Lunar NY Springy Snake

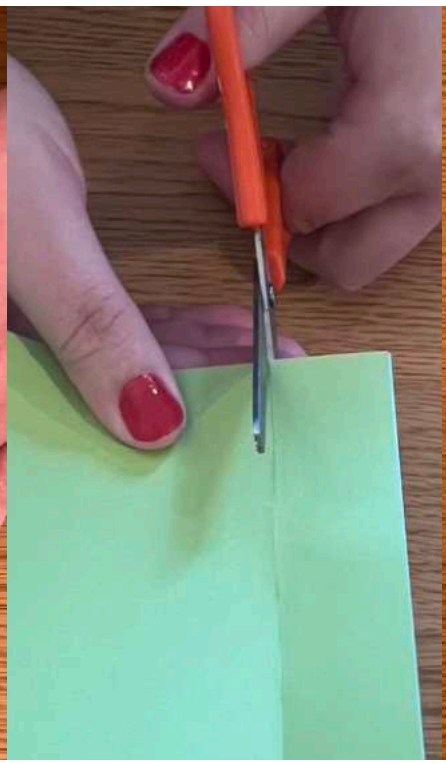

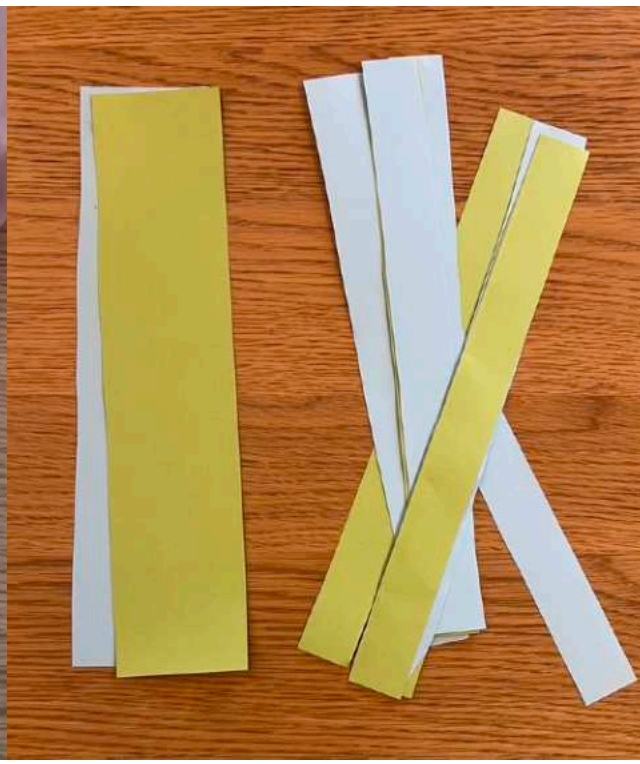

Celebrating Lunar New Year, which this year is the year of the Snake - we thought it would be fun to create our own Springy Snakes

Tools and Materials:

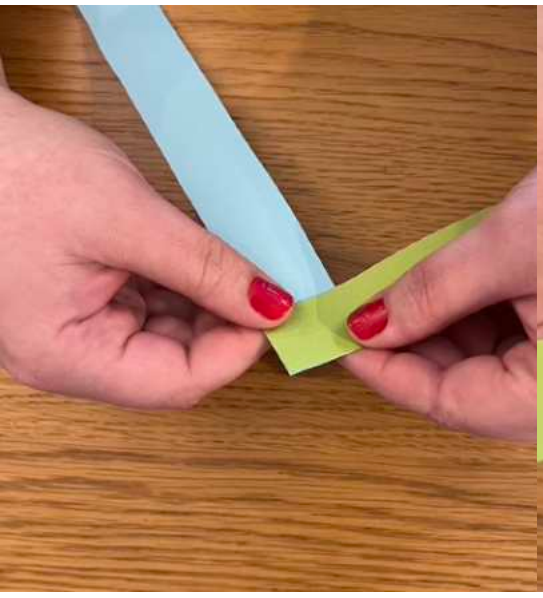

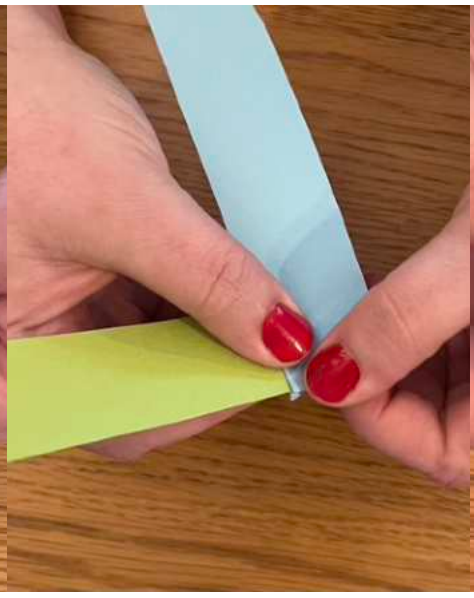

- Coloured Paper
- Pencil
- Glue Stick
- Scissors

Taking your whole bits of paper fold a strip on one and then use that as a guide to cut both pieces of paper, repeat until you have a few strips to create your springs from

