Homemade Dominoes

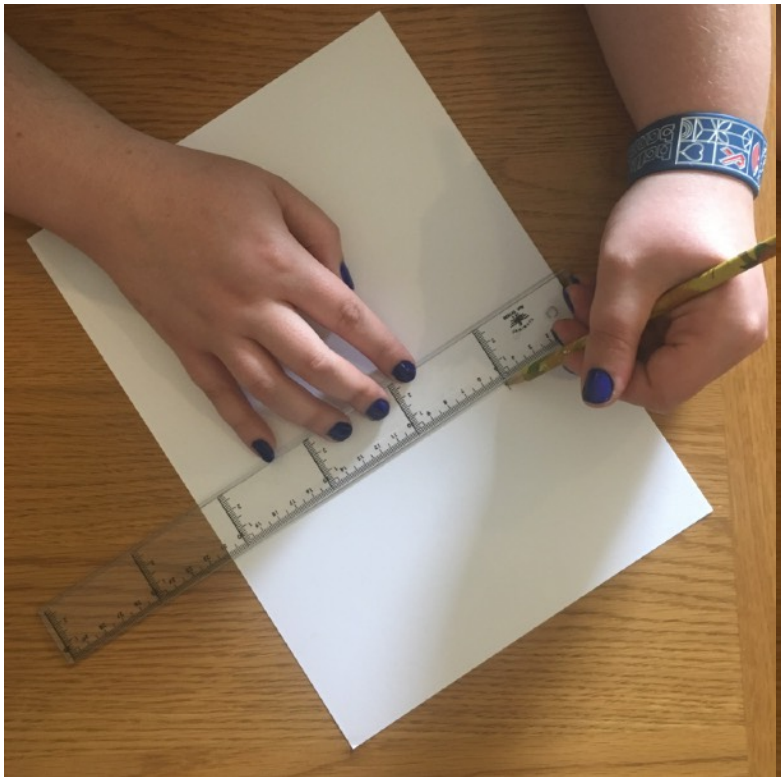

Dominoes is a super fun game where you have to match the numbers - why not create your own set from paper to enjoy the fun anywhere!

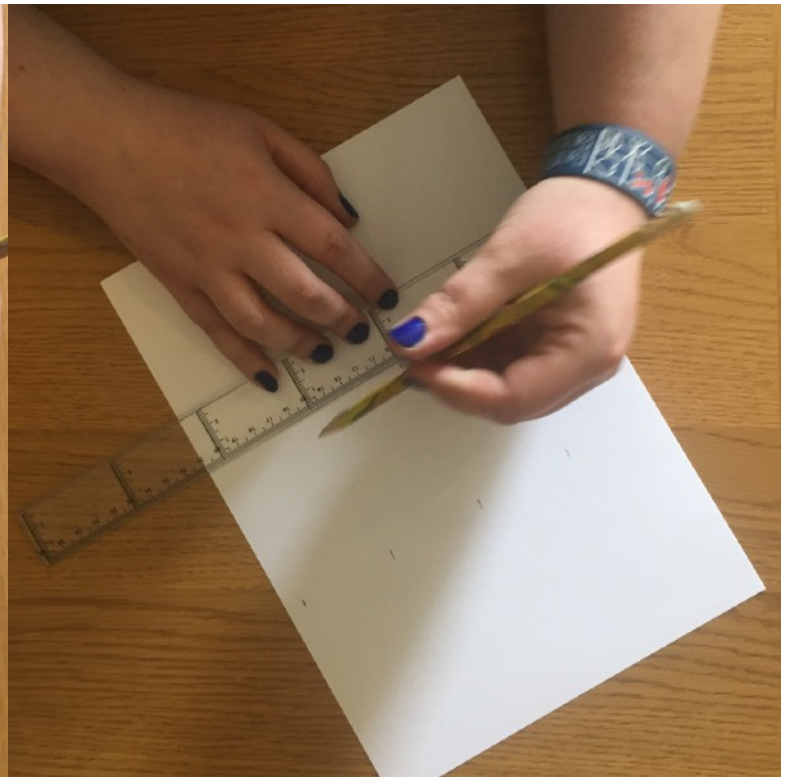

Tools and Materials:

