Jigsaw Card

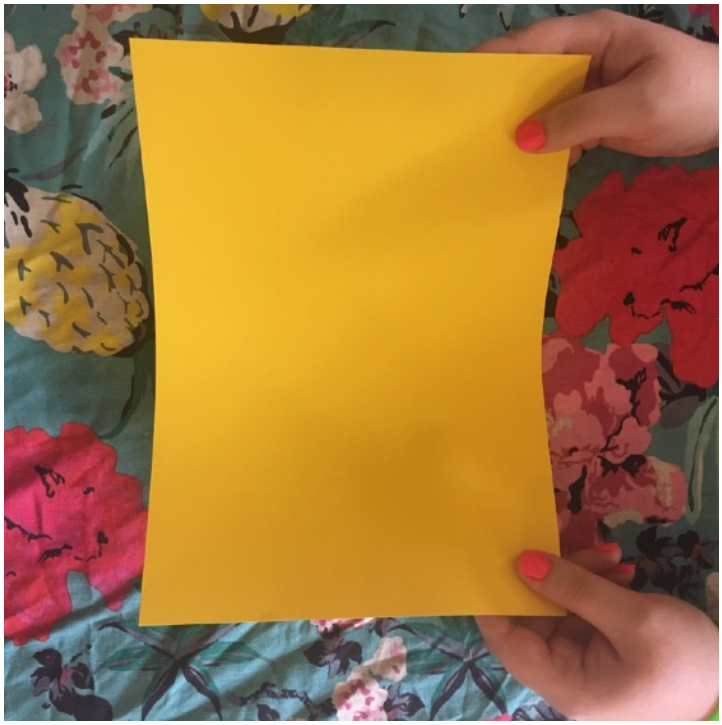

This is a really fun way to create a card for friends or family with the added twist of them having to figure out the greeting on it!

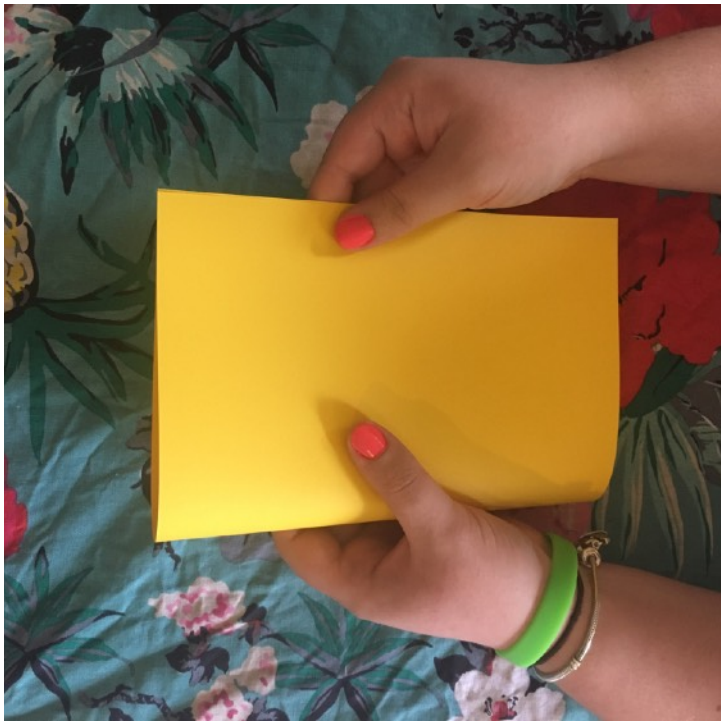

Tools and Materials:

- Paper
- Coloured Paper
- Felt Tips
- Pencil
- Scissors
- Glue stick

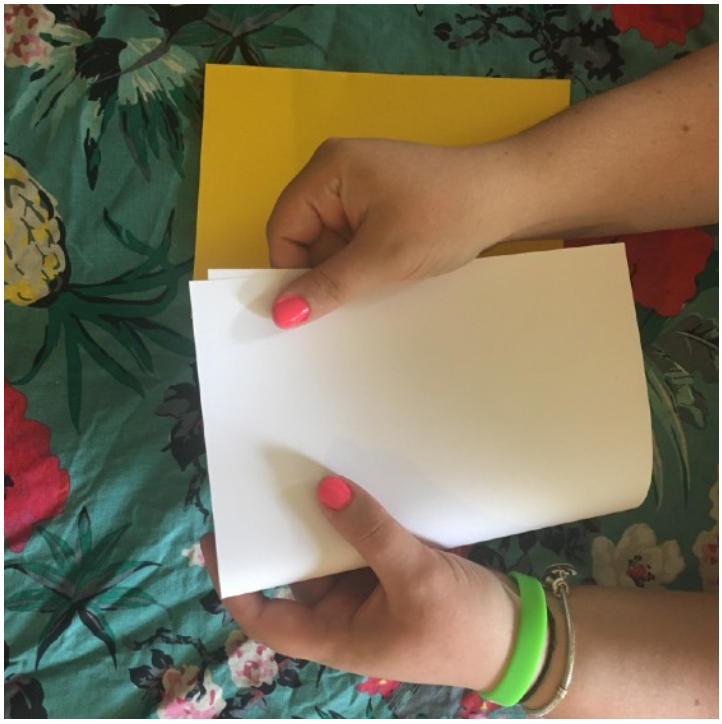

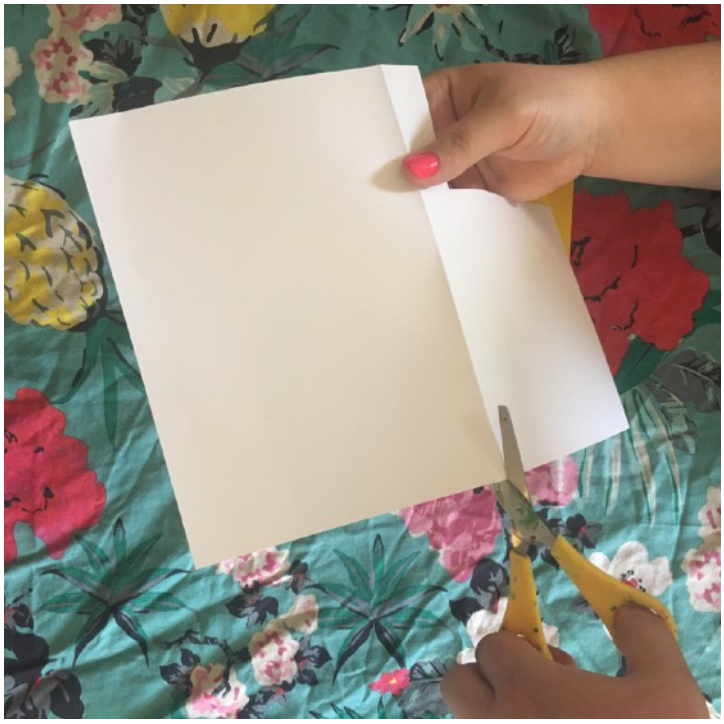

Take your coloured paper and fold it in half - this is the base for your card. We chose yellow but you can use any colour

