Elements Book

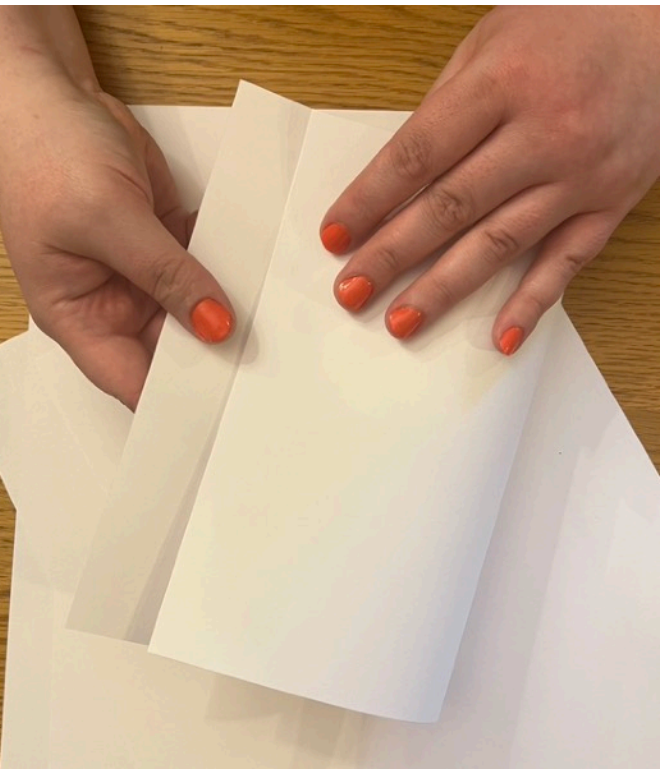

Inspired by the Elements (Earth, Wind, Fire, Water) why not create your own 3D book with poems you've created or found to represent them

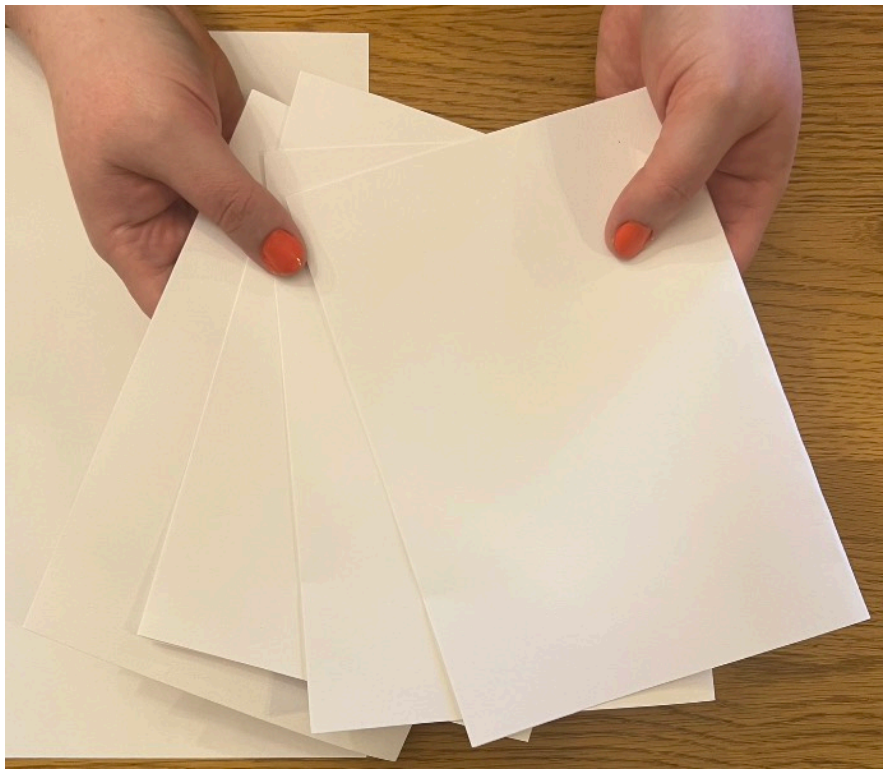

Tools and Materials:

- Coloured Paper
- Pencil
- Gluestick
- Scissors
- White Paper, 5 Sheets
- Black Felt Tip

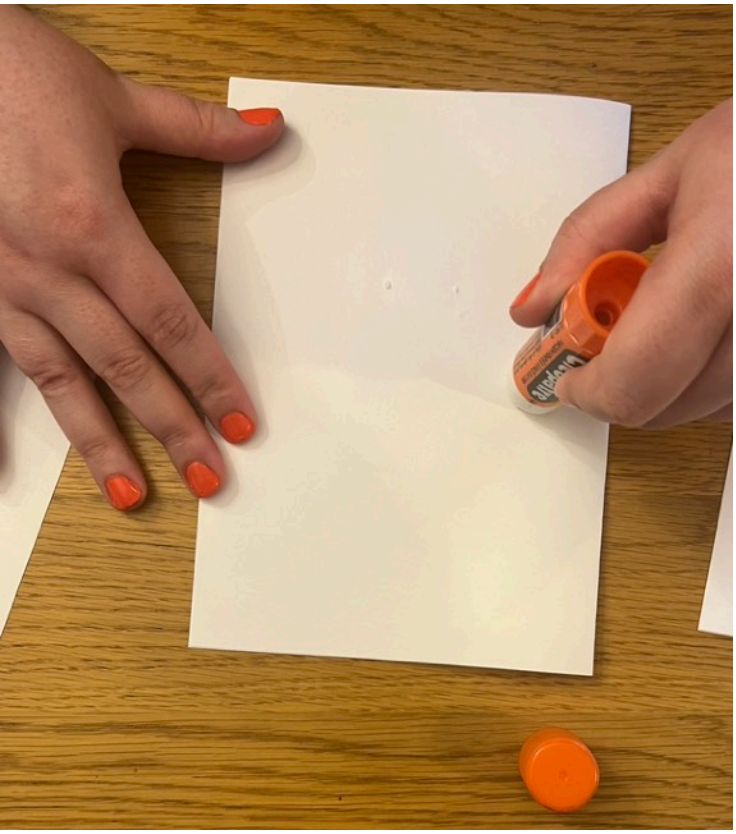

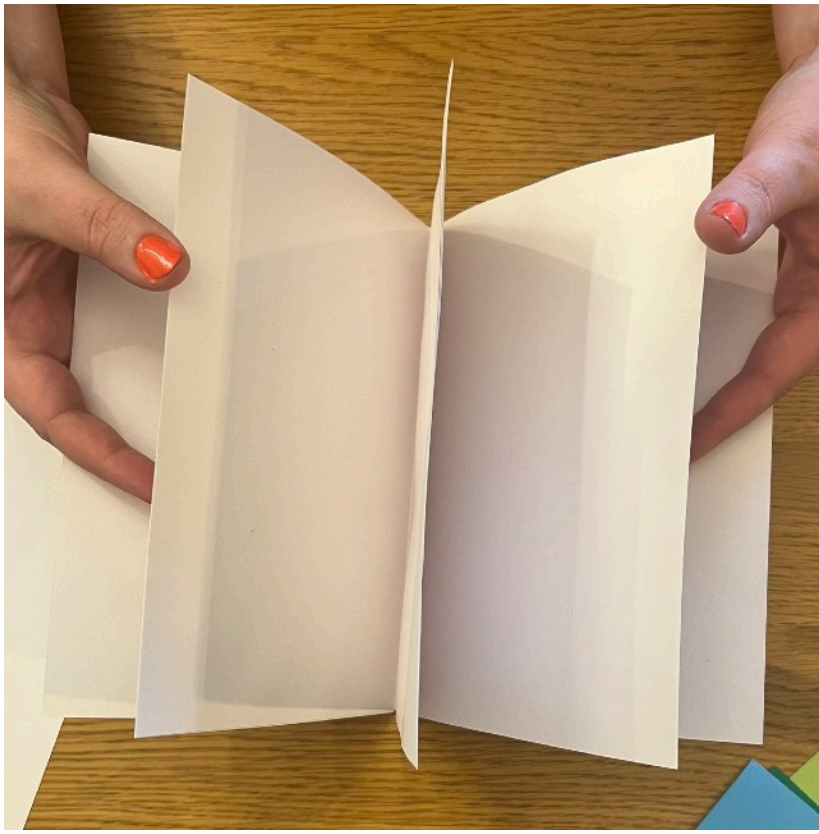

Take 4 sheets of the paper and fold them in half like so to create your book, in this teaching