Handy Heart Card

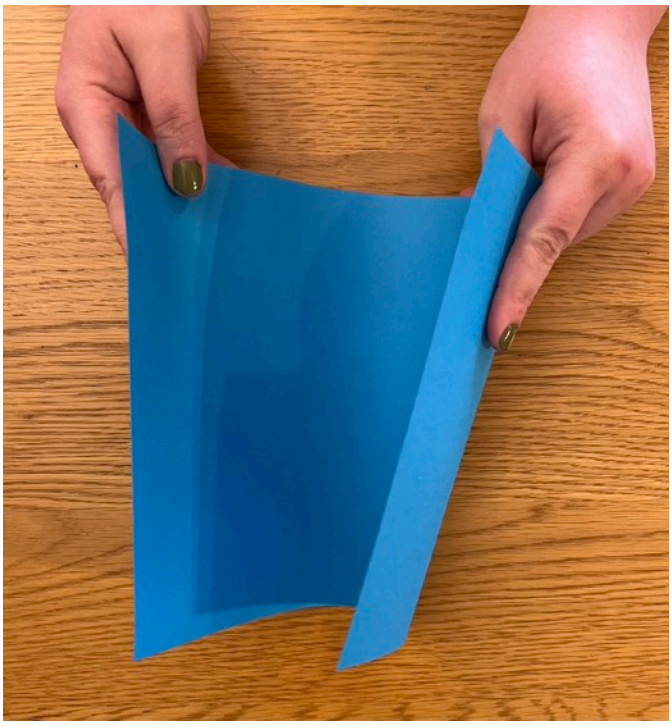

Mother's Day, Father's Day or any celebration you want - this handy heart card is bound to be appreciated! Simple to create but a fun twist on a standard card.

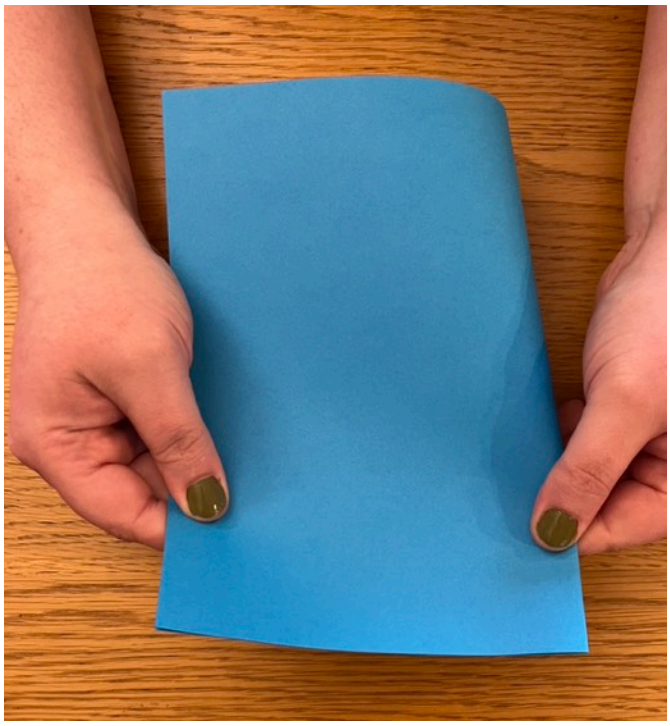

Tools and Materials:

- Coloured Paper
- Pencil
- Gluestick
- Scissors

Choose which colour you want for the hands, we went for the blue. Take the paper fold it in half like so

