Friendship Flower

30th of July is International Friendship Day but we think every day is a good day to celebrate friends with these flowers you can gift them!

Tools and Materials:

- Coloured Paper
- Pencil
- Gluestick
- Scissors

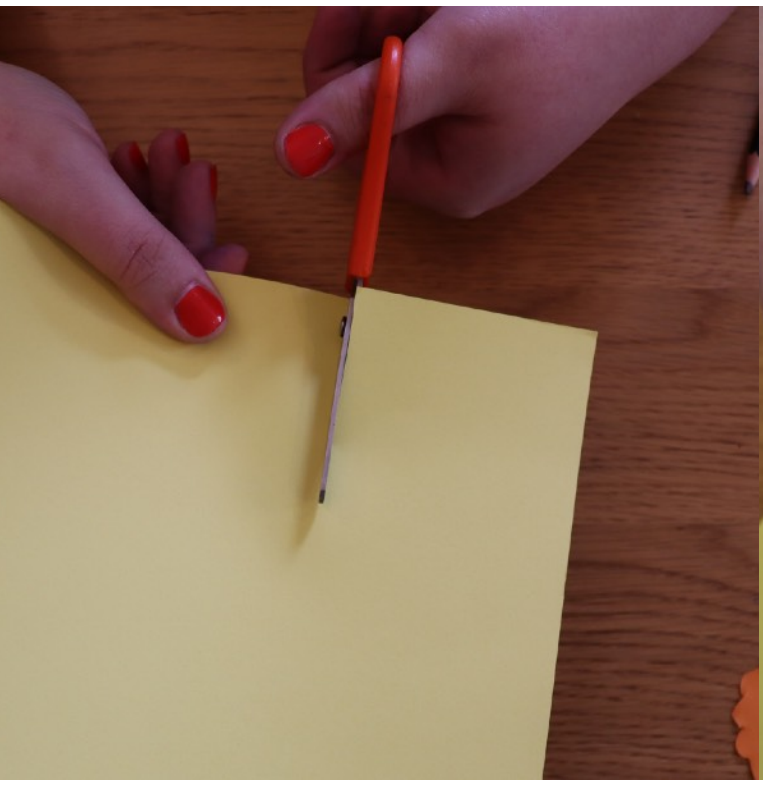

First of all we wanted to make our flower - we thought a Daffodil-esque flower could be fun so started drawing and then cutting out the curved centre like so

Then to create the petals, cut a strip of yellow wide enough to fit the length of the petal, fold it over a few times so you can cut multiple petals at once

Once you are happy with your petals you can stick them to the centre of your flower

Then using your greens you can create the stalk, leaves and some grass for added interest - like the petals if you fold paper you can get 2 leaves the same shape like so