pack we are showing you one of the elements to guide you through how to craft it

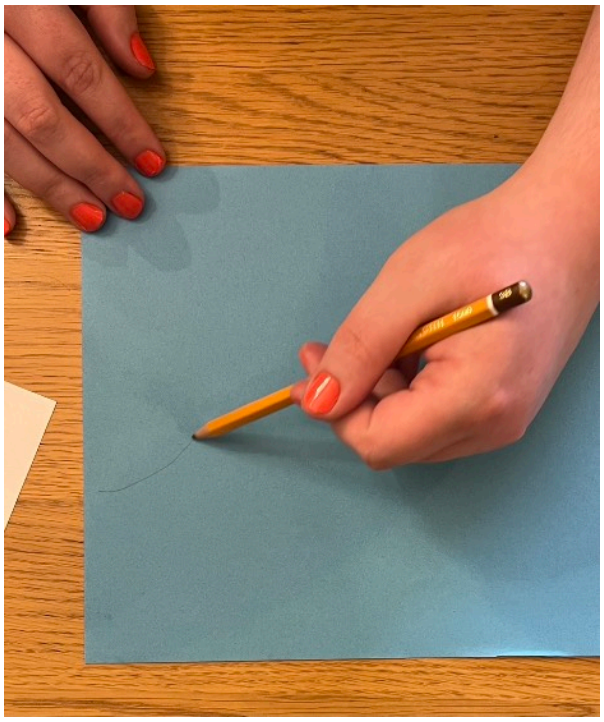

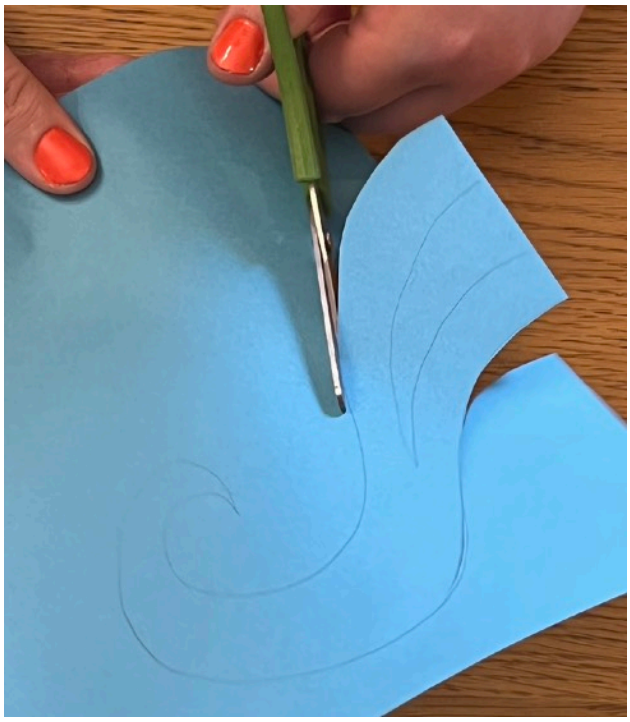

Once folded cover the outside in glue and sandwich them together like so to create your book base