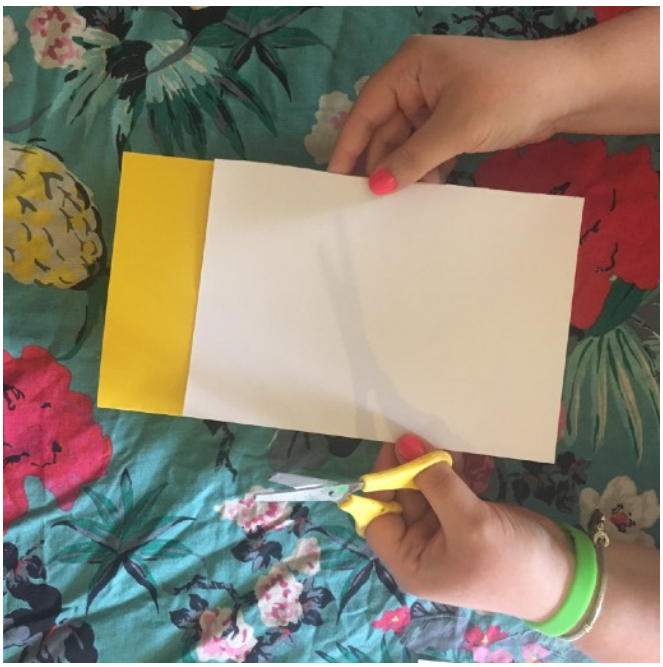

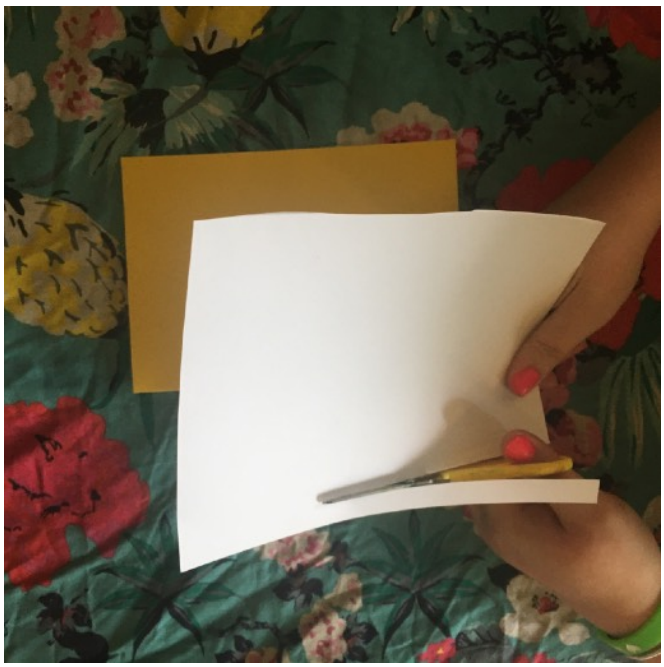

Take your white paper and do the same, one piece we will use for the jigsaw the other for a pocket on the back

Taking the piece of paper we are going to trim it to make it smaller than the yellow paper like so

