Dot Drawings

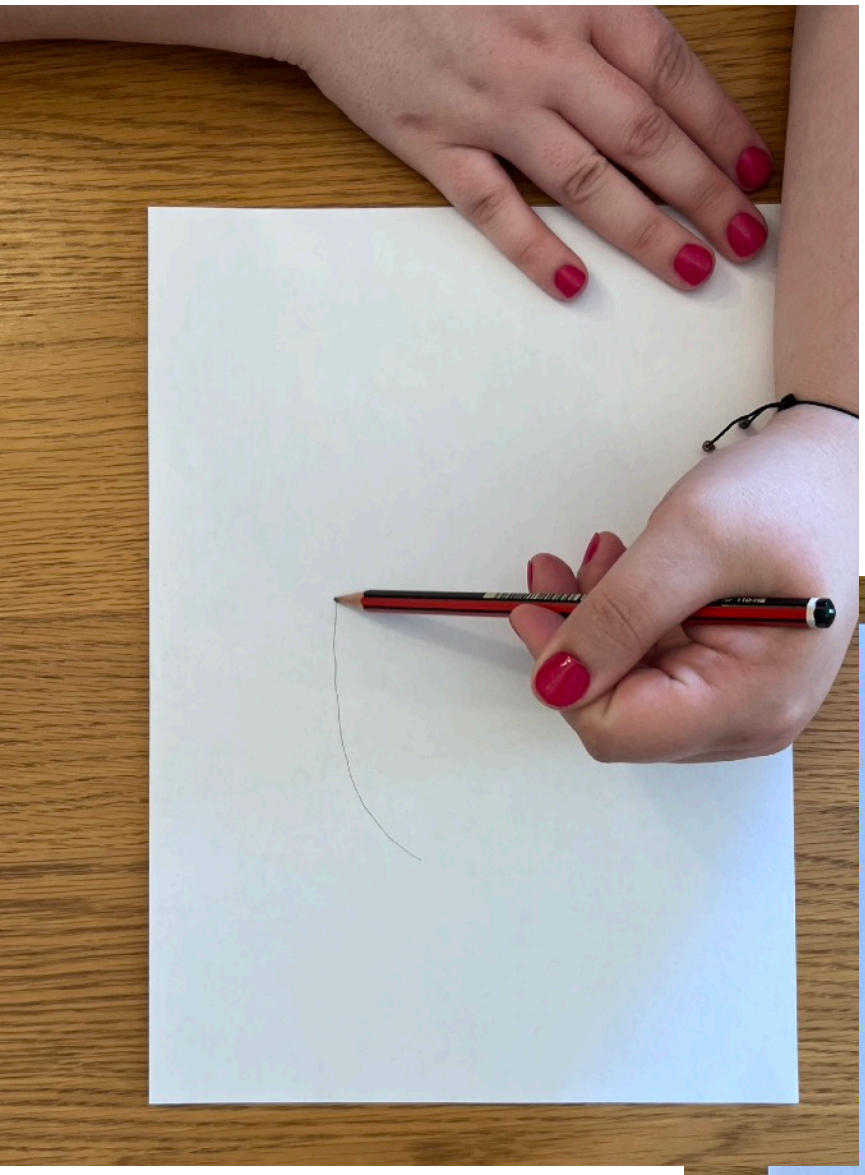

Using tracing paper you can create your own dot drawing transforming lines into a series of dots to form your image

