Look Back Chart

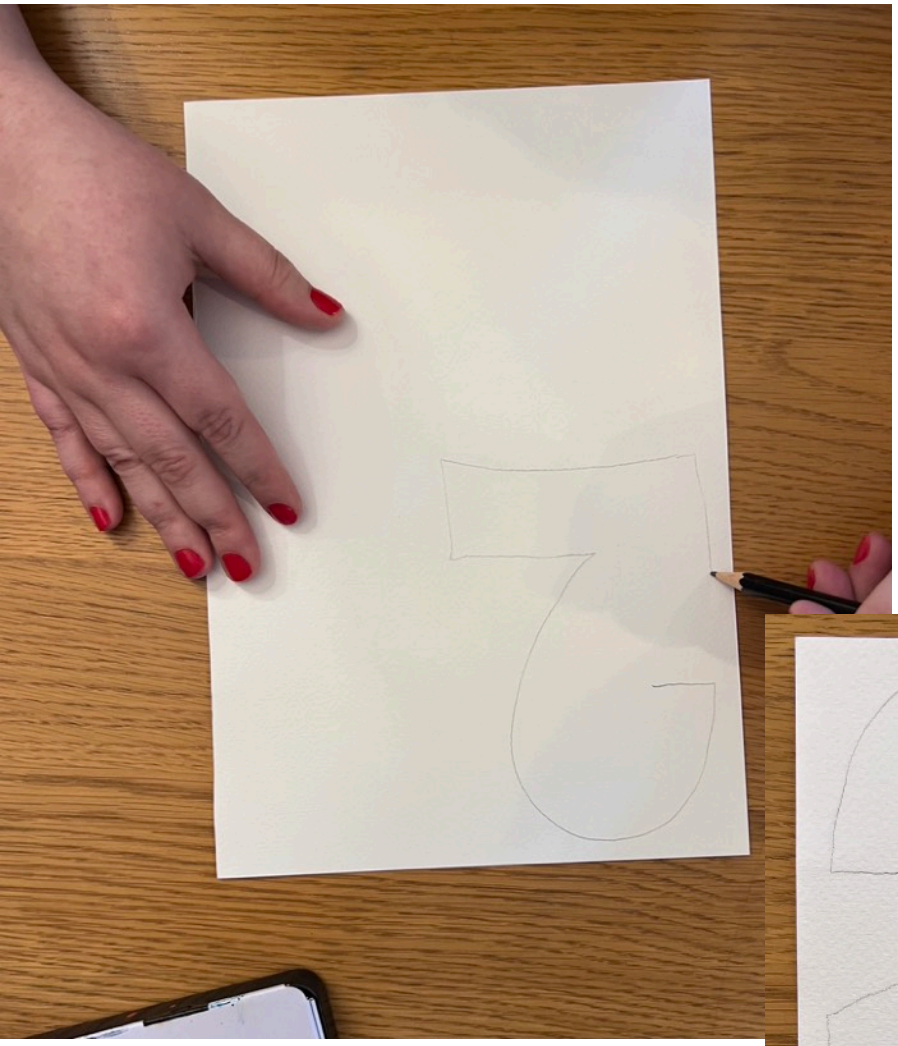

Celebrating a new year beginning why not create a look back chart to be filled in over the year with places been, books read - whatever it is you want to mark as important!

