Father’s Day Folding Card

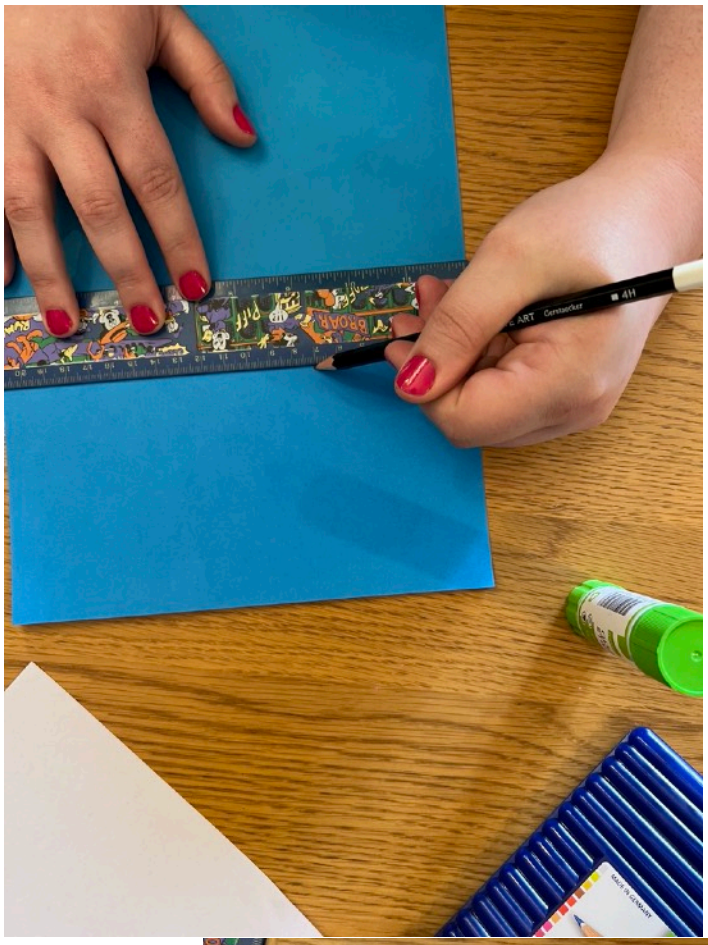

Why not create this multi message card for Father's Day, Mother's Day or any other celebration you fancy crafting one for!

