Fantasy Landscape

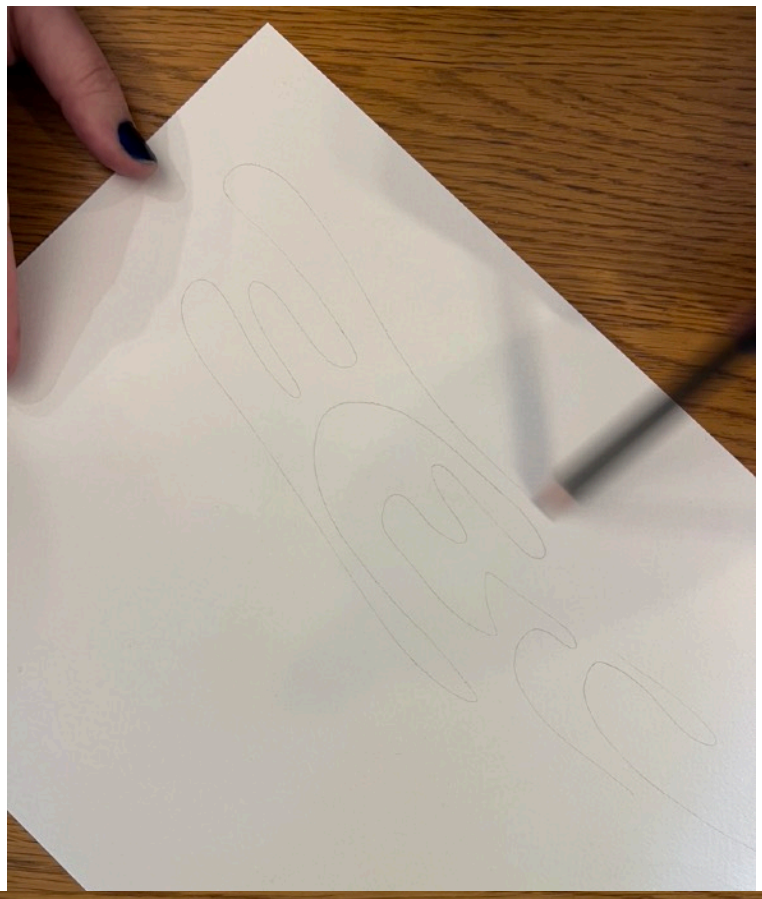

Why not create a landscape form your imagination - how you want it to look - things don't have to make sense (borrowing from surrealism) you can enjoy playing around with it!

Tools and Materials:

- Paper
- Pencil
- Paintbrushes
- Watercolour
- Water

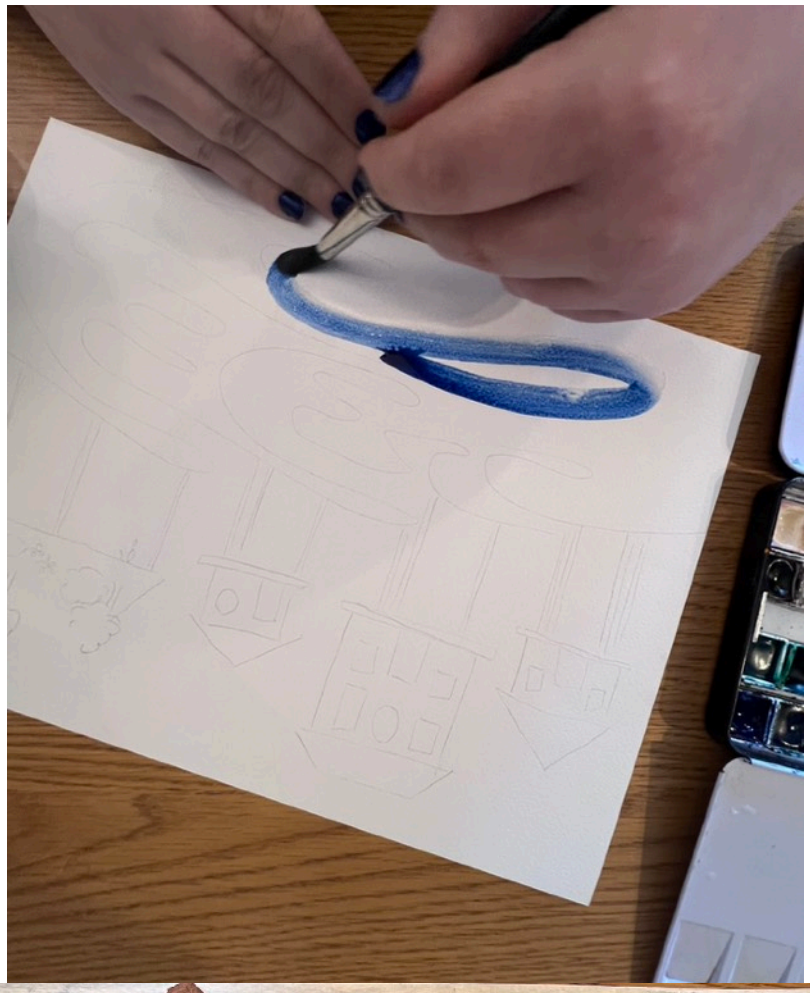

First of all start sketching out your landscape - what elements do you want to include? We thought it would be fun to create a village in the middle of the ocean on stilts!