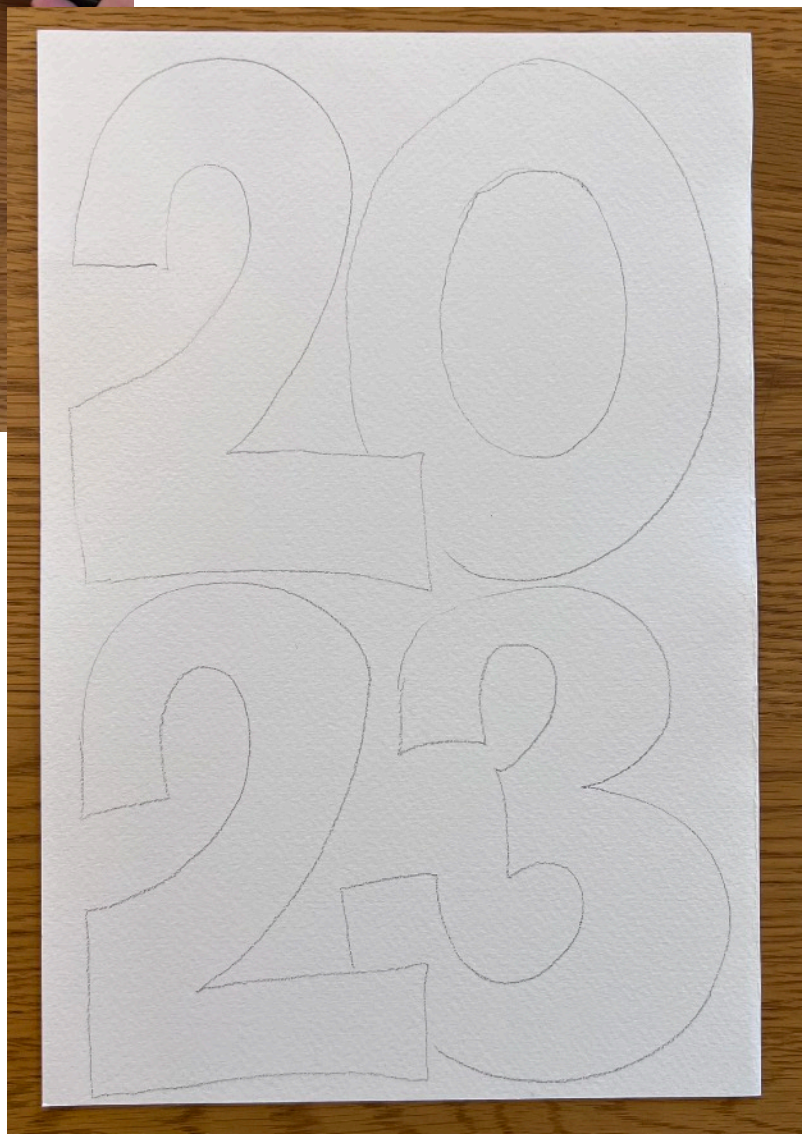

Tools and Materials:

- Paper
- Pencil
- Watercolours
- Paintbrushes (small and medium)
- Water

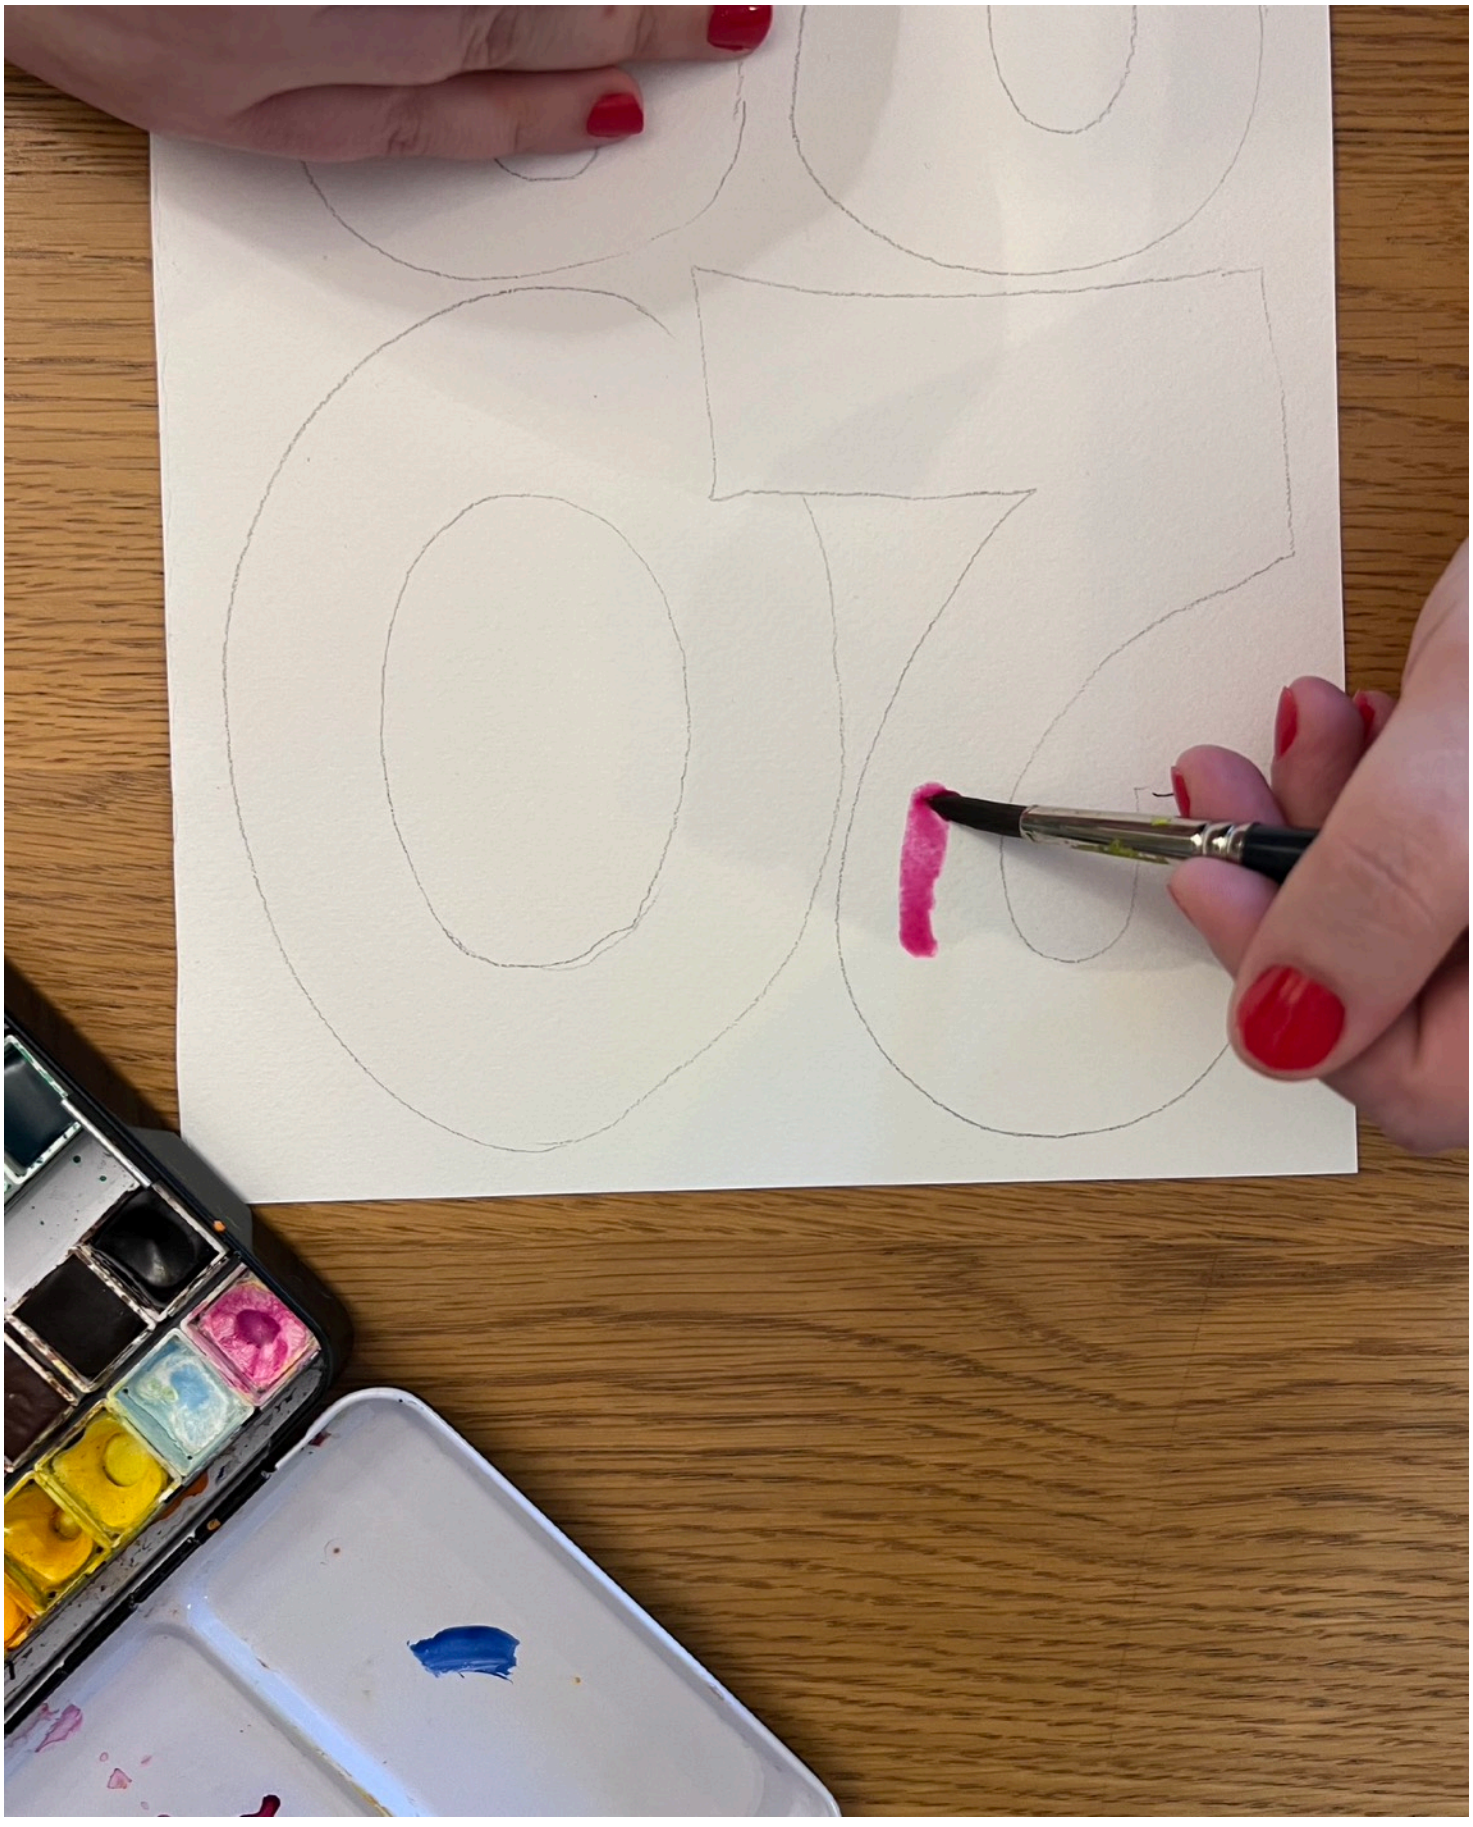

So think about how you want to do your design, for this teaching pack we've gone for a simple but bold use of the year "2023" like so, drawing the 4 figures to fill the page

