Homemade Fuzzy Felts

”Fuzzy Felts” were a kids toy made in the 1950’s using geometric shapes to create multiple pictures as they are reusable! Creativity and no mess - perfect for at home!

Tools and Materials:

- Felt in a variety of colour
- Scissors

First of all decide which colour you want as your background - we chose a black piece of felt as our base but you can chose whichever you like! Using the other colours start cutting smaller shapes like matchsticks, squares, rectangles, hearts etc - whatever shapes you like!

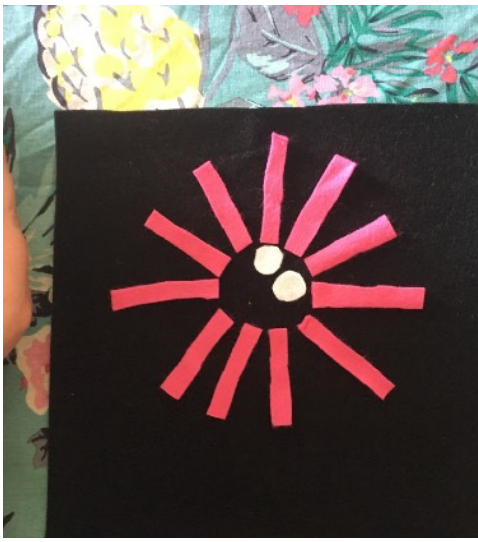

So you should end up with a stack of shapes in different colours like so

Now you have your basic kit you can start to create! What do the shapes inspire you to make? It can be figurative or abstract - thats the fun of fuzzy felts!

There you have it your very own “Homemade Fuzzy Felts”

Here is another we made to inspire you!
