CoolitArt

Button Tree

Taking in inspiration from the colour change of leaves in Autumn why not create your own Button Tree - also works for Christmas trees too if you want to make your own cards!

Tools and Materials:

- Card
- PVA
- Paintbrush
- Buttons

First have a look through the buttons you have to figure out what colours you have and want to use!

Start by planning out the trunk of your tree to figure out where you would like your branches to go - then once you are happy you can glue it! Then add the leaves to finish it!

There you have it your very own Button Tree!

Here’s another we made to inspire you!
