# Halloween Lantern Bunting

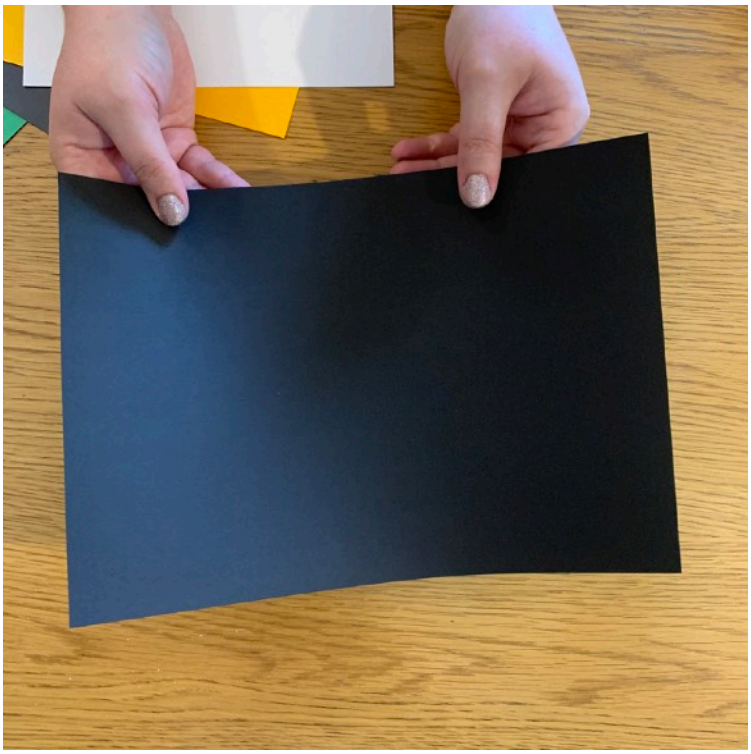

Celebrating Halloween why not create your own Spook-tacular 3D lantern bunting!

Tools and Materials:

- Coloured Paper (some for the bodies some for decoration)
- Sellotape
- Gluestick
- Scissors
- String

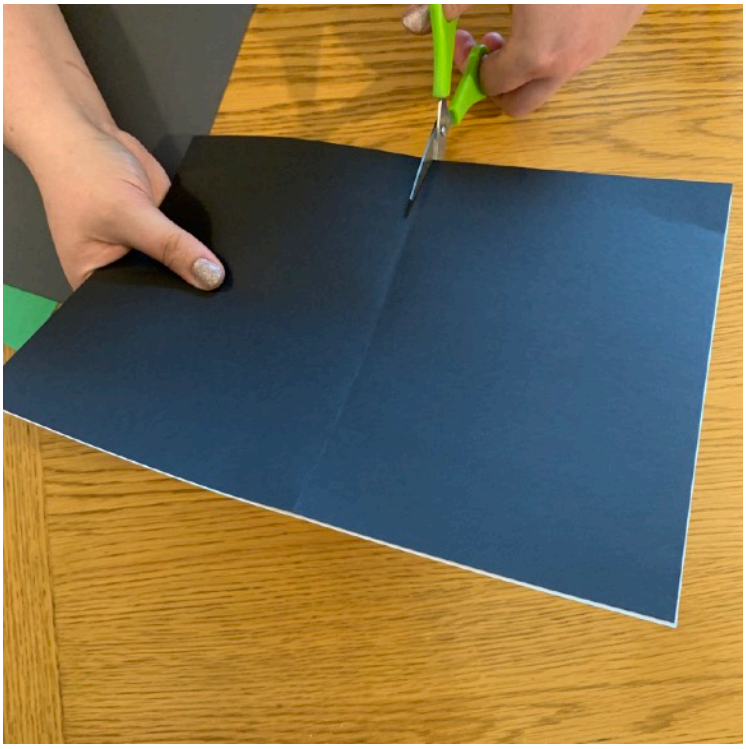

First of all to make the bodies of your creations take a piece of paper and fold it in half - do this for all the paper that you are using for the creatures, we are doing 2 ghosts, 2 pumpkins and 2 cats so need 1 sheet of orange, 1 sheet of white and 1 sheet of black to create 6 in total.