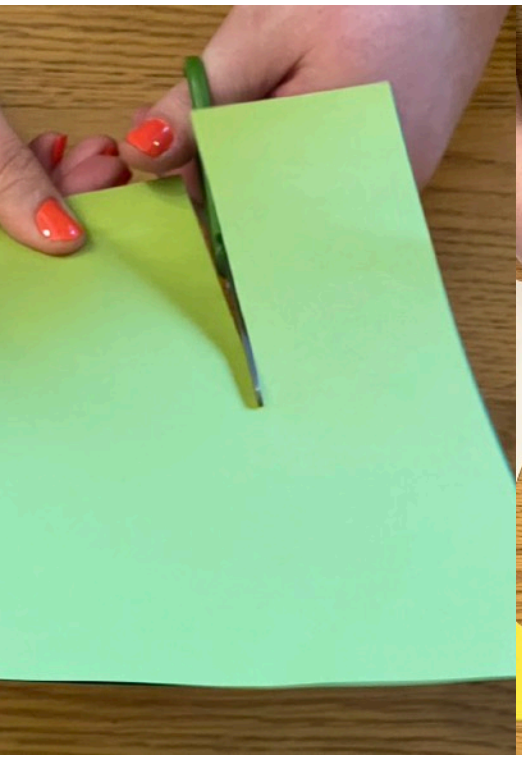

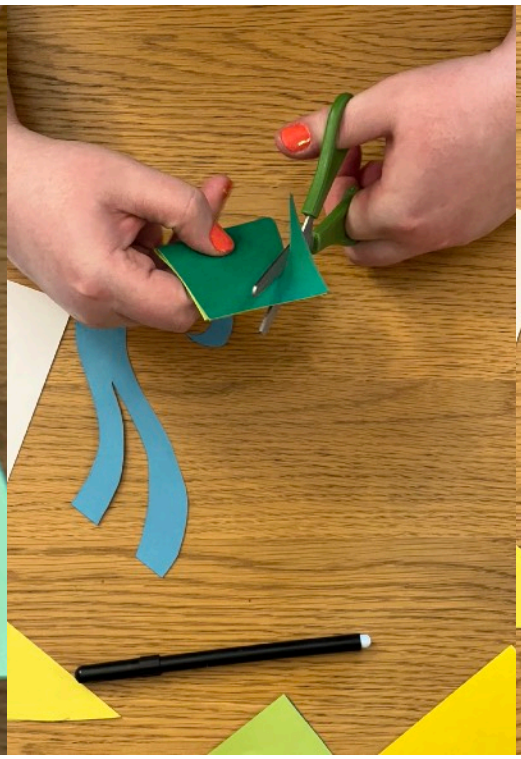

For this we are creating wind and leaves to illustrate a poem by Christina Rosetti, to do this we've drawn a loose swirl to represent a gust of wind and leaves dancing in it. Sketch your swirl and cut it out

