Floral Font

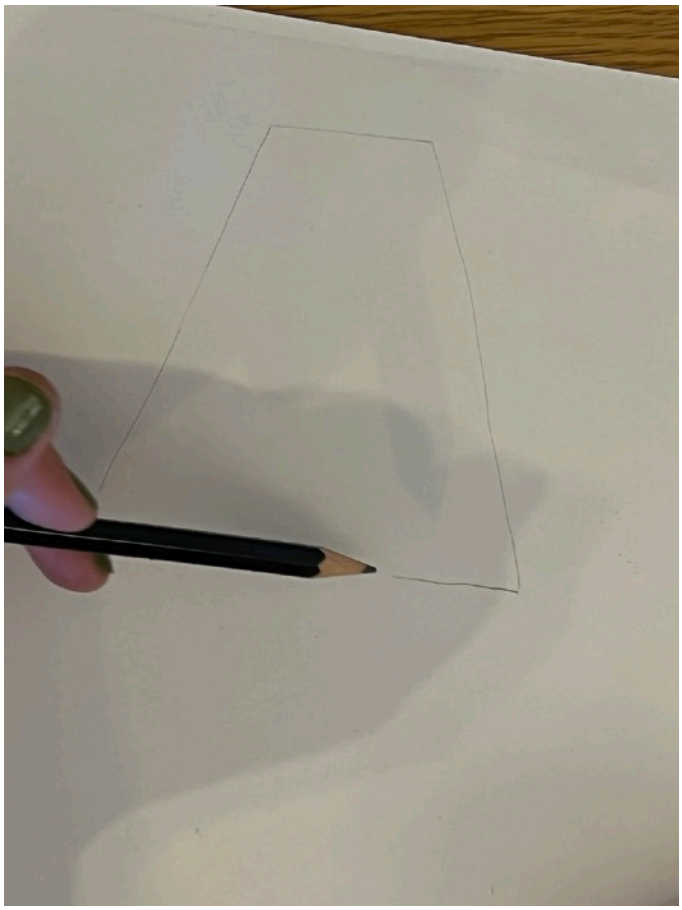

Why not create your own flower-filled letters for your initials or for friends or family as a personalised gift!

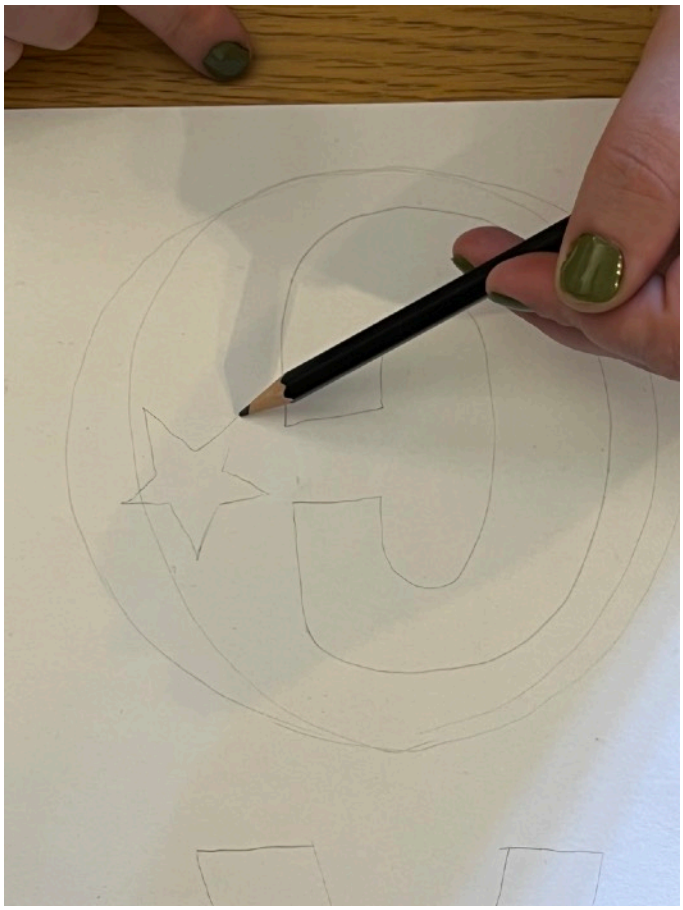

Tools and Materials:

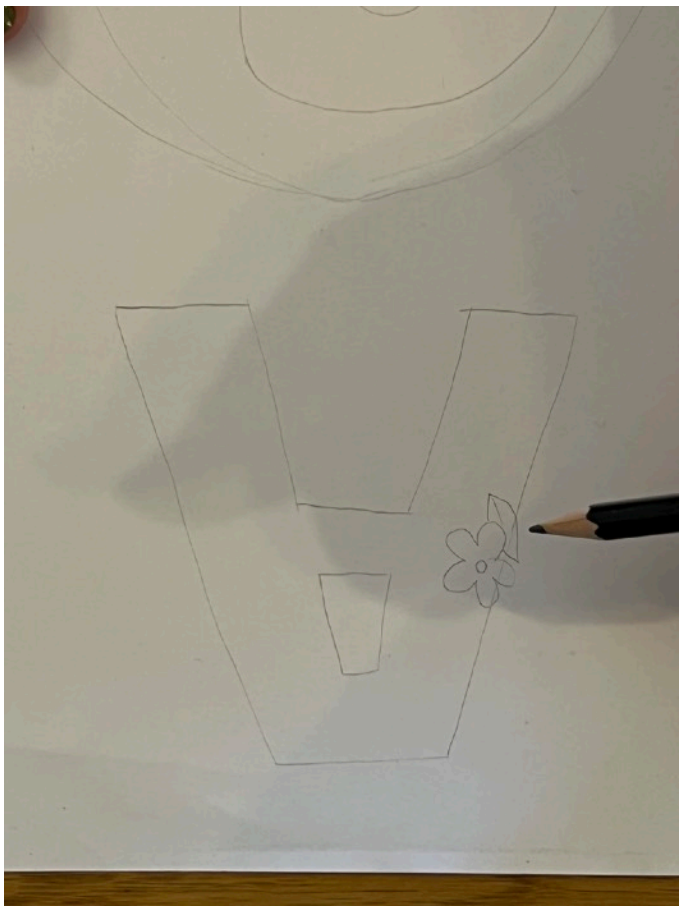

- Paper
- Pencil
- Colouring Pencils

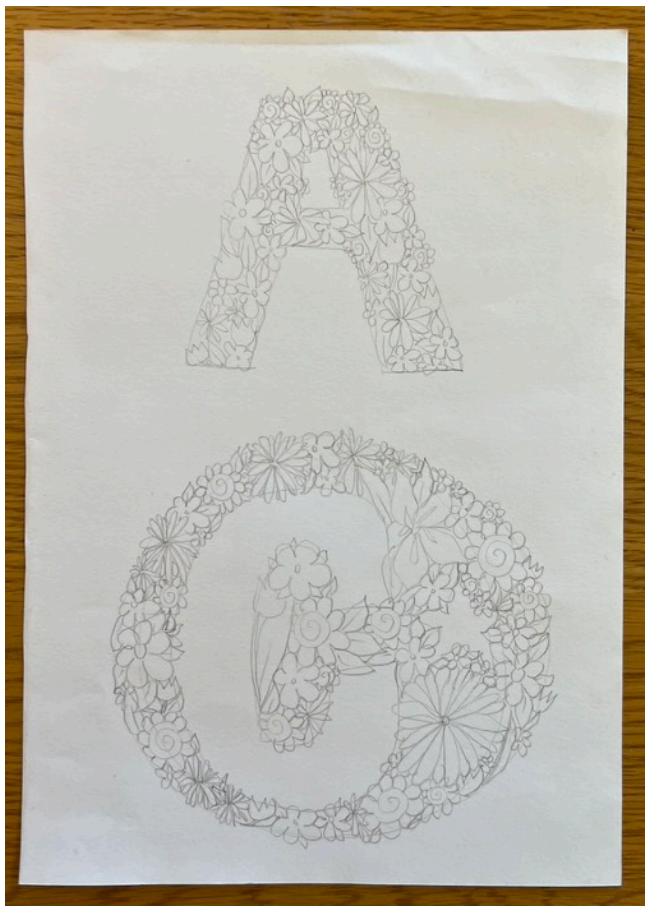

So for this we did 2 styles of Floral Fonts one full of flowers and the other as a cut out surrounded by a disc of flowers - with both sketch out your letter in a 3D way but then chose which style you want to do for it!

