Cool it Art

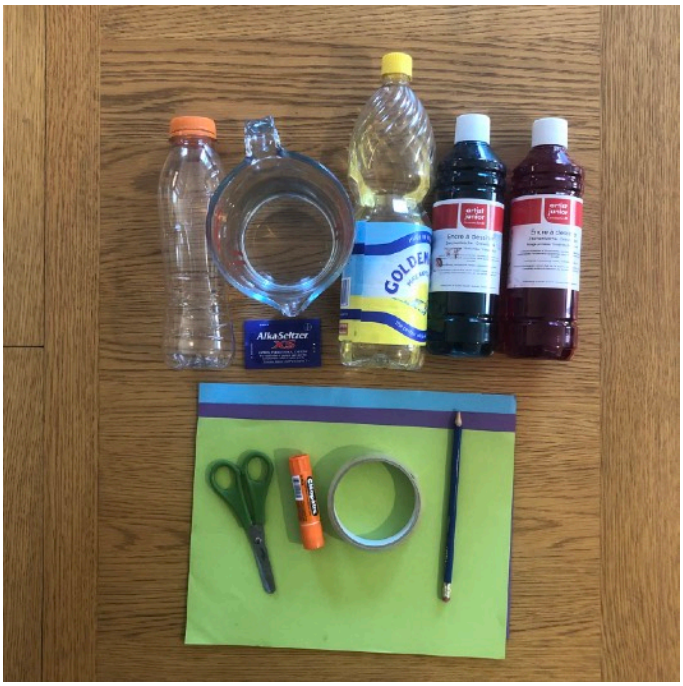

Lambeth

Luminous Lava Lamps

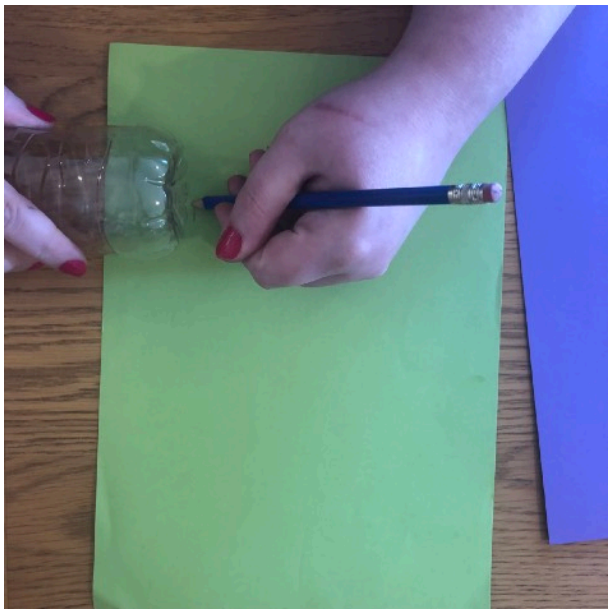

This is a super fun was of combining art and science!

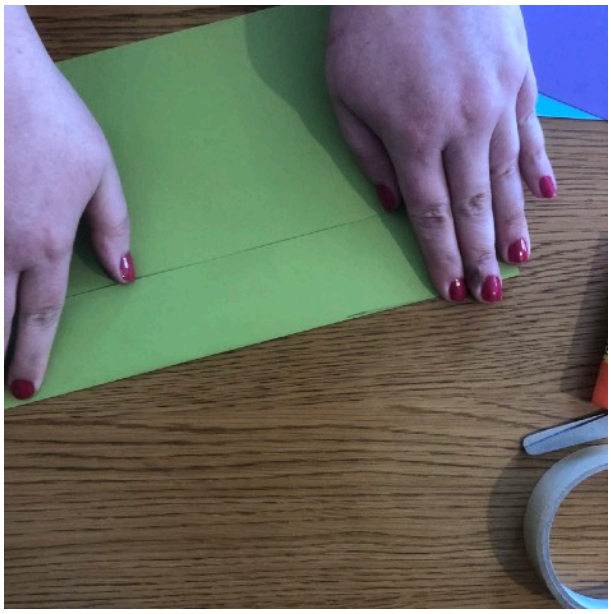

Tools and Materials:

- Empty plastic bottle
- Water
- Oil
- Scissors
- Ink
- Coloured Paper
- Sellotape
- Glue
- Alkaseltzer
- Pencil

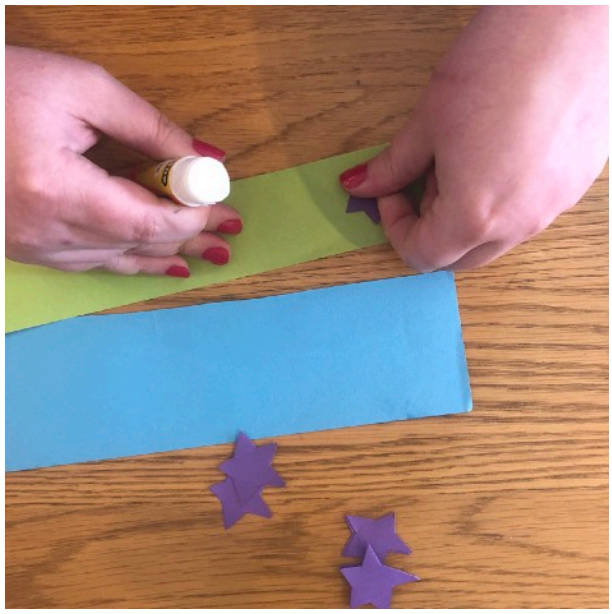

So first we need to transform the bottle to look like a lava lamp - making a band at the bottom to hid the base and a band at the top to hide the cap. Measure the length you want then fold it over and cut it out, repeat for the other one

Once you are happy with your bands you can decorate them - cut out some shapes to add to the bands

Once you are happy stick the cut outs to the bands and then stick the bands to the bottle

Now for the fun bit - adding the ingredients to make the lava lamp work! Add in the oil then ink and then the water

Then for the magic - crumble up the Alkaseltzer and add it in to the bottle - put the lid on fast!!

And there you have it your very own Luminous Lava Lamp