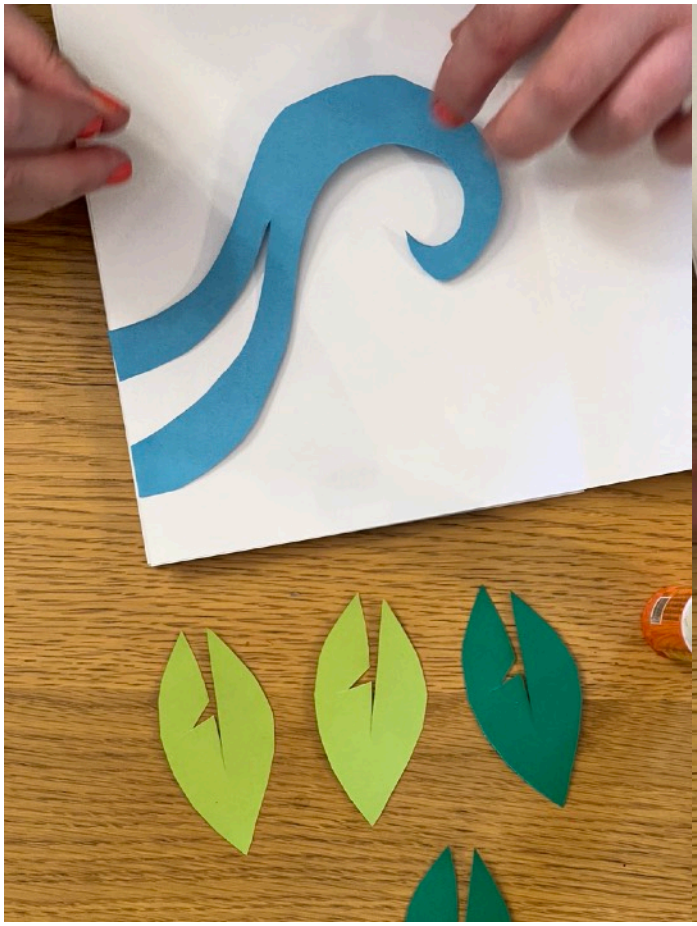

Now to create the leaves - taking 2 shades of green you can put them together to cut out at the same time

