Create your own Jigsaw

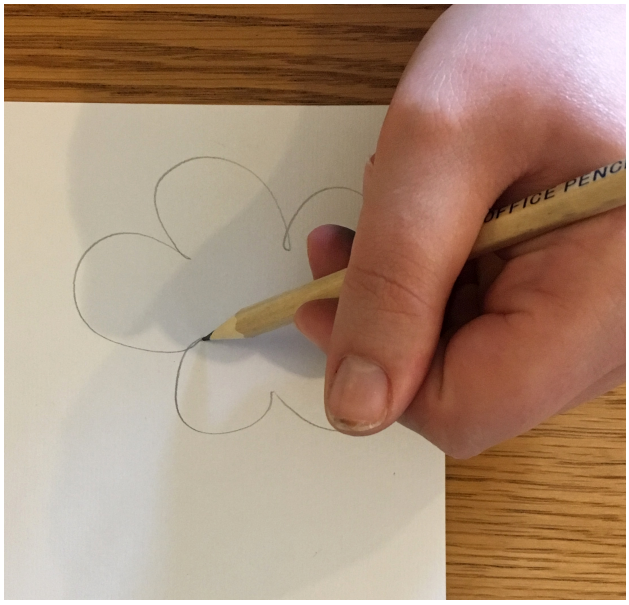

Taking in inspiration from “Games and Puzzles week” in November we thought it would be fun to create our own jigsaws to play with on a rainy day!

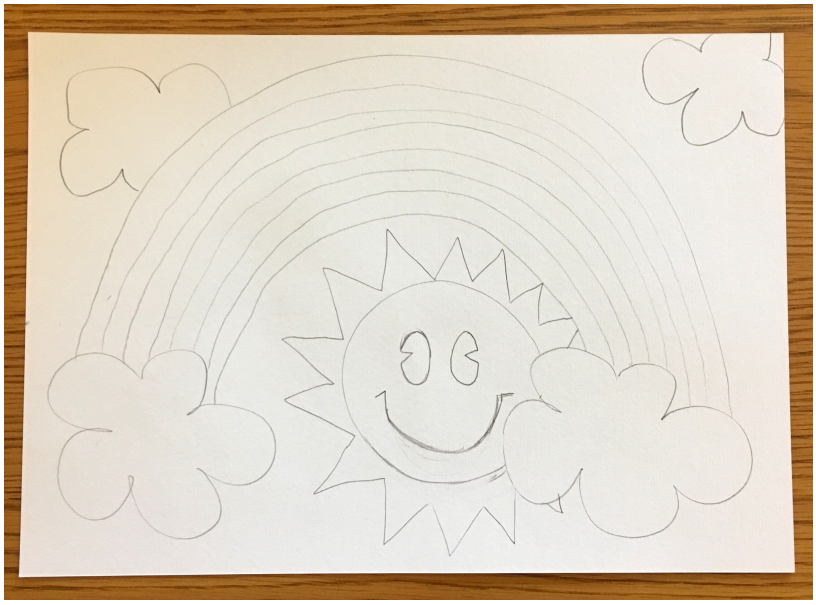

Tools and Materials:

- Paper
- Pencil
- Scissors
- Felt Tips

So the fun thing with this is you can create any image you like - the possibilities are endless you just need to figure out what it is you want to draw! We settled on a rainbow and some clouds to draw!

