Continuous Line Drawing

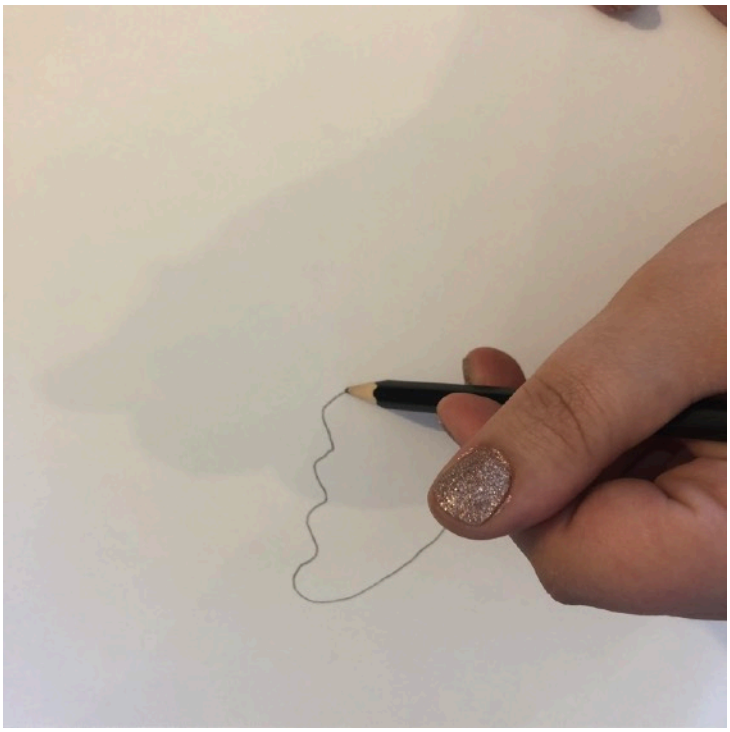

Continuous line drawing is where you don't take your pen or pencil off the paper so you have to think about the journey you make with the line you are drawing - it can be a bit tricky but it is fun to try!

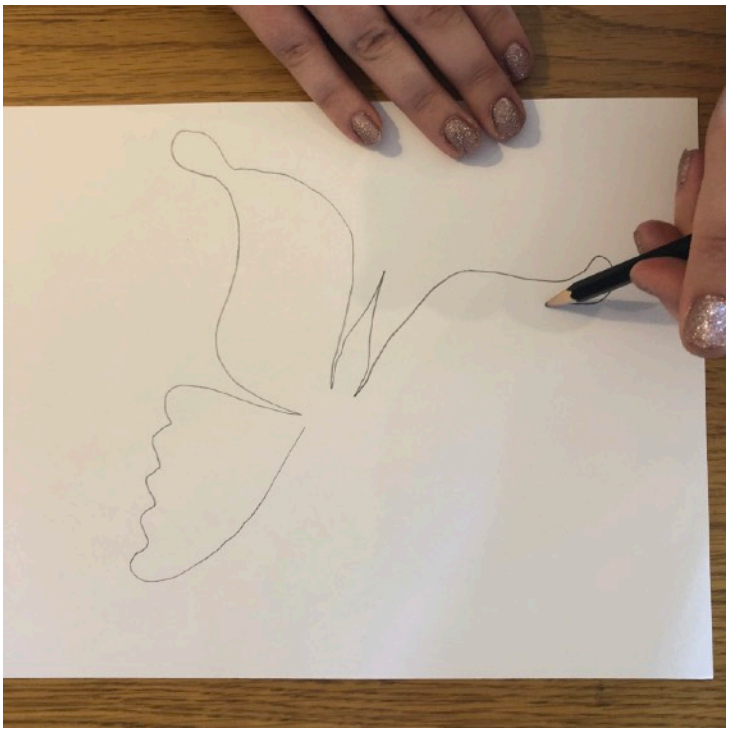

Tools and Materials:

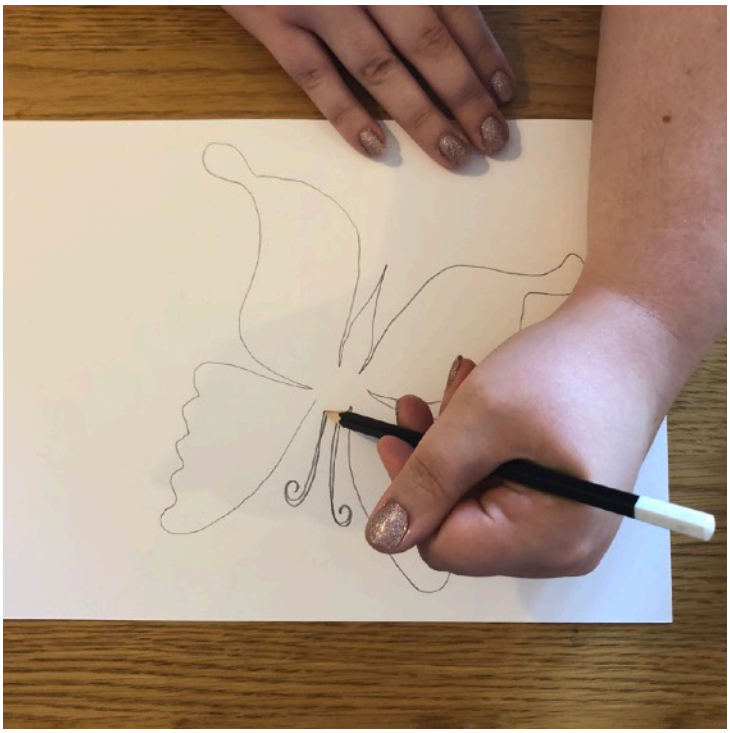

- Paper
- Pencil

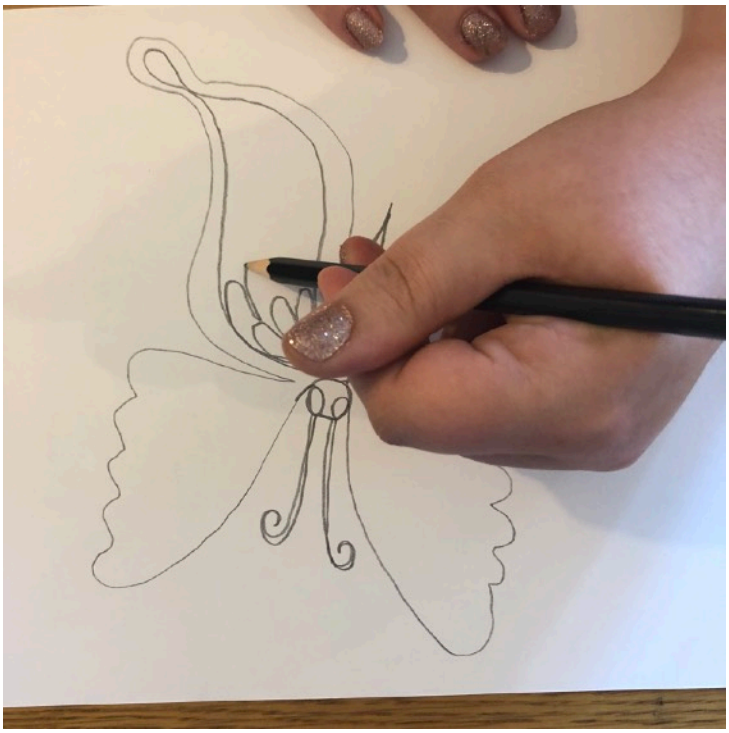

So what do you want to create? What image do you think could look interesting? We thought a butterfly would be fun! Start sketching out your work being mindful of the direction of your line - if you get tired you can take a break and go back to the point and restart drawing