- Paper
- Ruler
- Pencil
- Felt Tip
- Scissors

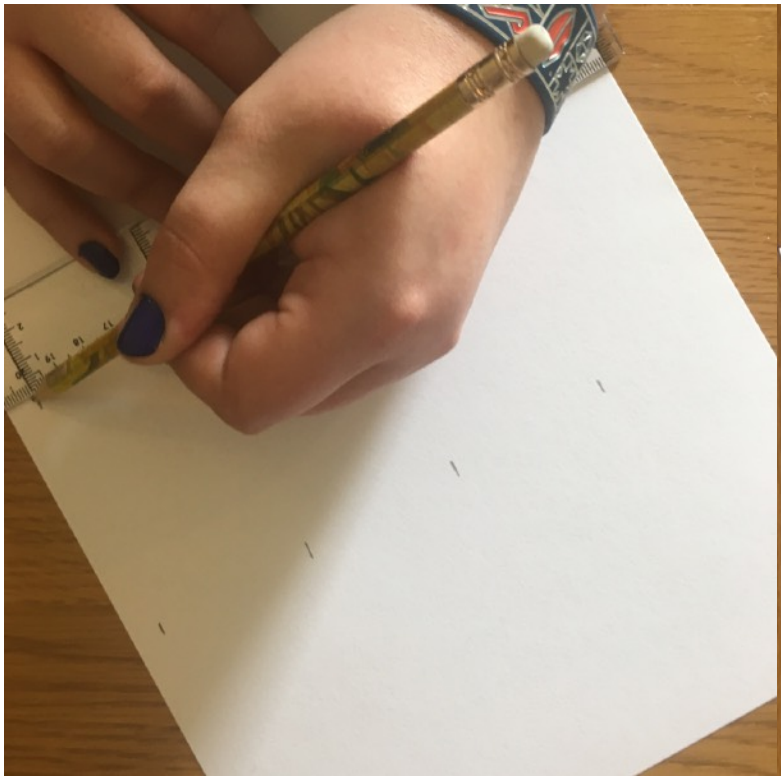

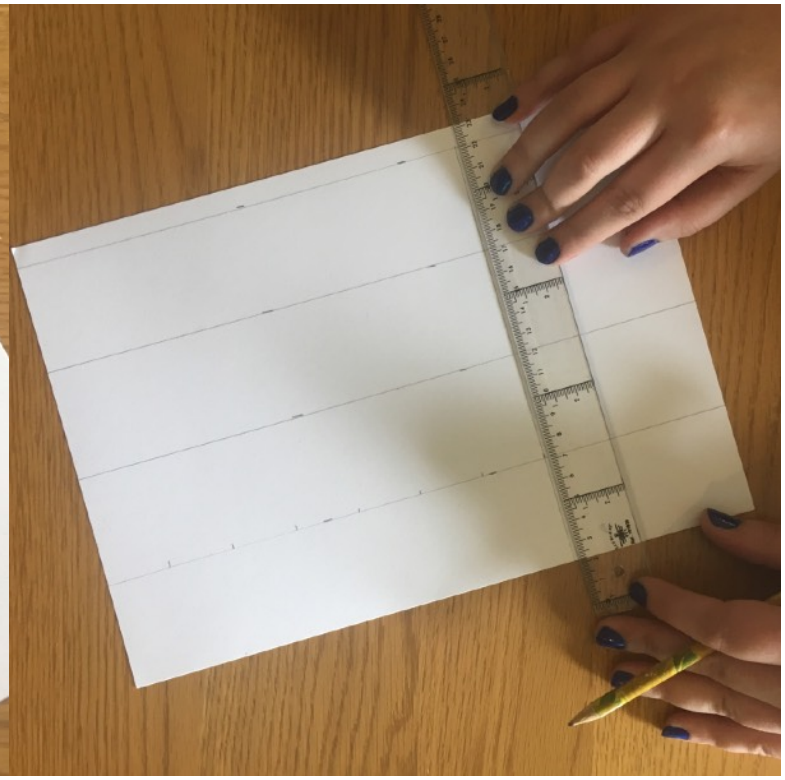

First of all measure out 5cm intervals going up from the long side of your piece of paper - 4 in total

