Egg Carton Chick

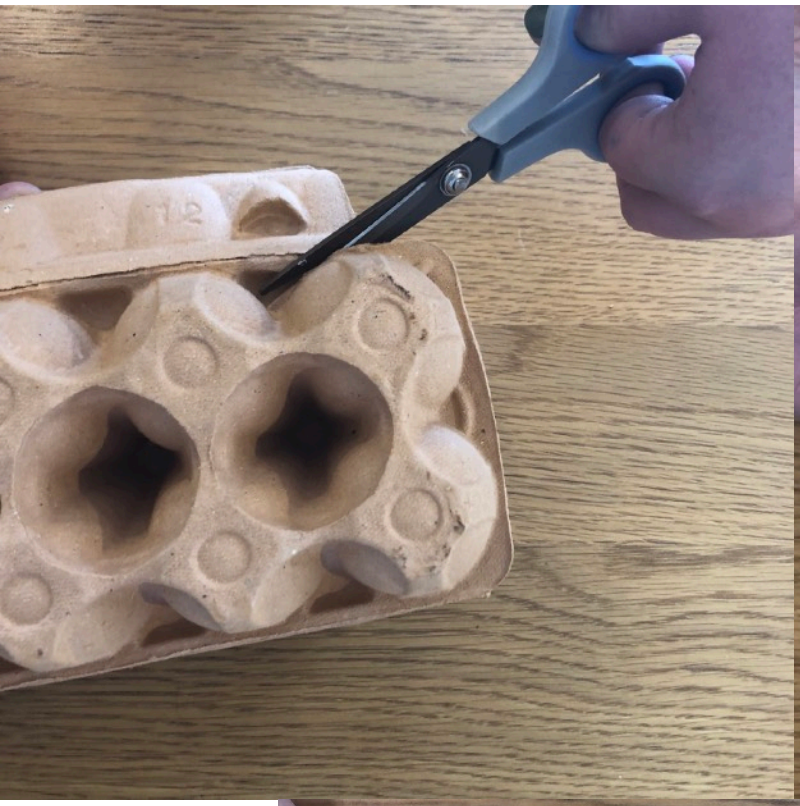

This is a fun and simple upcycling craft which is great for Easter decorations - even place settings if you fancied!

Tools and Materials:

- Coloured Paper
- Felt Tip
- Double Sided Tape
- Paint
- Cardboard Egg Carton
- Scissors

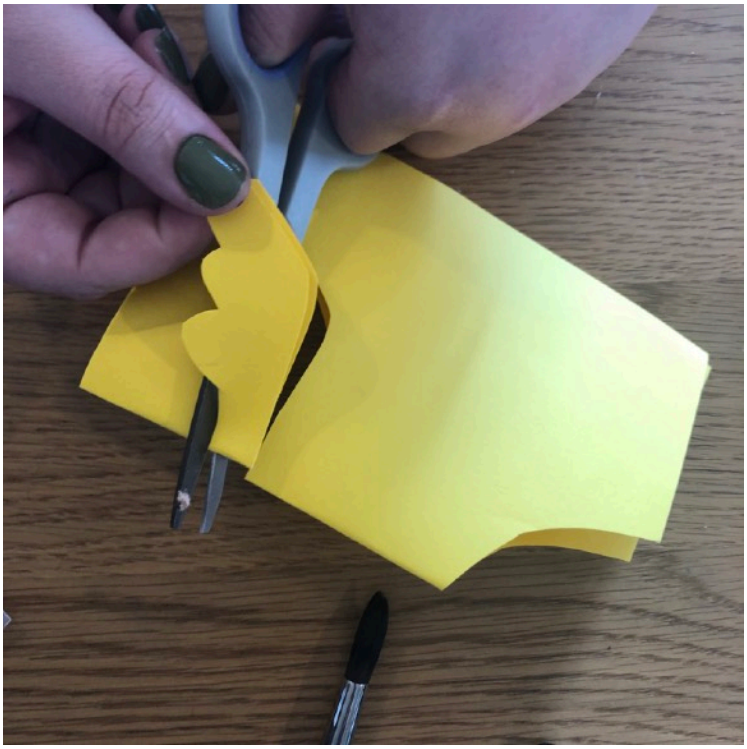

First of all you need to cut a bit of the egg carton out to create the body - don’t worry if there are some gaps these are good for the wings, make it level all they way round so it can stand