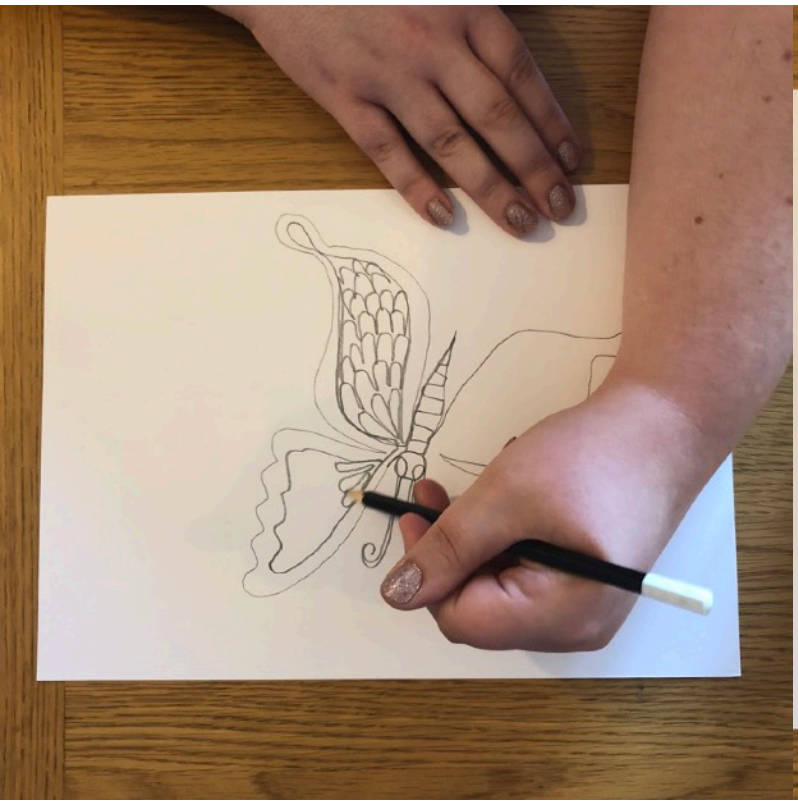

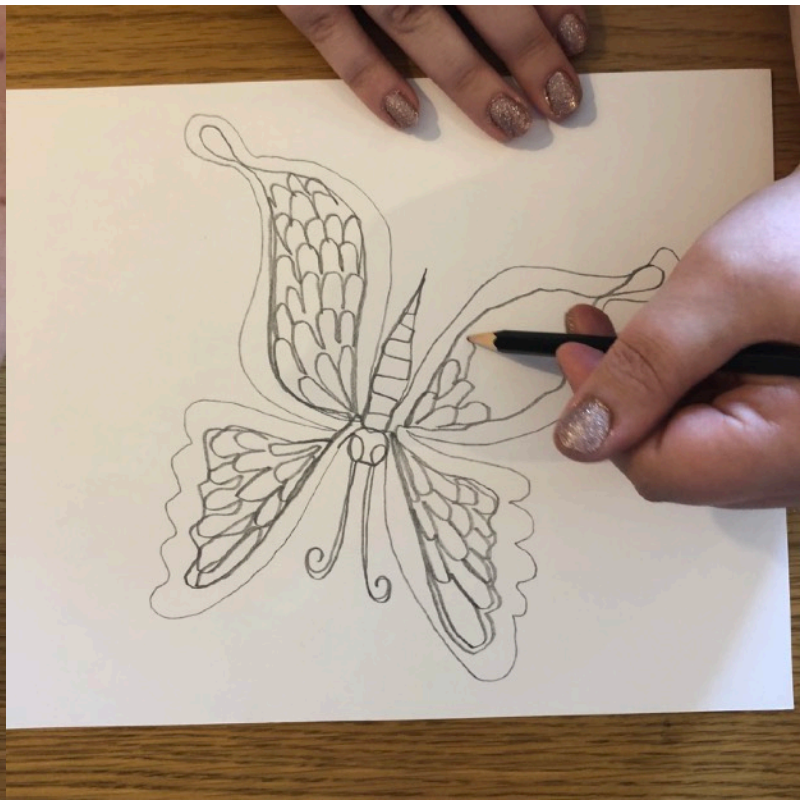

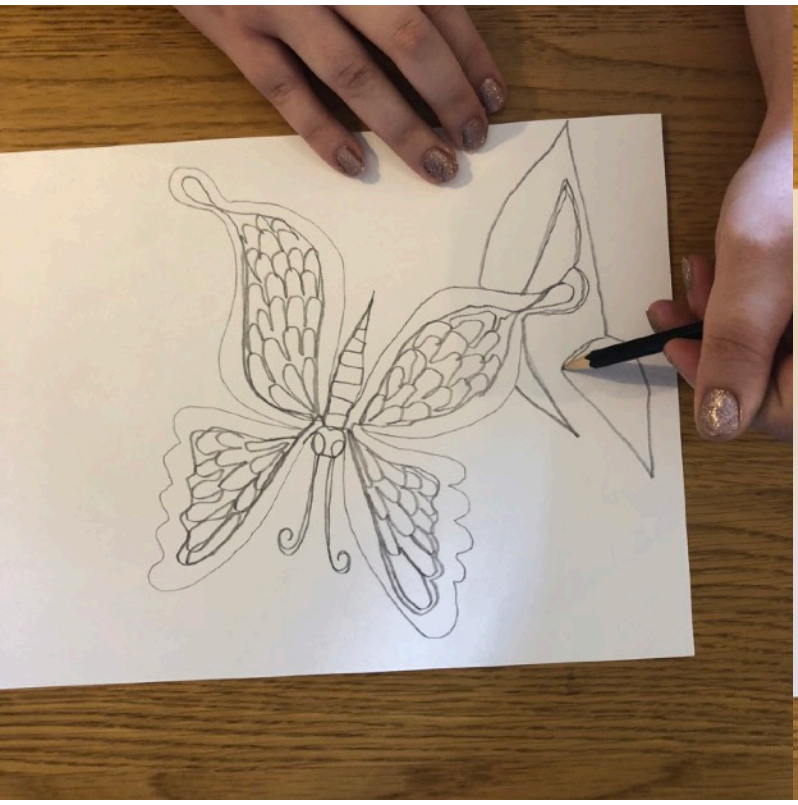

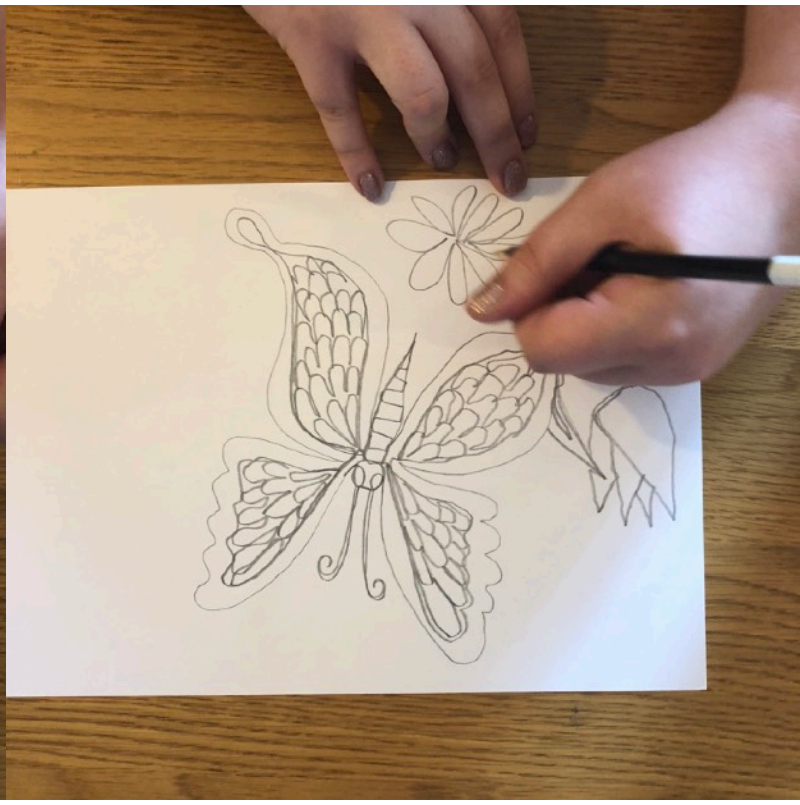

You can add in texture and details by thinking what patterns would work on your image like so

There you have it your very own
“Continuous Line Drawing”!