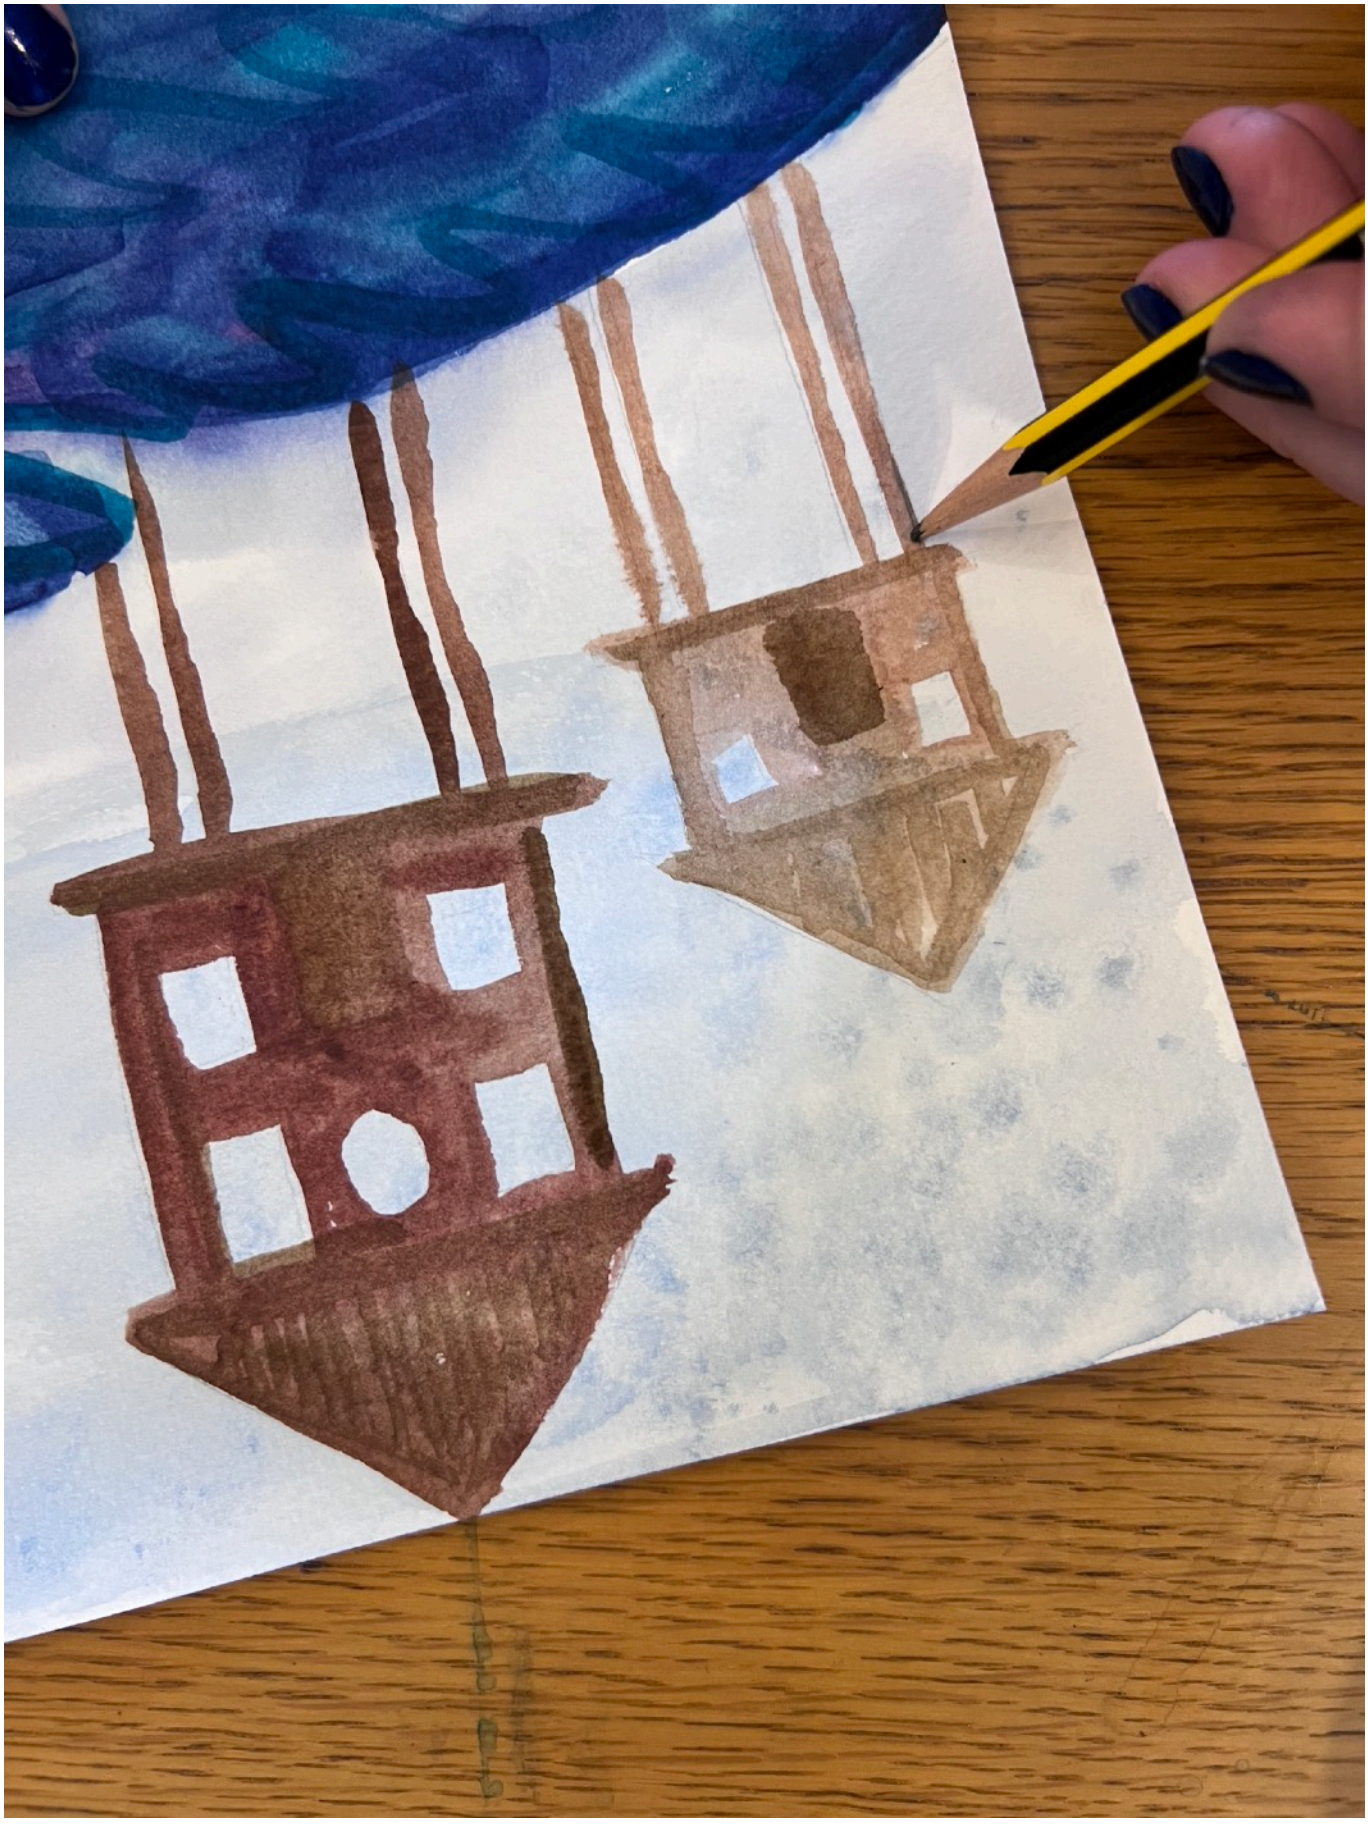

Once you are happy with your sketch then you can start t paint it with your watercolours

Once it has dried then you can outline it again with pencil or even a pen if you prefer. Outlining just helps it pop a bit more and make smaller details easier to distinguish

There you have it your very own “Fantasy Landscape”!

Here is another we made to inspire you!