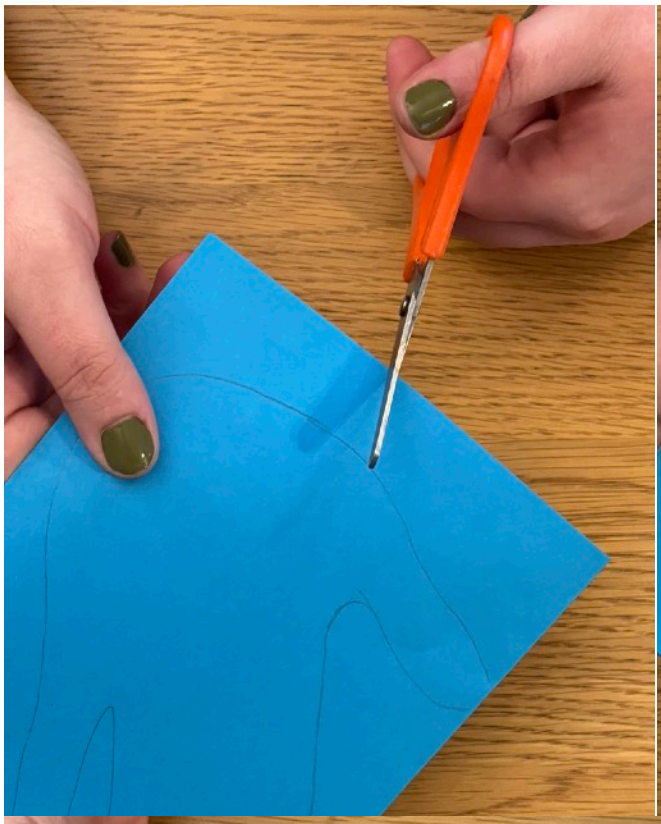

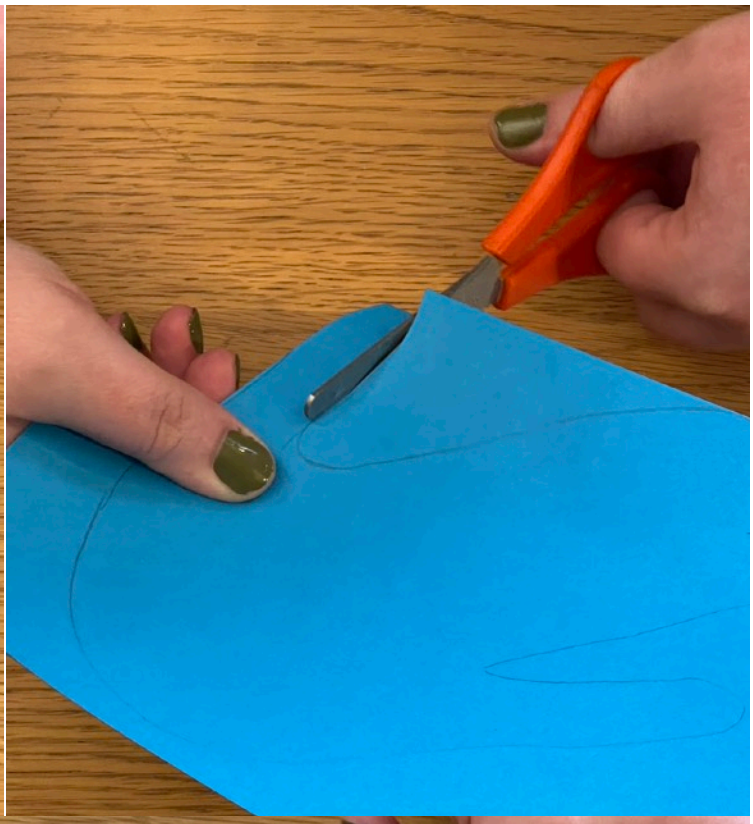

Place your hand on the folded paper, your finger tips pointing down to the fold. This is important because you want the hands to hinge open so make sure is the bit that is joined and not open