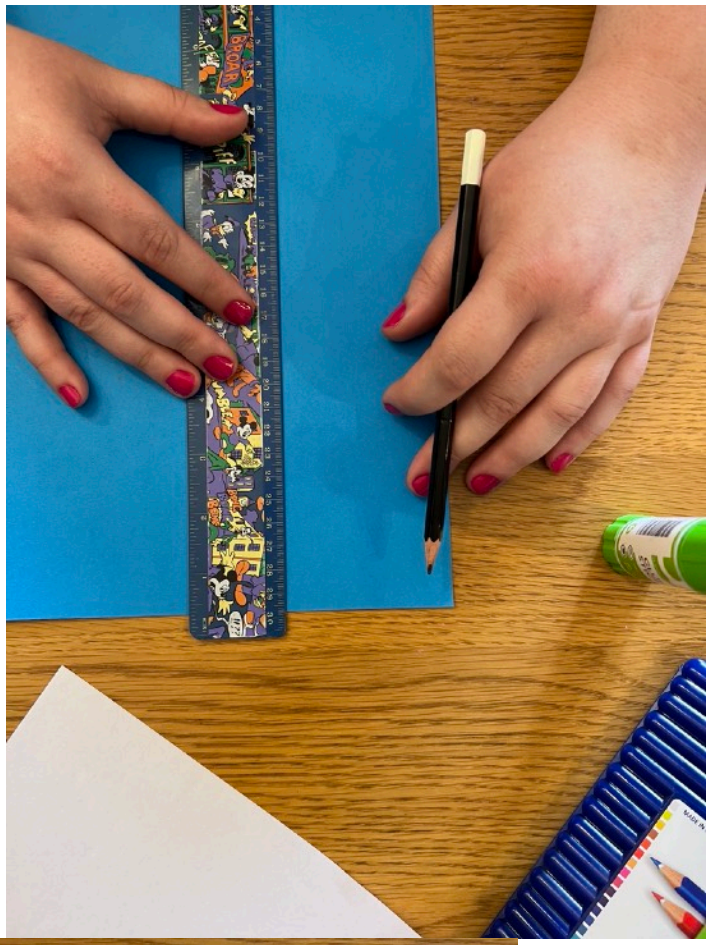

Tools and Materials:

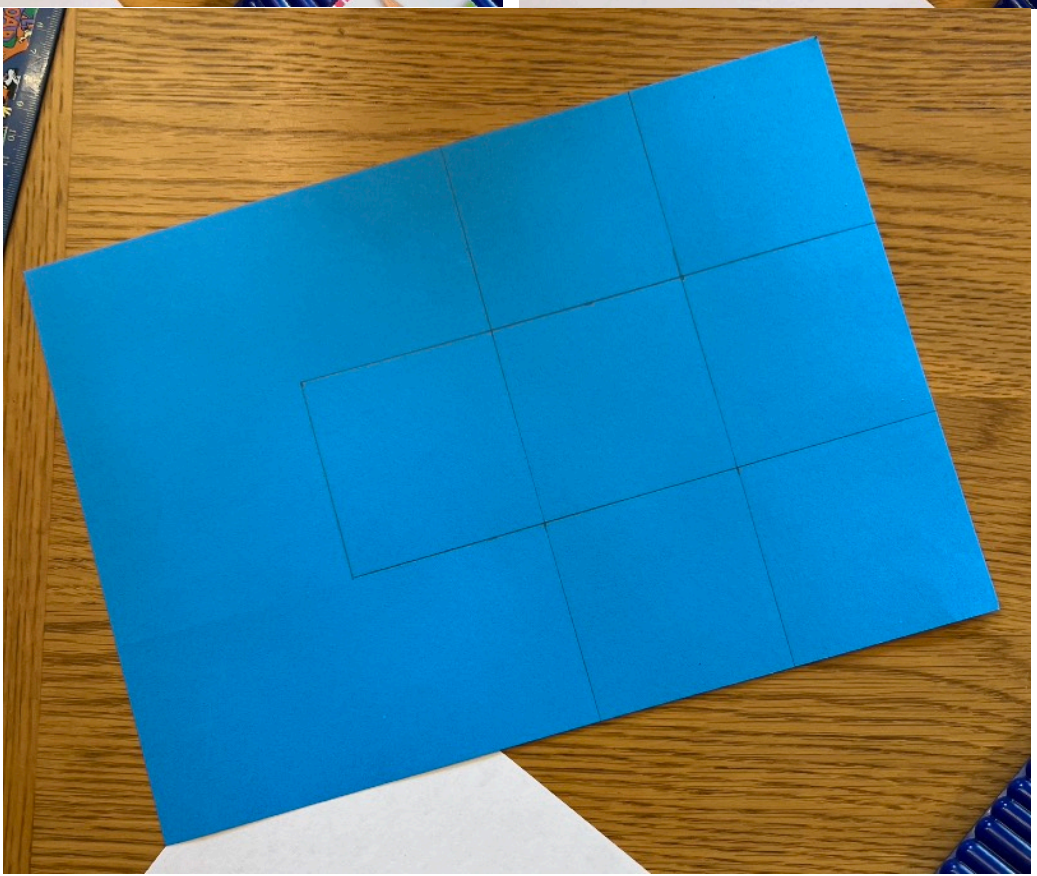

- Coloured Paper
- Paper
- Pencil
- Gluestick
- Scissors
- Ruler
- Colouring Pencils