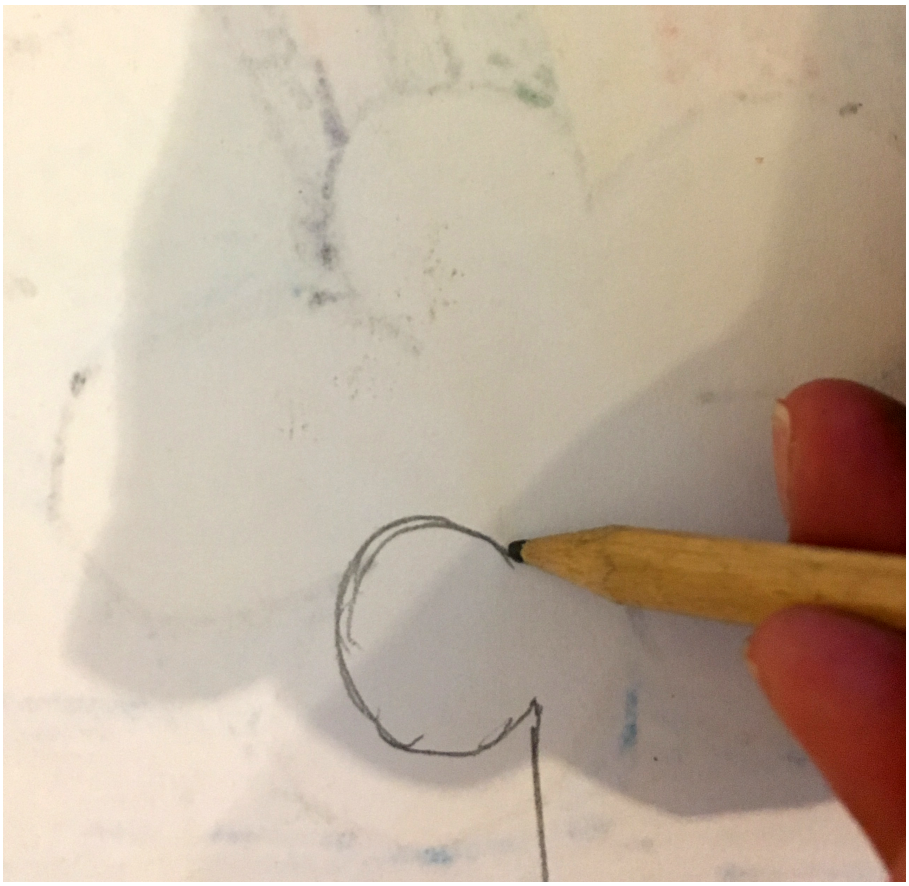

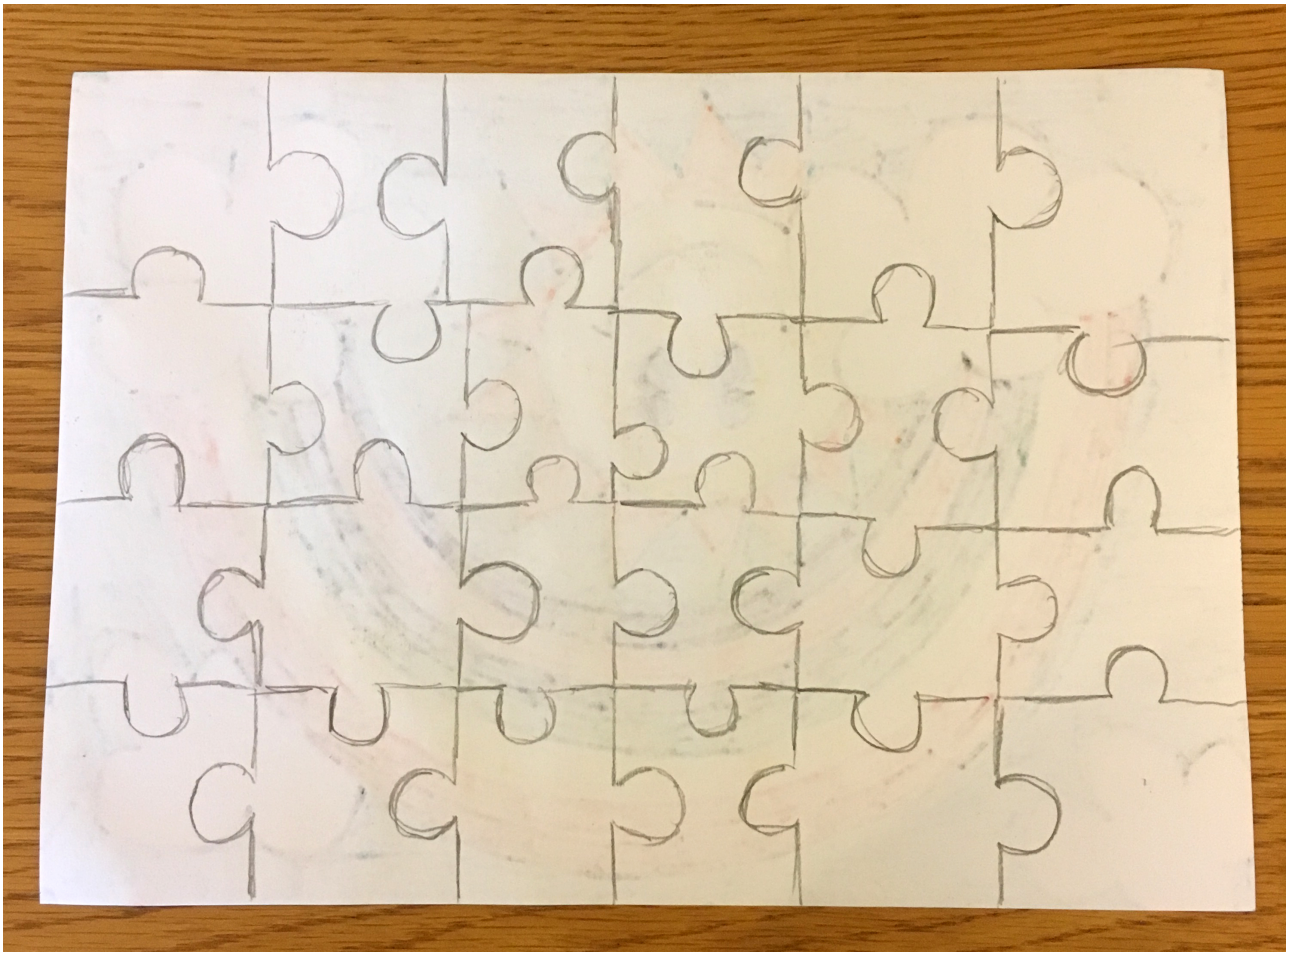

Once you are happy with your design you can colour it in!

