Easter Fan Faces

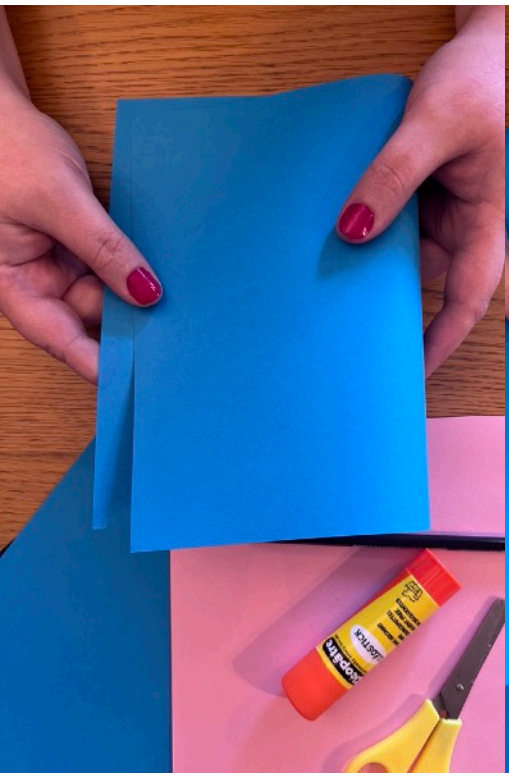

Why not create your own Fan Faces of different Easter Creatures like Chicks, Bunnies or even an Egg!

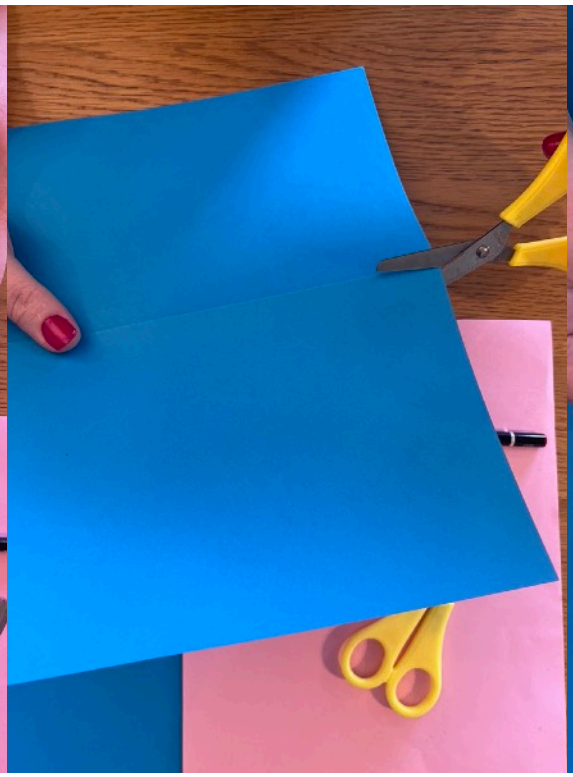

Tools and Materials:

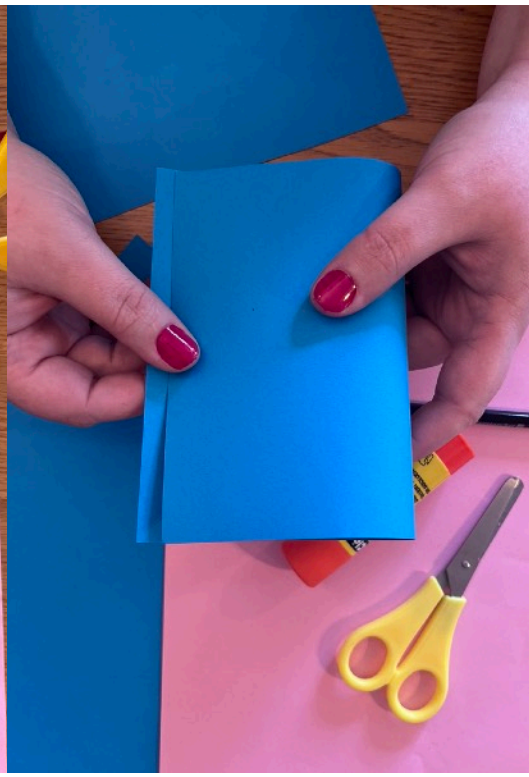

- Coloured Paper (2 sheets of the main colour/face if big, 1 sheet if small)
- Pencil
- Gluestick
- Scissors