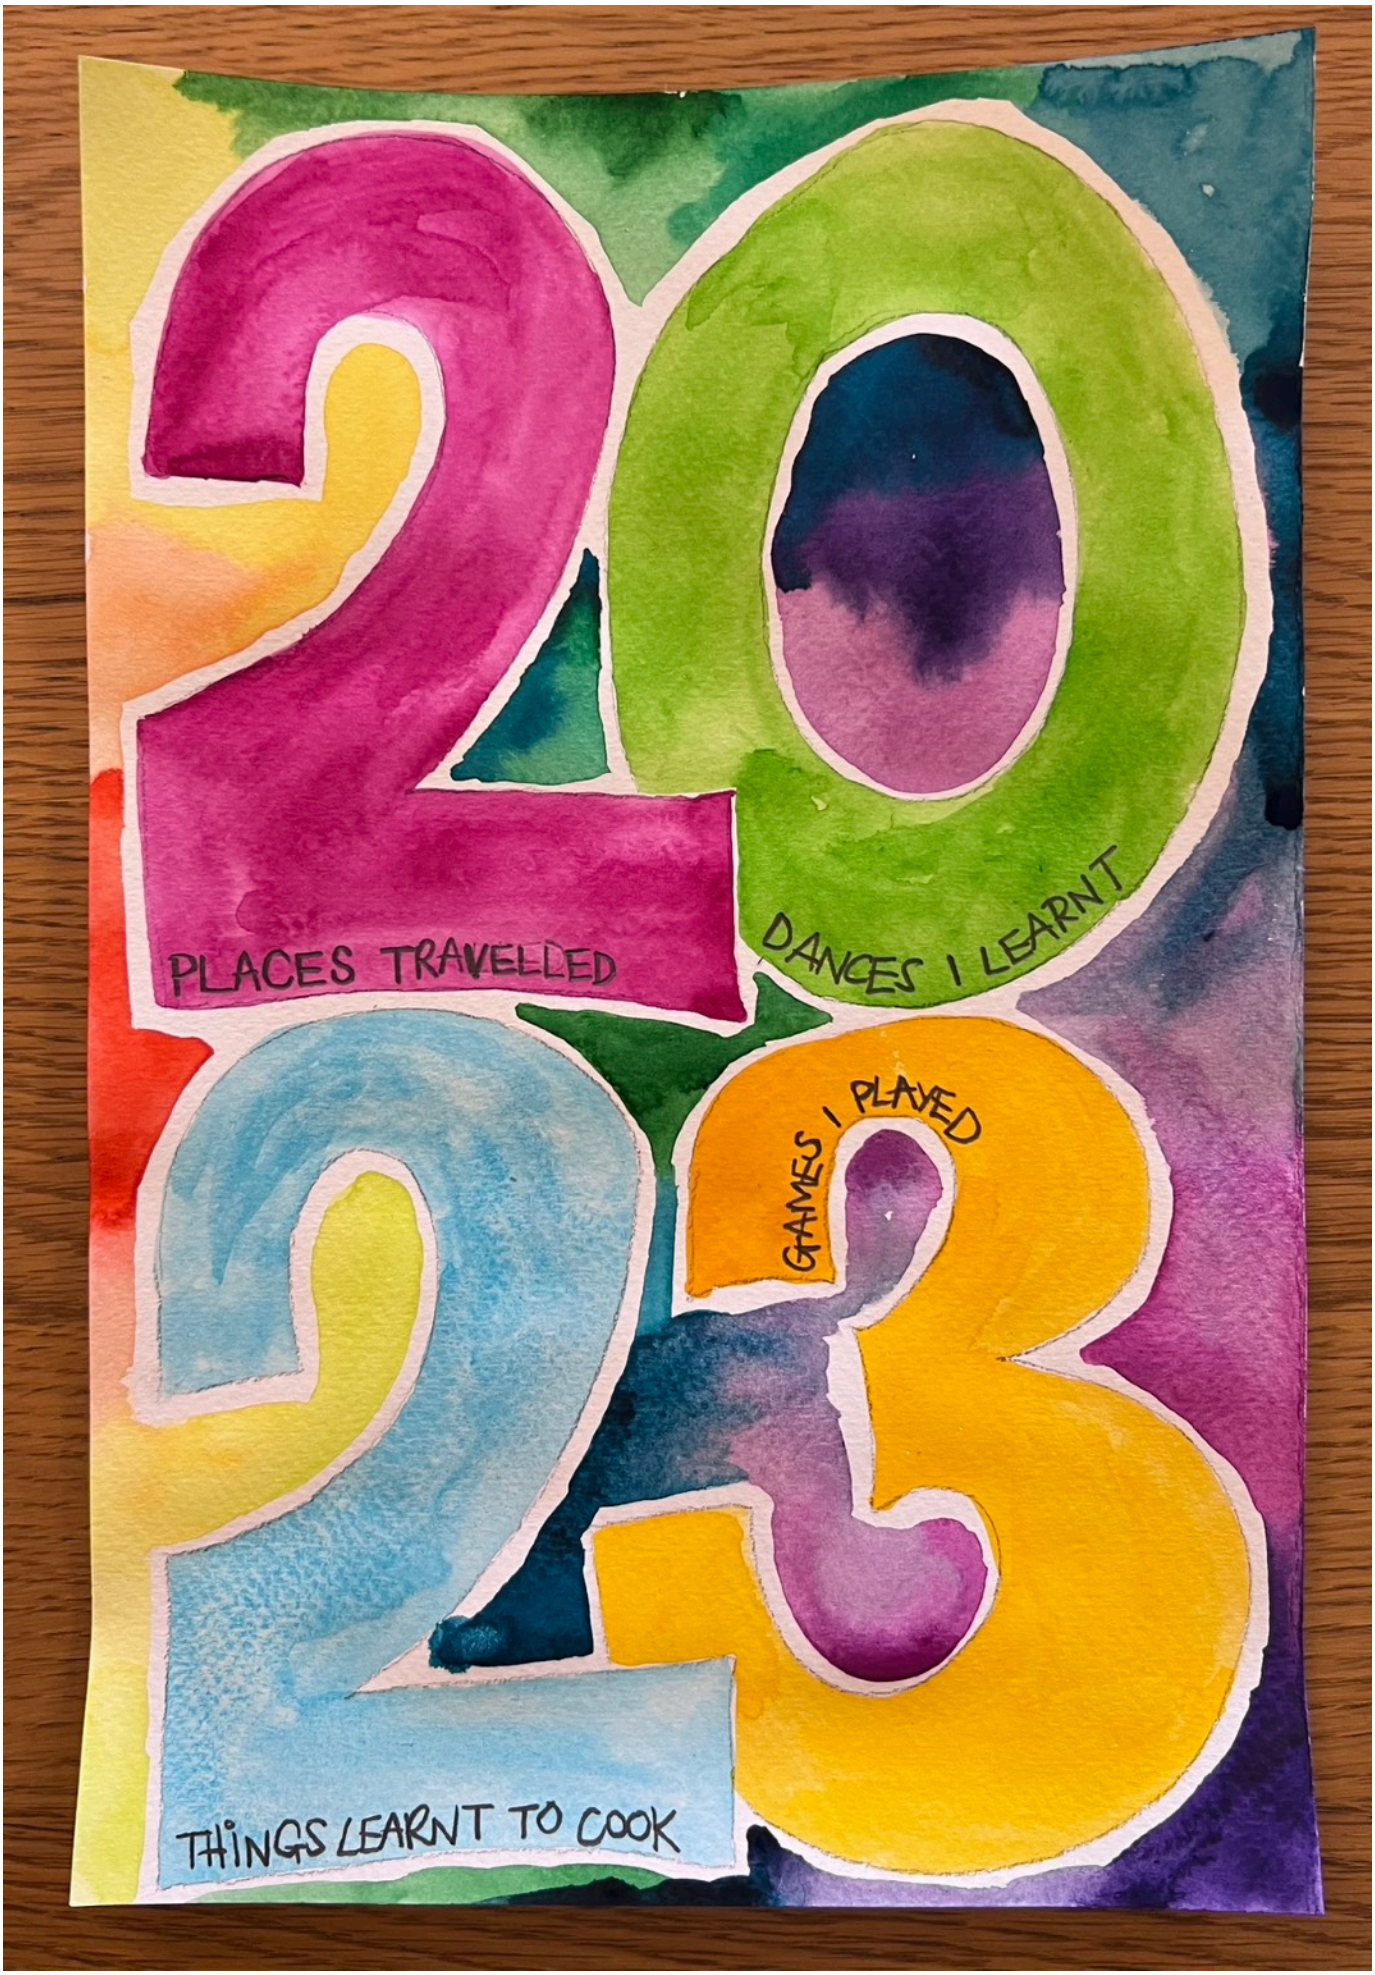

Once you have created your figures and are happy with the layout you can paint them, one dry you can add in the details of what it is you want to count

There you have it your very own “Look Back Chart”

Here is another we made to inspire you!