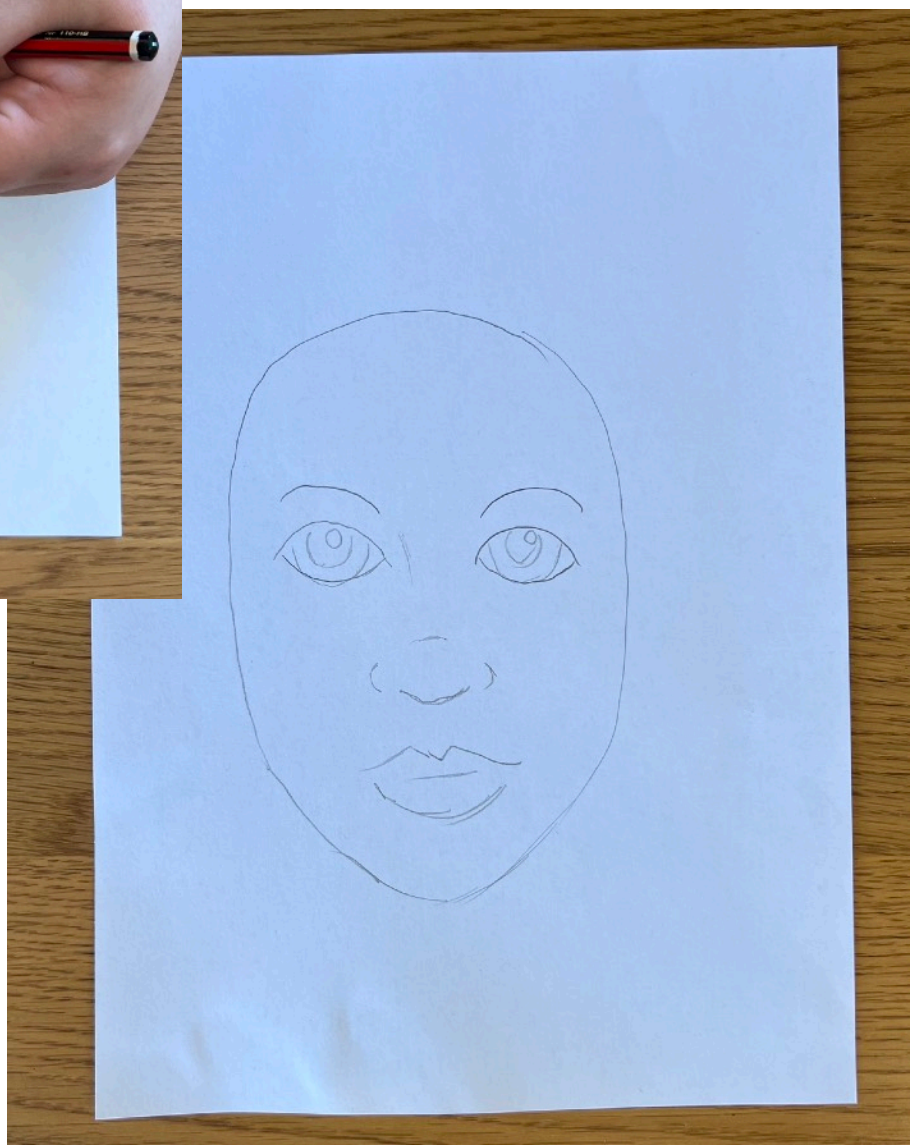

Tools and Materials:

- Paper
- Tracing Paper x 2 (if you don't have Tracing Paper then you can use Baking Paper)
- Markers or Felt Tips
- Pencil

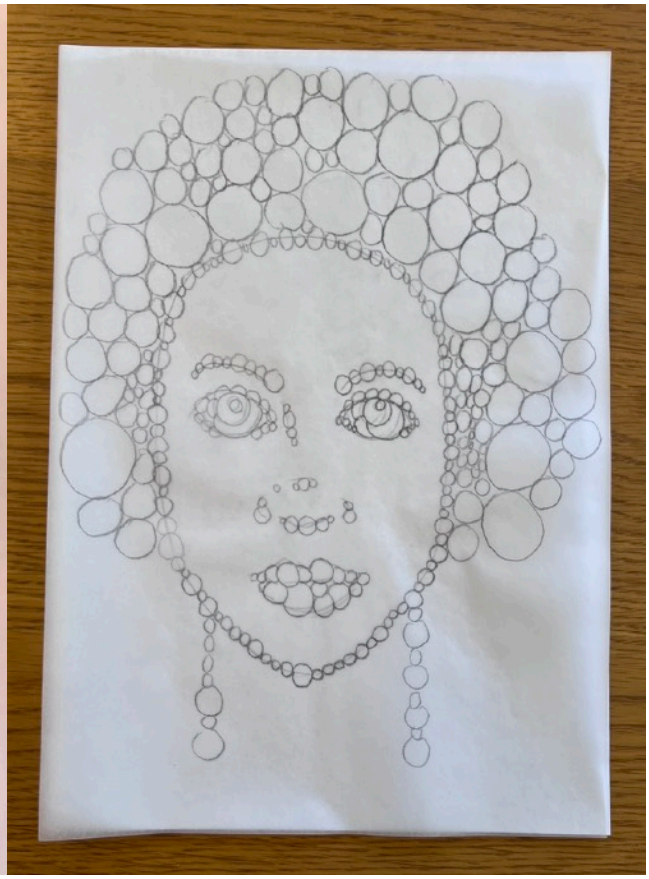

To be able to make your drawing totally from dots first you want to sketch it out on your paper as a guide for your dots. What is it you want to draw, don’t do anything over complicated as it might be hard to fill in with the dots. We chose a face to then be able to create beautiful bubble hair