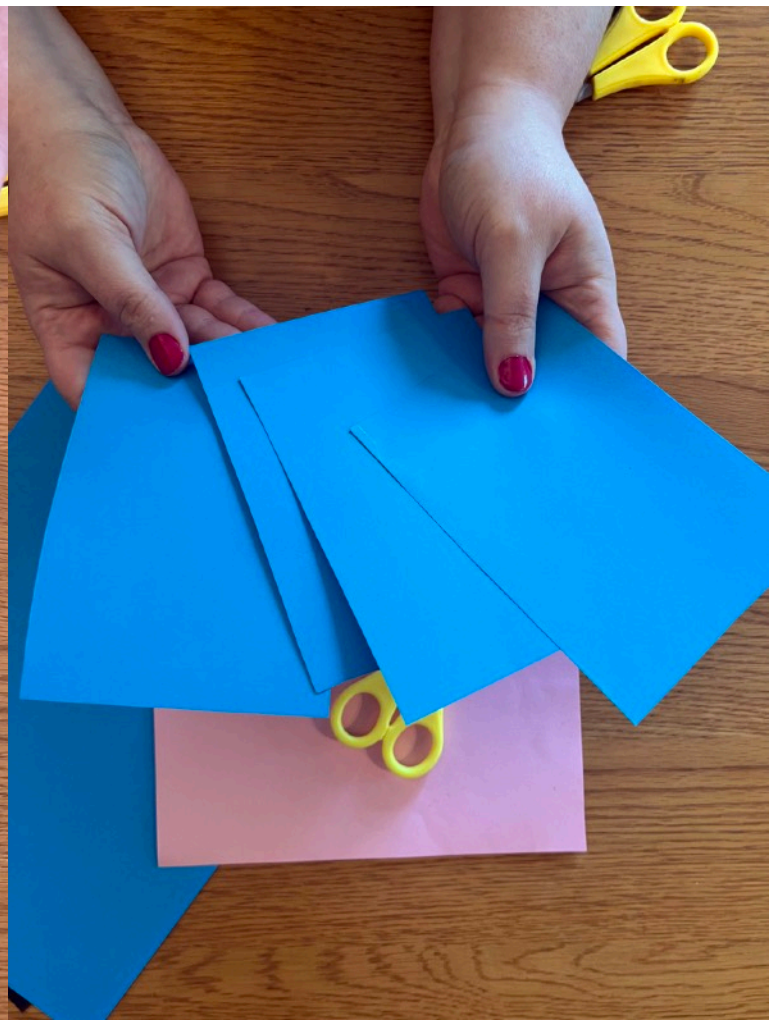

We decided to make a smaller face for this which only need 1 sheet of paper to make, taking your A4 paper fold it in half cut it then fold it in half again, cut again to have 4 bits of paper like so