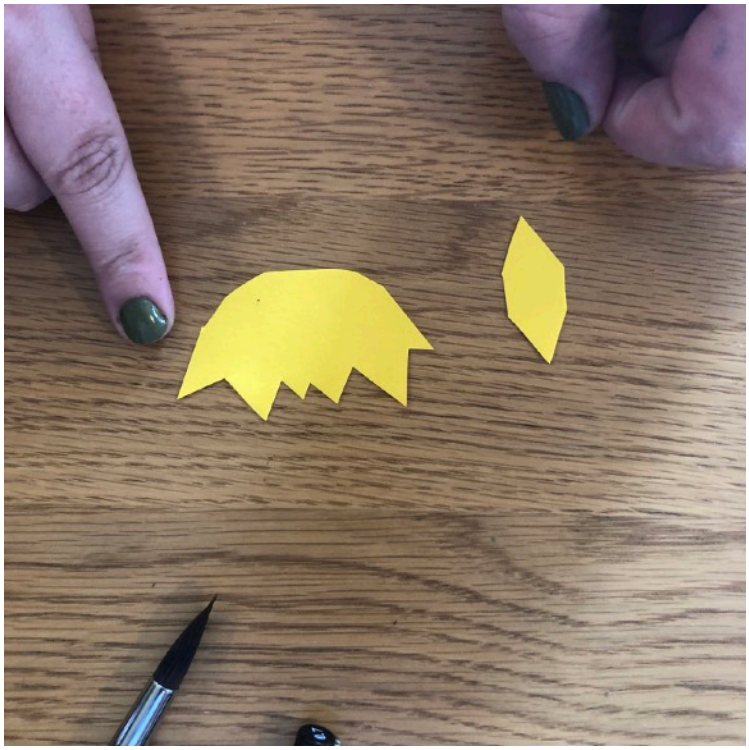

Once you have the body then to create the beak, wings, and feet

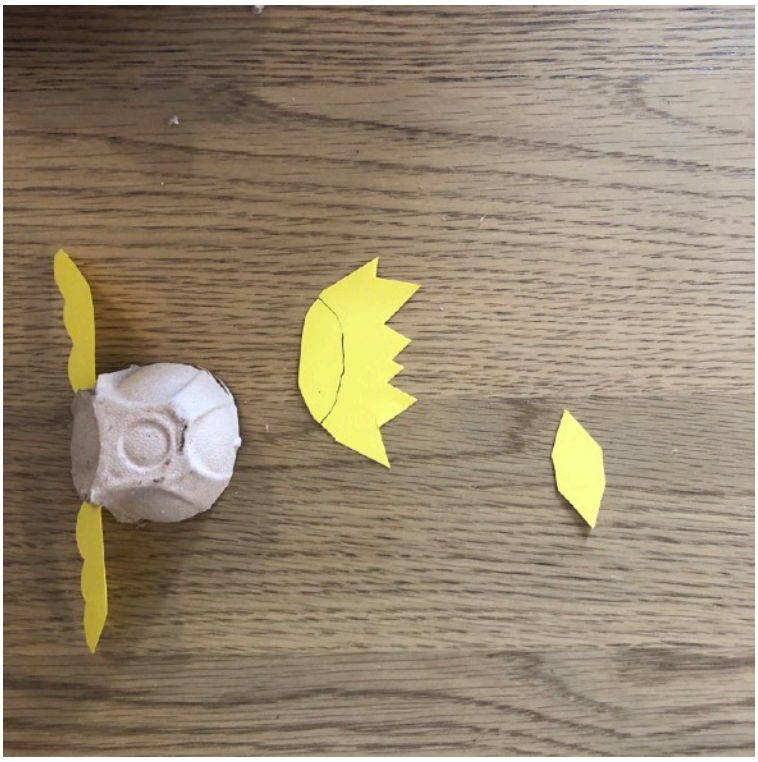

For the beak we created a square with 2 triangles coming off it - so it’s easier to stick on later!

Once the feet are down place them under the body and draw a line where they meet so you can cut away the excess and create a tab to stick on the inside to attach them

