# Illustrated Initials

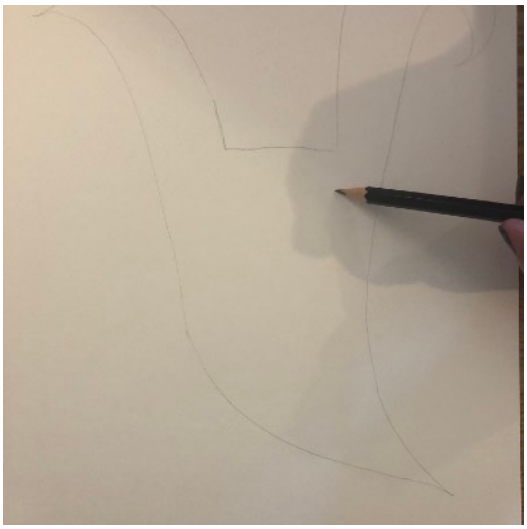

Back in the Medieval times there weren't many books as most people couldn't read or write so many had very fancy beginnings of pages with "Illuminated Letters" taking inspiration from this why not create your own illustrated initial - with things that represent you in the background

Tools and Materials:

- Watercolour Paper
- Pencil
- Water
- Watercolours
- Paintbrushes

First of all start sketching out your letter - what kind of font do you think you want to use? Then what should be in the background of your work - we chose flowers because we like them!

Start thinking about what colours you would like and start to fill it in

There you have it your own Illustrated Initial!