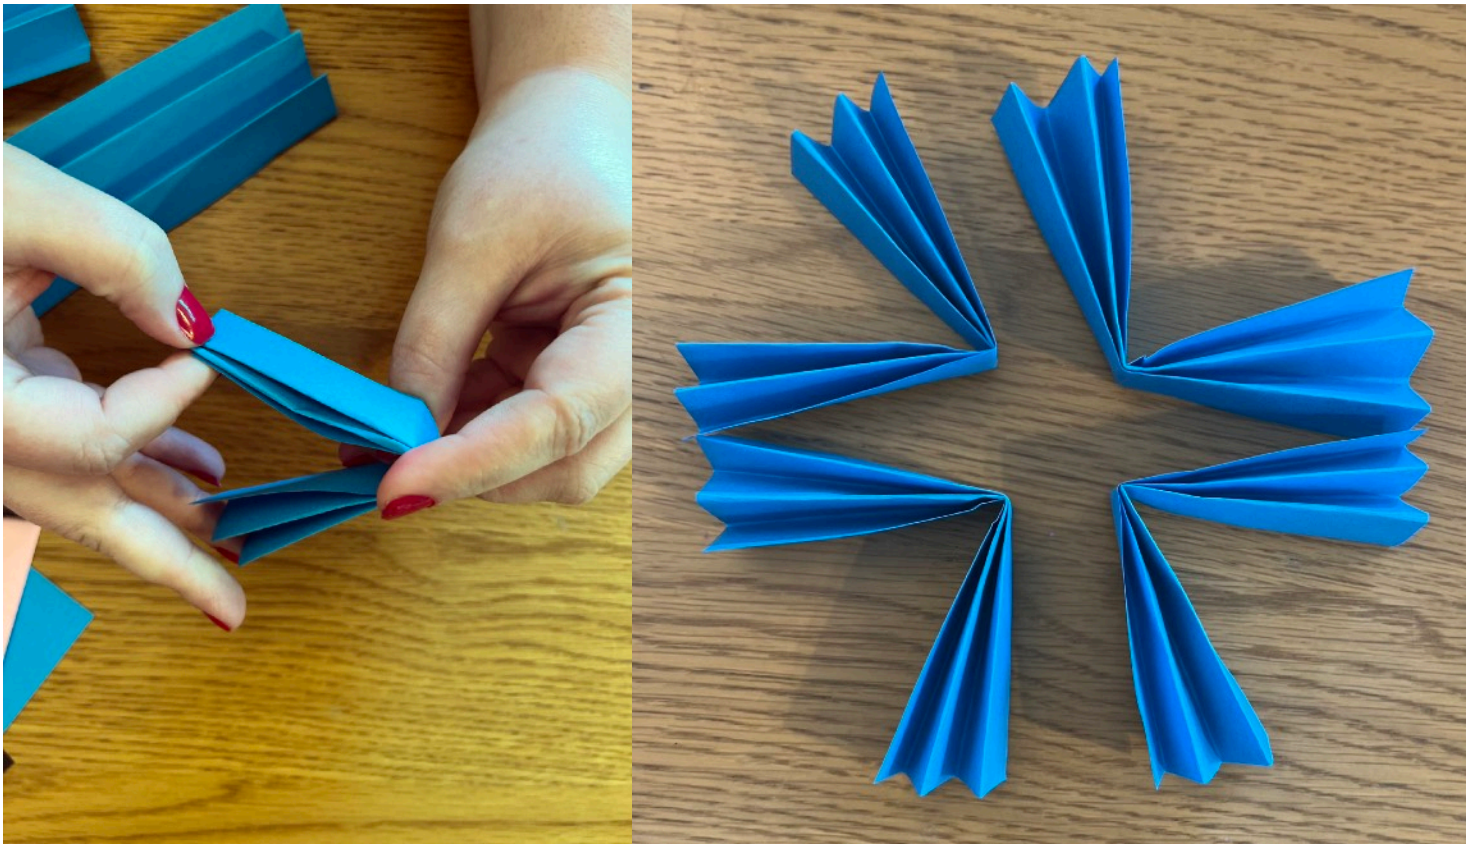

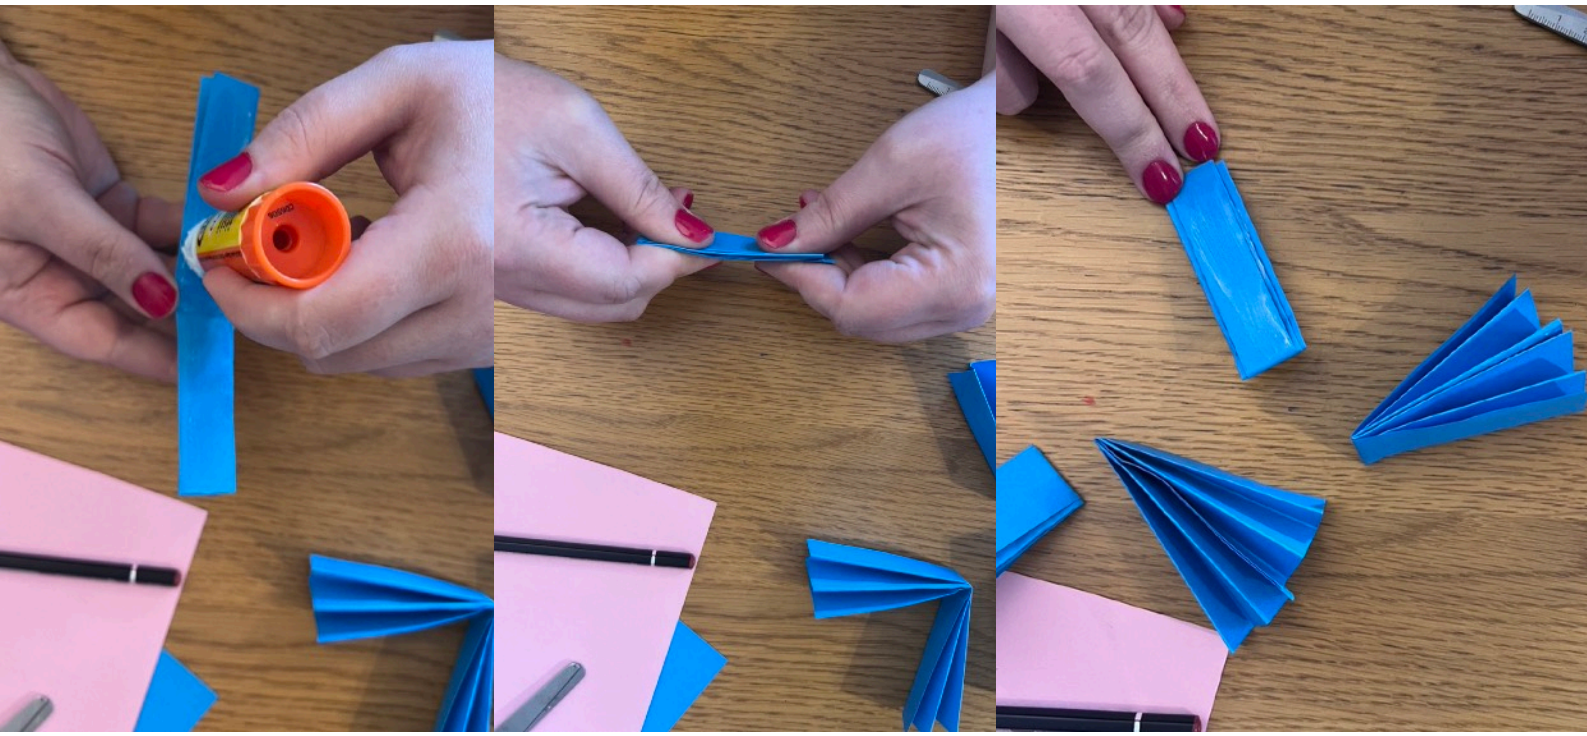

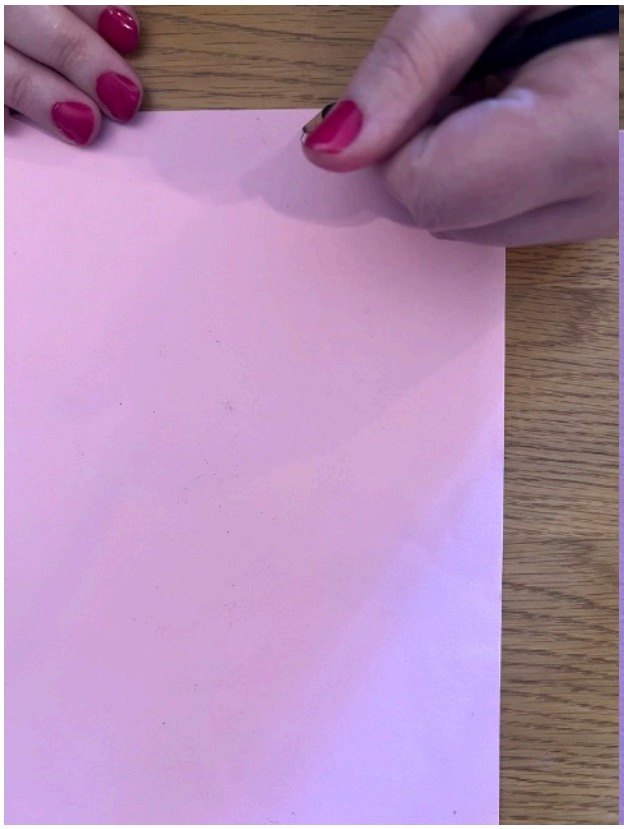

Once you have your 4 bits of paper we need to fold them like a fan alternating the fold to create a wave like so and then folding them in half to be able to create the face

