CoolitArt

Hidden Pictures

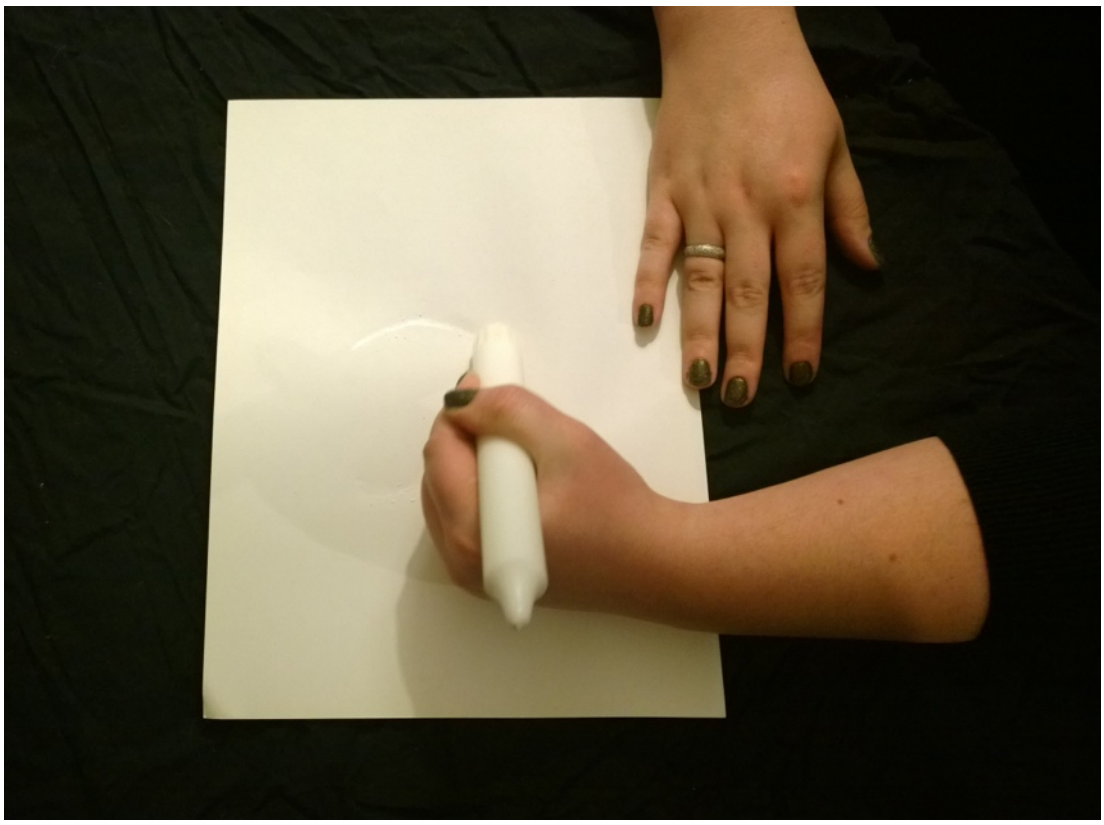

This is a fun way to create artworks or even hidden pictures as gifts to be revealed by the person you give it to!

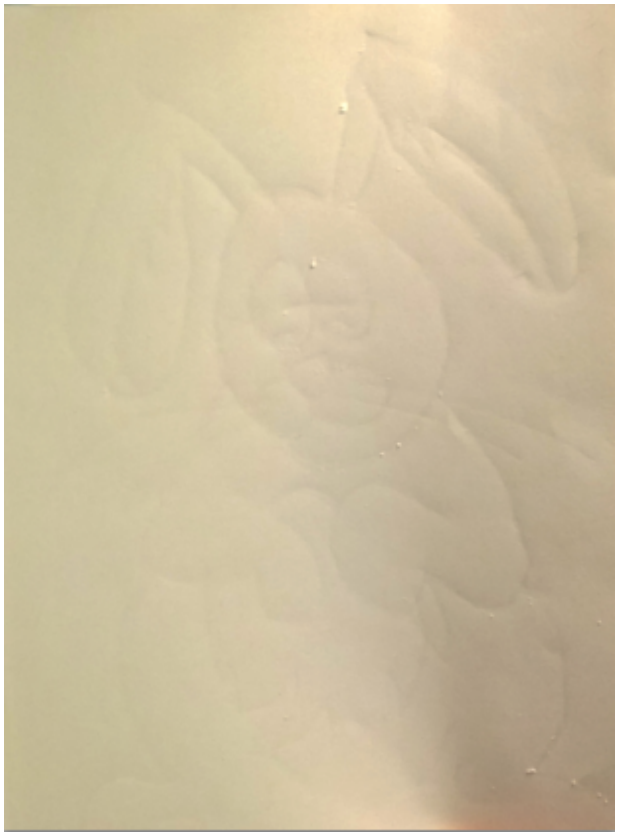

Tools and Materials:

- Paper
- Candle
- Paintbrush
- Watercolours
  although you could
  also use inks

With creating your image you need to come up with a design in your head to put on to the paper, drawing this is a bit more difficult as you can't see the wax lines like you can a pencil! If you get stuck you can see it if you wiggle your paper under the light

You should just about be able to see a faint outline when you have finished your drawing!

Now you can start to put the colours on to reveal your image to everyone! We have chosen to do a background which relates to the object we drew. You could do one colour, patterns such as spots or stripes, anything you would like really!

And there you have your finished “Hidden Picture”

Here are some other drawings we have created to give you inspiration!