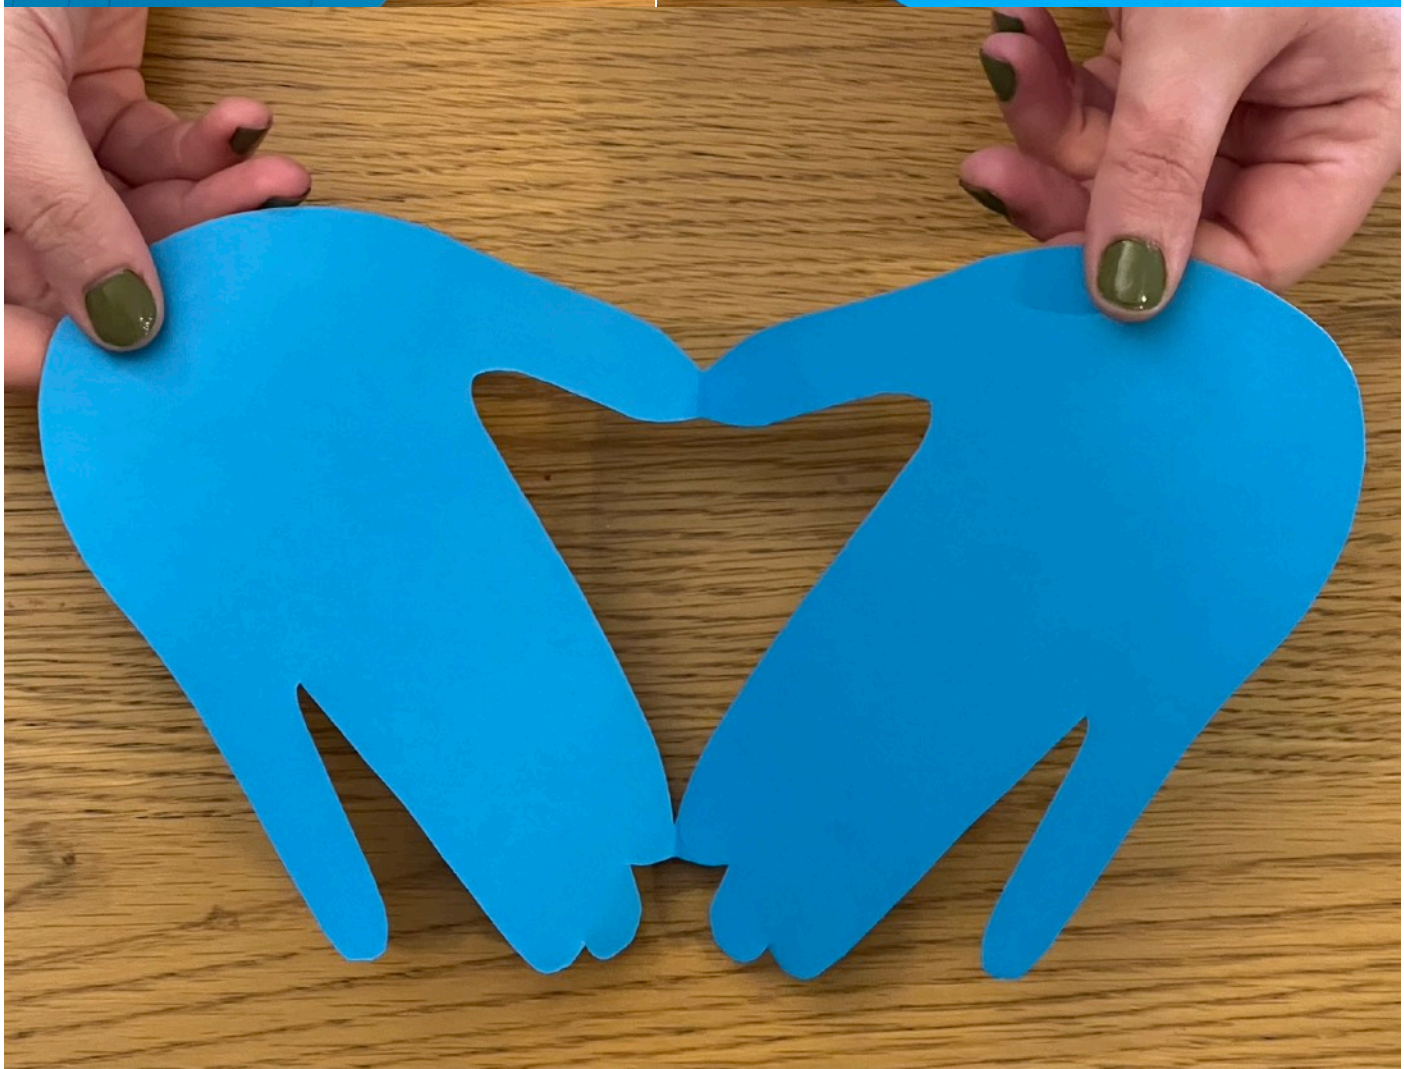

When you cut it out don’t cut away from the edge of the paper you want the finger tips at the edge to almost go over the edge so it remains attached