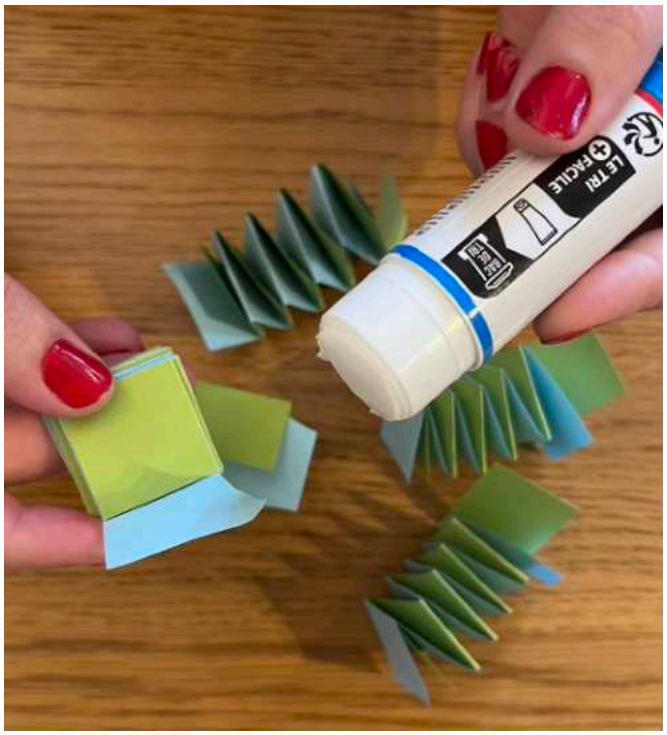

Taking 2 strips - we used different colours you can use the same - put them at a right angle and then fold one over the other continuing till the paper runs out to form a spring