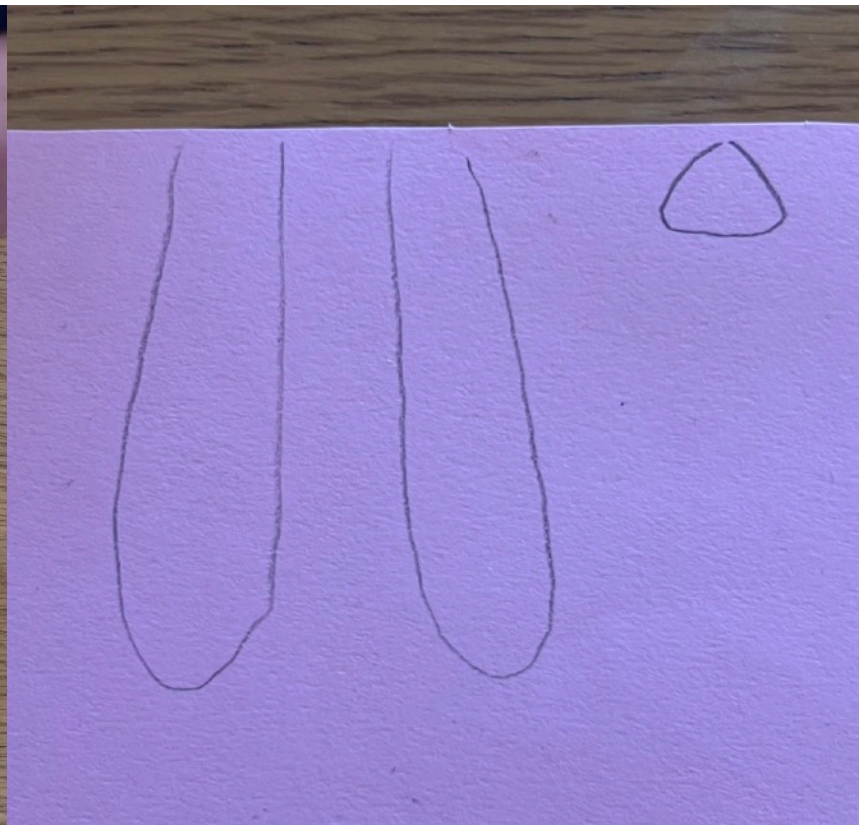

Glue the middles of the “V" together and hold them to set then once set glue the individual fans together - apart from one edge, you aren’t pulling it into a circle yet!

Whilst that is all setting we can create the facial features to decorate - for this we need a nose, eyes, ears and inner ear bits plus whiskers!