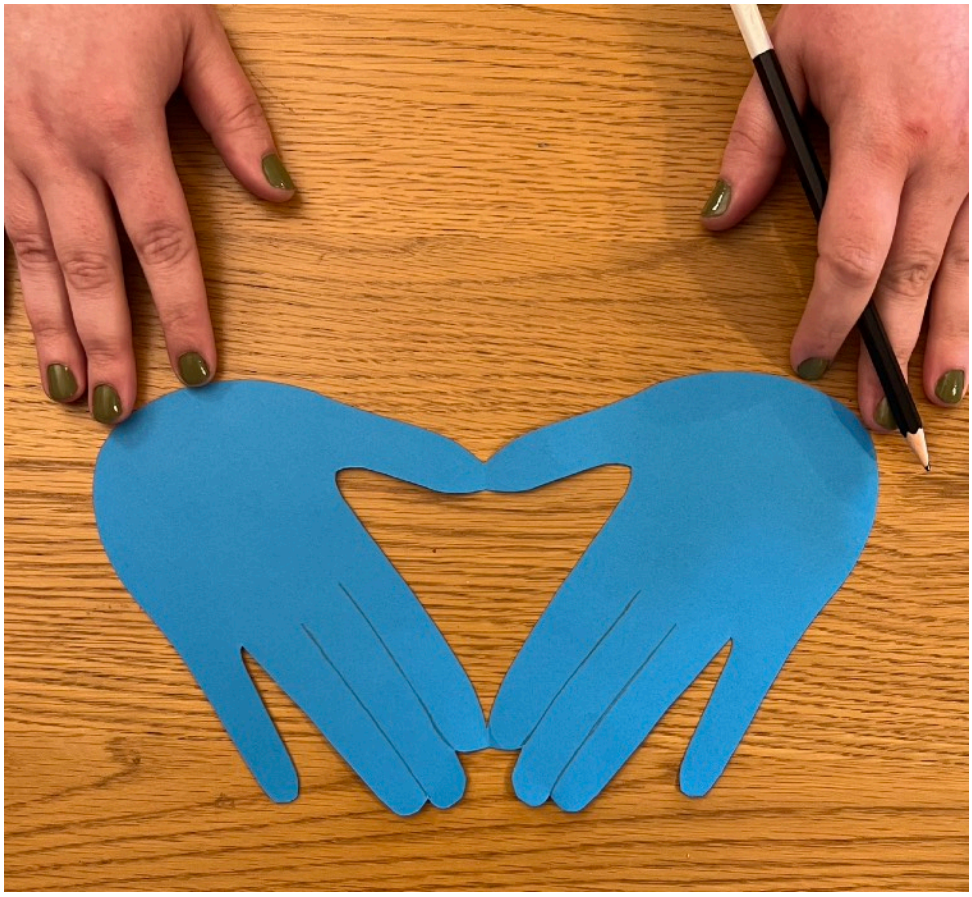

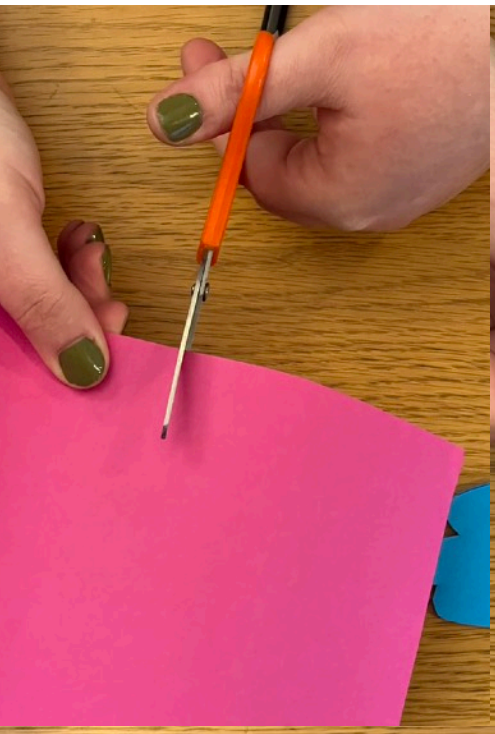

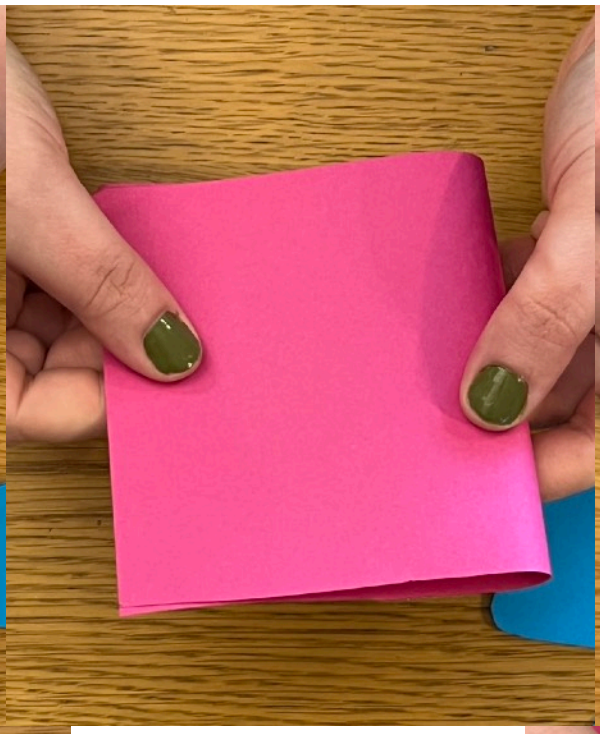

Now you have the base of the card you can add in details like fingers. You want to draw the fingers on the inside of card so is more visible thought you can do it both sides!