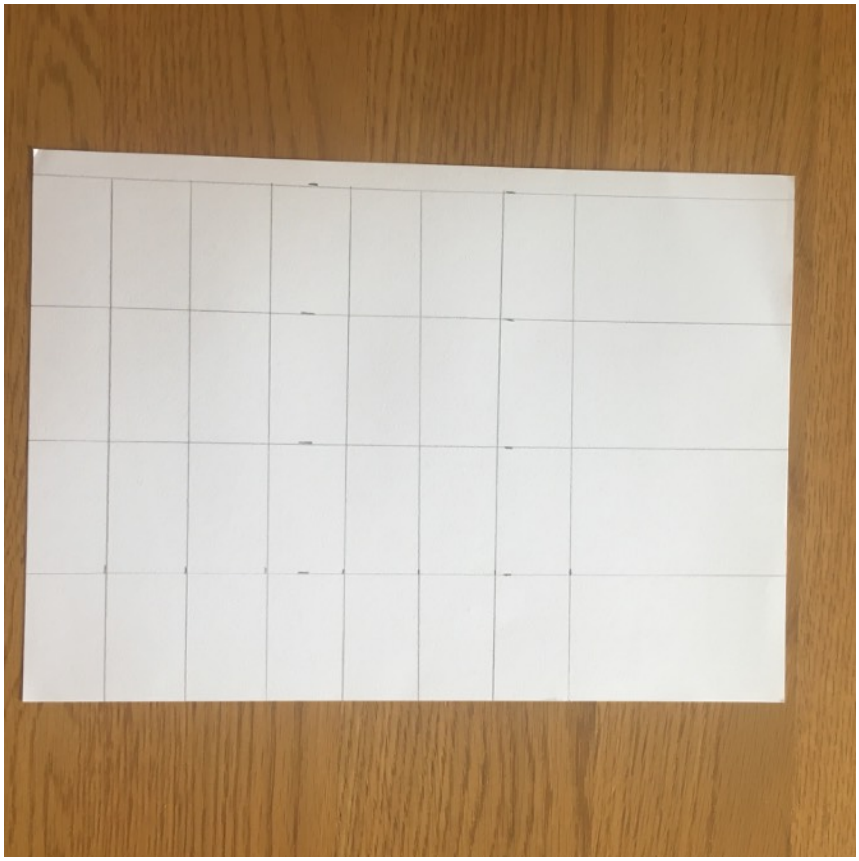

Make more 5cm marks further along so you can join the lines

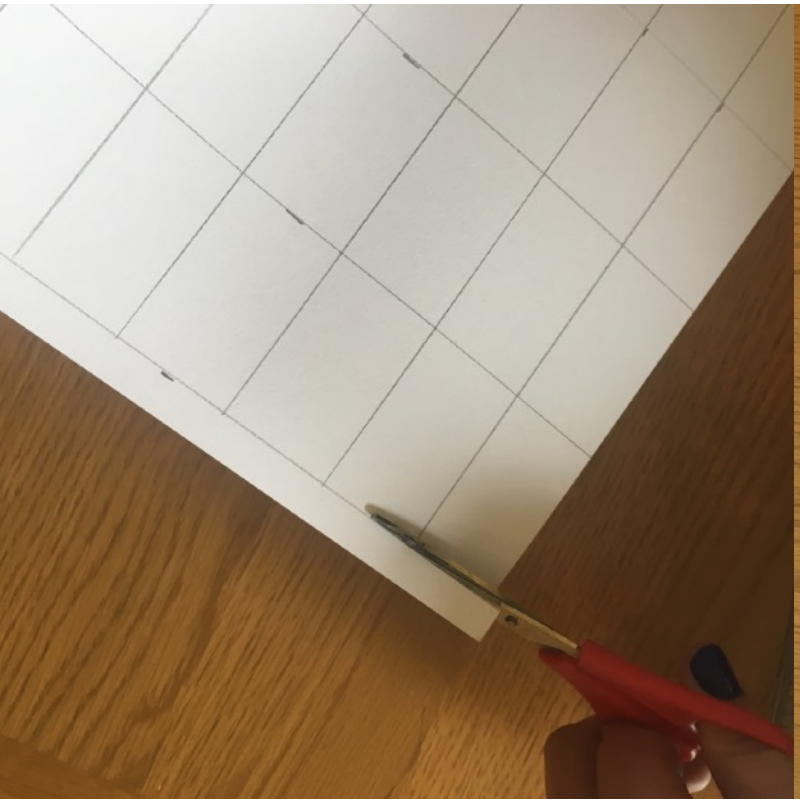

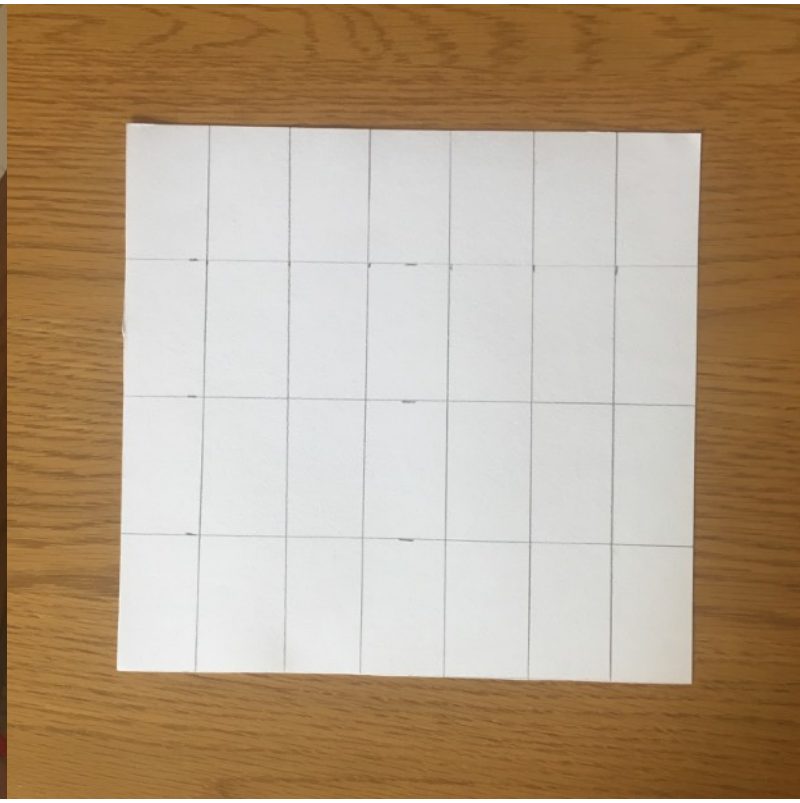