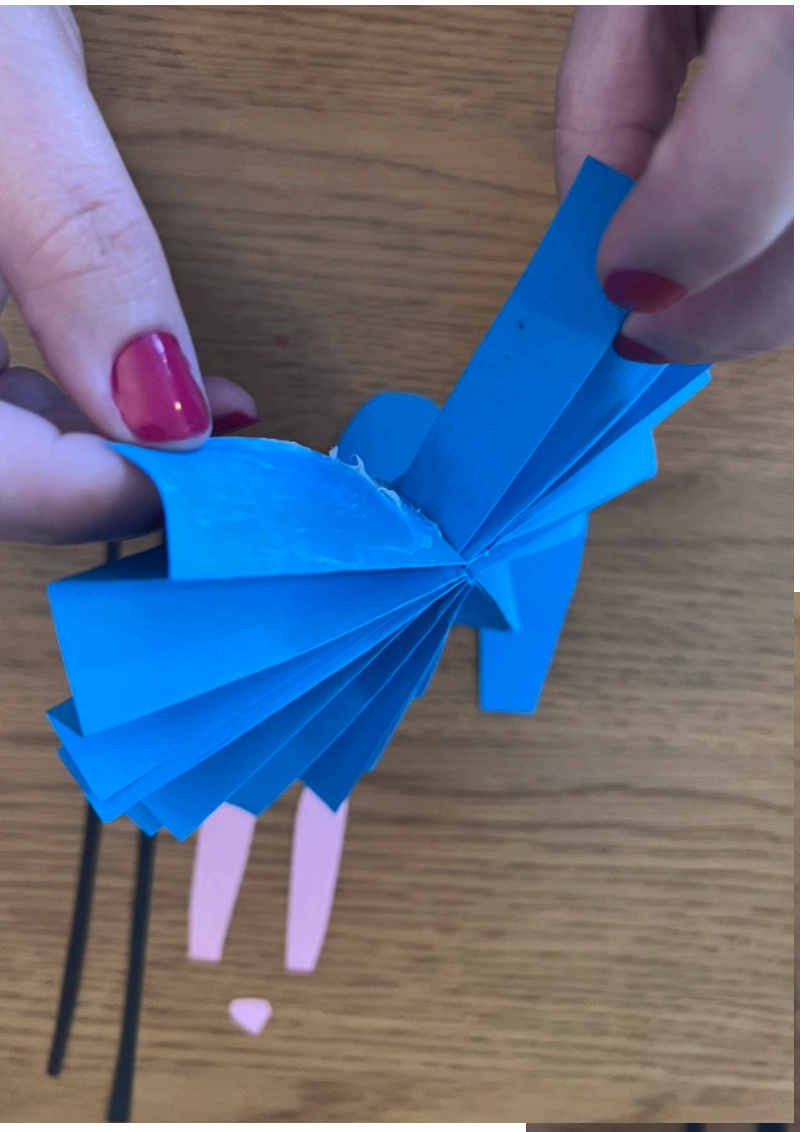

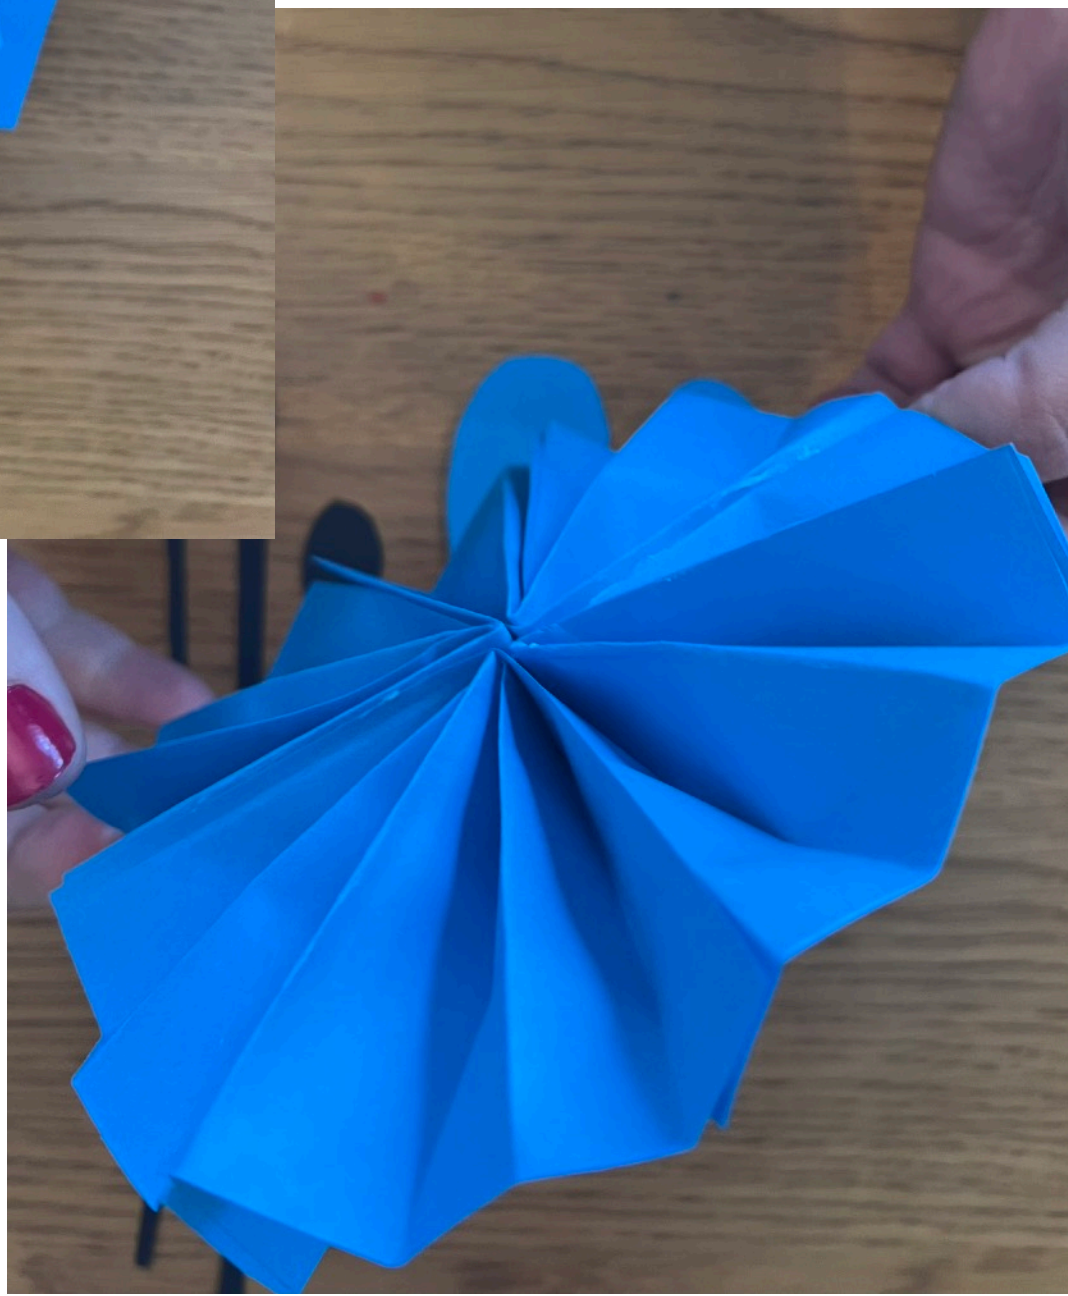

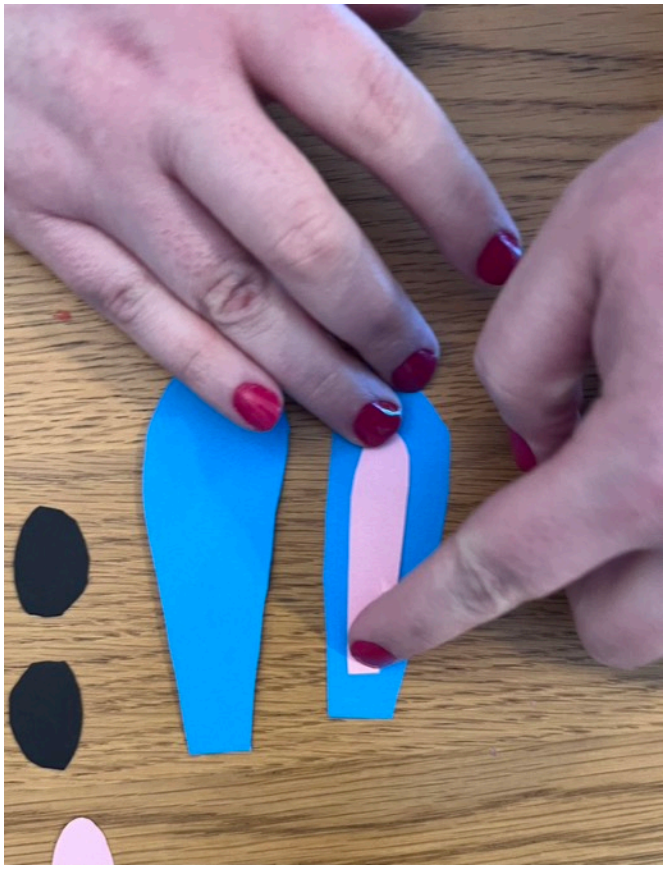

Once you have all the bits cut out then you can form the circle of fans, gluing the last bit and then holding it together to set like so. It might take a while, see how you get on