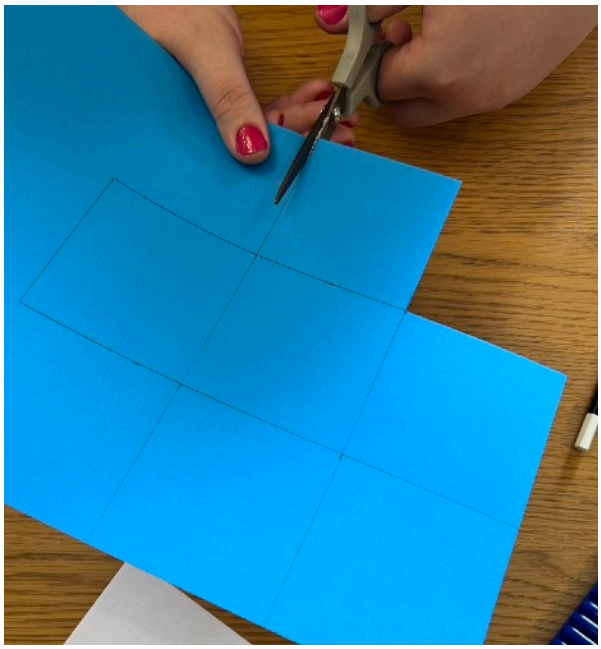

First of all you need to make the base of the card - which is nearly the net of a cube minus 1 side. You will have 5 squares in what looks a bit like a cross or an X - using A4 paper we drew our squares 7cm x 7cm like so