Make 3cm marks along the long lines 7 in total as you need 28 dominoes

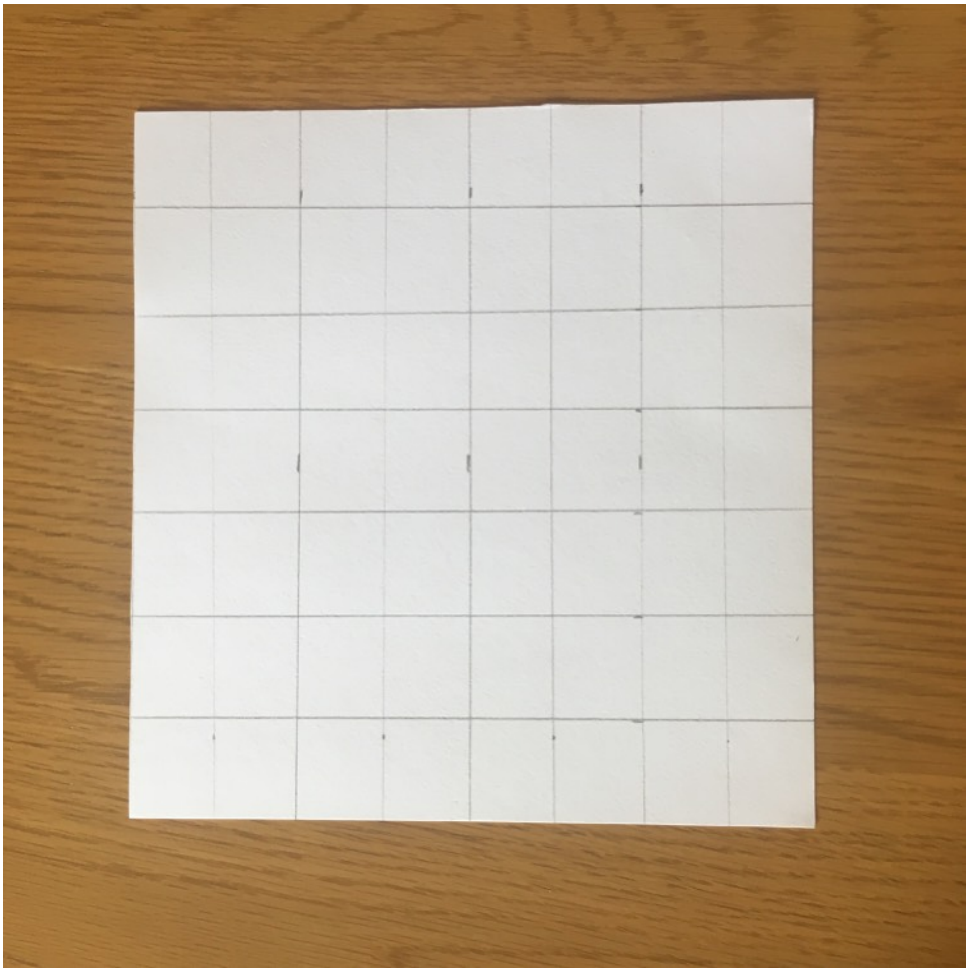

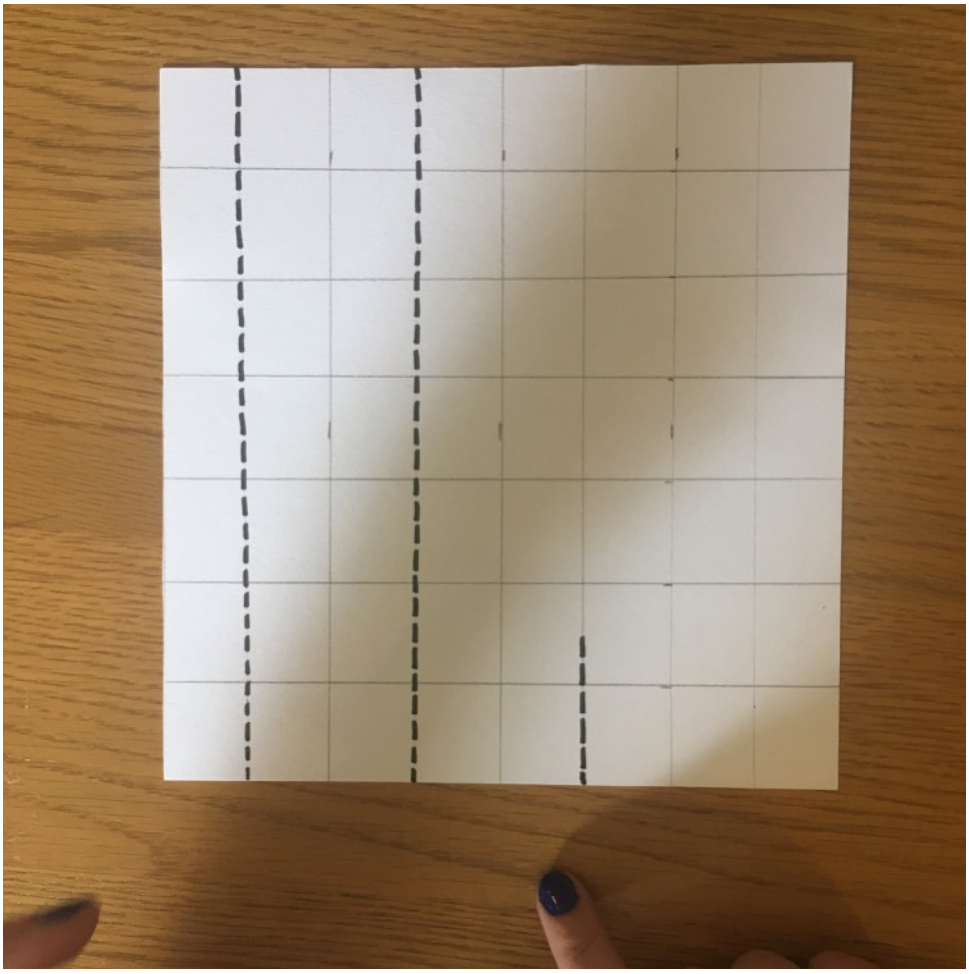