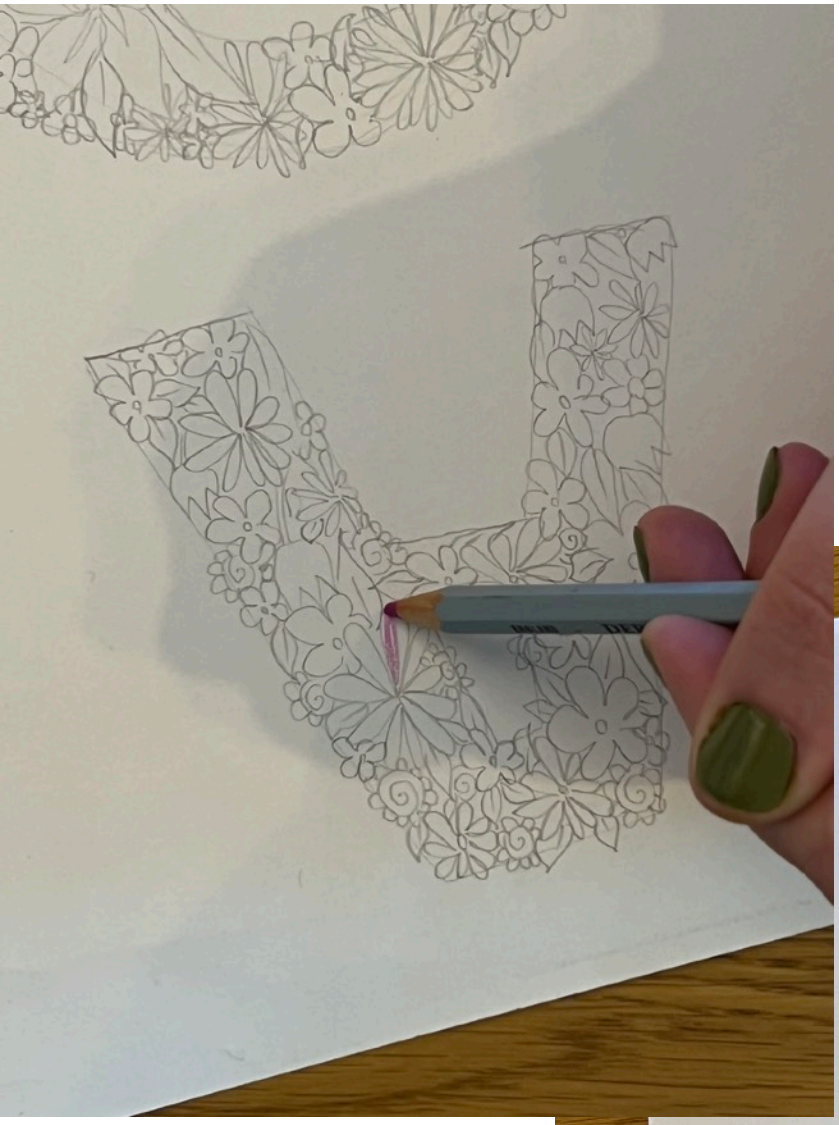

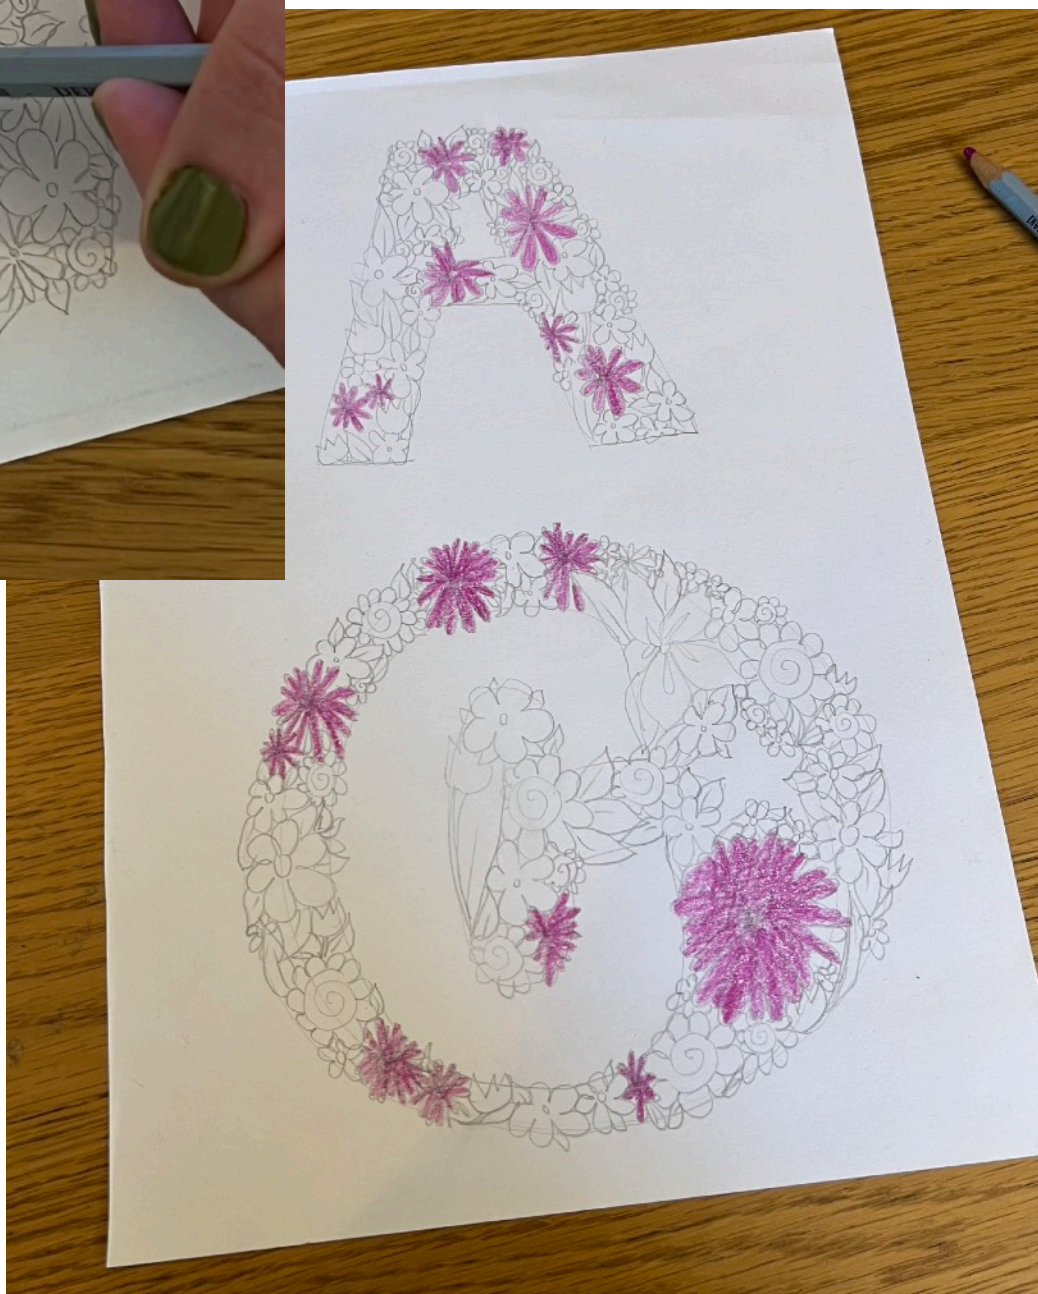

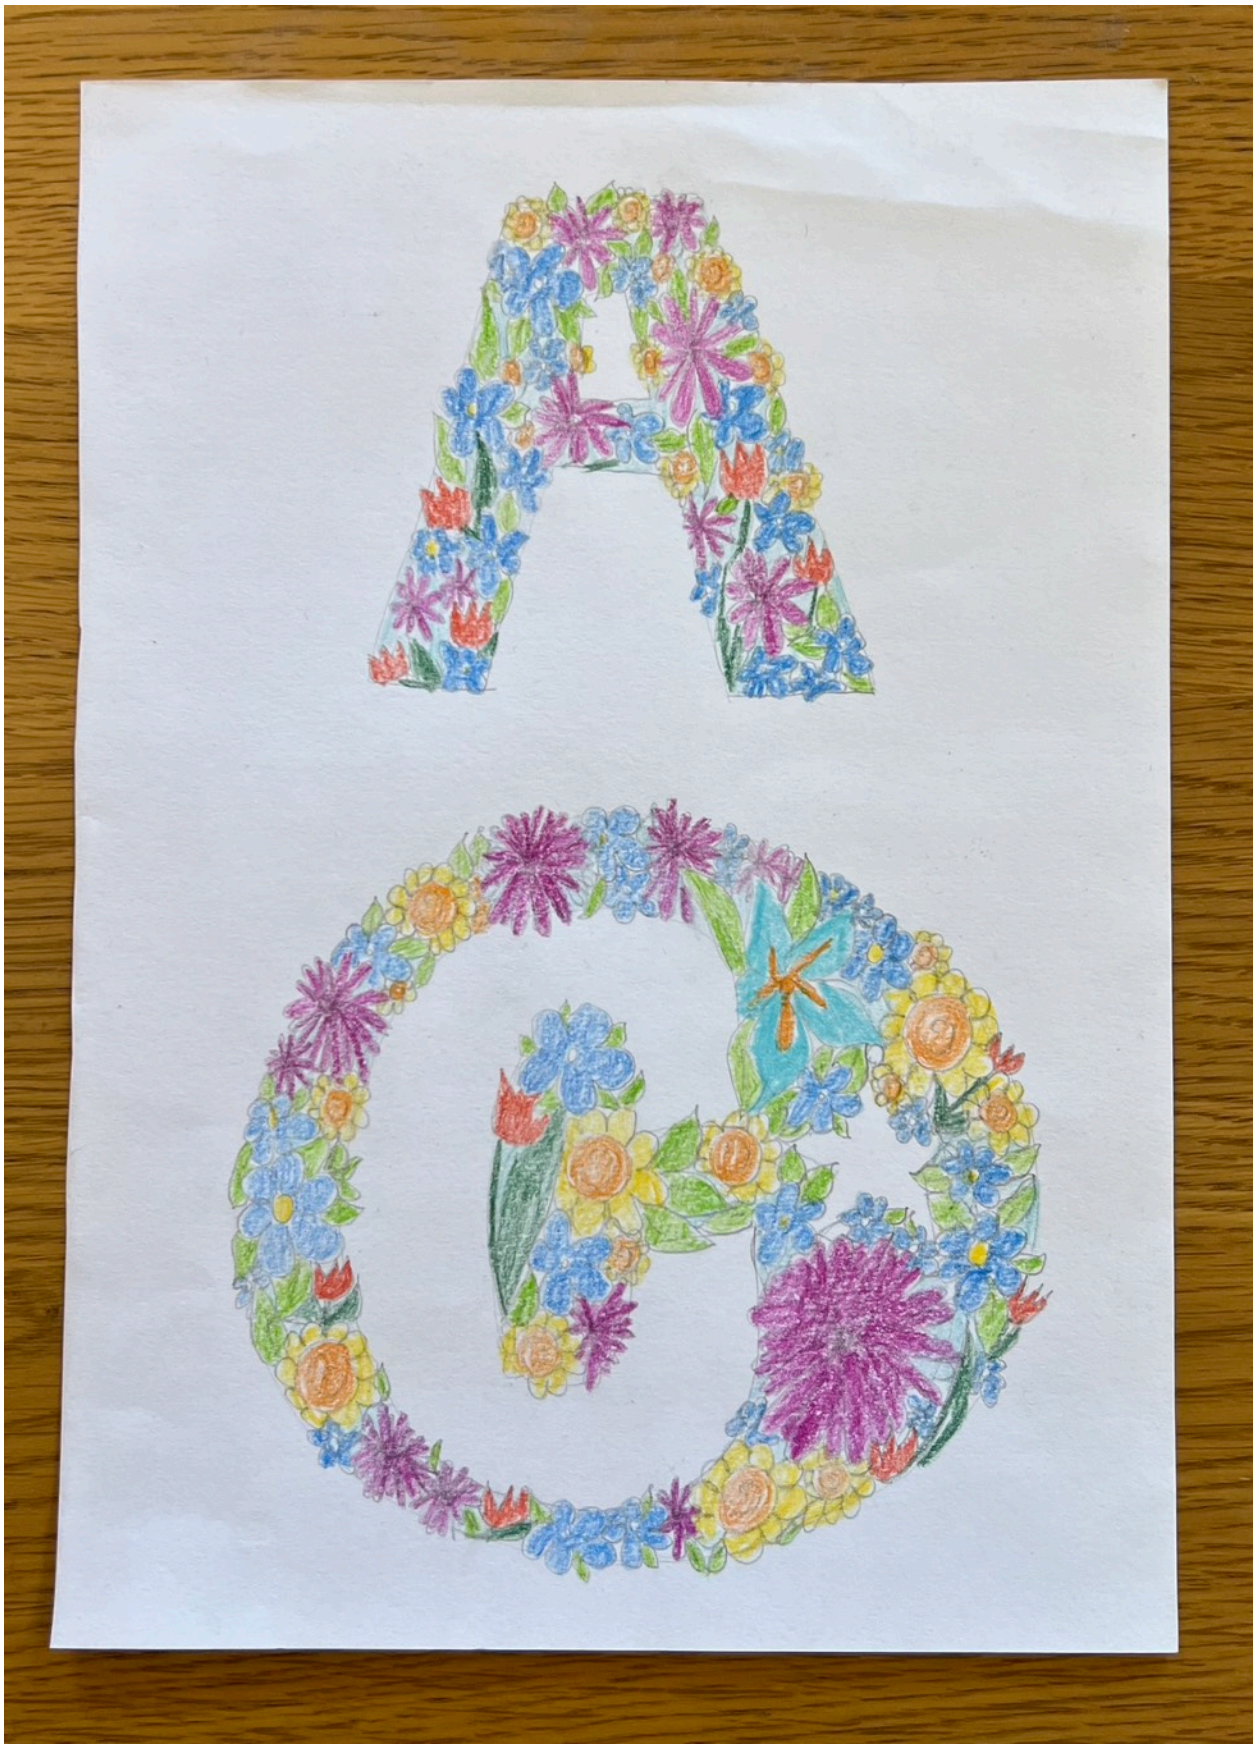

Once you are happy with the letters and the flowers filling the letter or disc then you can start colouring it in. We find it easier to do one colour at a time all the way through rather than switching pencils all the time

Once you have colour it all in you can leave it as is or go back in with the colours to outline in them or using the drawing pencil outline to create a more graphic bold look. It just depends on the look you are going for - there is no right or wrong

There you have it your very own “Floral Font”!

Here is another we made to inspire you!
