# Cubism

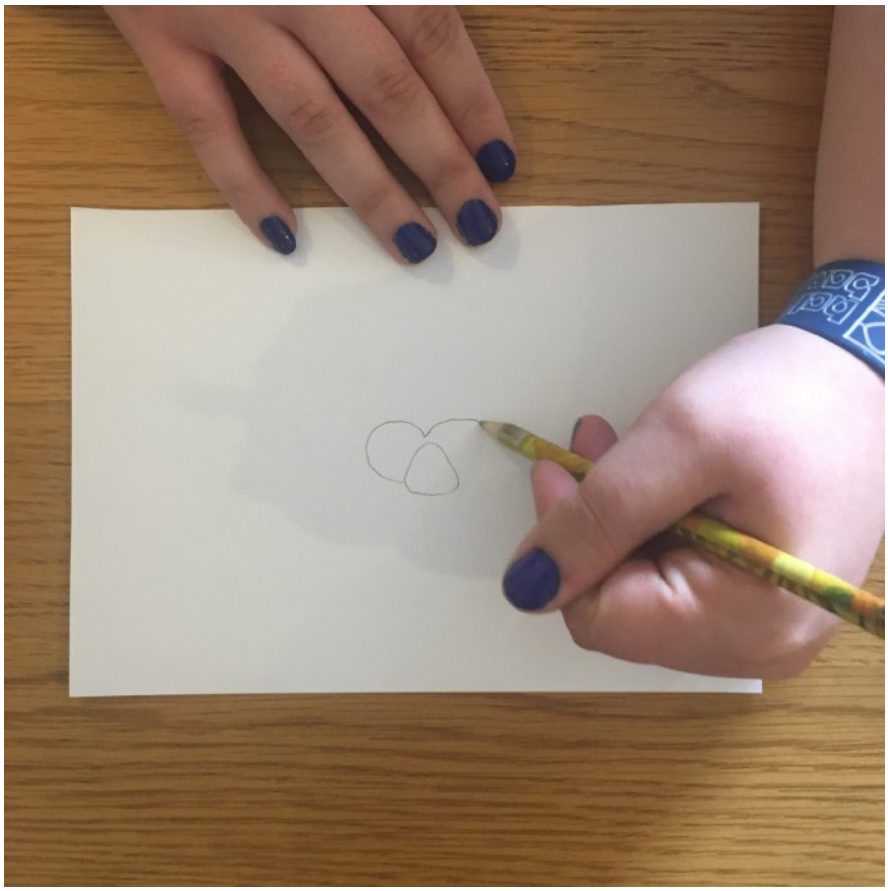

Cubism is a really complex Art form - the simplest way to describe it is that the Artist was trying to show everything of the image at once so it looks a bit fractured

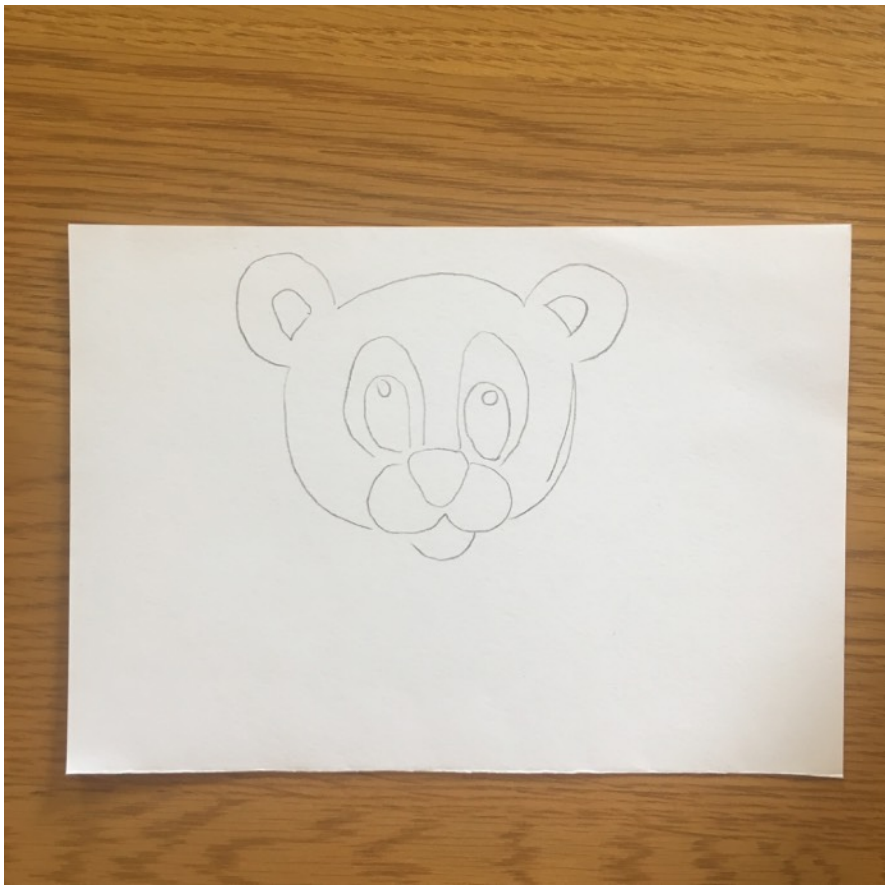

Tools and Materials:

- Paper
- Felt Tips
- Pencil
- Ruler

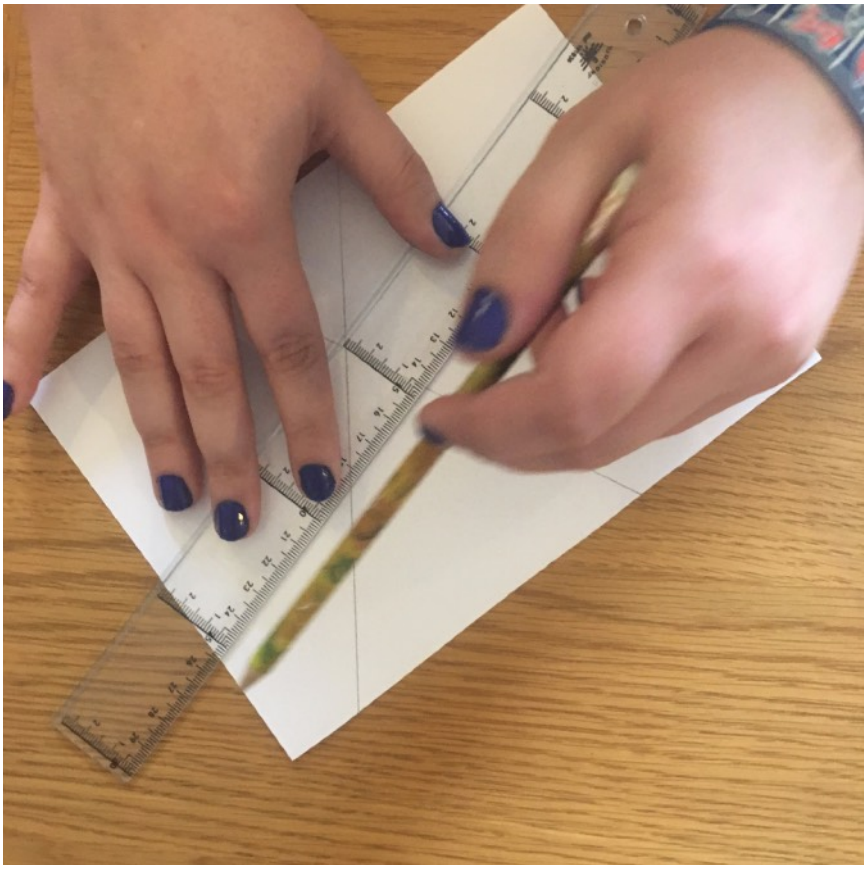

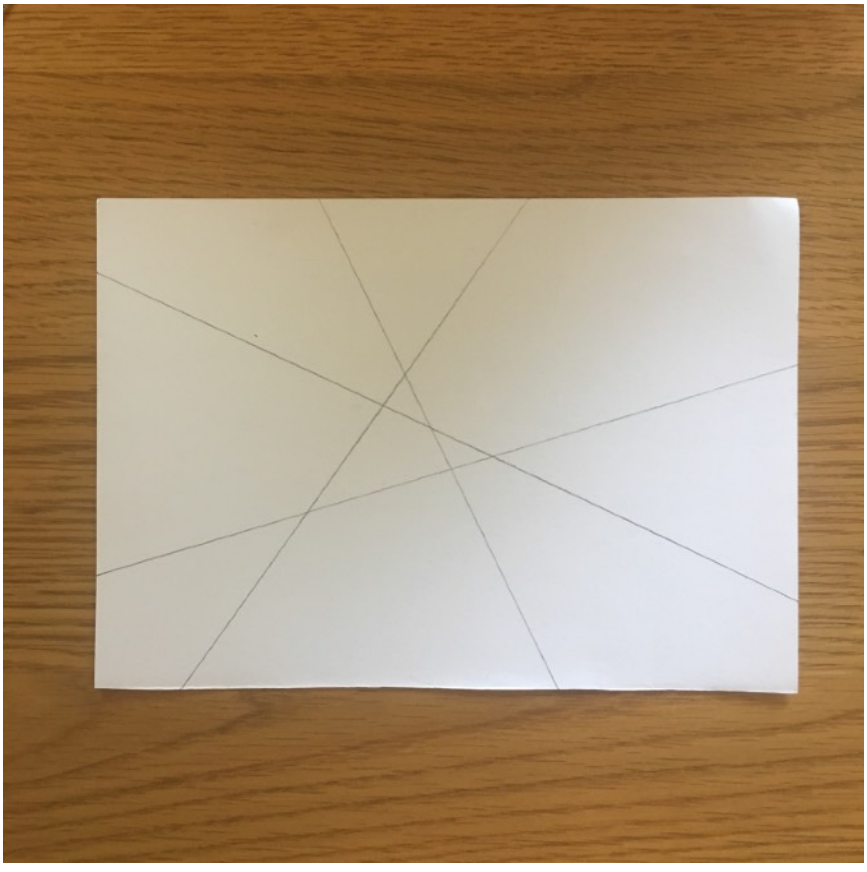

So before we start our work it is good to do a sketch of the image you want to recreate - we chose a panda because we like them!