Then cut the excess from your tiles like so

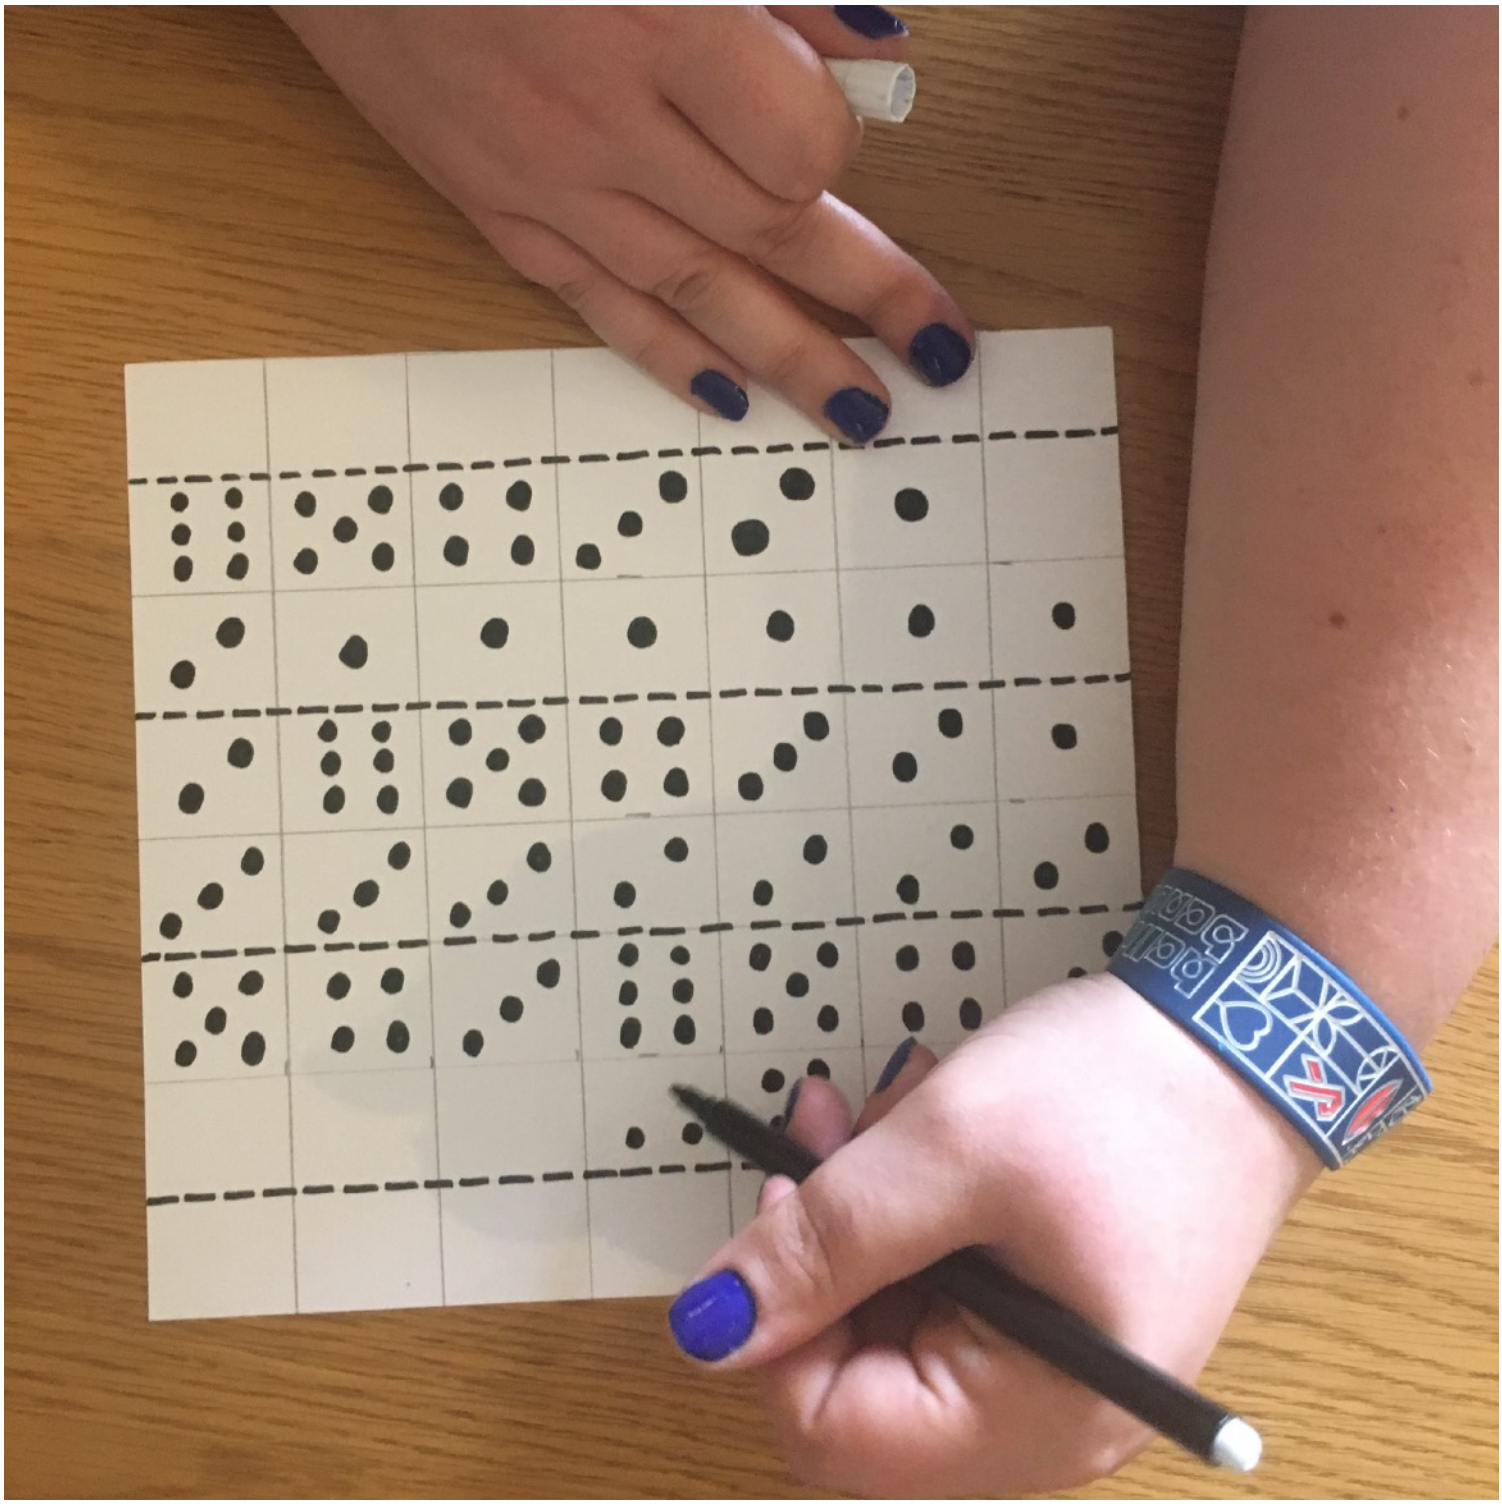

Draw a line through the middle of your tiles (2.5cm) like so

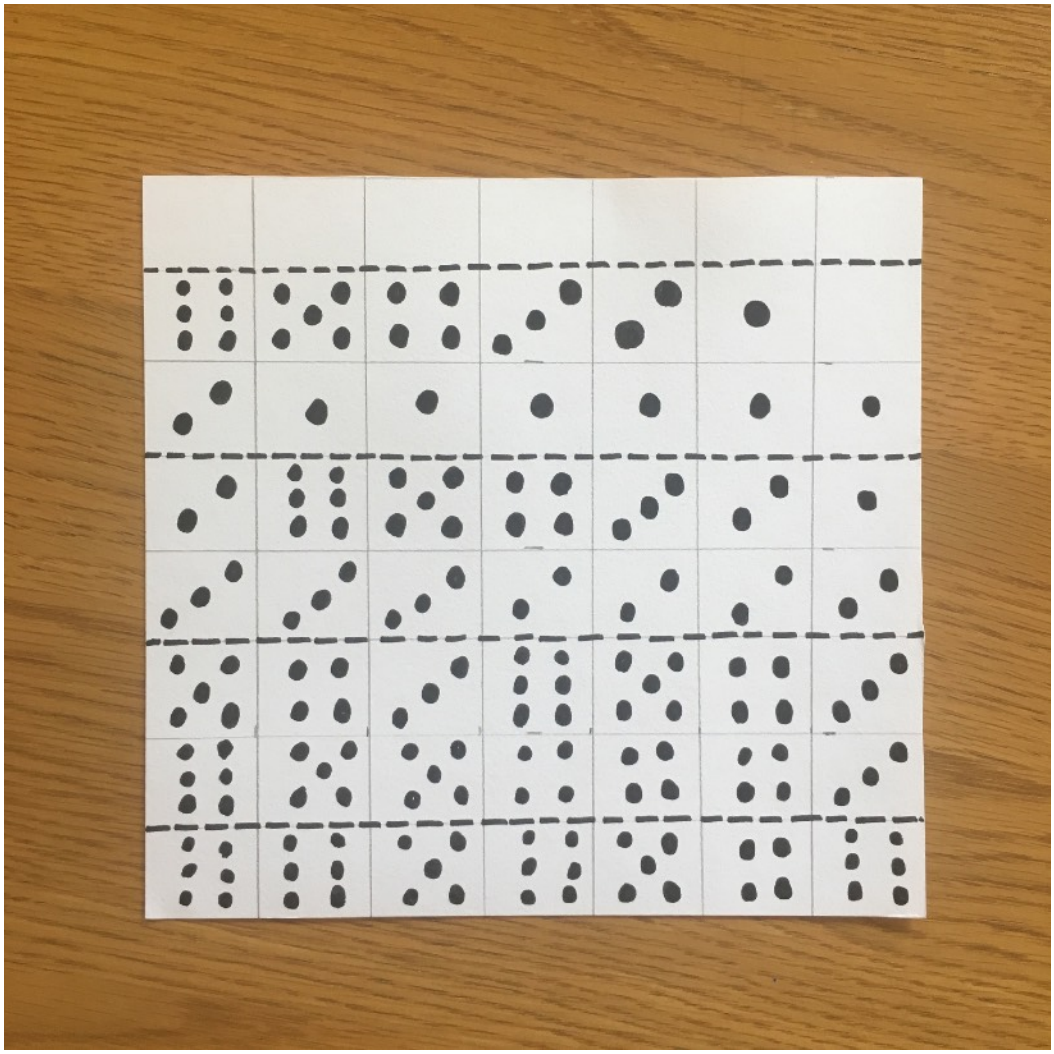