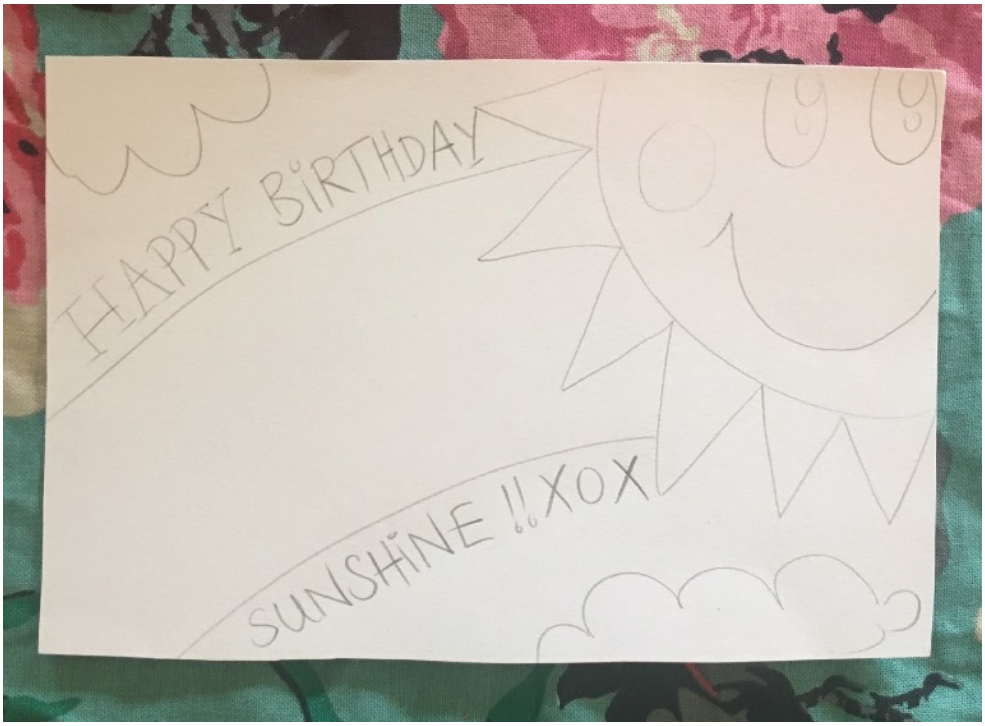

We just think it looks nice with a border to make the image stand out

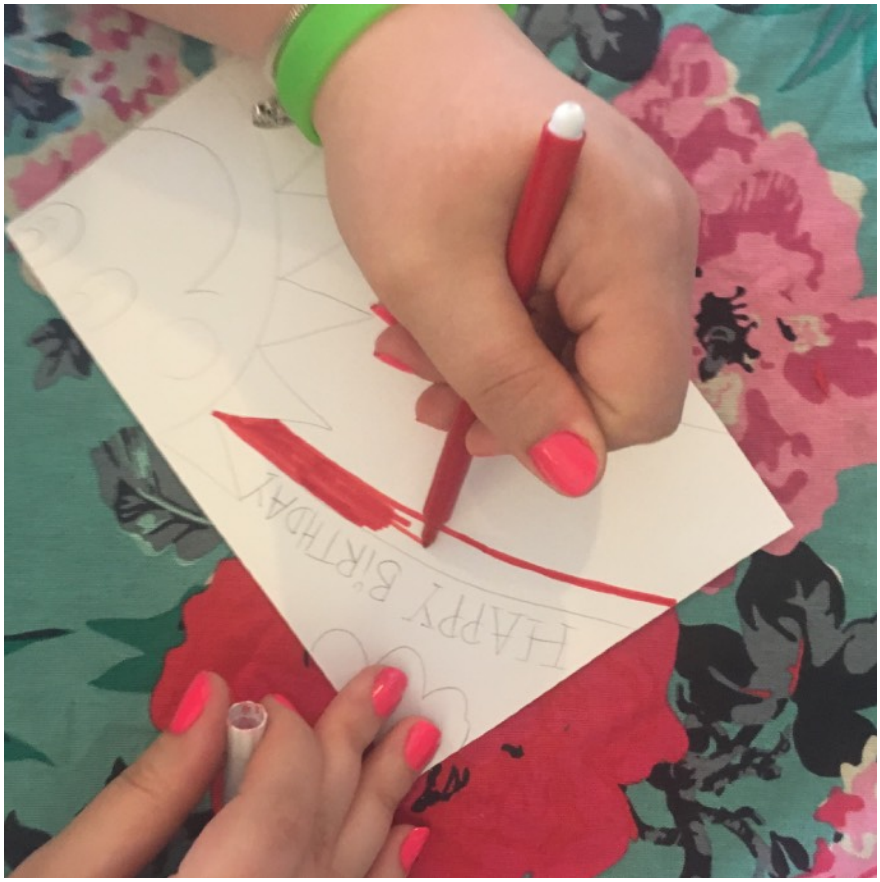

Who is the card for and what is it for - we are doing ours for a birthday. Think about what they might like to get and start drawing it!