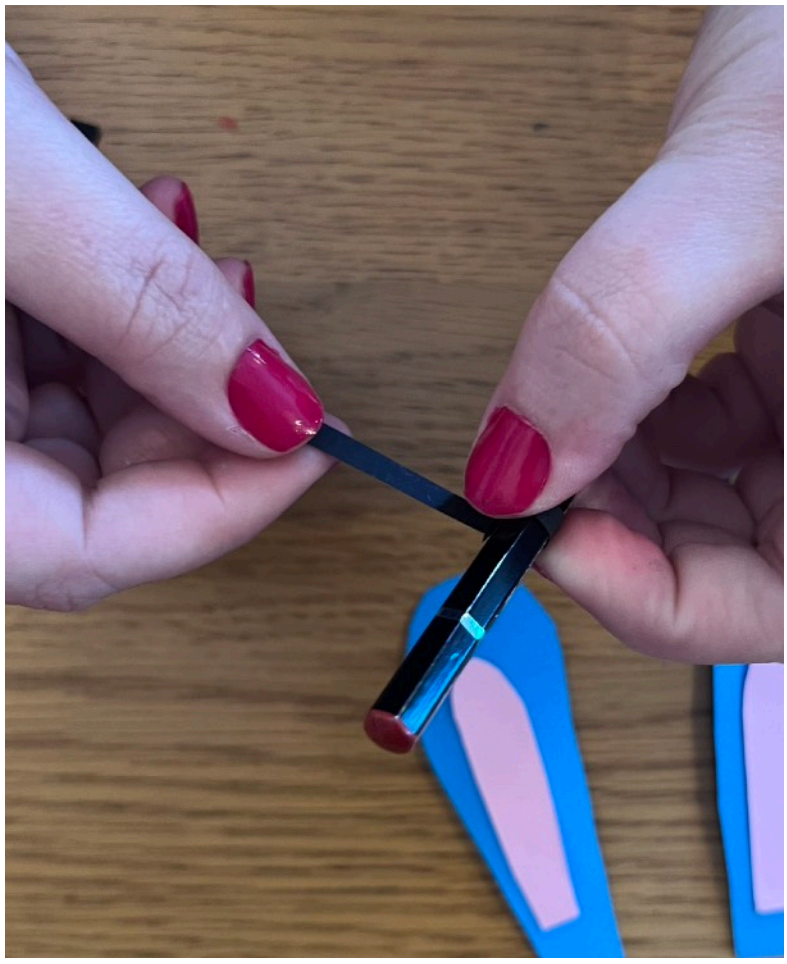

Now glue other bit together like the ears, and you can use a pencil to curl the whiskers by rolling it around it