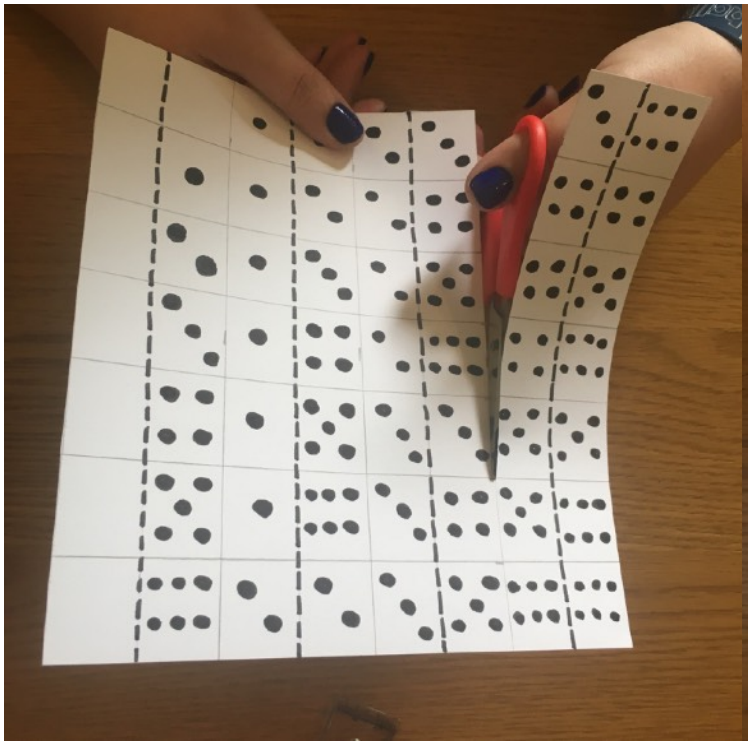

Then you need to start numbering them - with the tiles we have: 0/0, 0/1, 0/2, 0/3, 0/4, 0/5, 0/6, 1/1, 1/2, 1/3, 1/4, 1/5, 1/6, 2/2, 2/3, 2/4, 2/5, 2/6, 3/3, 3/4, 3/5, 3/6, 4/4, 4/5, 4/6, 5/5, 5/6 & 6/6 - when we say 0 leave it blank don't draw any dots! You can do the dots like on a set of dice

