Cool it Art

Finger Print Hearts

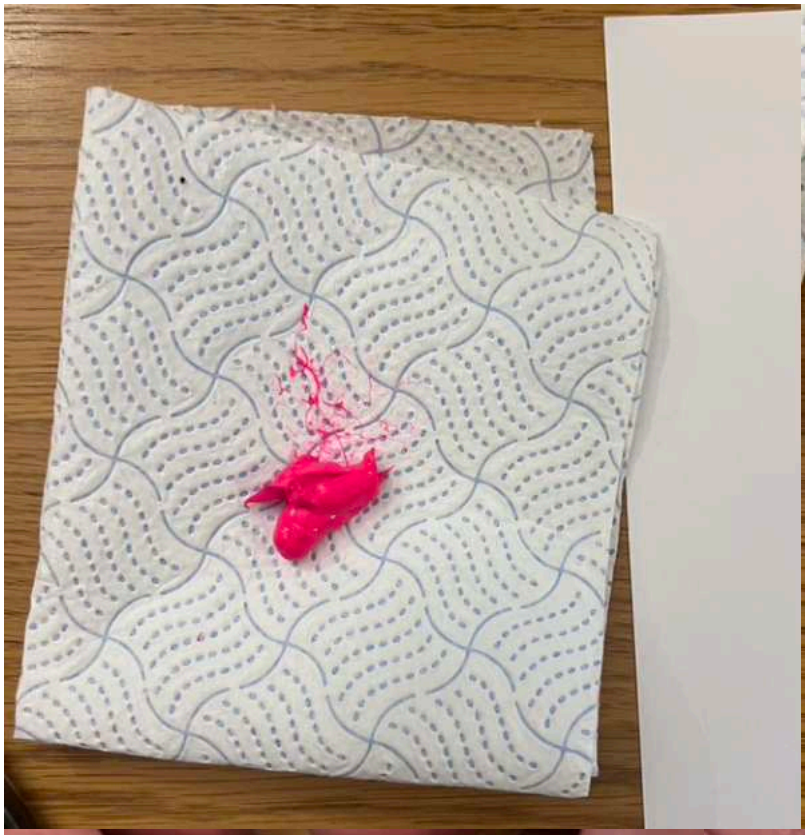

Inspired by Valentine's Day we thought it would be fun to create finger print heart posters for our friends and family to enjoy - plus we get to have fun being a little bit messy!

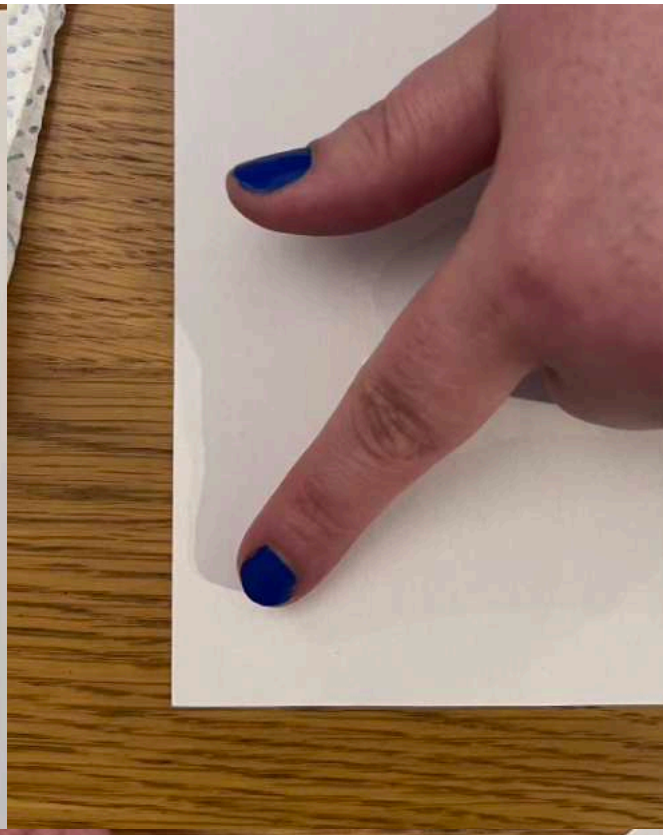

Tools and Materials:

- Paper
- Kitchen Roll or Paper Plate
- Acrylic Paint
- Black Fine Liner Pen

We decided to use a thick bit of kitchen roll to add our paint onto as a palette - you can use a paper plate, clingfilm over a plate, an empty clean yoghurt pot - whatever works best for you! This is nice and simple you just dip your finger into the paint and then start fingerpainting to create a V shape which makes a heart like so

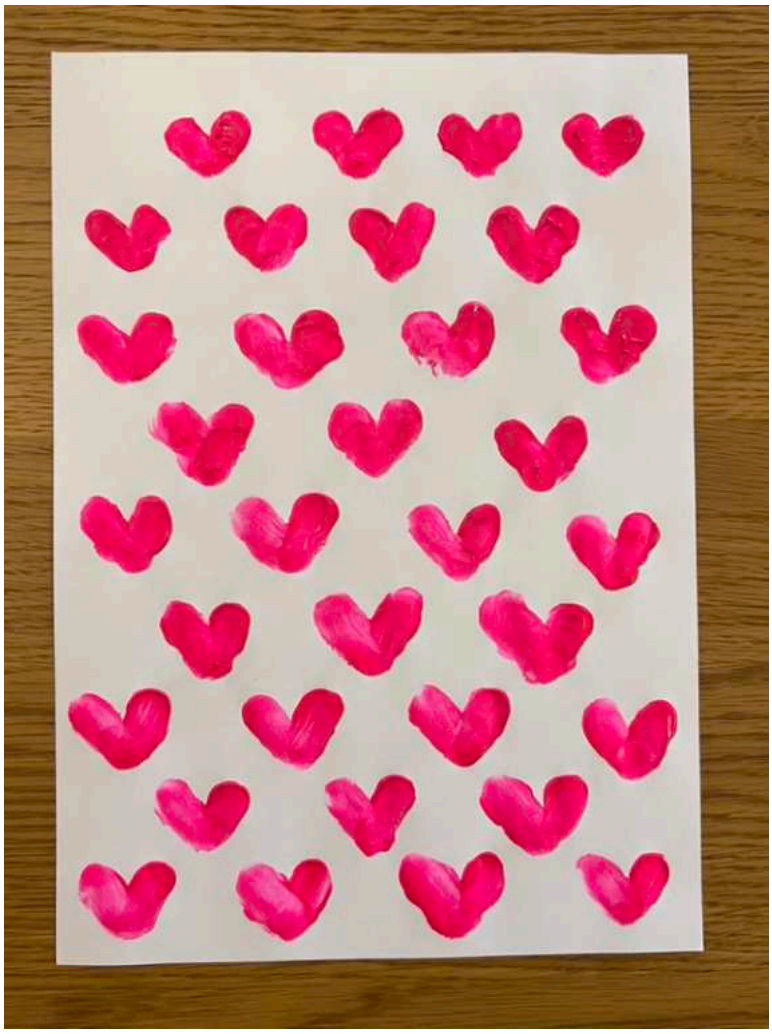

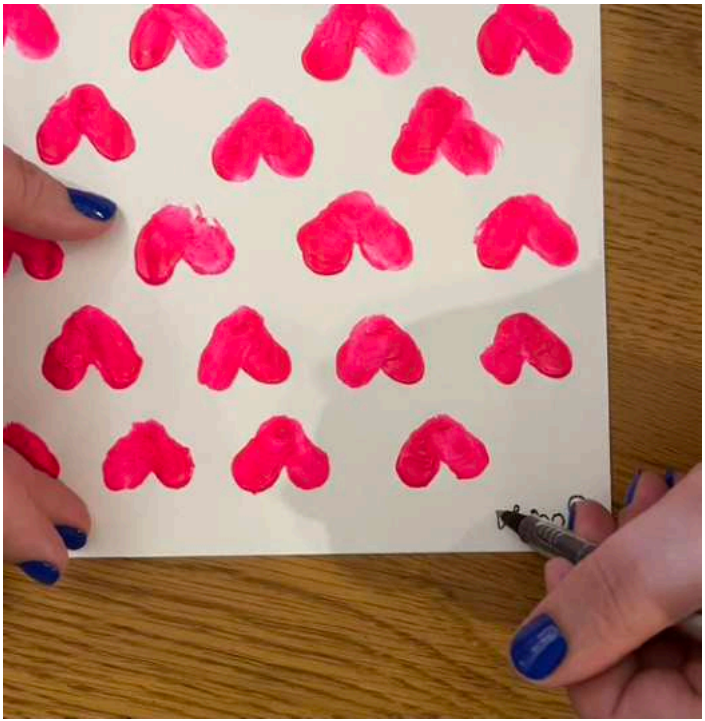

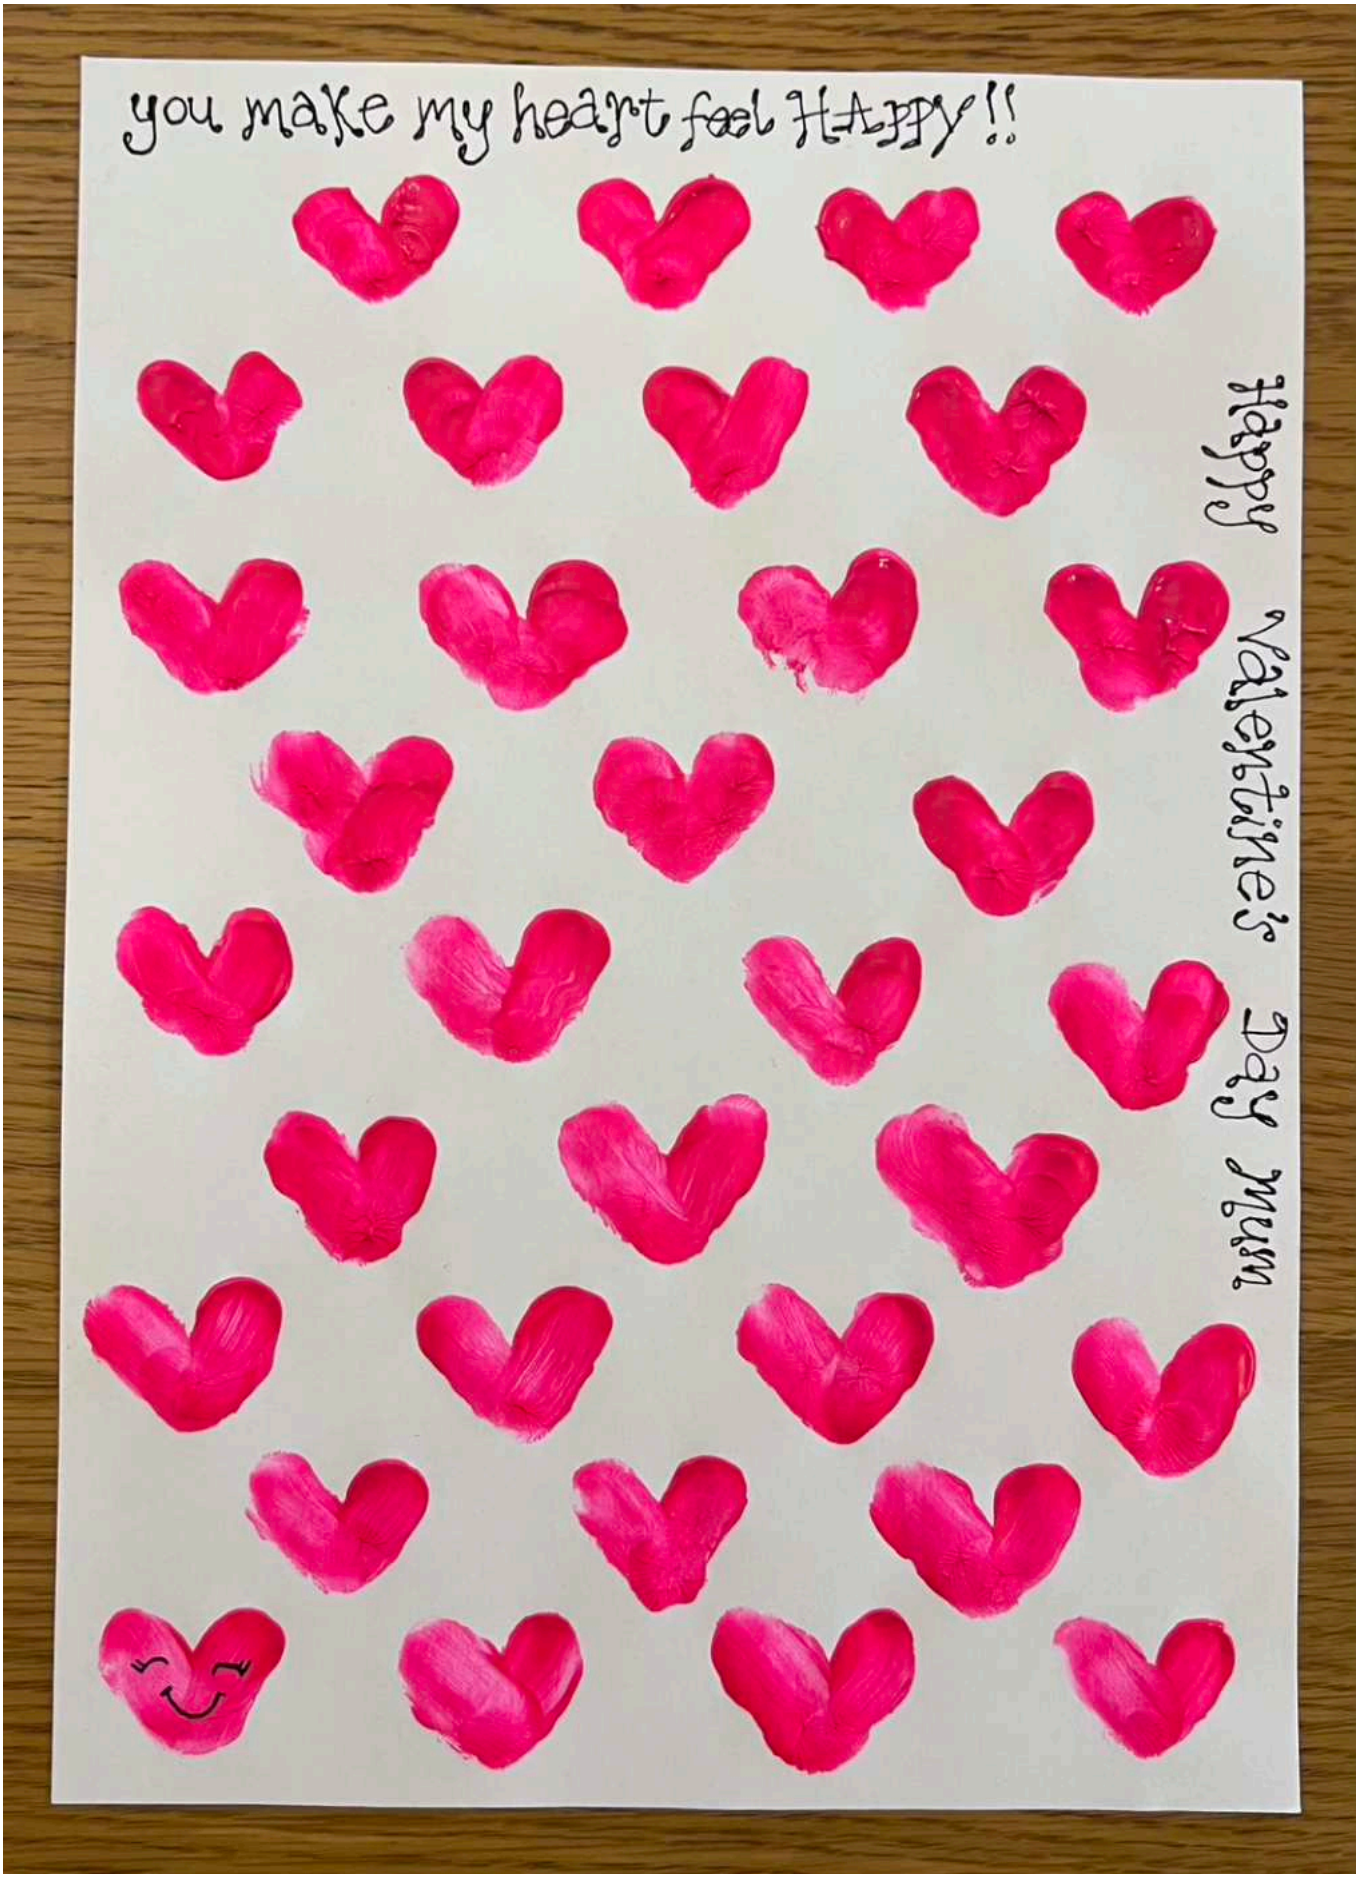

Keep on repeating till you have created as many hearts as you want for your design

When it has dried you can write your message and add any details in with the black pen

There you have it your very own
“Finger Print Heart Poster”!

Here is another we made to inspire you!