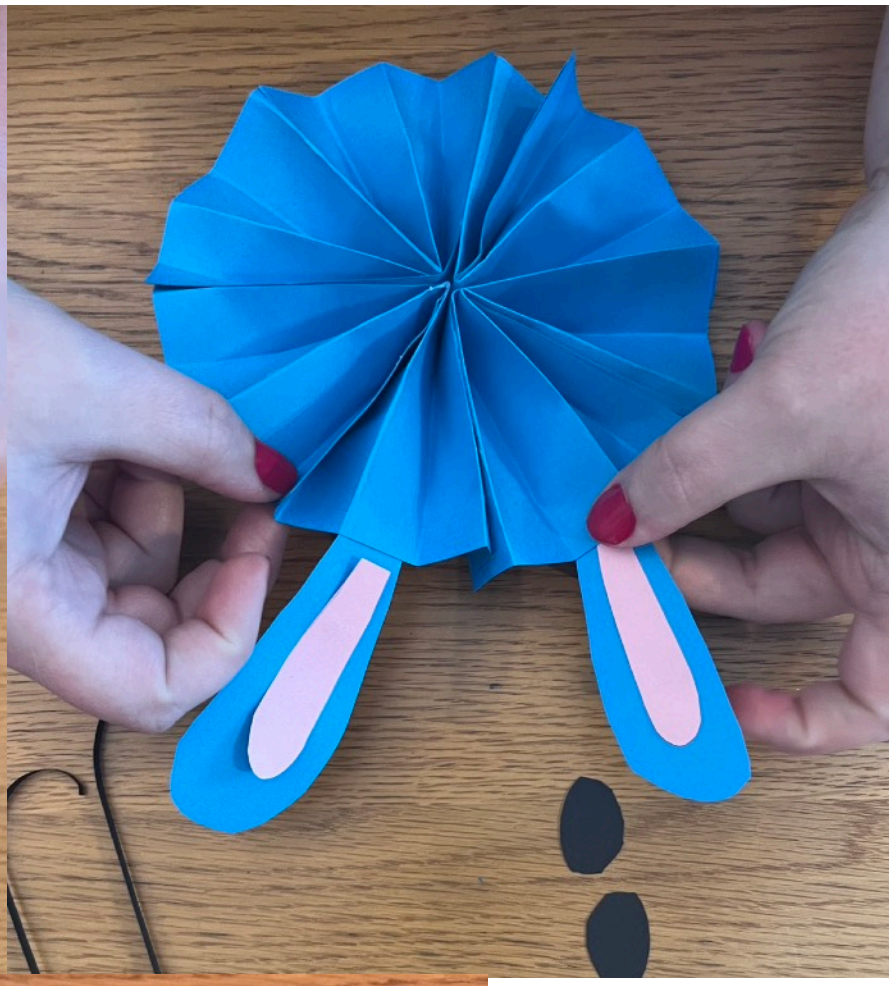

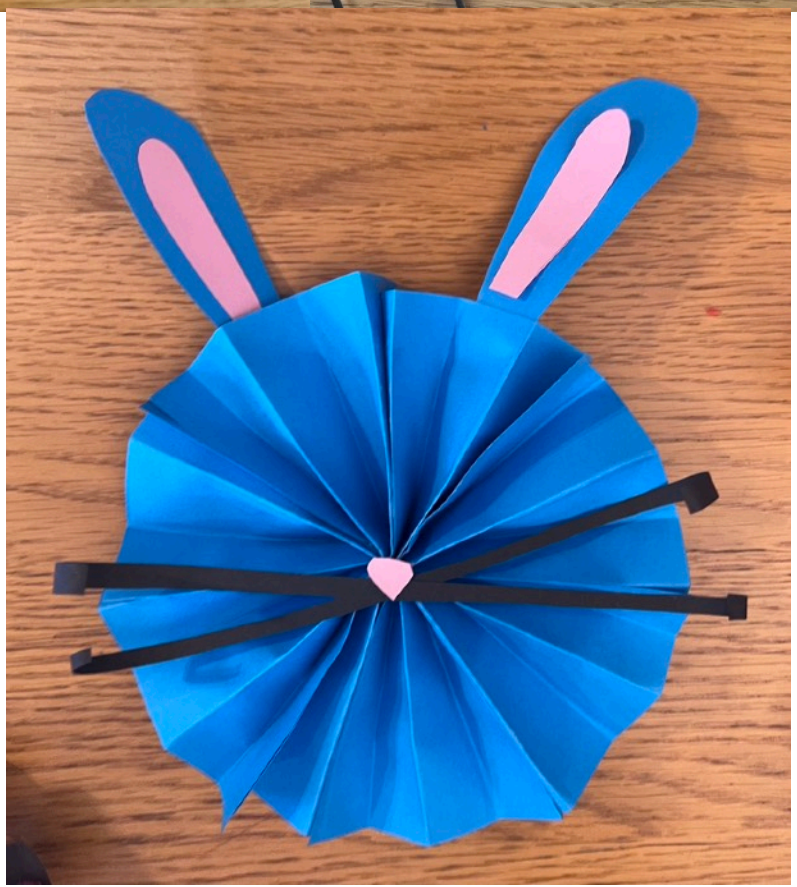

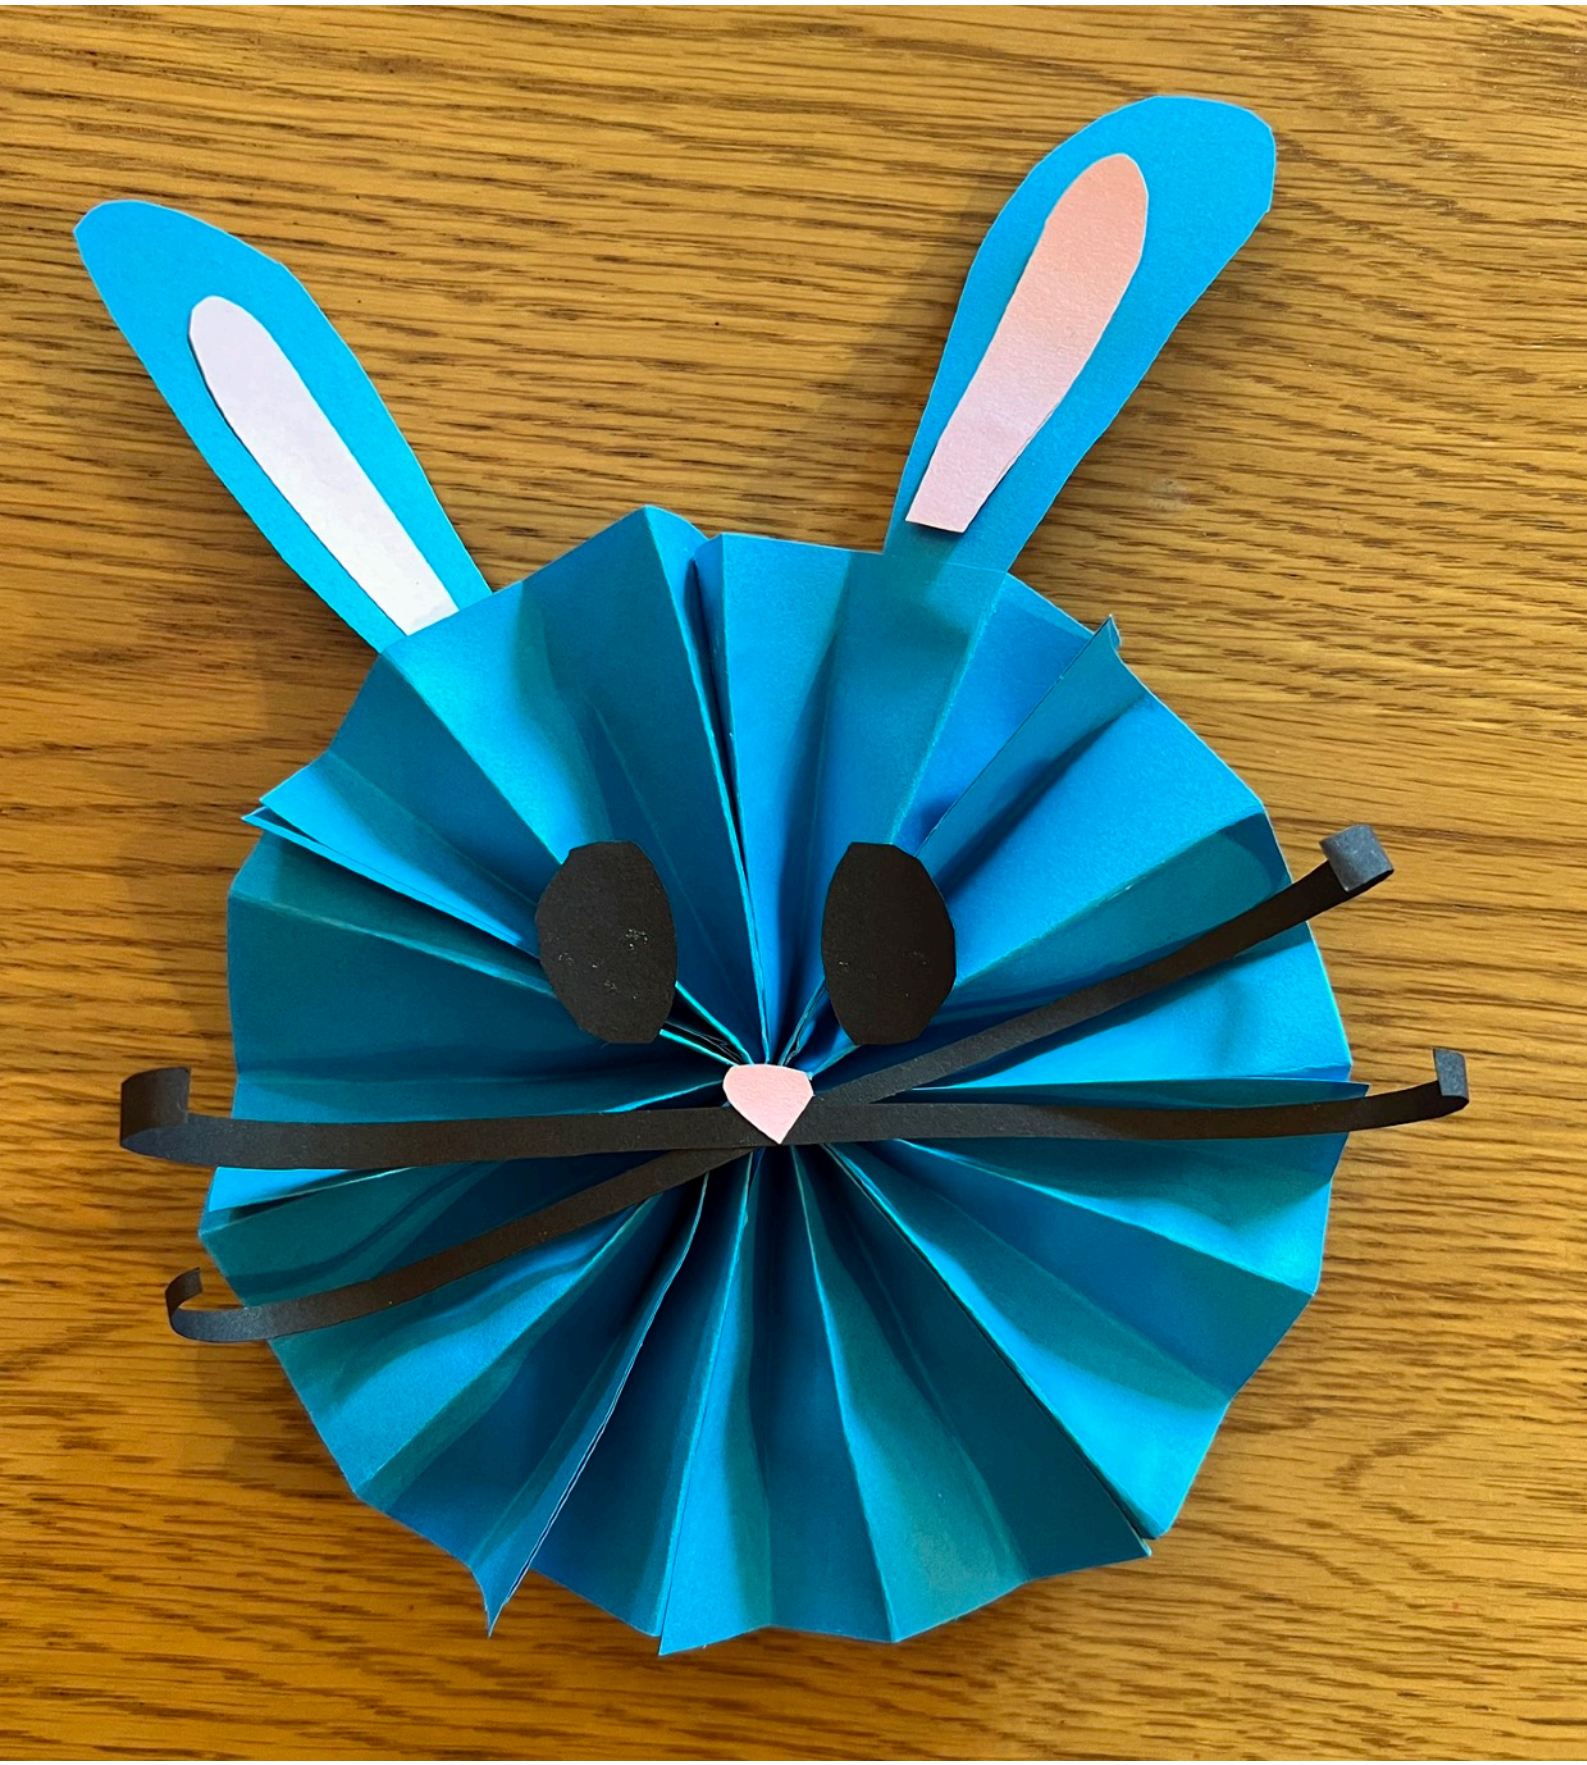

Then start gluing the parts to the fan face - because the fan isn’t a flat surface it could be a little tricky just try and find the best place to attach the ears, eyes, nose and whiskers

There you have it your very own “Easter Fan Face”!

Here are some others we made to inspire you!