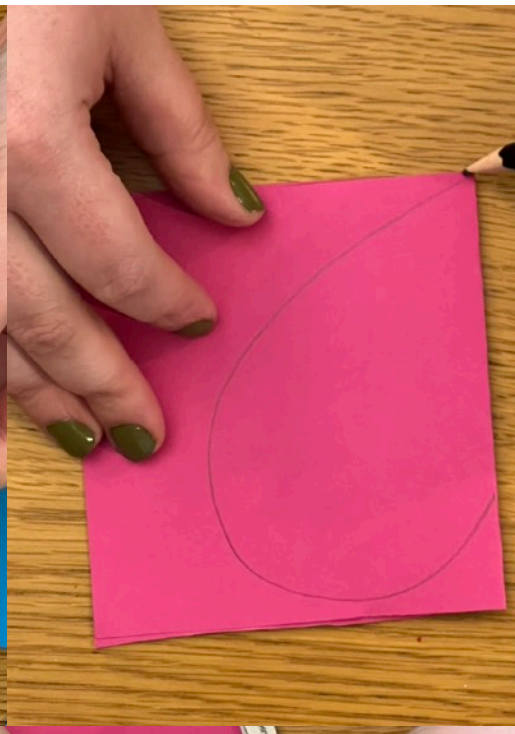

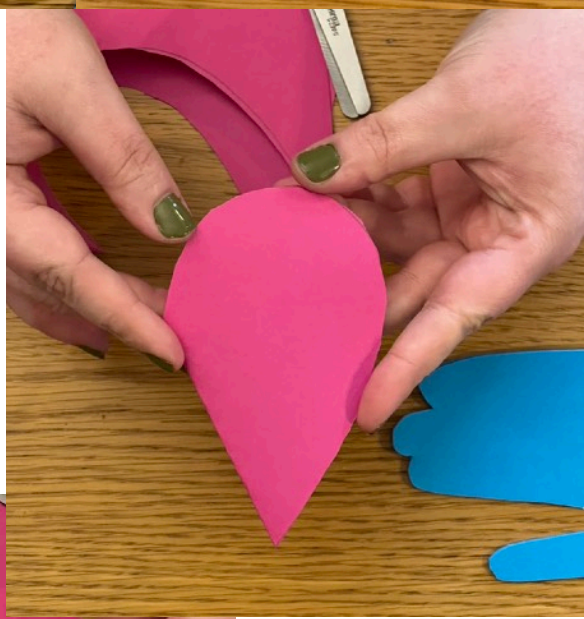

Now to create the heart, cut a smaller strip from the pink paper - a size that will fit in the palms of hands. Fold in half and then sketch out your heart (half of a heart)

