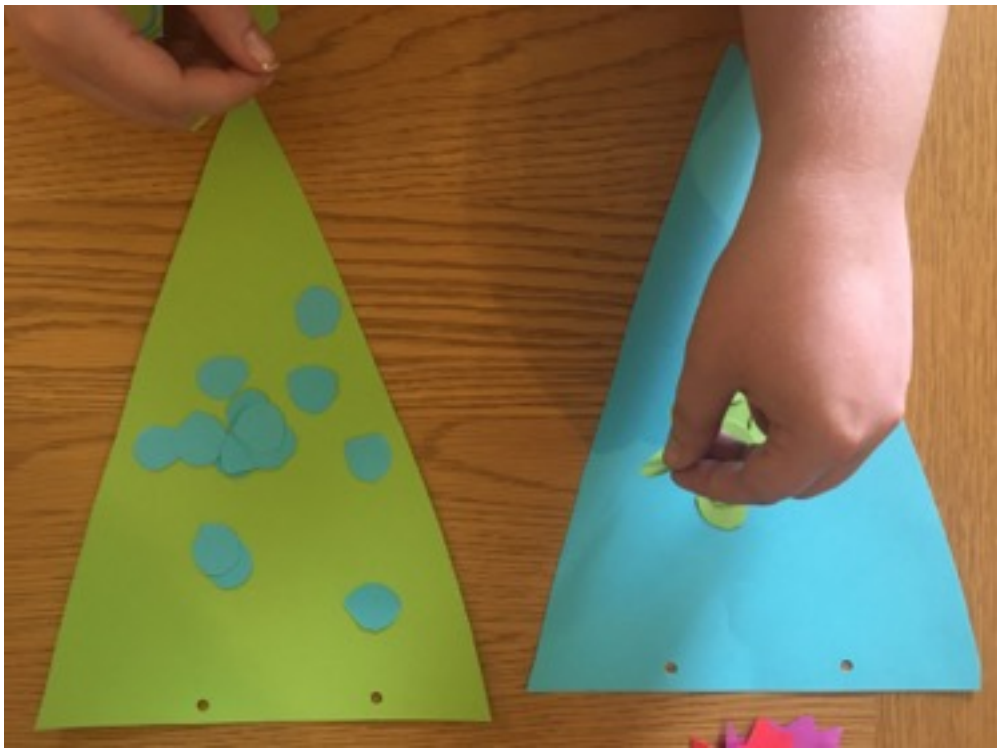

Now for the best bit! Decorating your bunting, we paired our colours up to do contrasting patterns, decide what you want to decorate your triangles with and cut them out, again we did this by sight you can of course use a pencil!

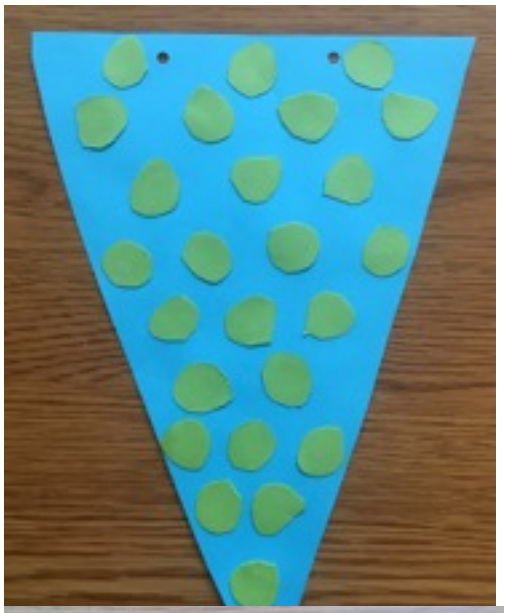

Sort out which decoration belongs on which triangle and get sticking!