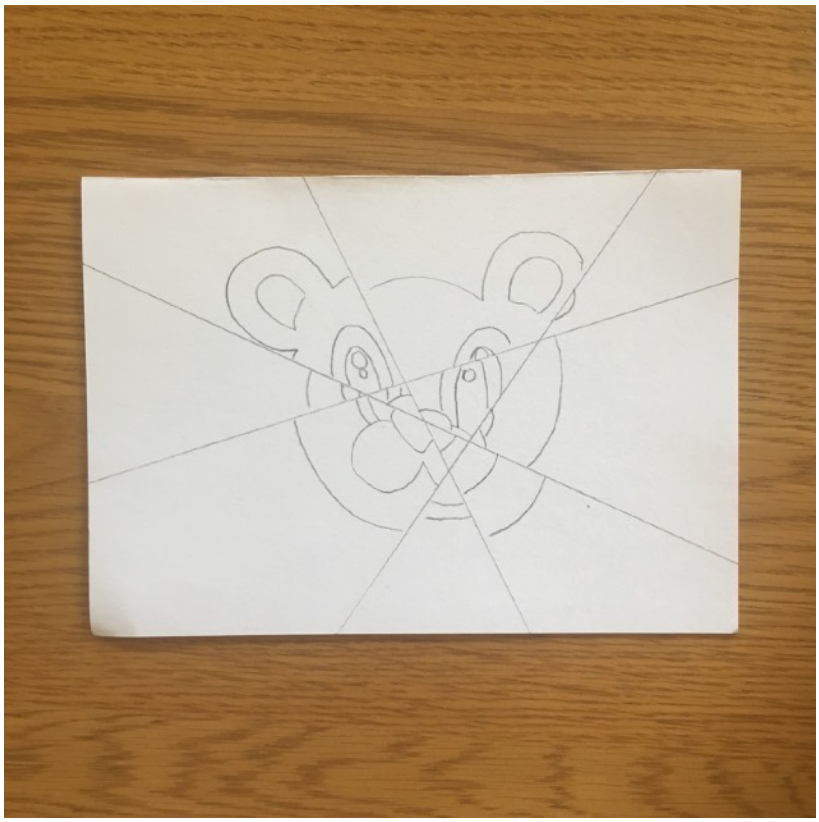

Now to create your Cubist inspired artwork take your ruler and start to draw lines across the page which overlap like so

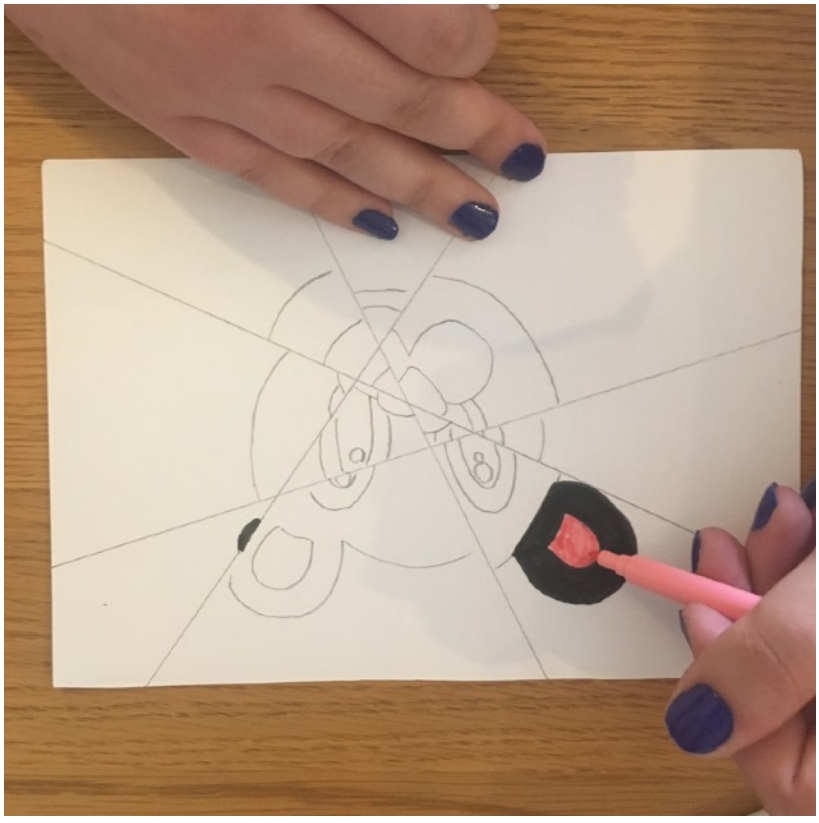

So in each section you want to draw your image, but slightly shifted so the lines don’t touch in the sections

Then you can colour your work in - again making sure colours don’t touch to make your artwork pop!

And there you have it your on “Cubism” inspired work!

Here is another we made to inspire you looking at Cubist portraits - why not look up different bits of Cubism!