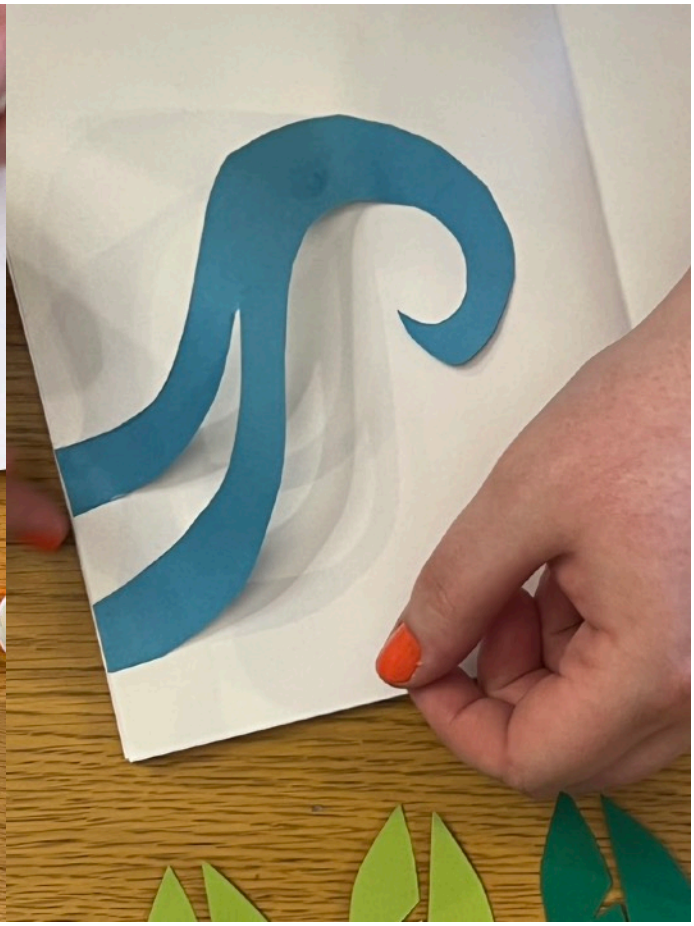

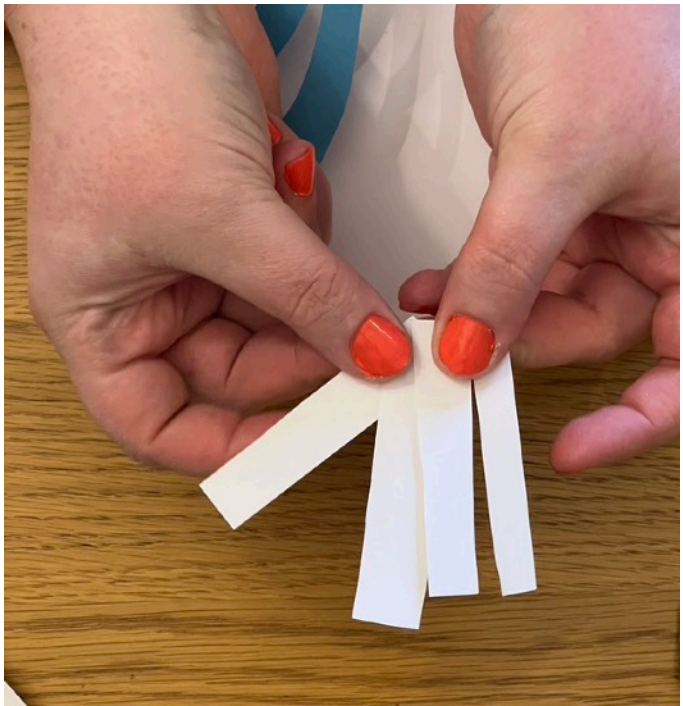

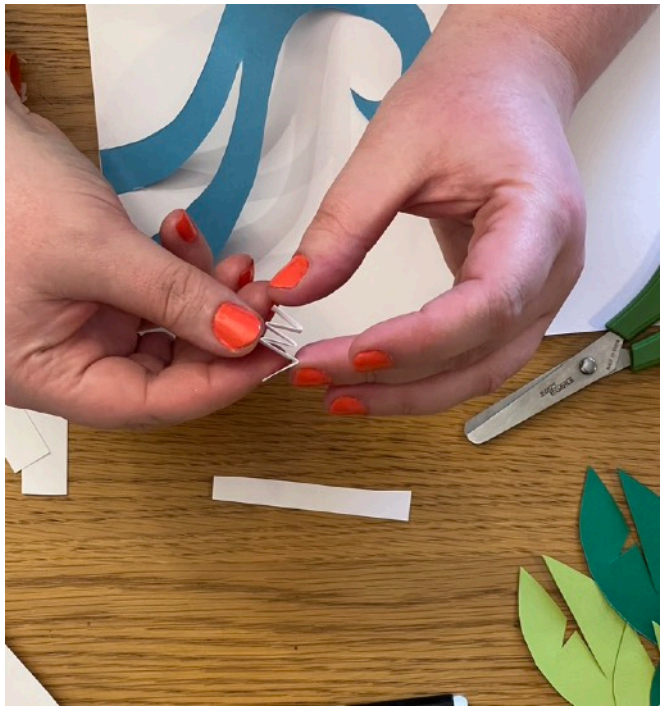

Start laying out the parts on the page to see where you want to stick them, when gluing try and bend it up to give a 3D effect and movement

Using the remaining piece of white paper you can cut out strips to make springs or rings to bring the leaves off the page like so