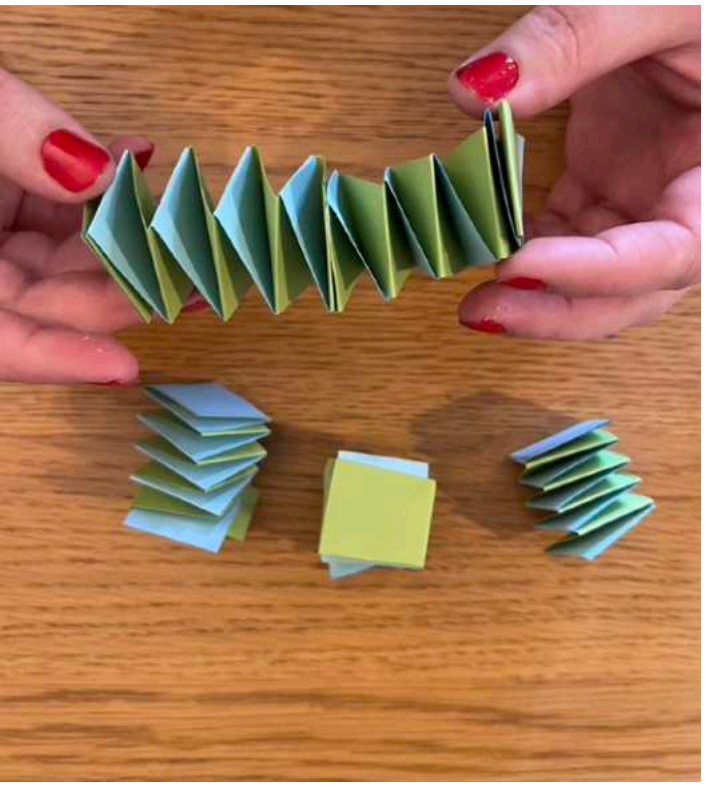

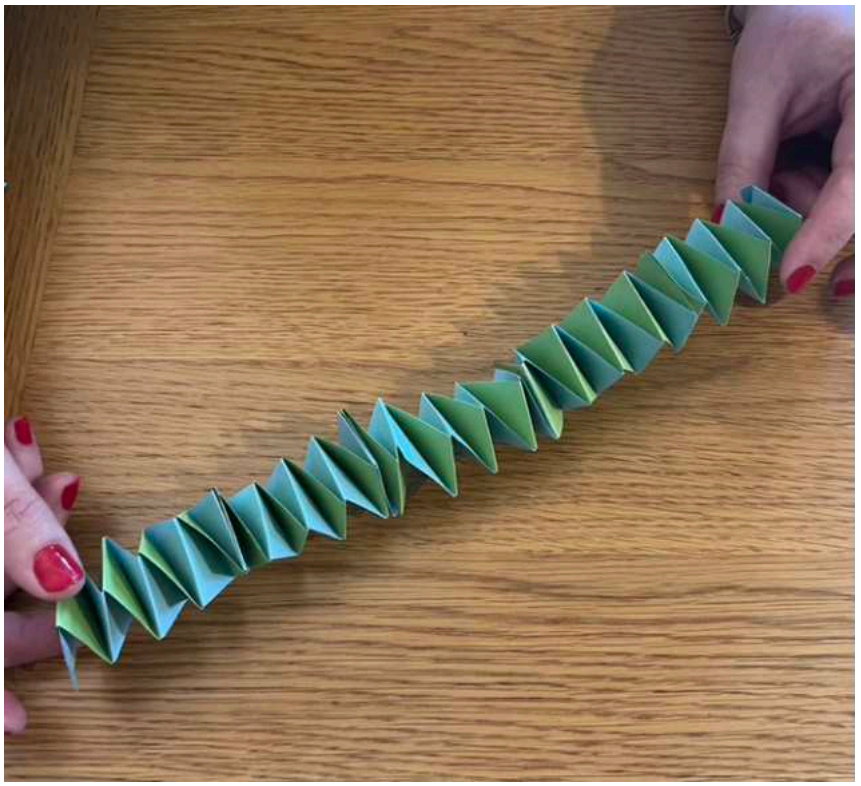

Once you have all your springs folded you need to secure the ends by glueing them together

When you've done that and they have dried a bit you can start glueing them all together to create the body of your snake - you can make it even longer if you like, just need to create more springs!

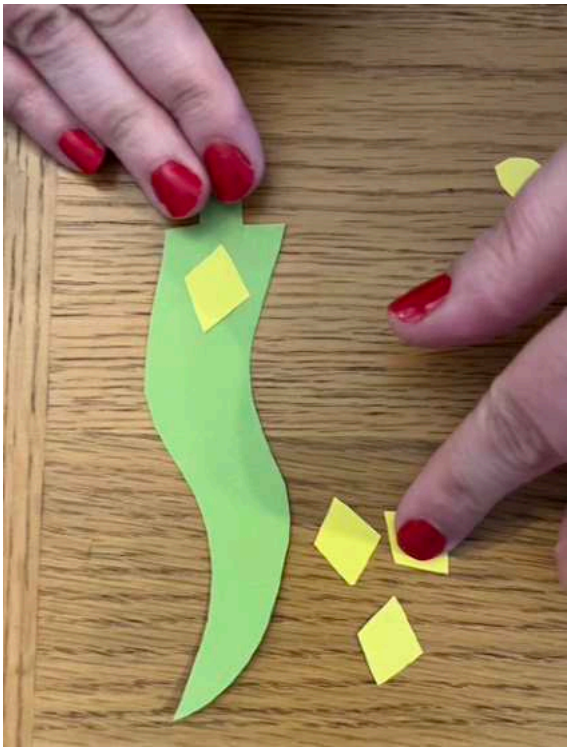

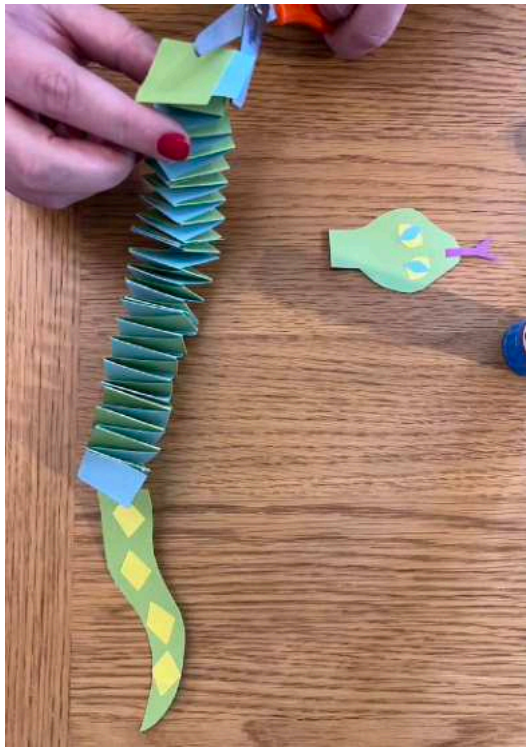

Using some of the leftover paper cut out a head and a tail - you need to leave a tab to stick them to the body with, the tab is smaller than the head or tail but wide enough to get some grip when you glue it

Cut out any other embellishments you might want - eyes, tongue, patterns and then stick them on when done. Then attach the head and tail to the body like so

There you have it your very own “Lunar NY Springy Snake”!
