Glitter Rangoli

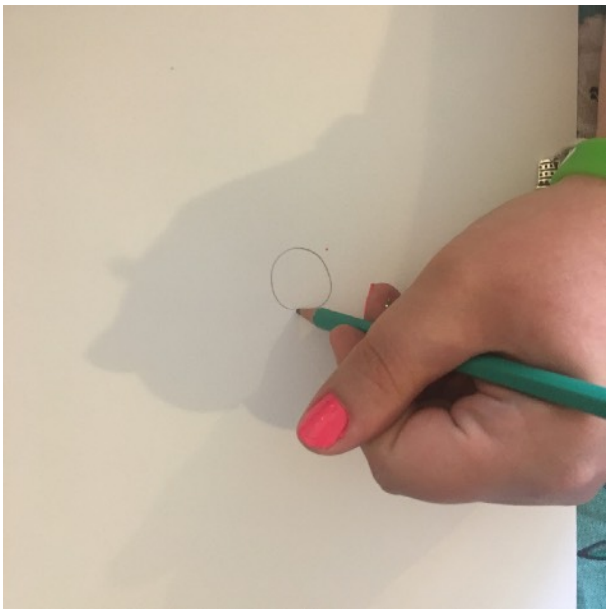

Glitter Rangoli if a fun way to create patterns with a bit of shimmer!

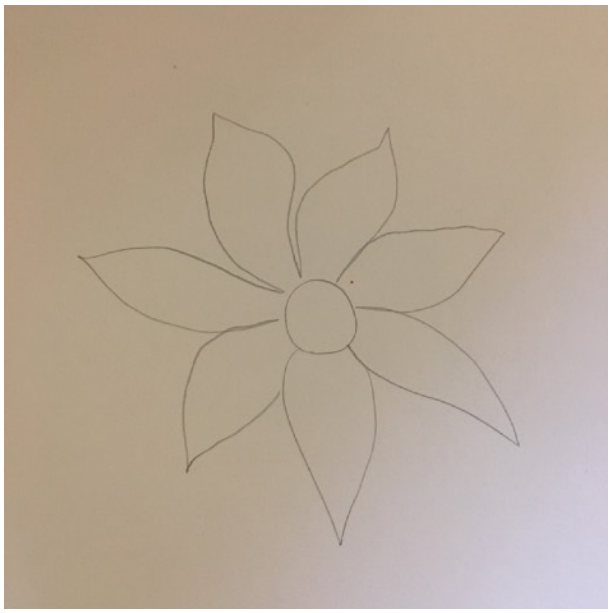

Tools and Materials:

- Paper
- Pencil
- Glue (small nozzle bottle helps!)
- Glitter in a variety of colours

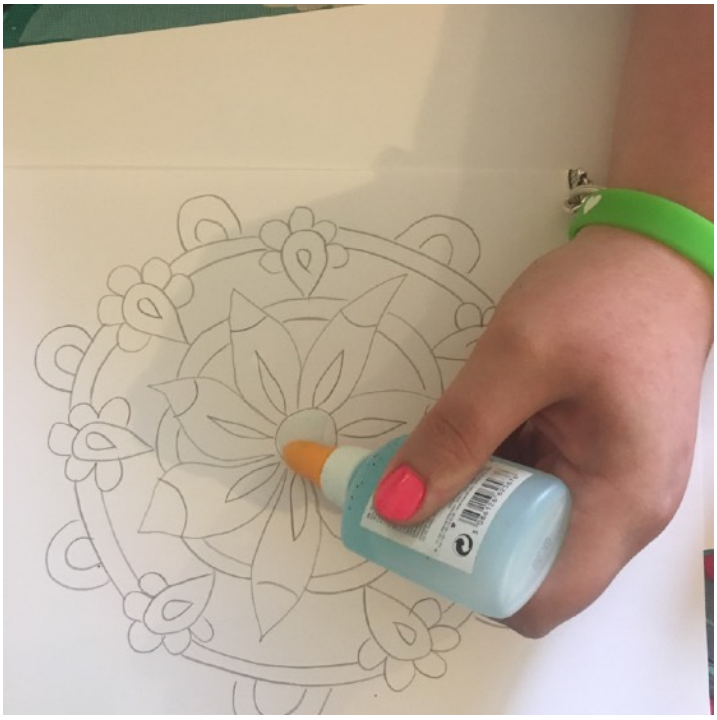

First of all start planning your pattern; Rangoli is mainly repetition of simple geometric shapes like circles and arcs.

Once you have finished drawing out your Rangoli fill in the glue for one colour of glitter at a time like so

Tip loads of glitter on the areas you want to to be that colour - all the extra glitter will be tipped back into the jar so don’t worry about putting lots on as you want it to be covered properly!

Using another piece of paper tip the excess glitter on to it - and then you can tip it back in to the jar

Continue adding one colour at a time or adding more bit to another colour like so

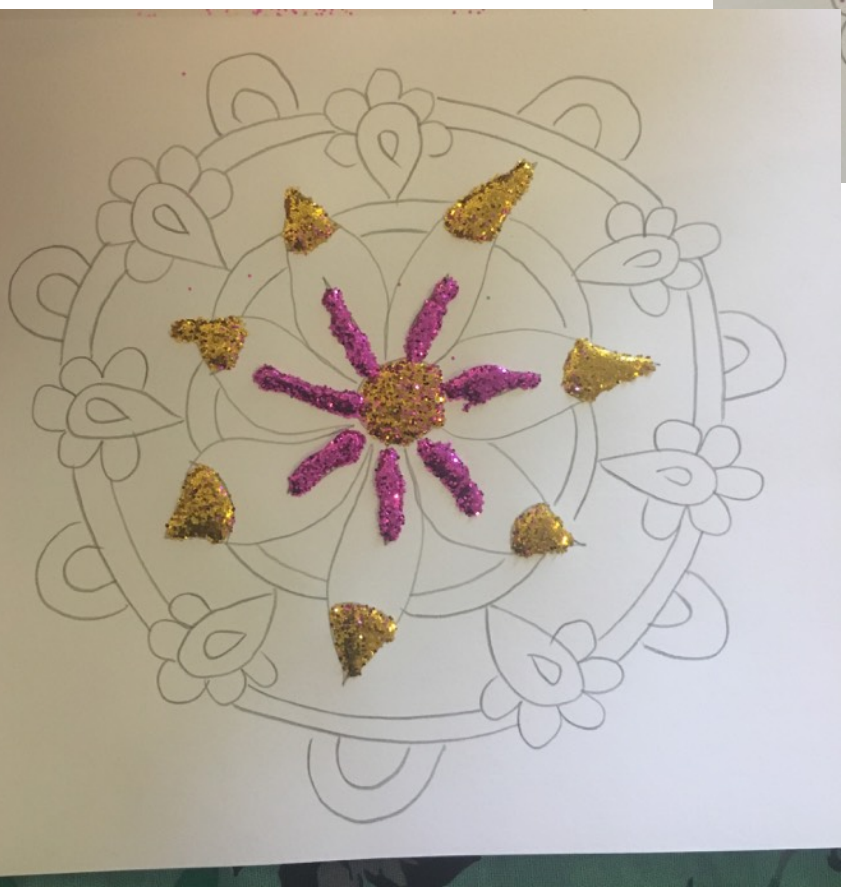

Keep repeating the process - plus giving them time to dry.

There you have it your own “Glitter Rangoli”!