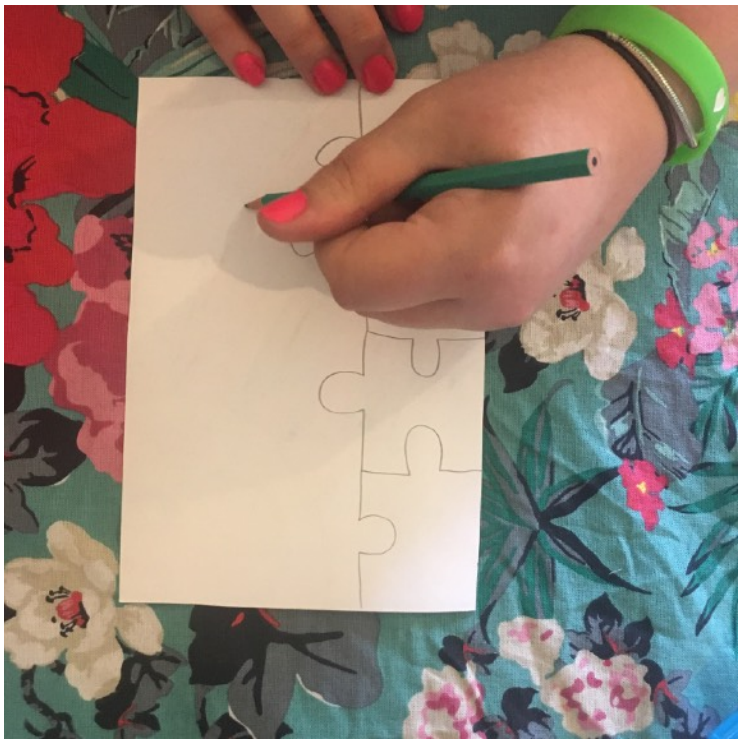

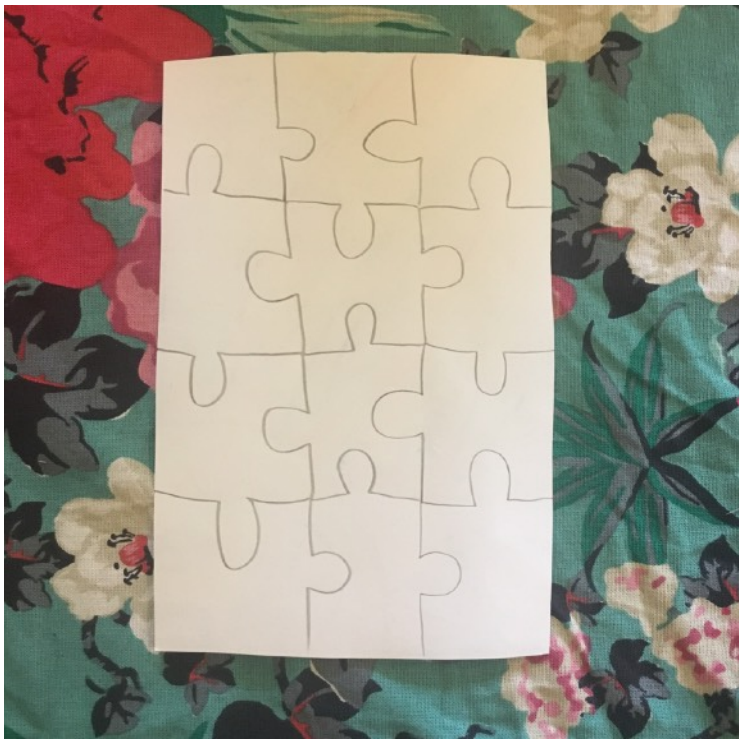

Once you are happy with your drawing you can start to colour it in!

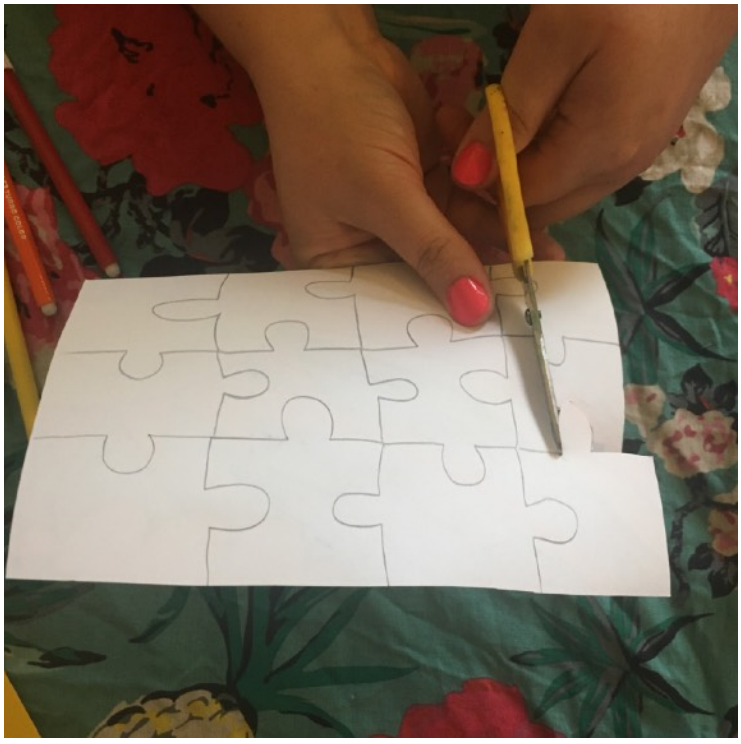

Now to transform your image into a jigsaw - flip it over and start drawing out the jigsaw pieces like so