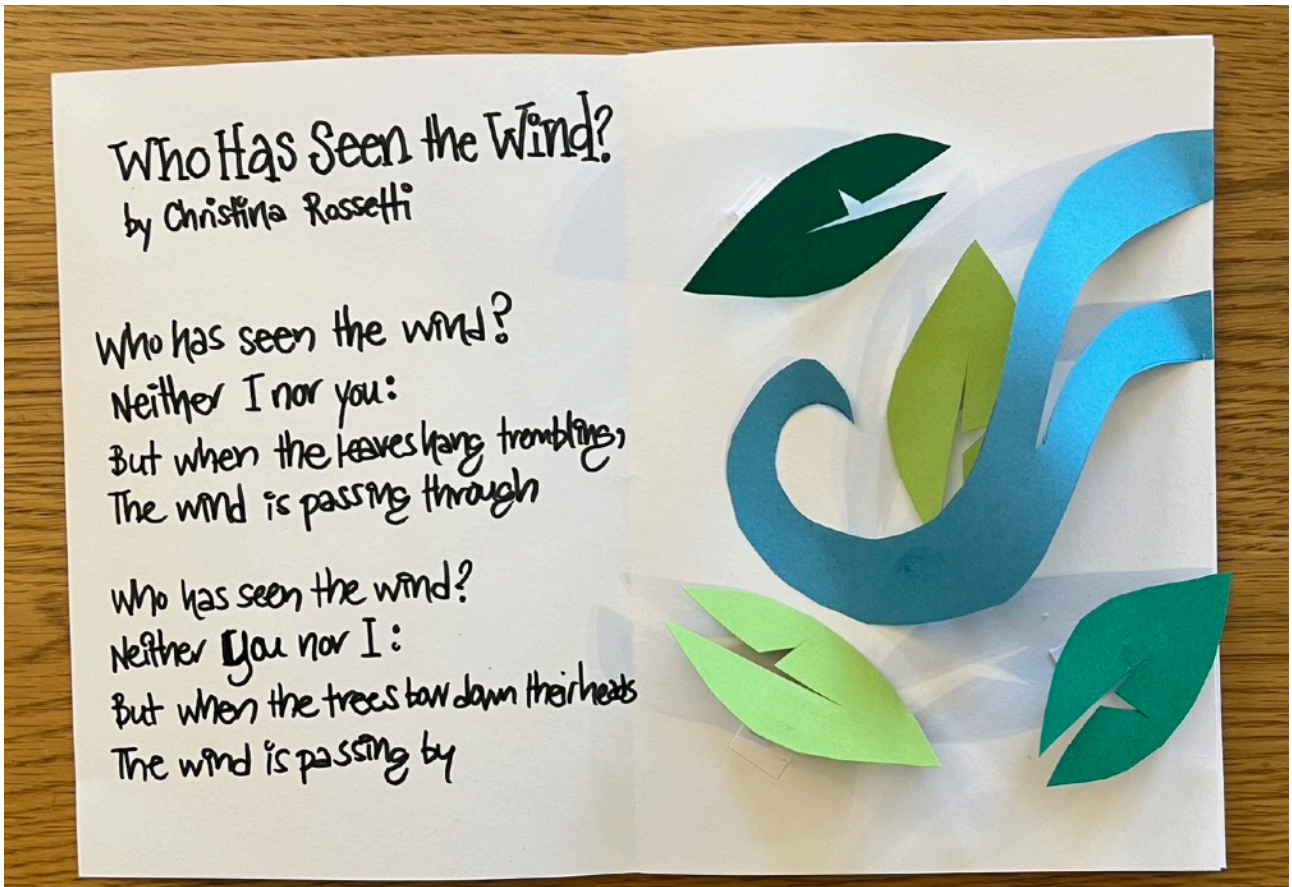

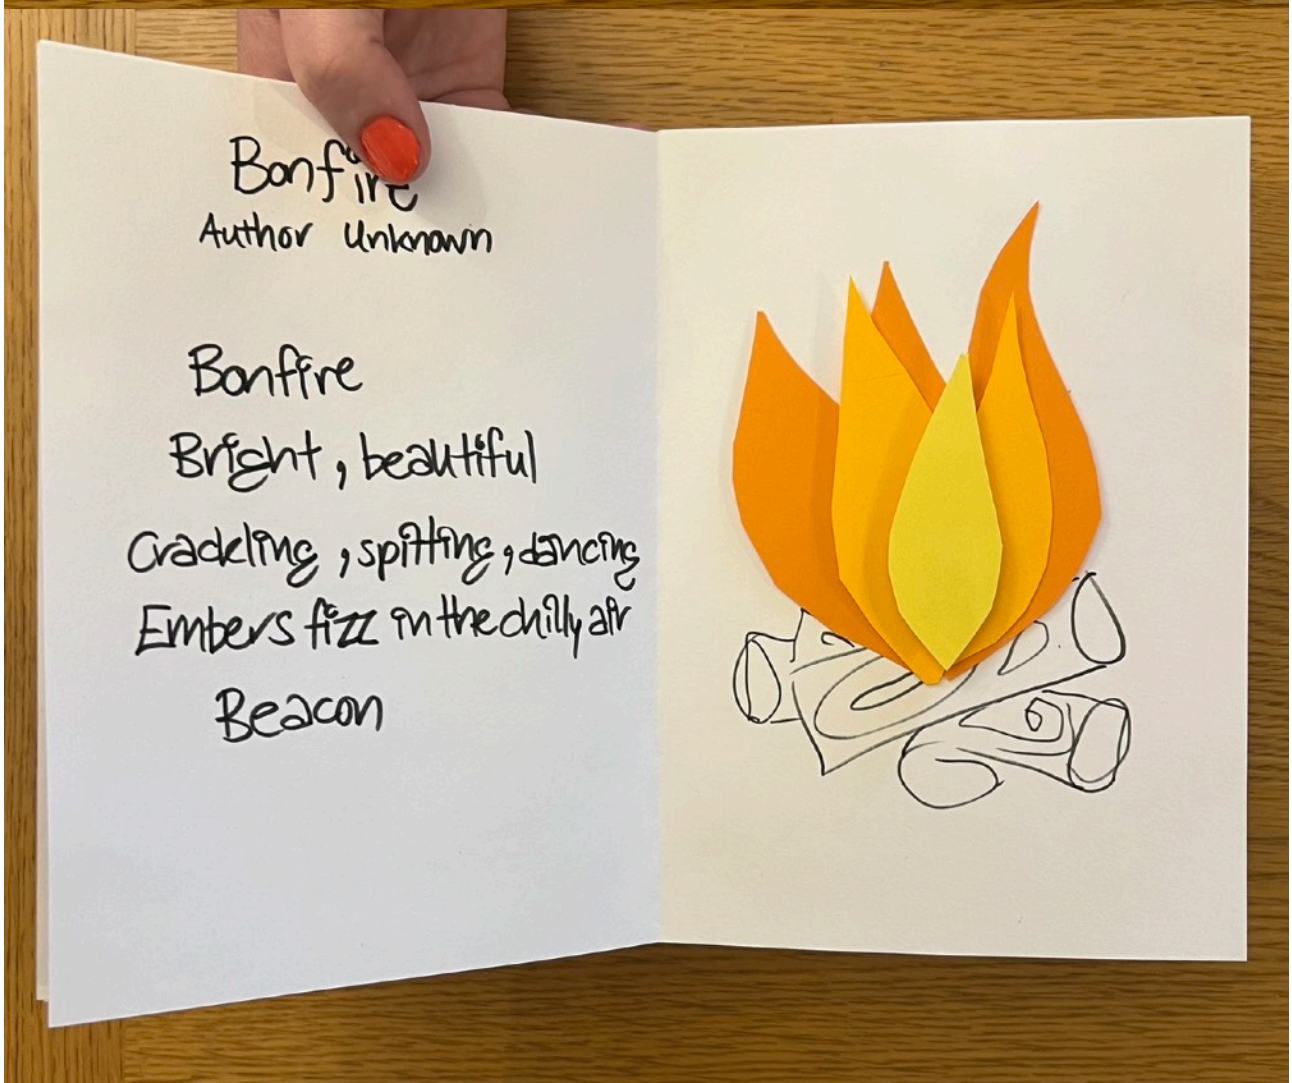

Attach on the back of the leaves and then place around the page, think about spacing when doing so and then add your poem (crafted or found)

Here are the finished pages & cover crafted to inspire you!

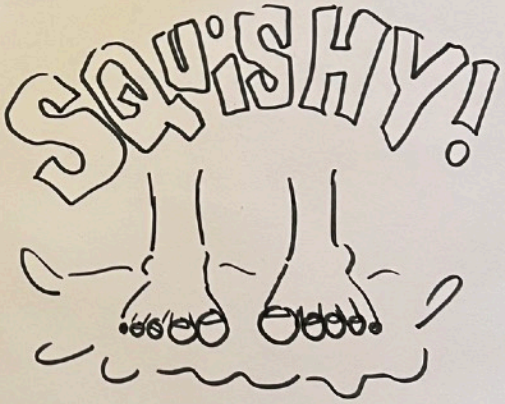

MUD - Polly Chase Boyden

Mud is very nice to feel
All squishy - squash between the toes!
I'd rather wade in wiggly mud
Than smell a yellow rose.

Nobody else but the rosebush knows
How nice mud feels
Between the toes.

I AM WATER

Author Unknown

I tumble
in torrents
down the mountain
sides steep
Plunging and pitching
to lakes dark & deep

I flow
and I flood
across rivers & plains
or gurgle
through gutters
and dribble down drains

I am
the spirit of water
born to flow and be free
to seep from snow and ice floe
to surge & spray as the sea