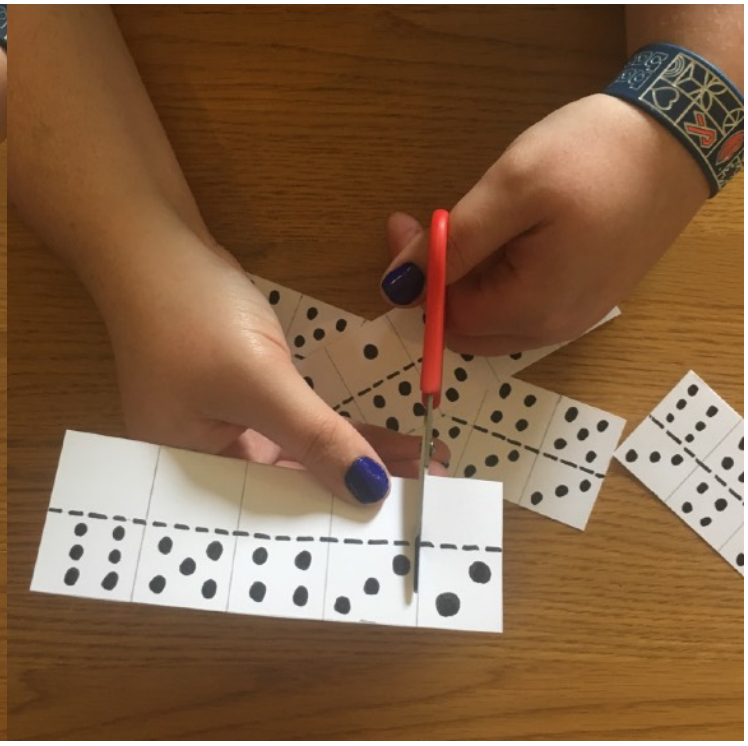

You should end up with something looking like this

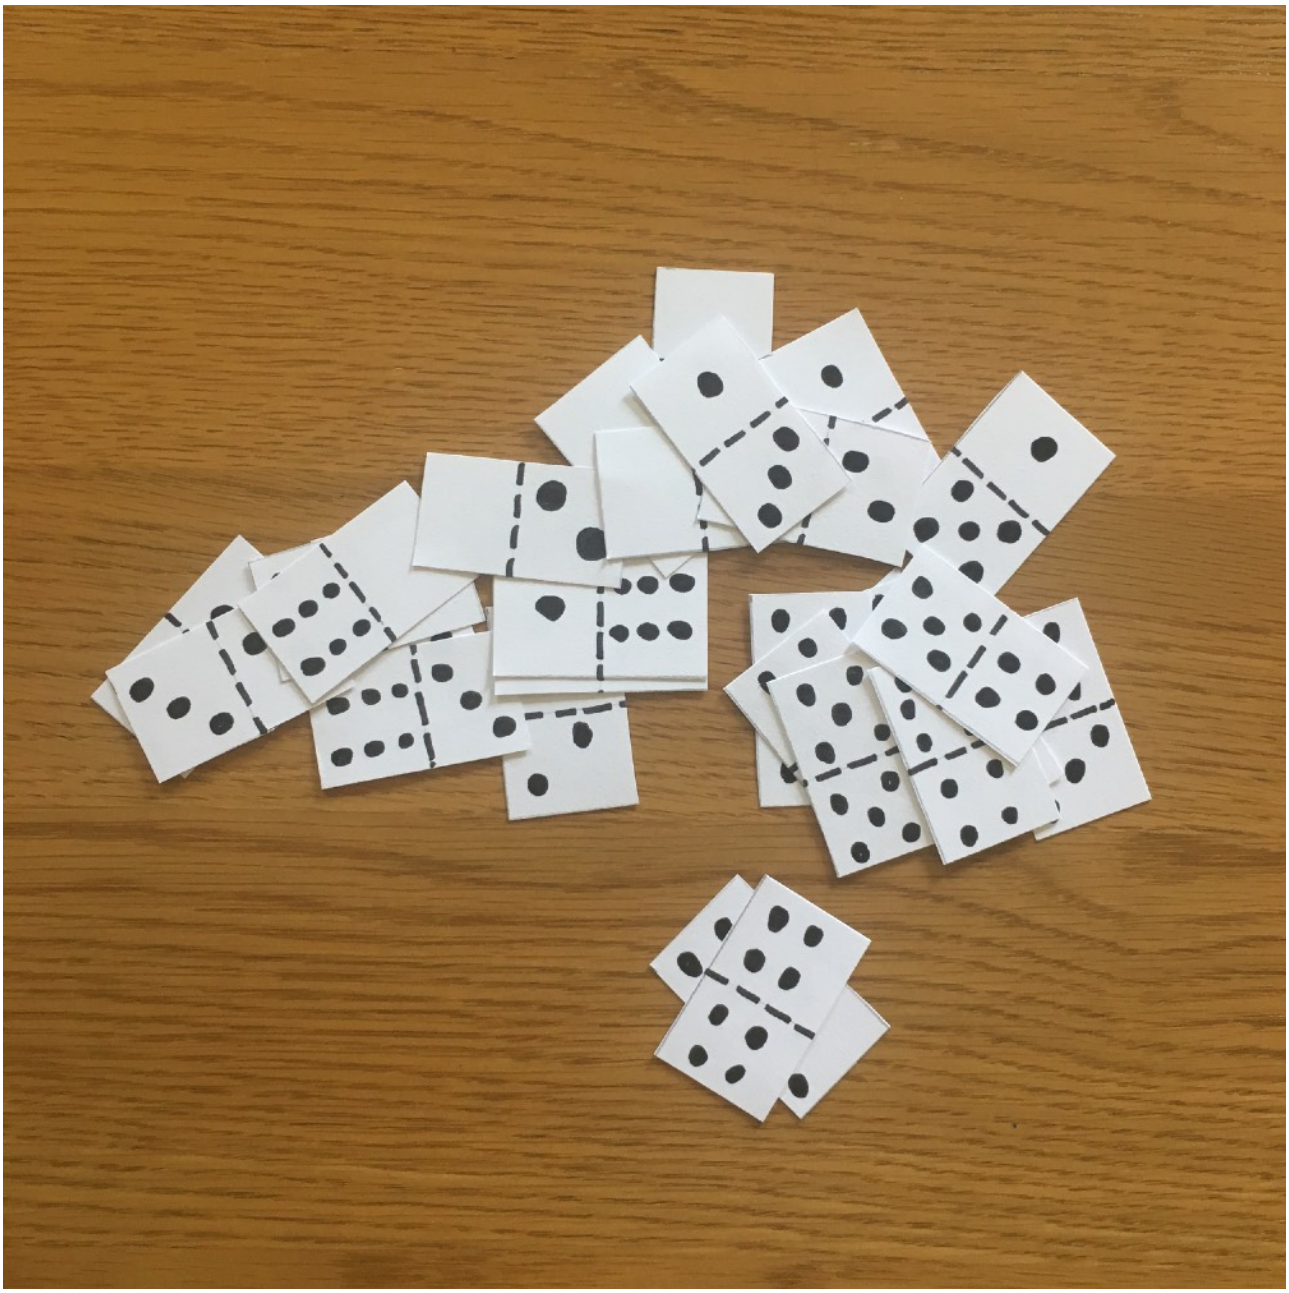

Then cut out your dominoes like so

There you have it your very own set of “Homemade Dominoes”

To play (up to 4 people): Each player takes 7 tiles, whoever has 6/6 goes first, or the second highest double then you have to match the numbers. If you can’t go take another tile - the whole point is to get rid of your tiles! Enjoy!