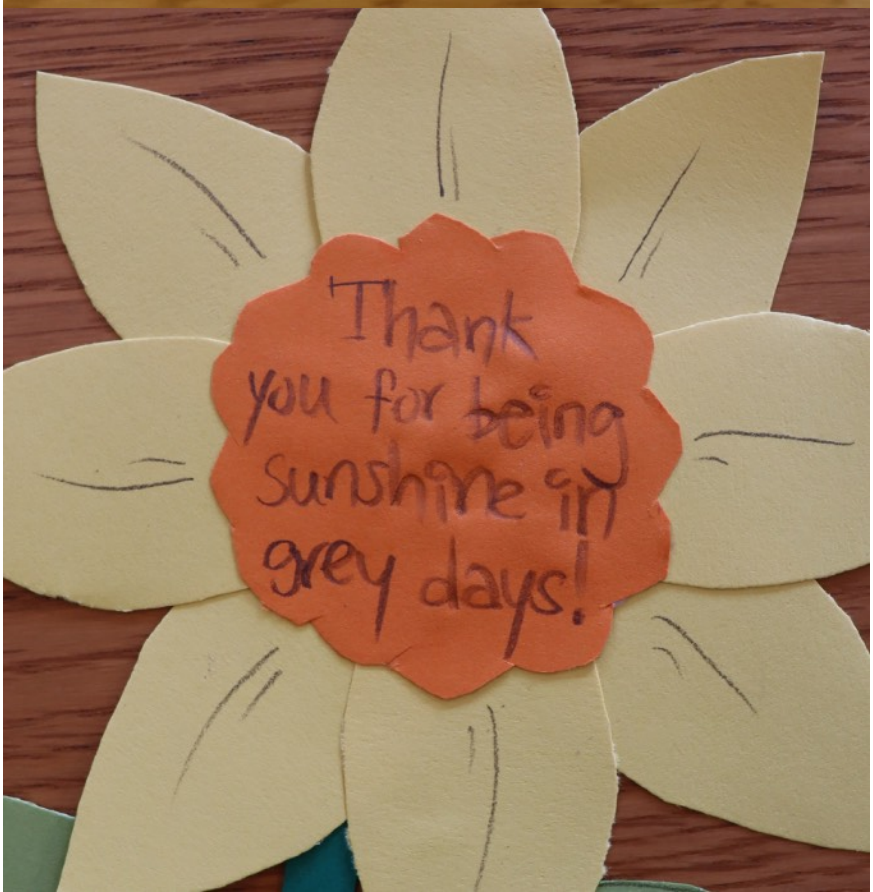

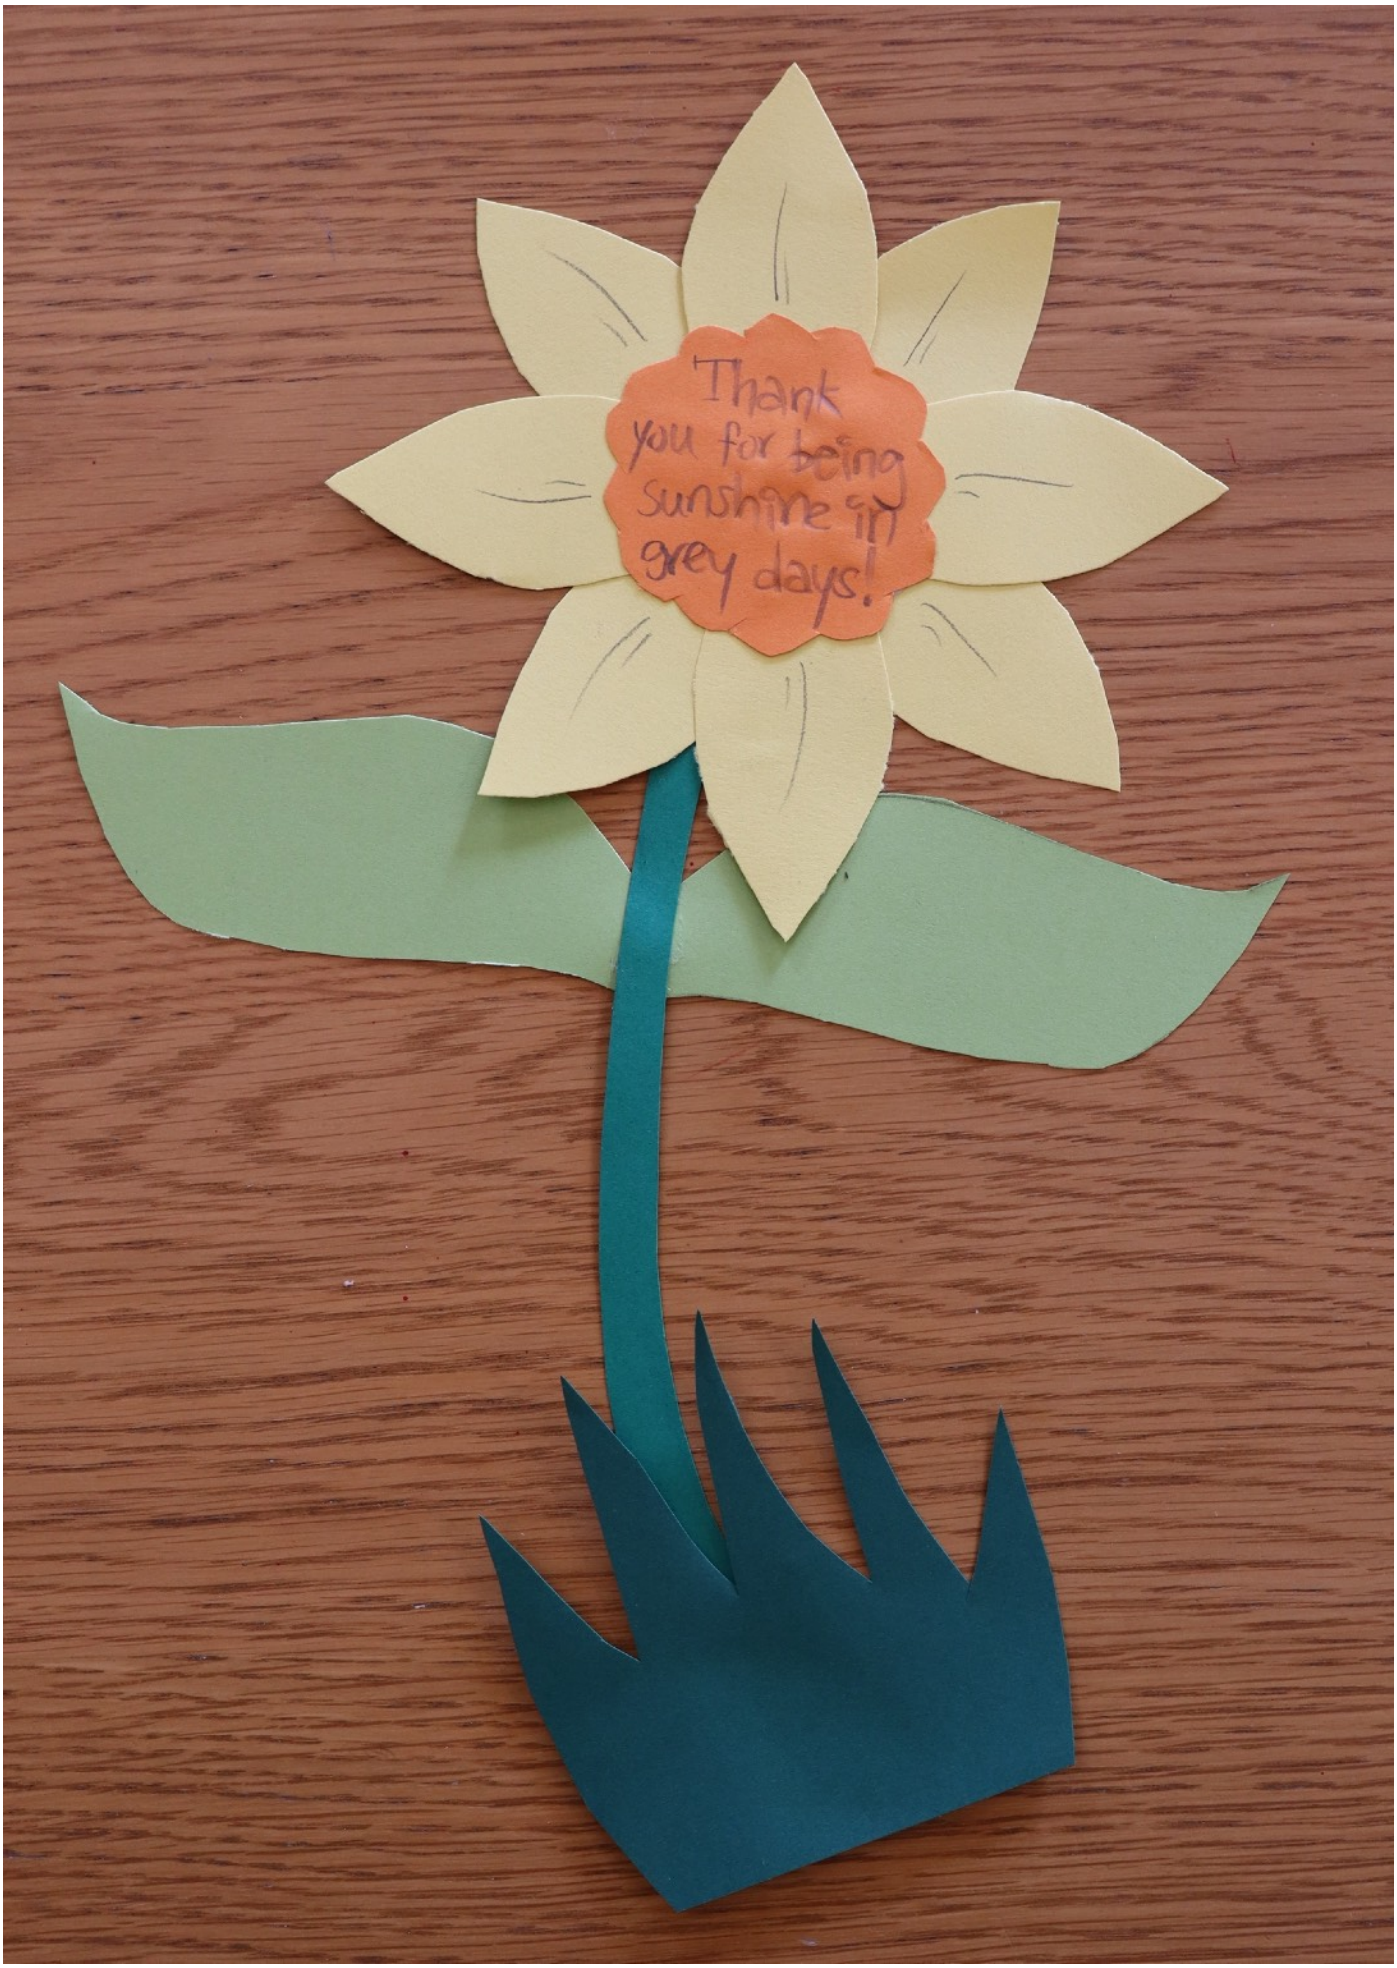

Once you are pleased with all your components you can stick them all together then lastly using your pencil add in any extra details plus the note you want to give to your friend written on the flower

There you have it your very own “Friendship Flower”!

Here is another we made to inspire you!
