Halloween Wreath

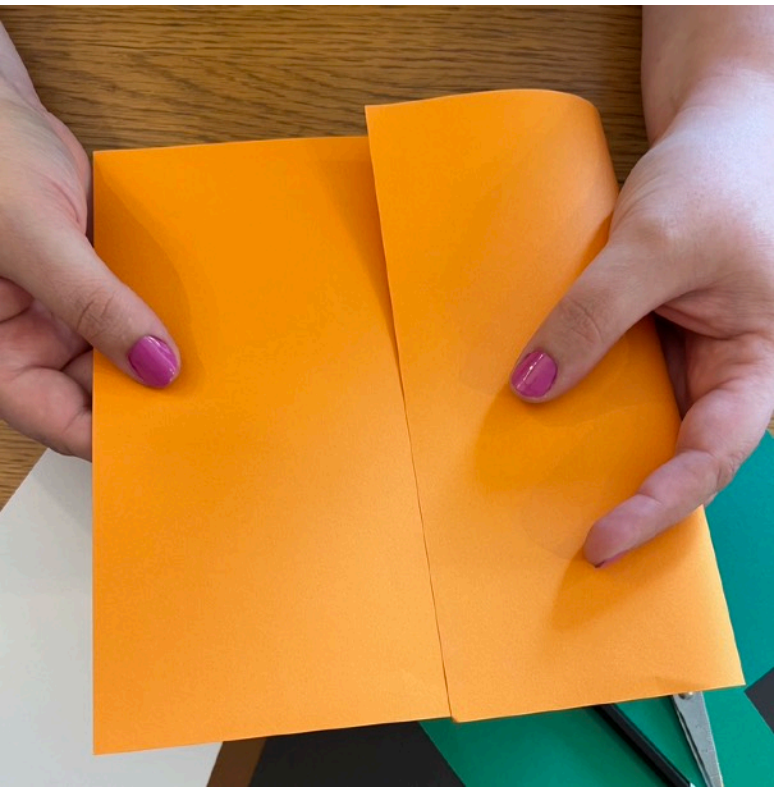

Celebrating Halloween why not create your own Spooky Halloween Wreath!

Tools and Materials:

- Coloured Paper (for Pumpkins & Ghosts)
- Pencil
- Gluestick
- Scissors

We have whole A4 sheets of orange and white to make our pumpkins and ghost - other bits can be scraps. Take one of your base colours and fold into thirds then fold that in half to create 6 squares

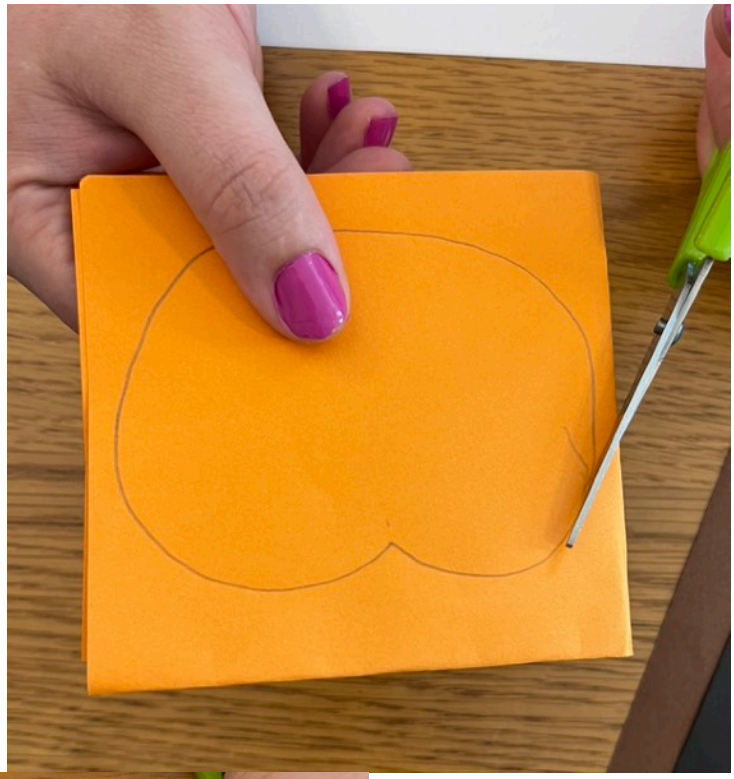

Once you have your square sketch out the pumpkin and cut it out like so, repeat with the white for the ghosts