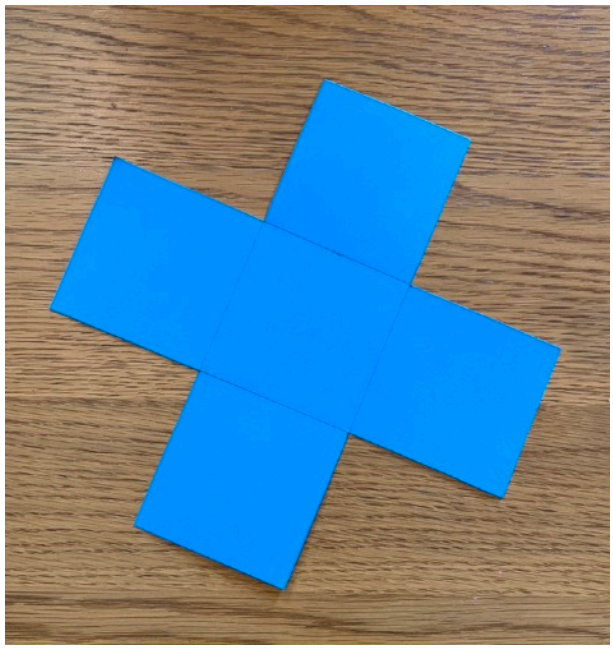

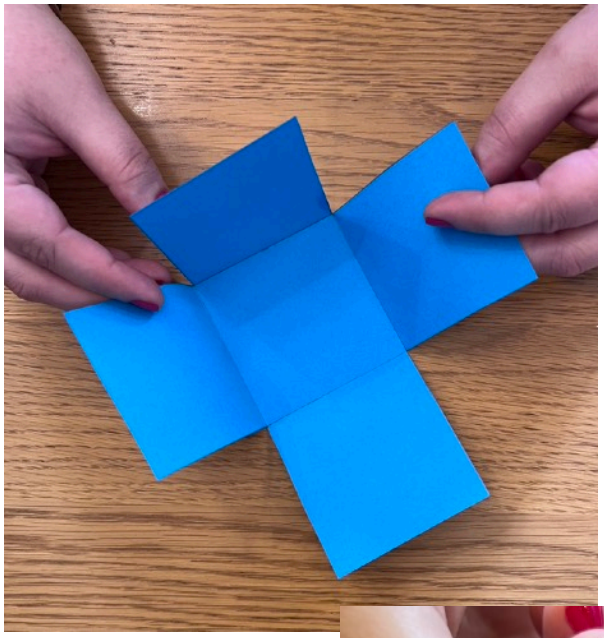

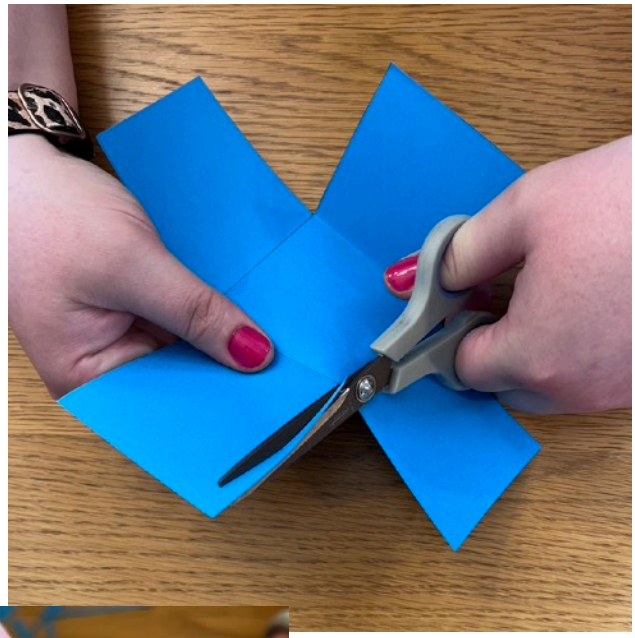

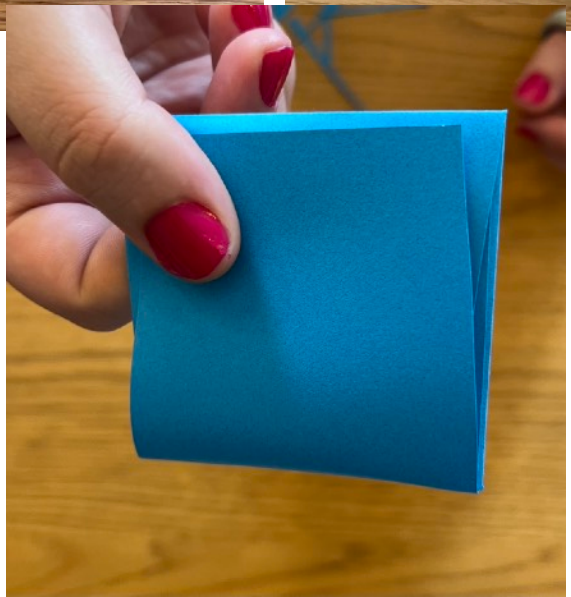

Once you have got the shape then you can cut it out and then fold it along the lines to form creases then cut in again to angle in the sides to add a bit of interest to the card