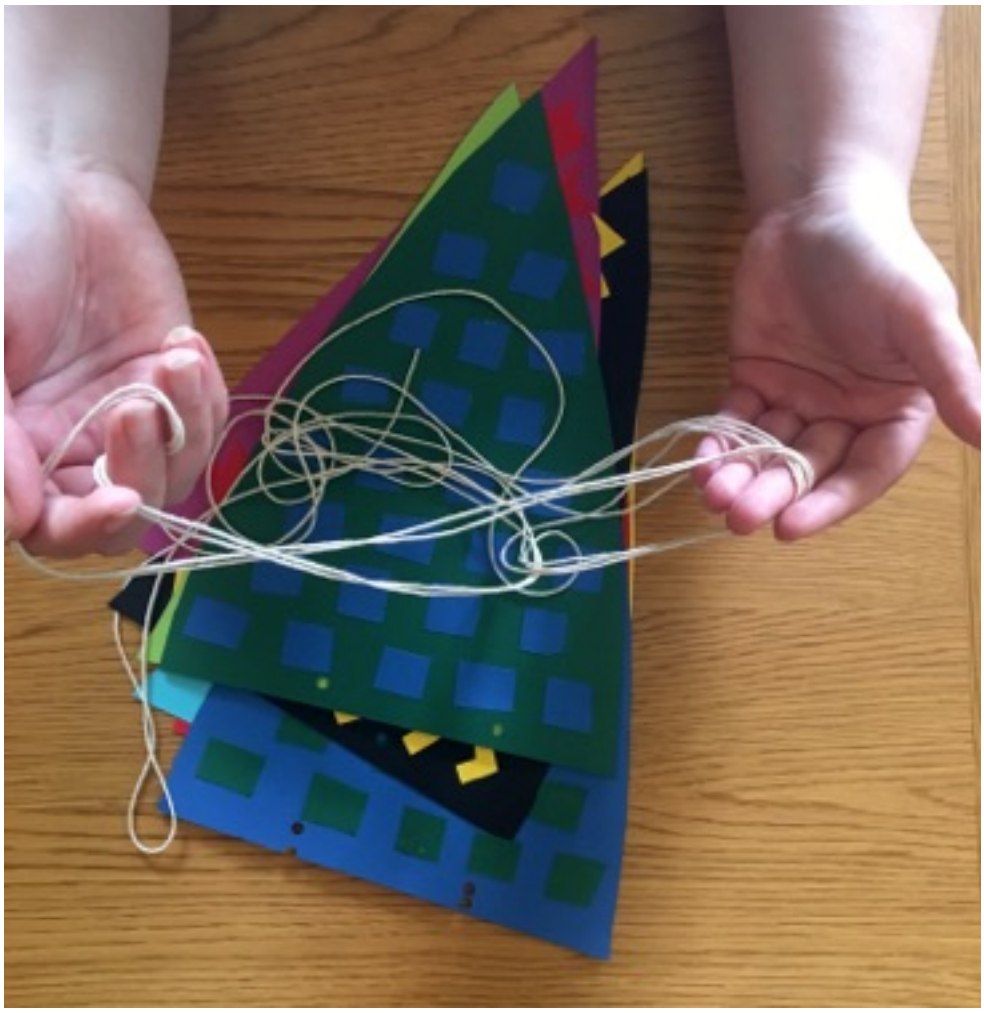

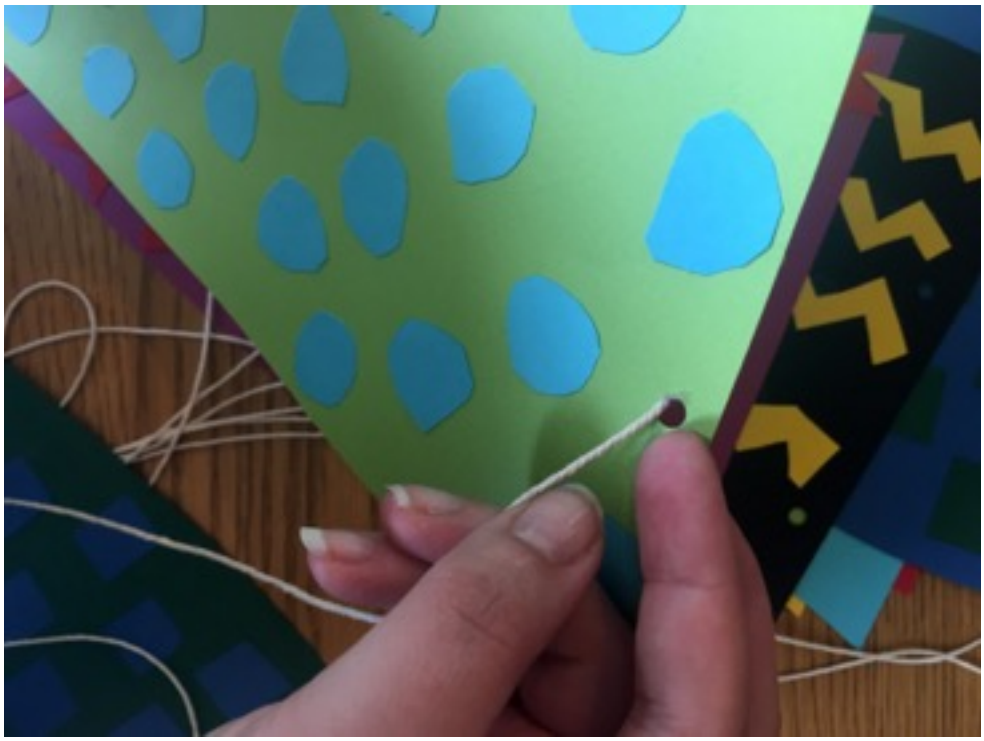

Then cut your string - long enough to thread through your bunting but also extra either side to tie it up like so

And there you have it your very own bunting!