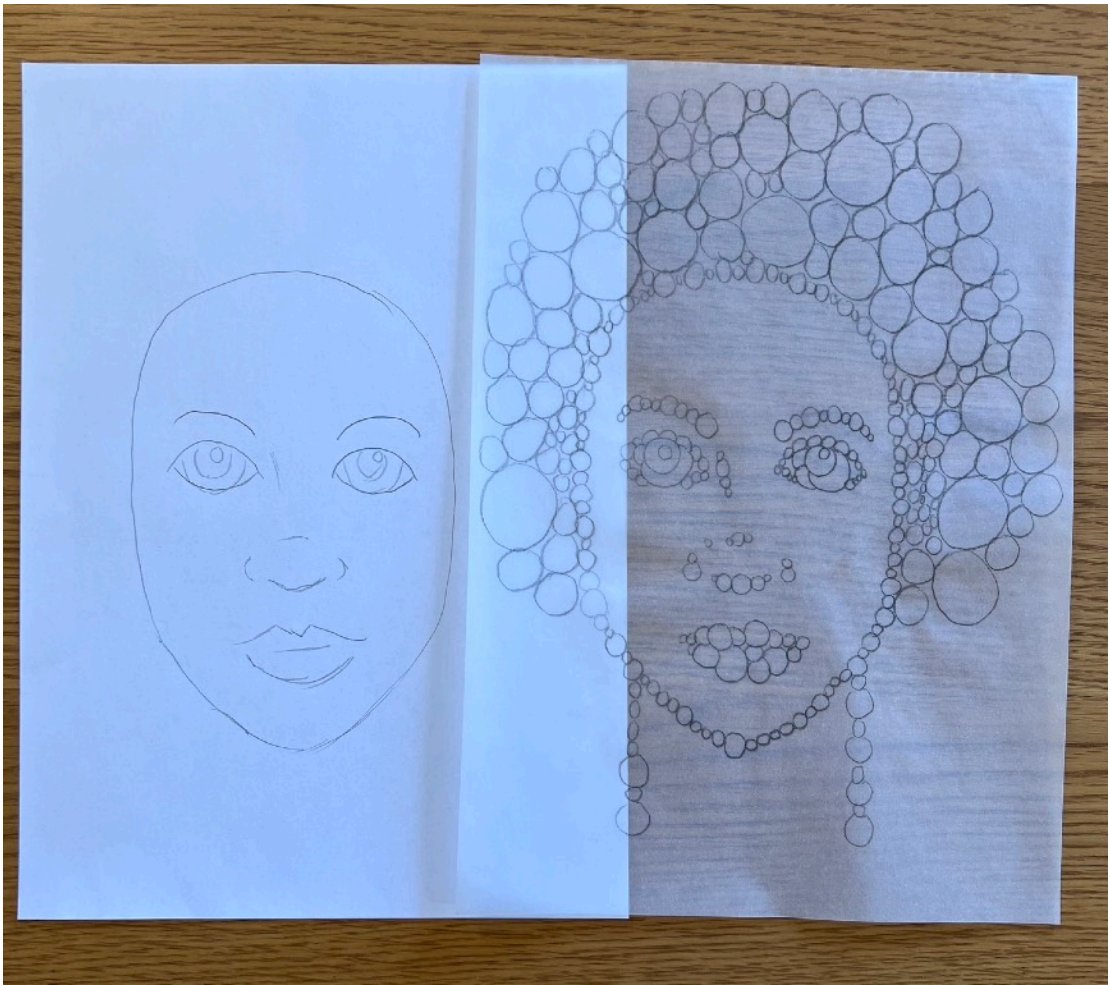

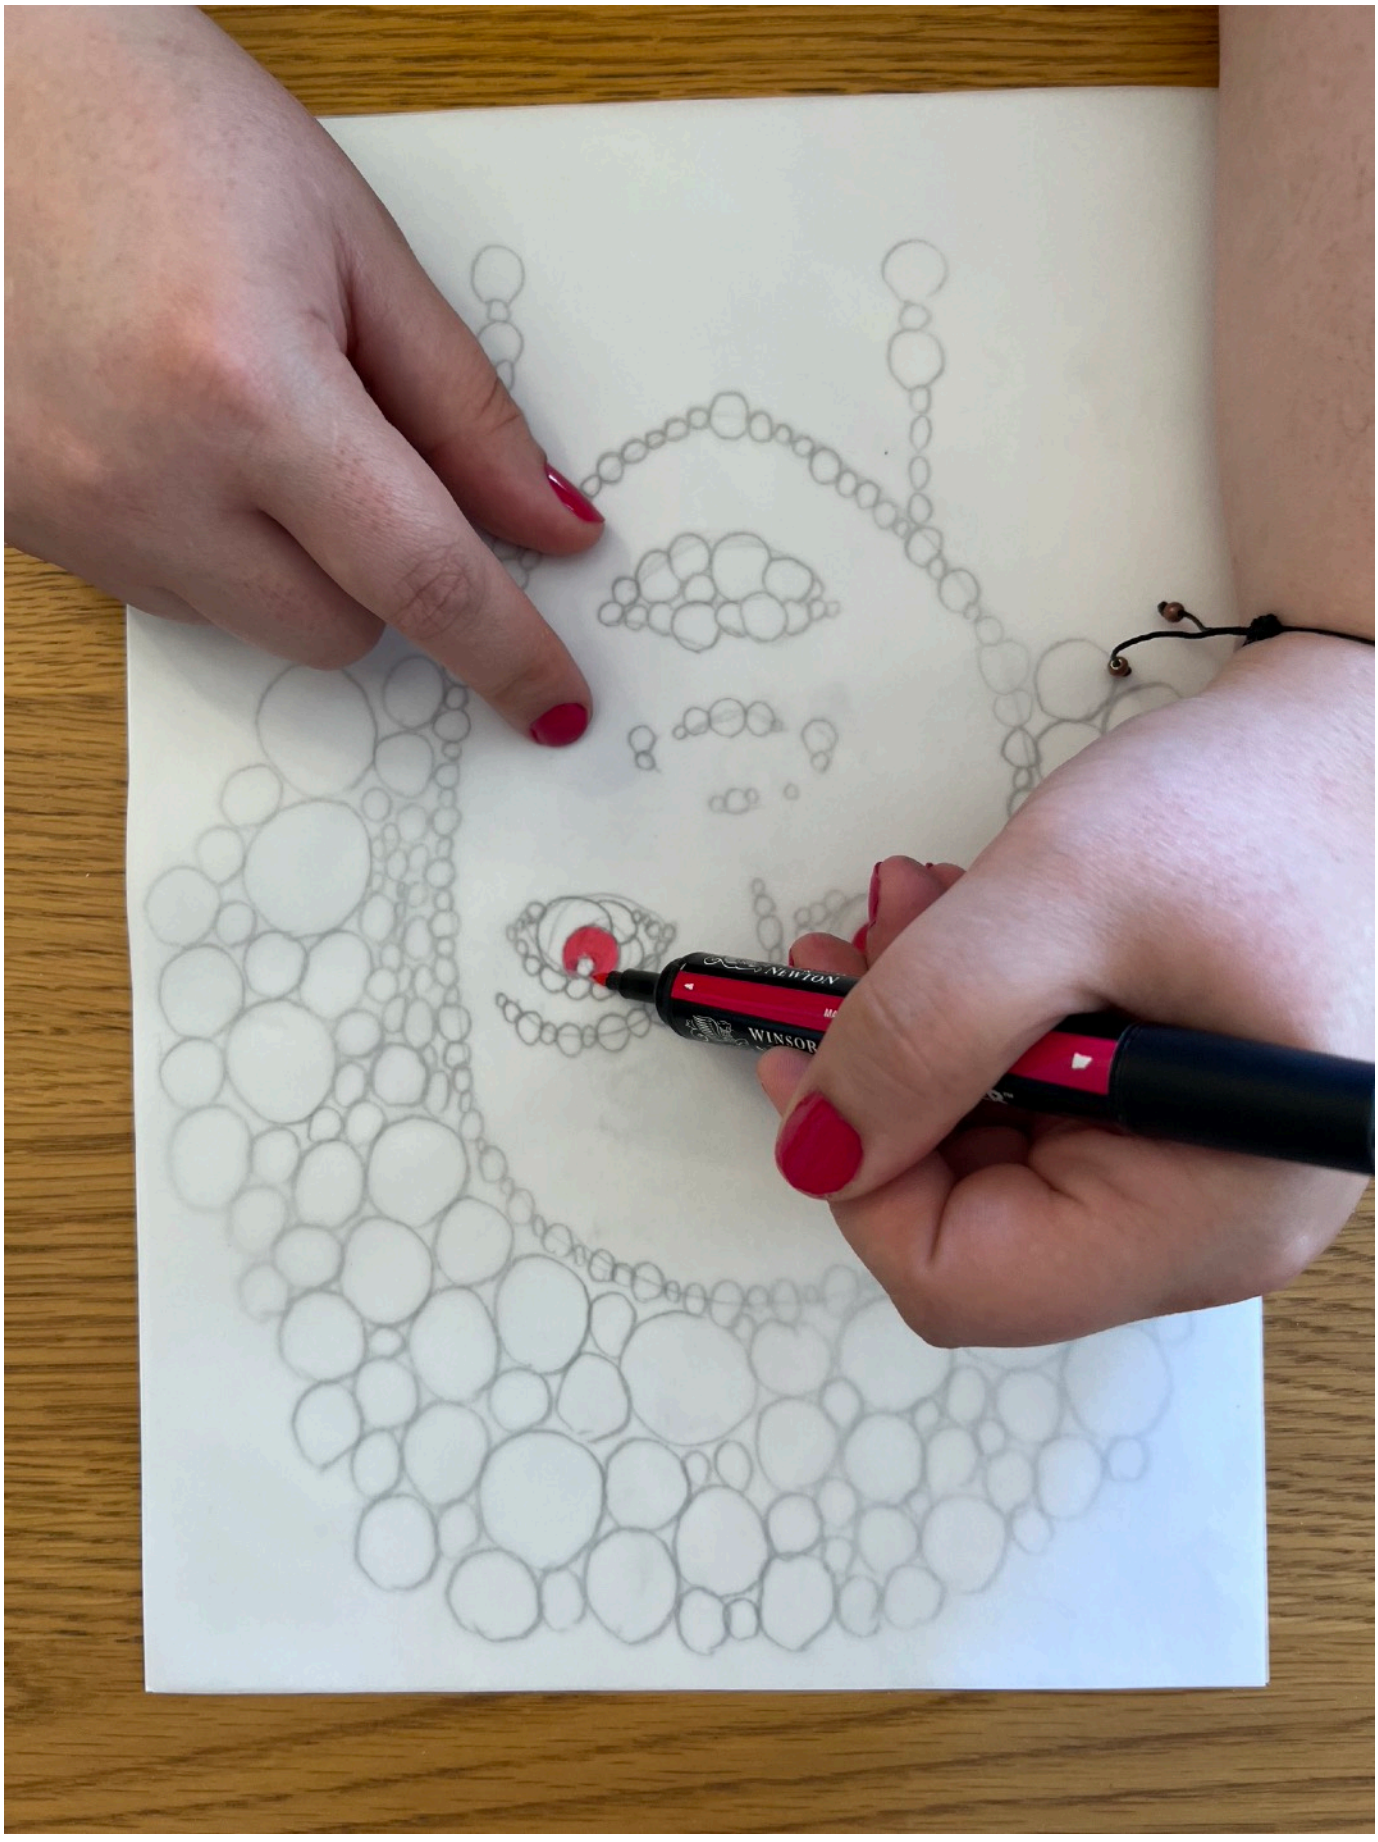

Once you have the base for your drawing take one sheet of your tracing paper and place it over the paper drawing to then create your circles like so

Get your other piece of tracing paper and put it over the circles drawn so you can use them as a guide to colour in but don’t have any pencil lines detracting from the colours

We found it easier to do one colour at a time to try and plan it out so the colours are evenly spaced and don’t touch the same colour

There you have it your very own “Dot Drawing”!