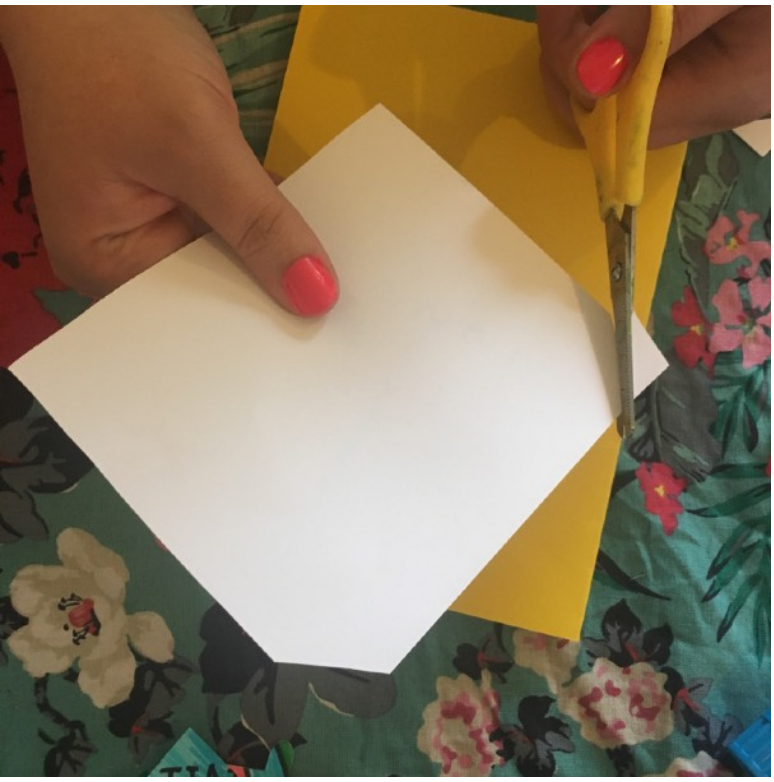

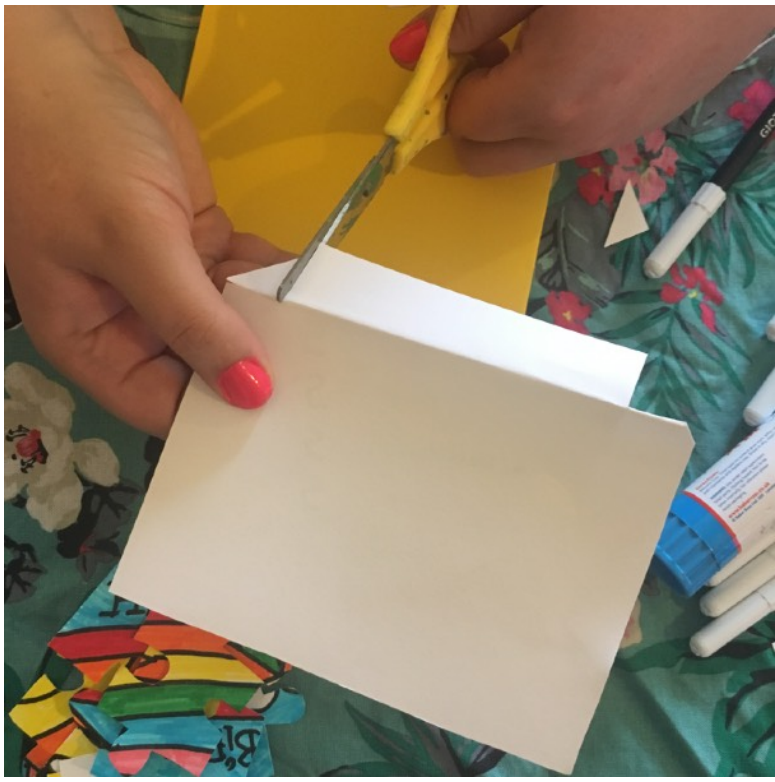

When you are happy with the shapes then you can cut them out

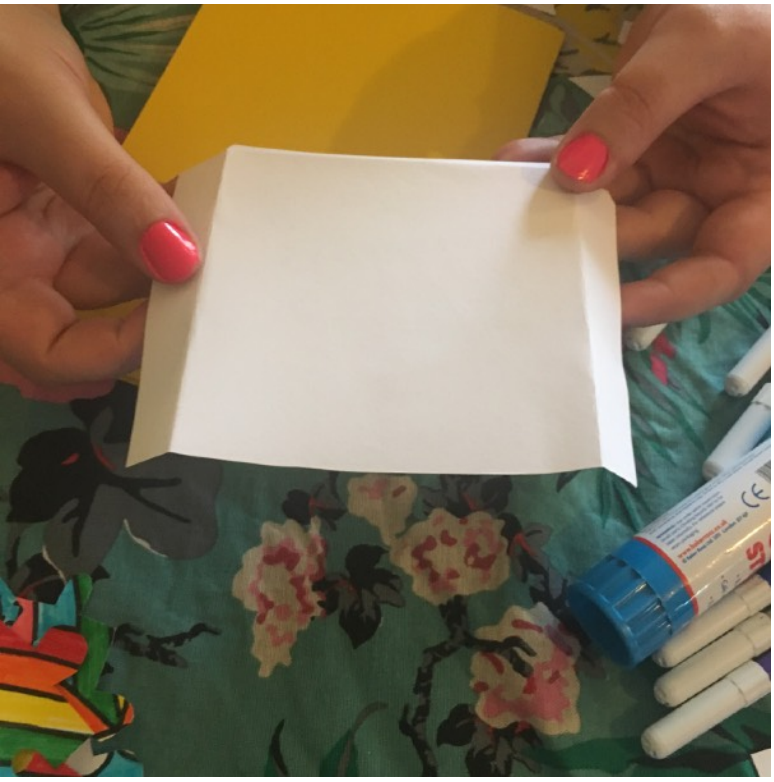

Now to make the pocket on the back of the card to take your jigsaw pieces - with a small rectangle cut the corners off on one of the long sides to make flaps to stick it on with