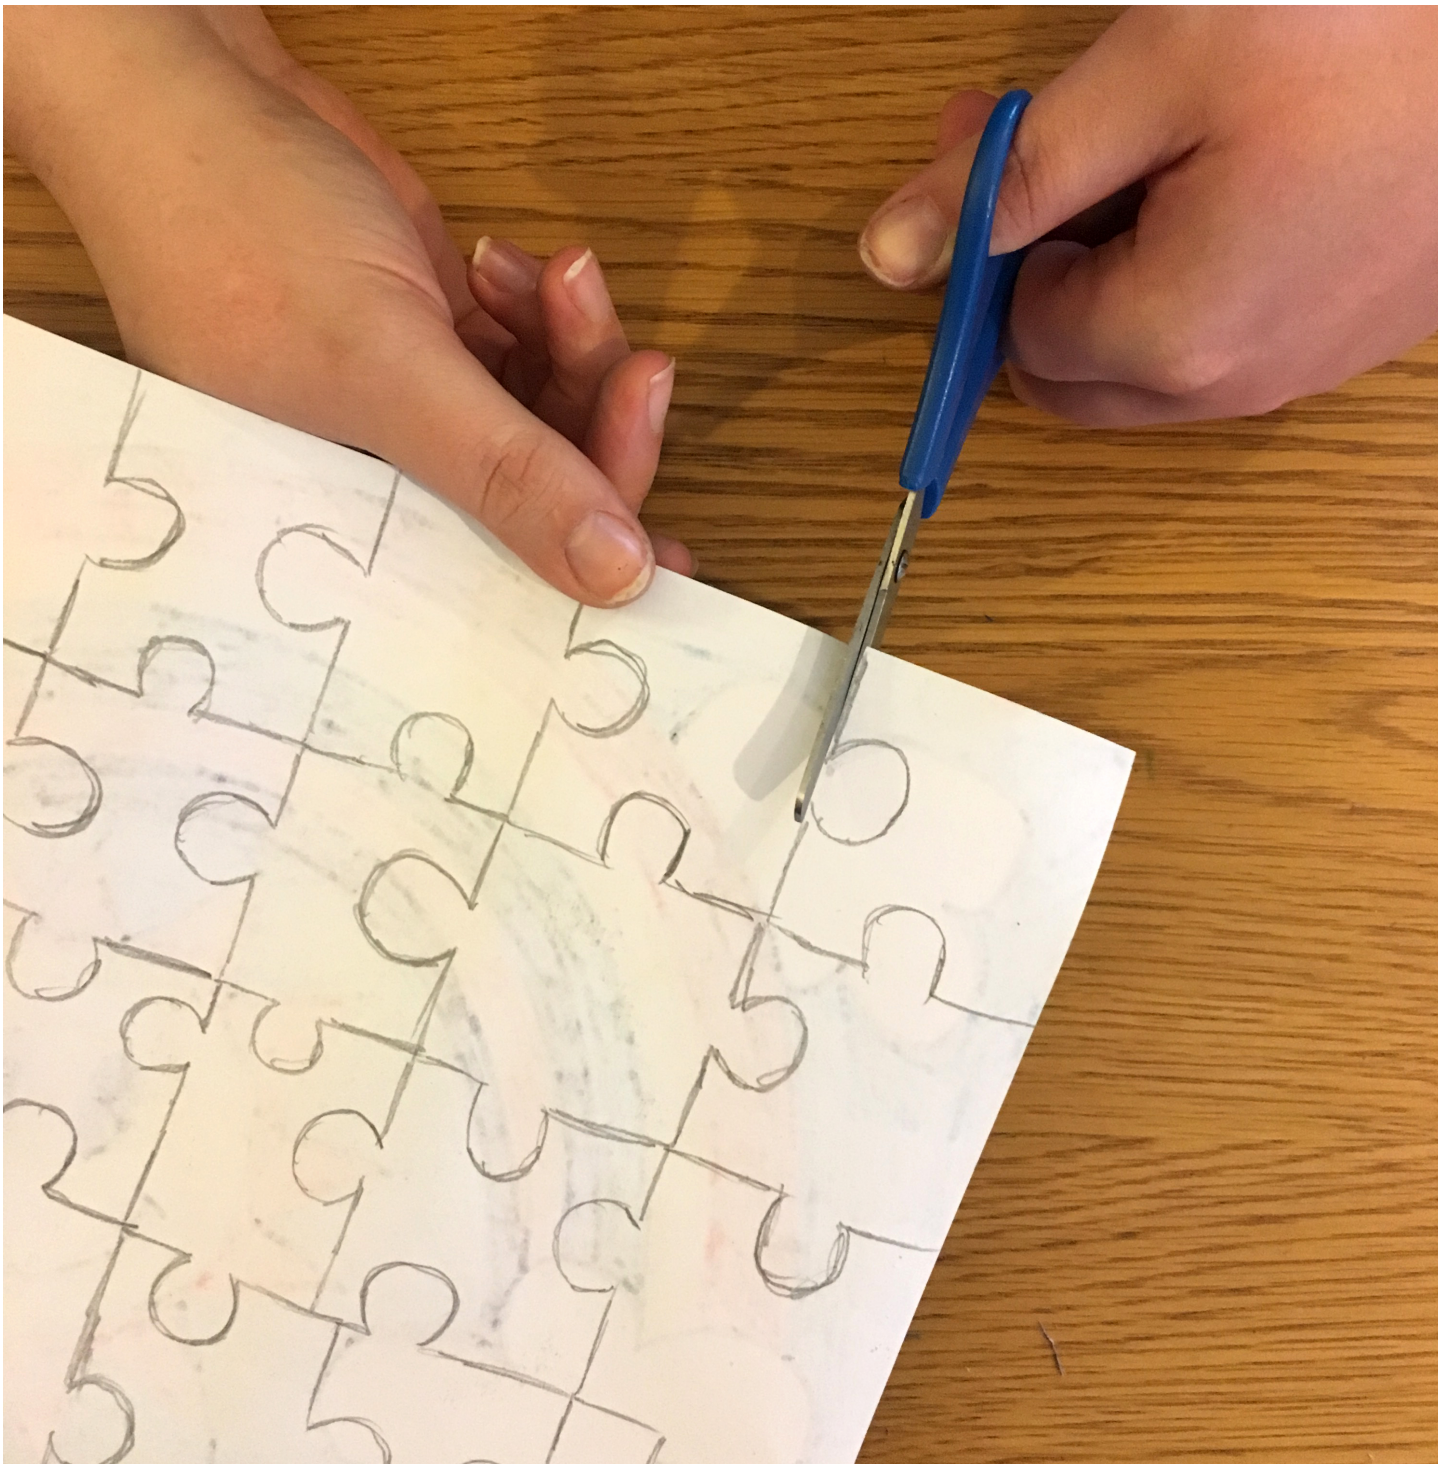

Now to transform you image into a jigsaw - flip your image over and start drawing jigsaw pieces, bits that interlink and lock like so

Once you are happy with the jigsaw pieces then you can start cutting it out!

And there you have it your own “Create your own Jigsaw”

Here’s another we made to inspire you!