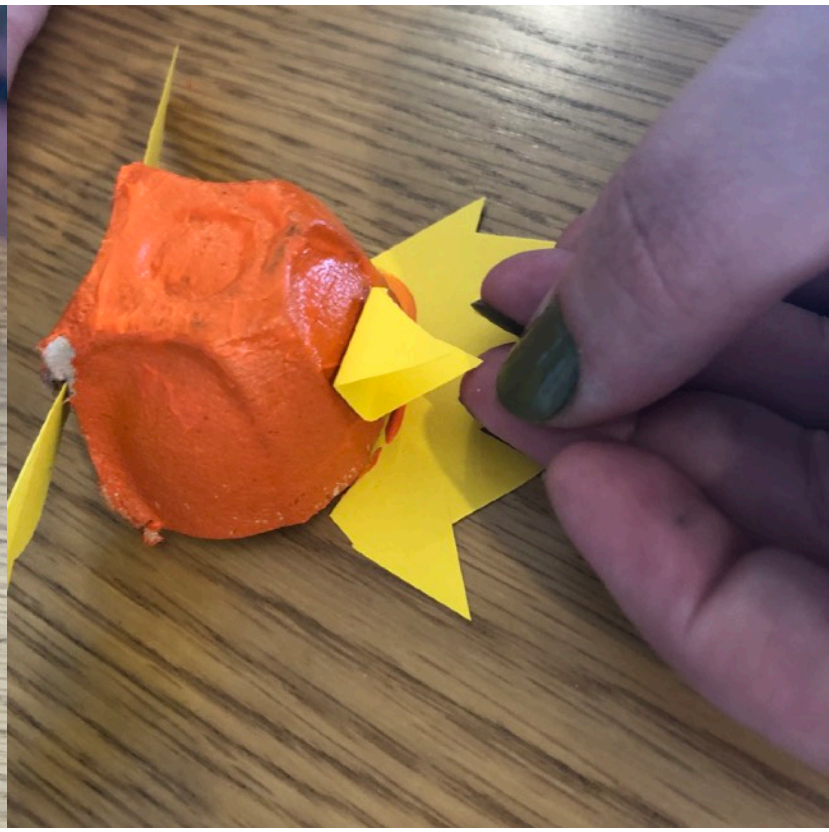

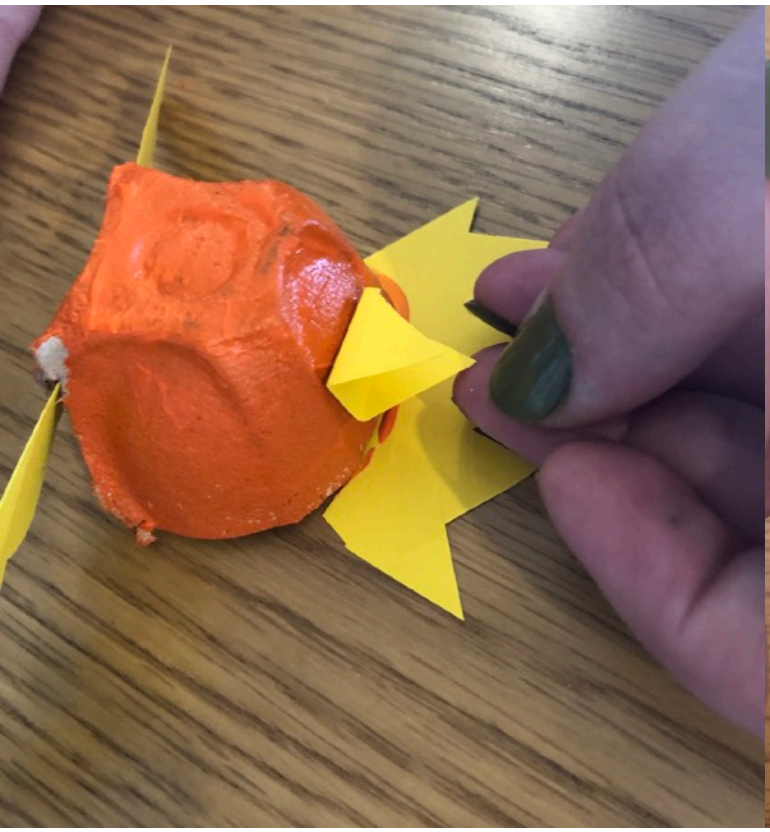

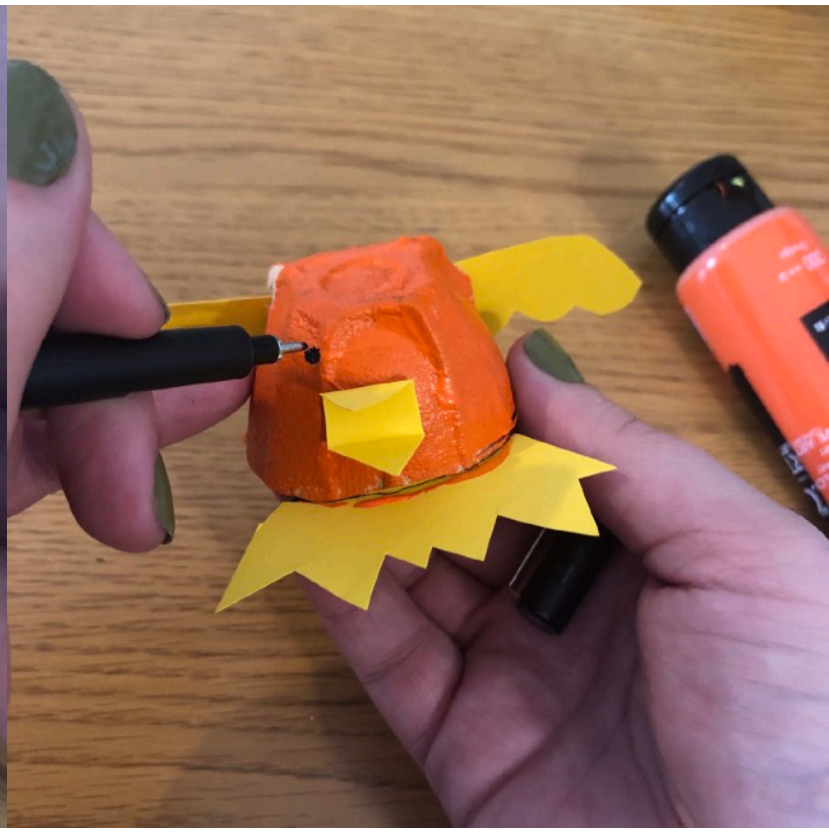

Now you can paint the body and once it’s dry add on the eyes and stick on the beak

There you have it your own “Egg Carton Chick”