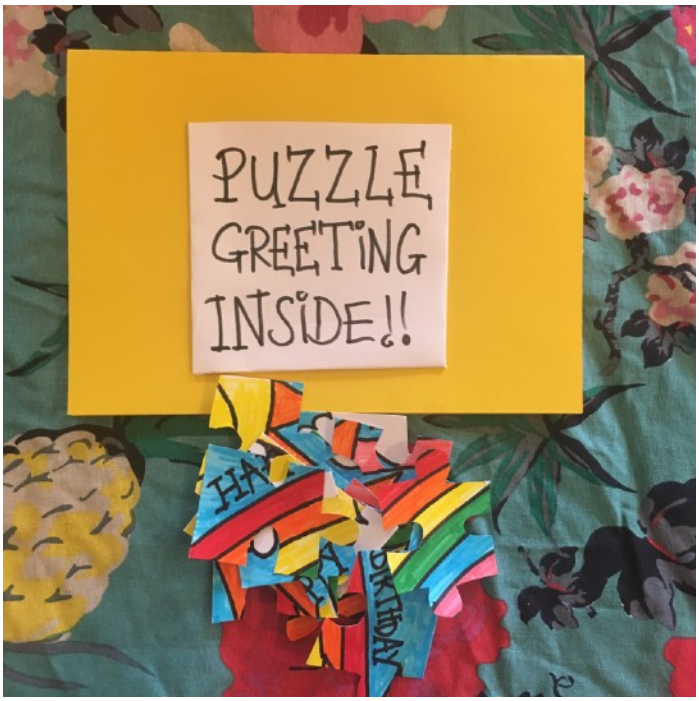

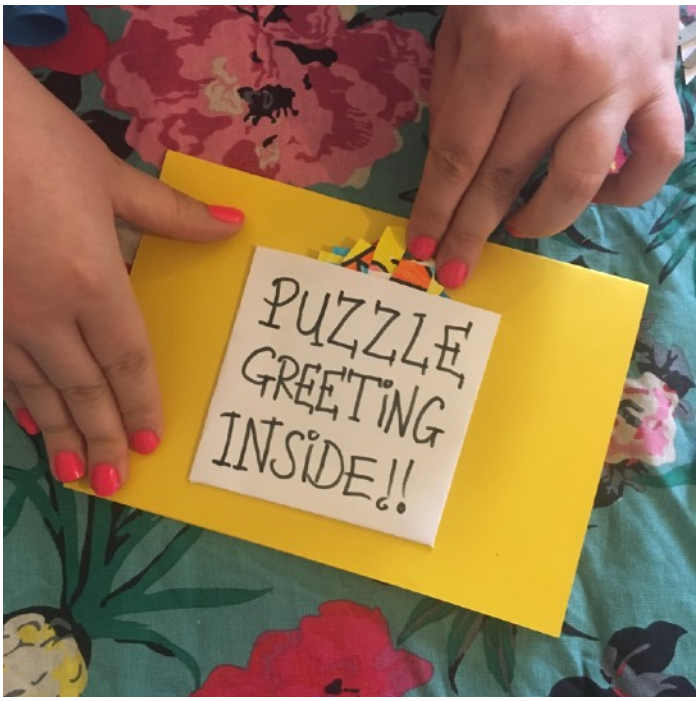

Glue the sides and stick it to the back of card like so

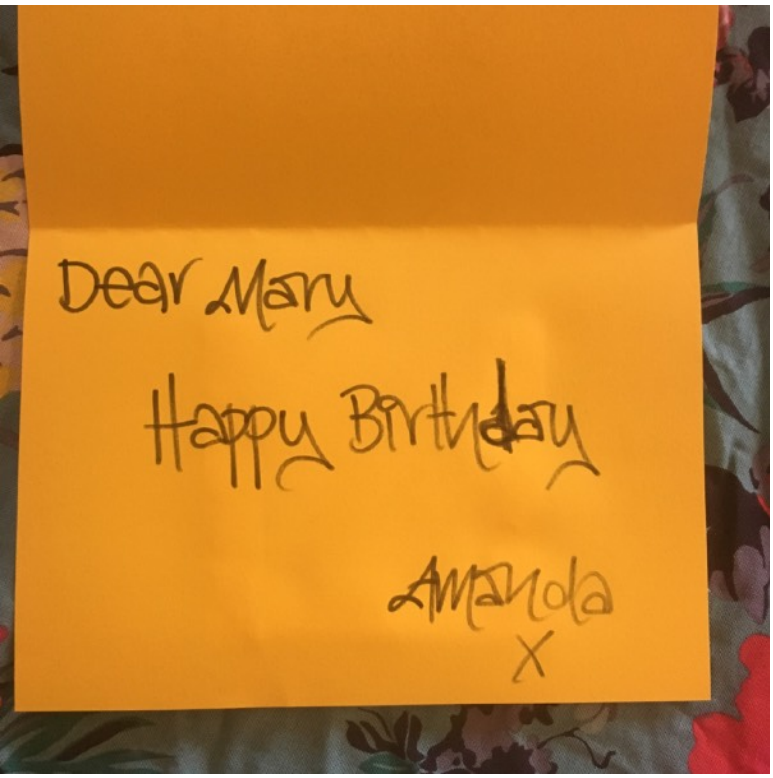

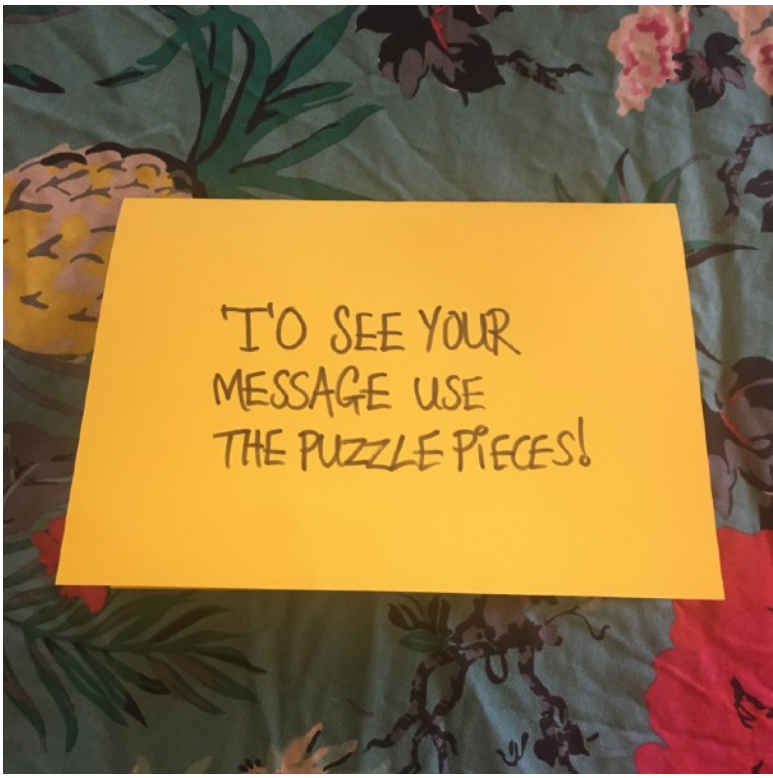

You can write a message or drawing on the back then add your jigsaw pieces in to the pocket

Leave instructions on the front of the card and lastly you can write your message inside!

There you have it your very own “Jigsaw Card”

Here’s another example we made to inspire you!