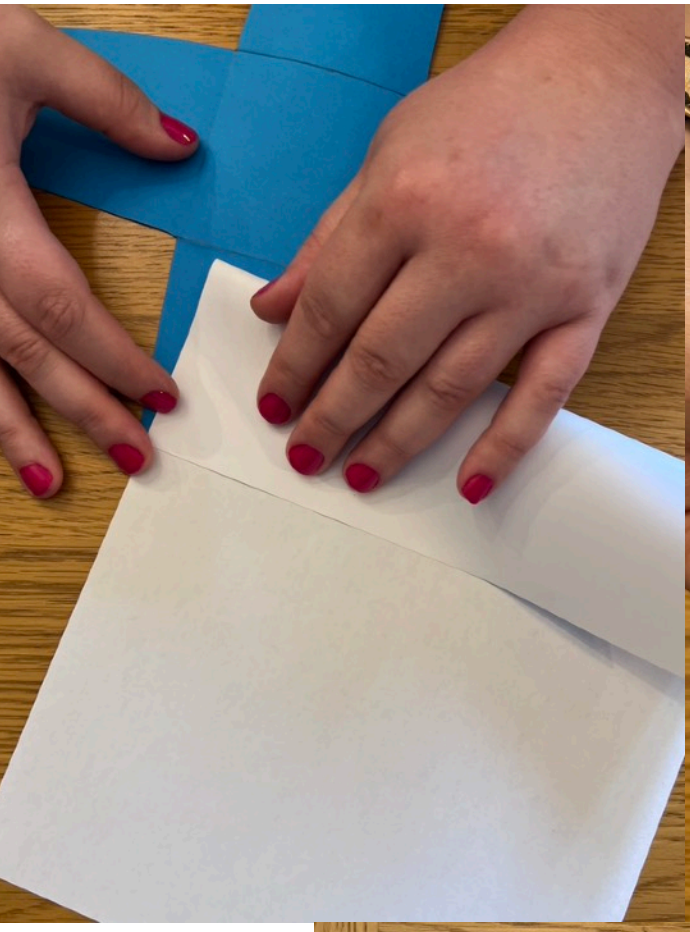

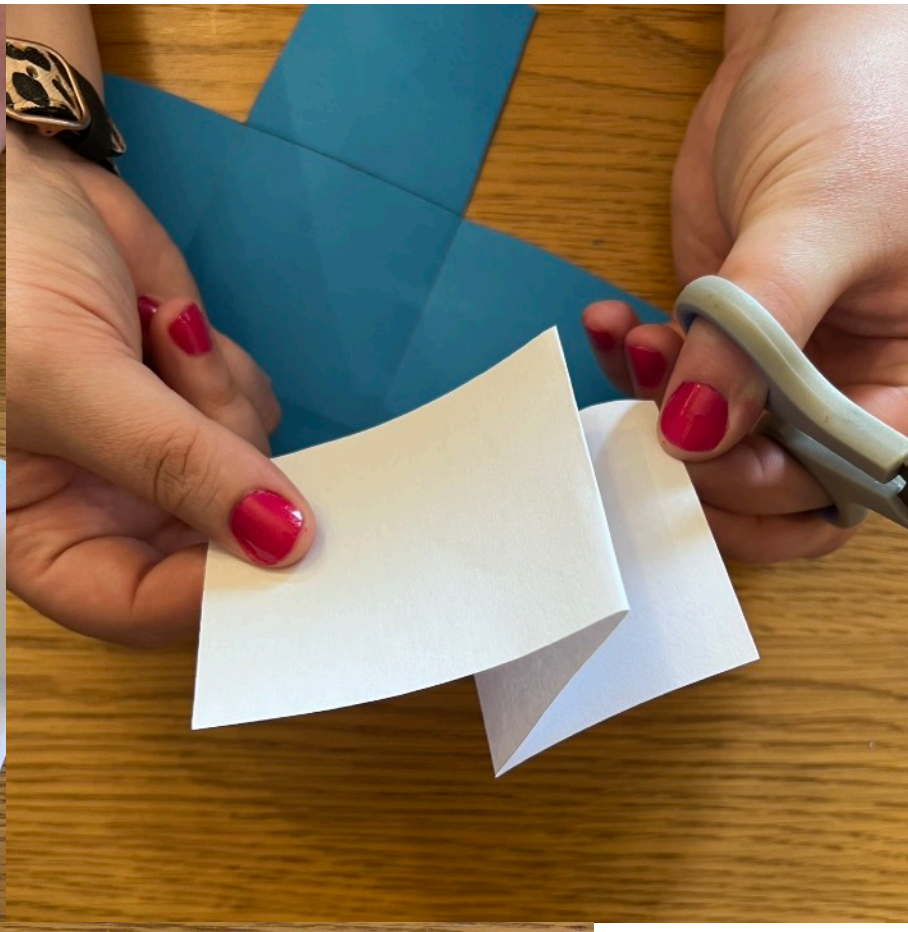

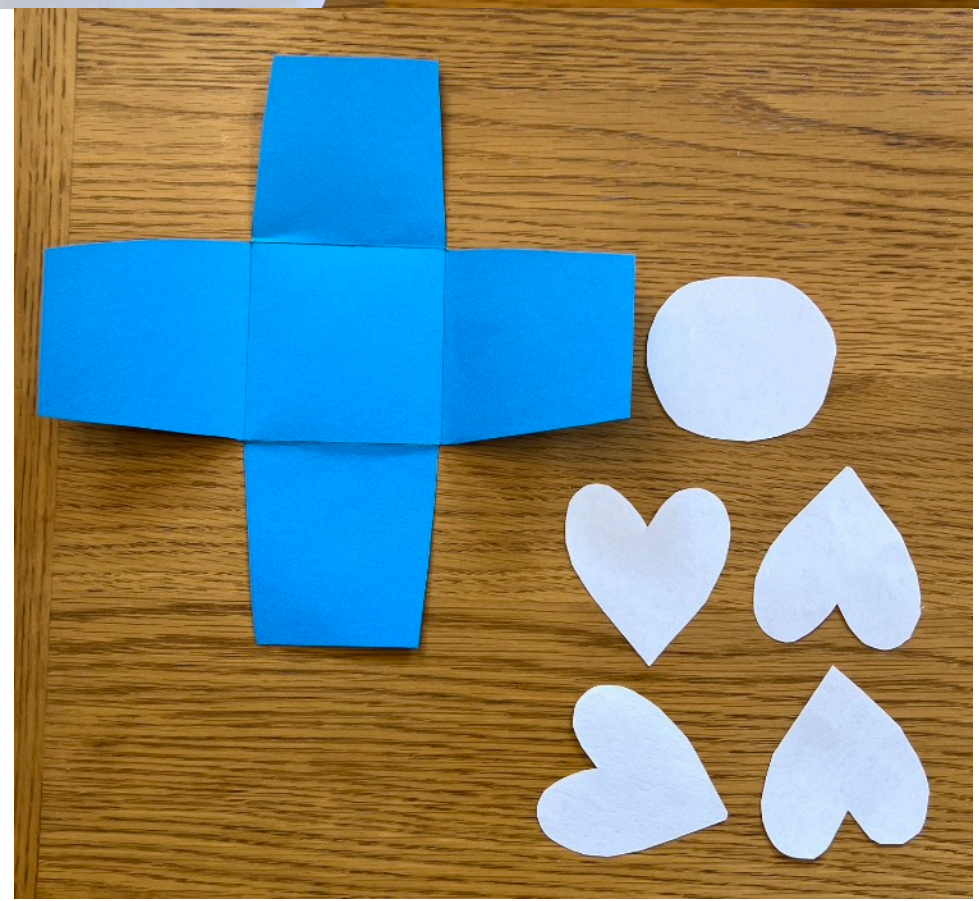

Now take your white paper and measure a strip that will be able to fit within the space, using the squares as a guide. Fold the strip a few times to get multiples of the shape you want to decorate with - we chose a heart and a circle