Now cut out the embellishments needed - eyes, mouths, leaves and stem for pumpkins and then glue them on

Take the pumpkins and ghosts alternating them to form a circle, we shape it before gluing to try and make it even

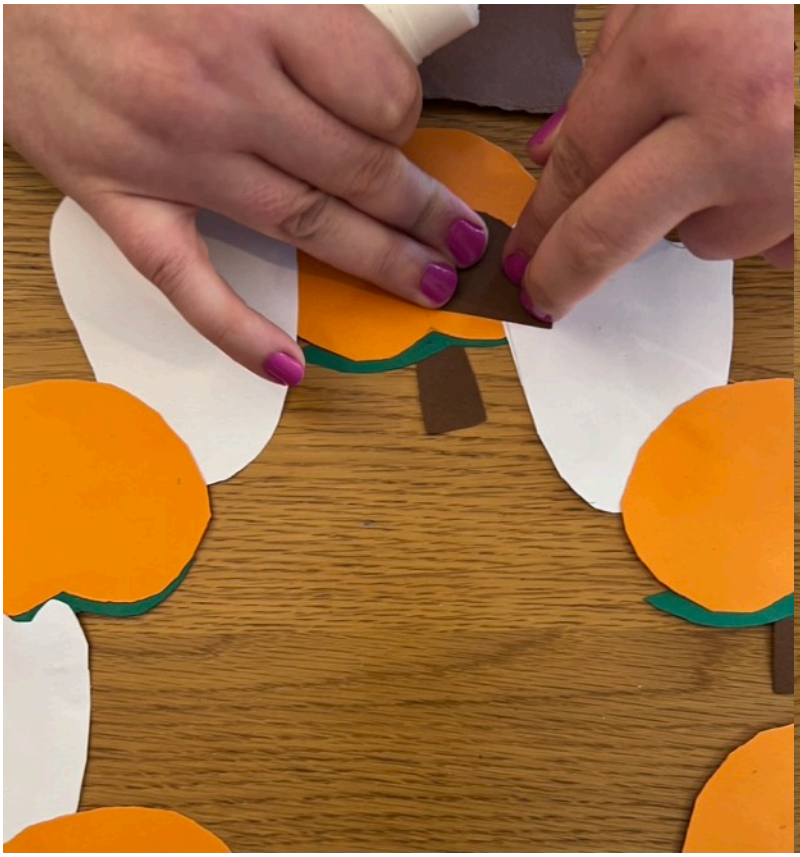

The gently lift the overlaps and glue to secure to each other, this is just to fix them together soo you can flip it over and strengthen on the back with extra paper

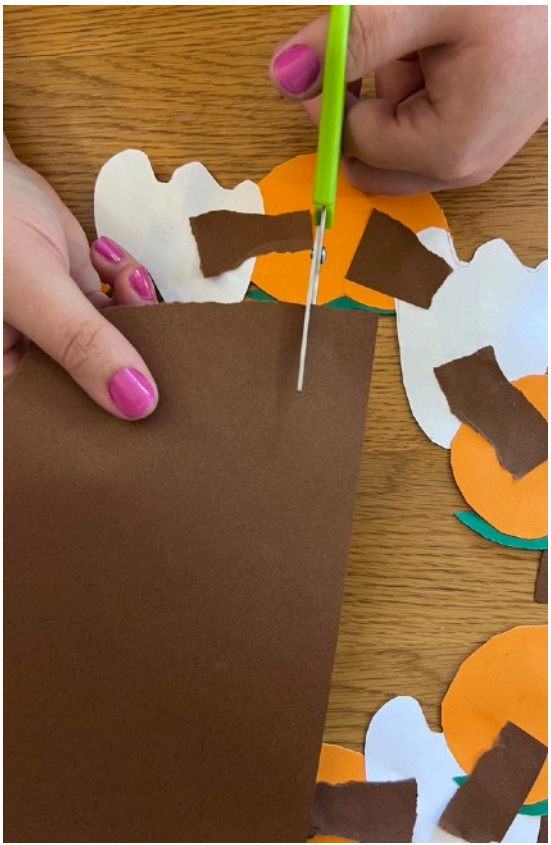

You can use scraps of paper like a bridge between each element to fix them together

Once finished cut a strip of paper to create a hanger for the wreath like so

There you have it your very own “Halloween Wreath”!

Here is another we made to inspire you!