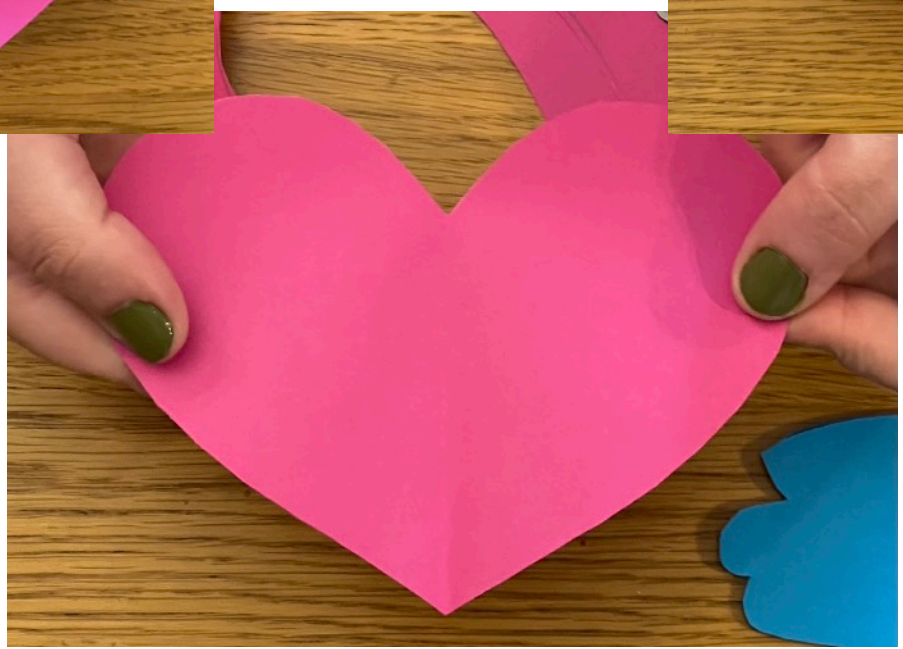

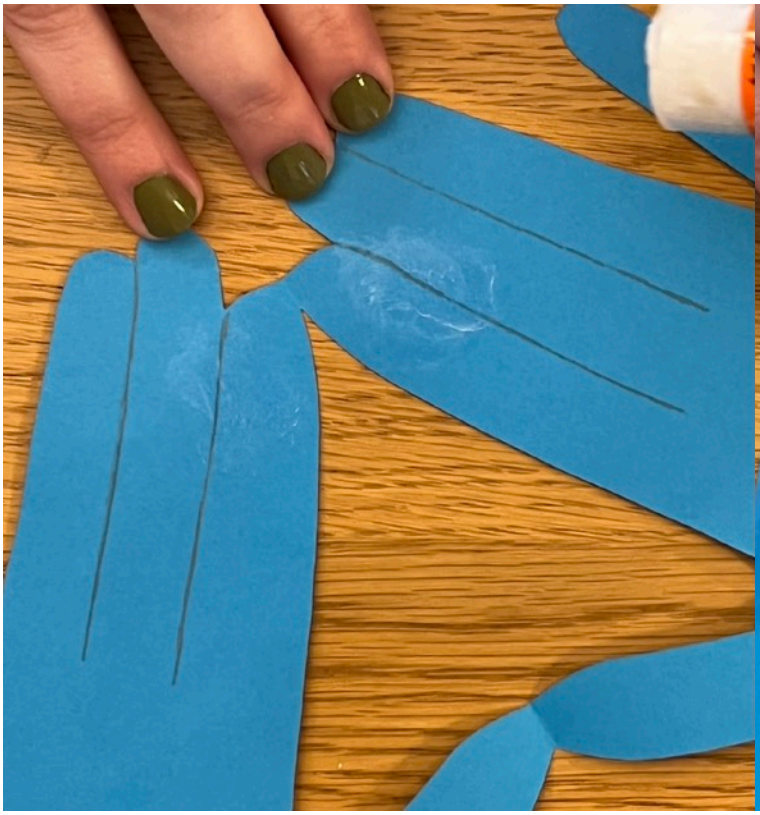

Take the heart and position it in the hands - you can glue it to the fingers meeting at the bottom like so