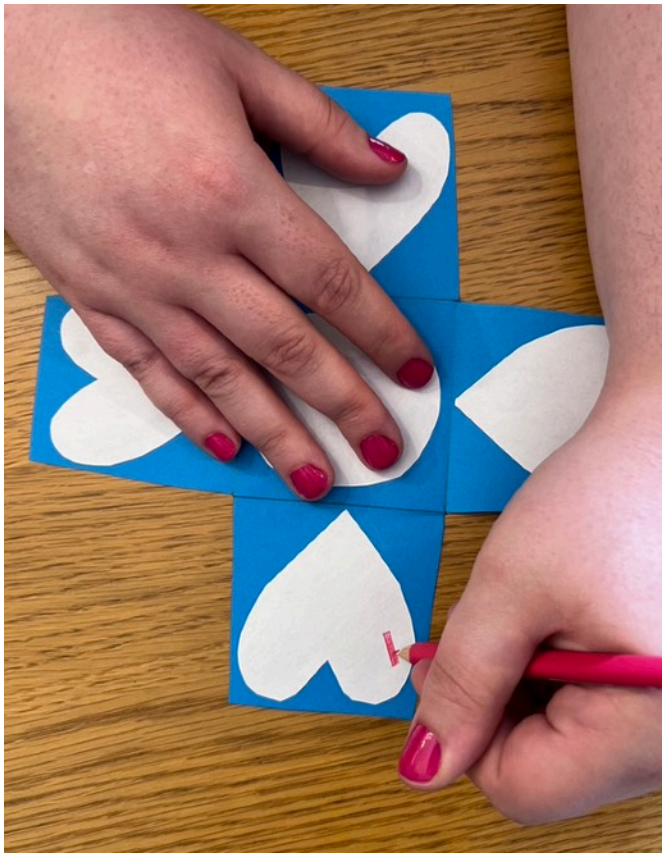

Once you are happy with the shapes then you can glue them on and start to decorate - we chose to do reasons our dads our the best dads

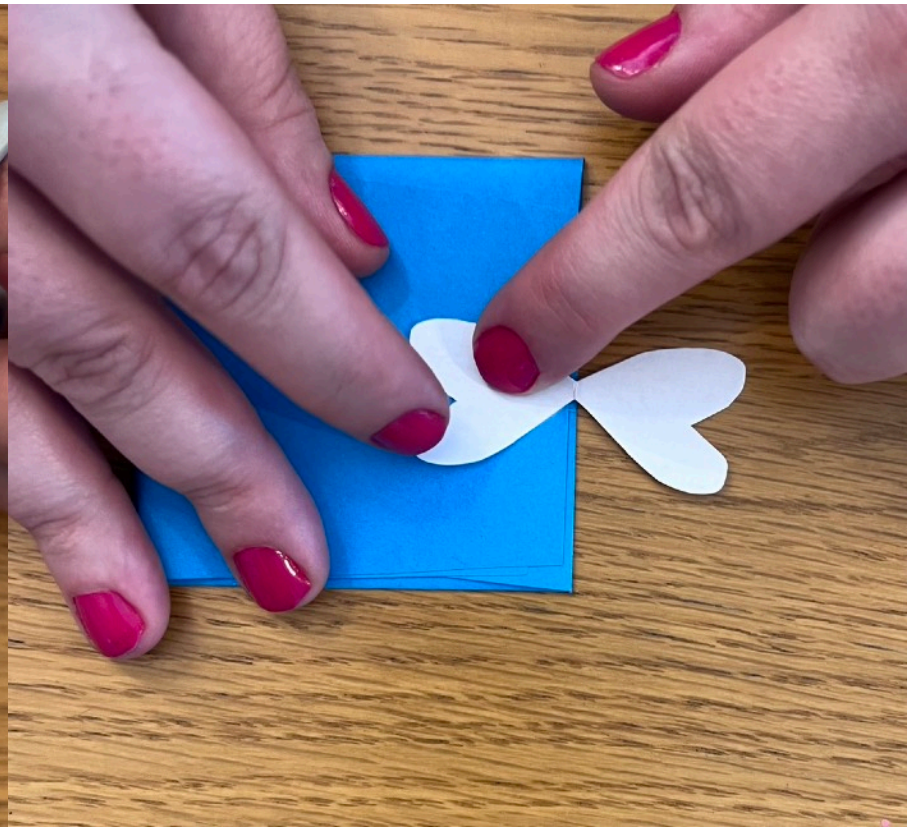

To finish it off we added a heart clasp - cut out 2 hearts (attached by the point because the paper is folded in half) then glue it either side to sandwich it shut like so

There you have it your very own
“Father’s Day Folding Card”!