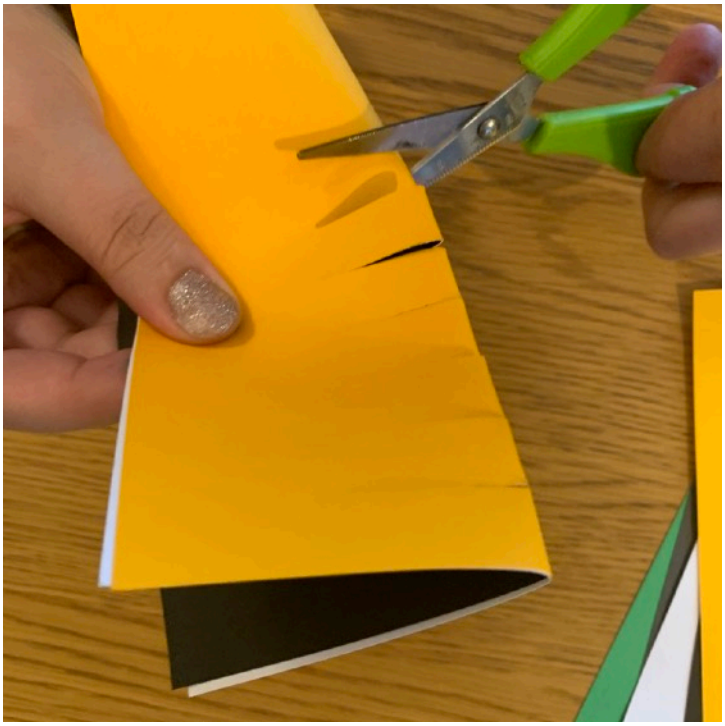

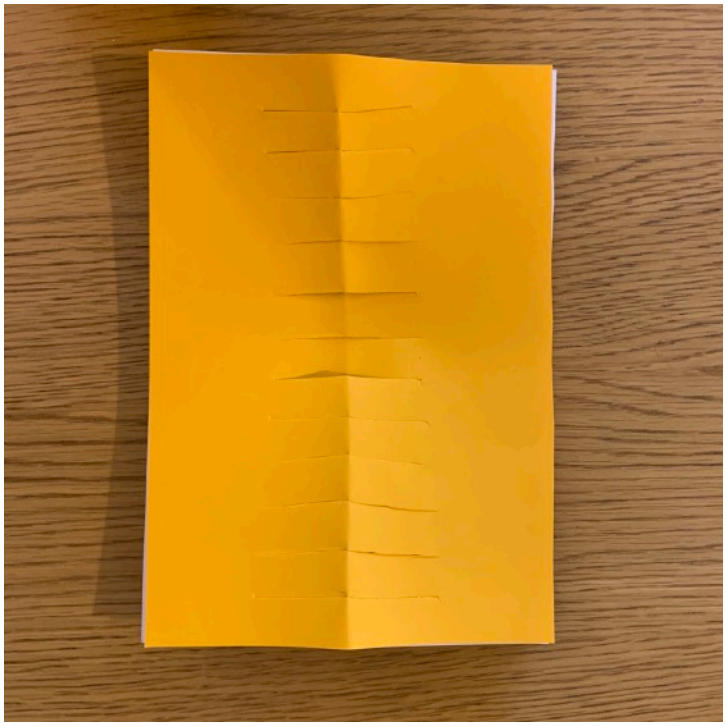

Taking your half pieces of paper fold them half long ways and cut slits about 1-2cms apart halfway up the paper like so

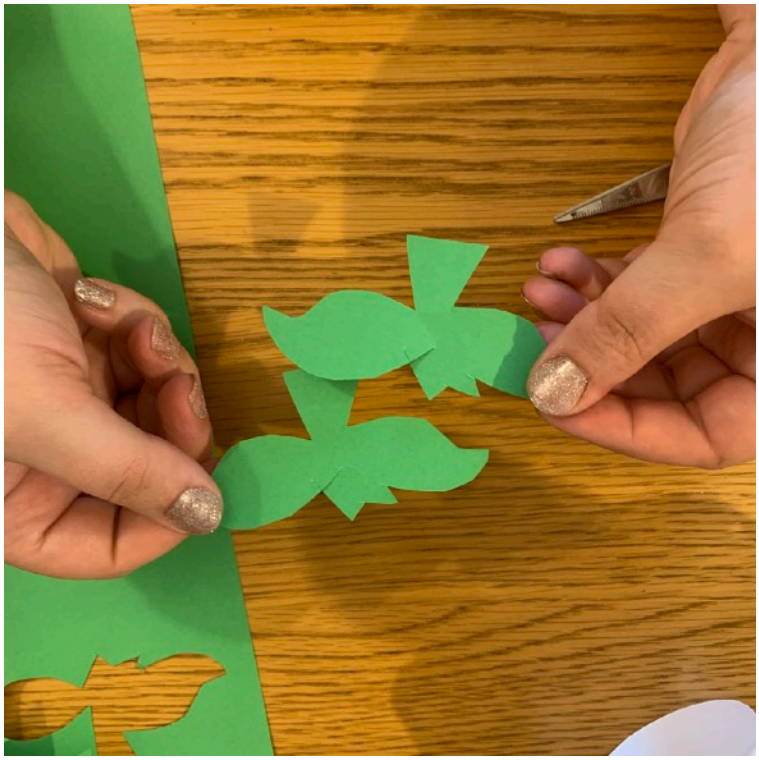

Take one of your bits of paper and bend it round into a tube shape and tape the ends/sides together