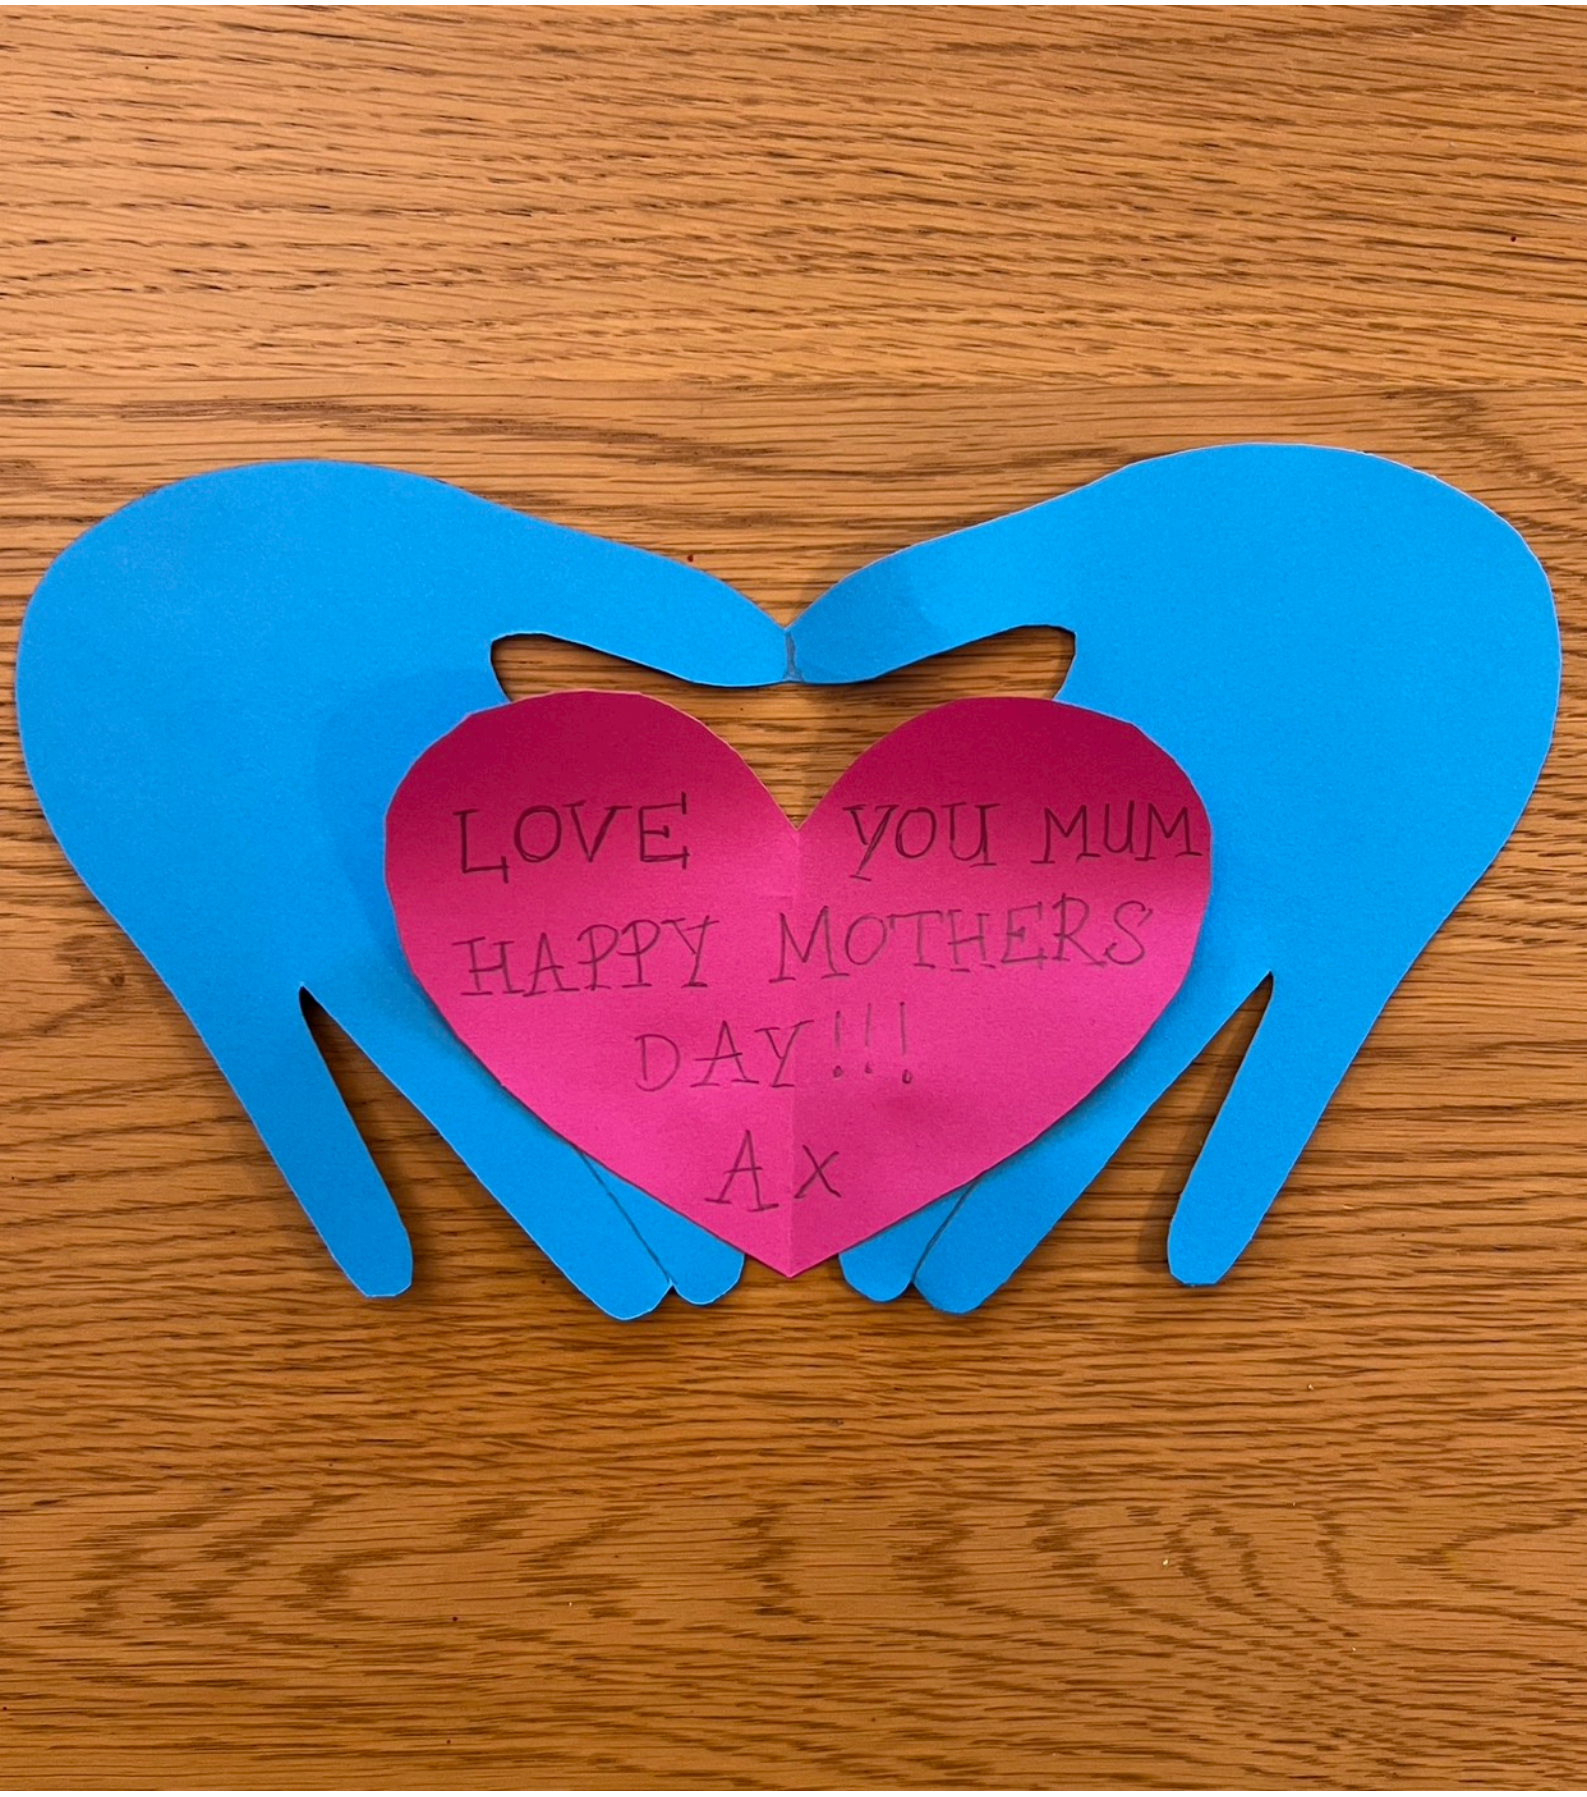

Then you can add you message for the recipient!

There you have it your very own “Handy Heart Card”!

Here is another we made to inspire you!