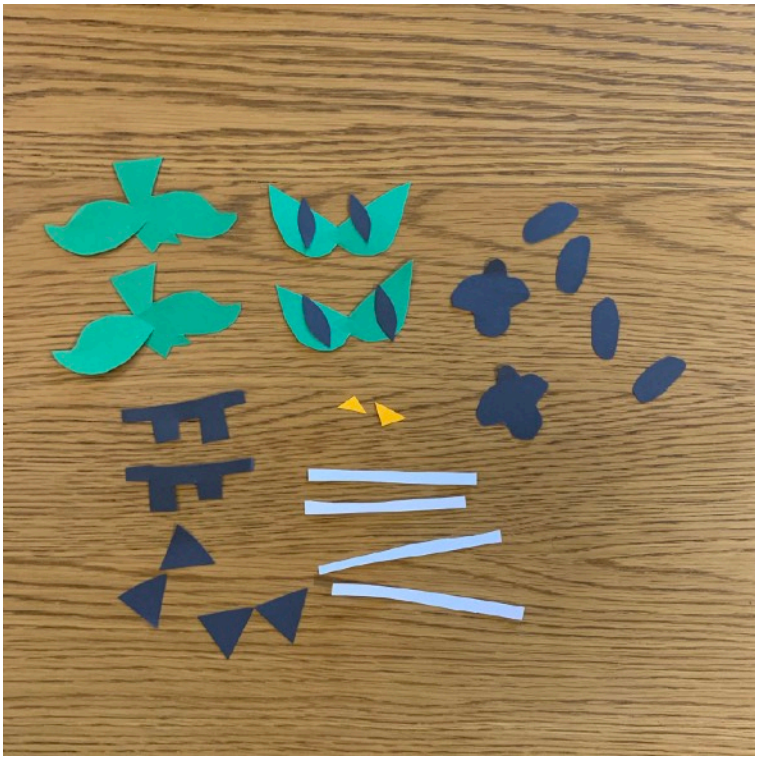

Now to transform the tubes into your creepy creations - think about what you are making and what they need to look like a pumpkin, cat and ghost - you could even make witches, Frankenstein, bats or monsters - anything you like! Cut out the features they need and then you can get to sticking them on!

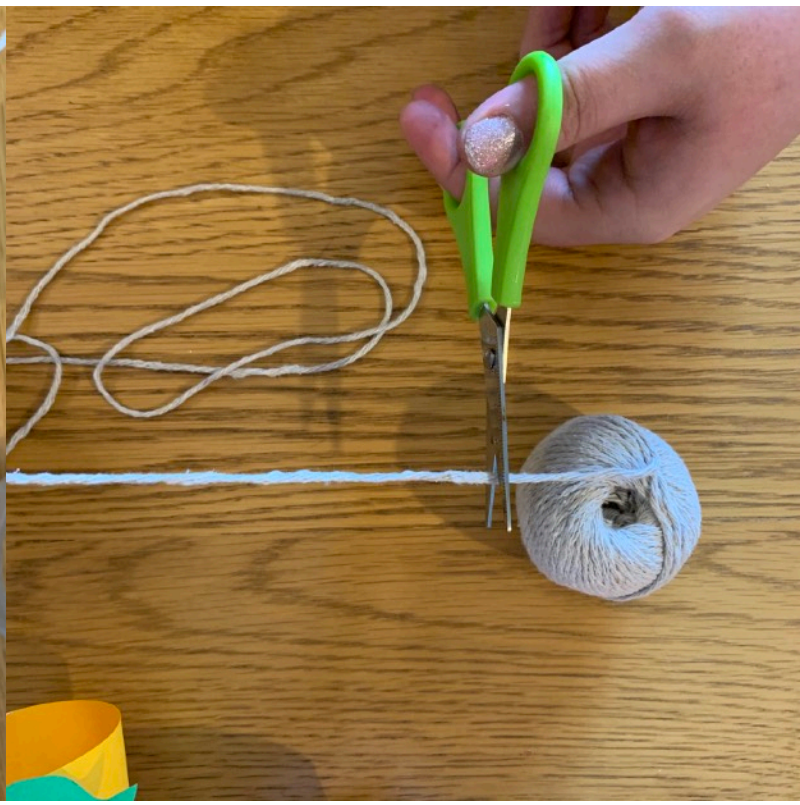

Once they are completed like so you can make holes in the sides to thread the string through like so

When they are all threaded cut the string and centre them

There you have it your very own
“Halloween Lantern Bunting"
