Marvellous Masks

Inspired by Venetian masks this is a fun way to create your own mask with paper and straws.

Tools and Materials:

- Coloured Paper or Card
- Pencil
- Scissors
- Glue stick
- Sellotape
- Straw

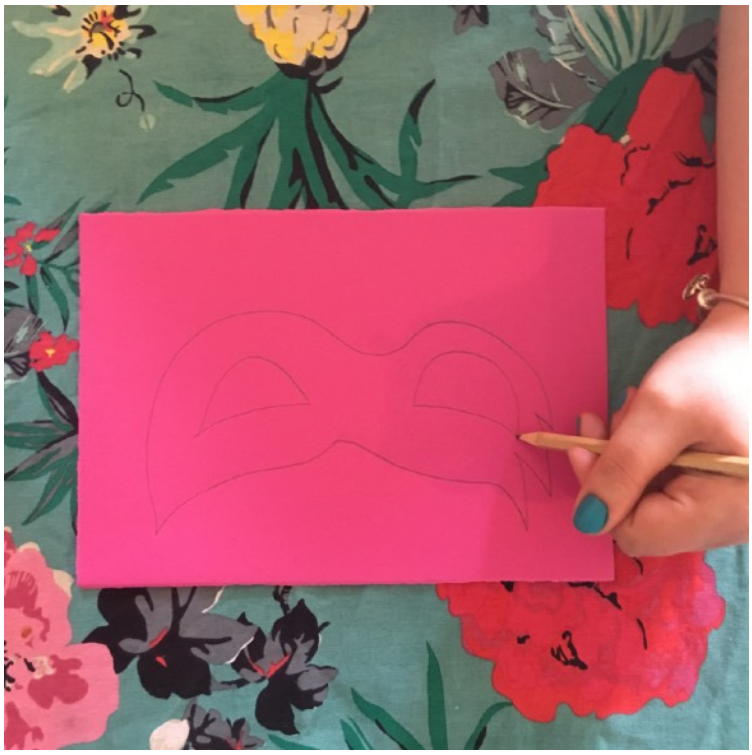

First we need to draw out the shape of the mask - it is to fit around you eyes and above your nose so make sure it is wide enough for your face plus leave a gap so it can sit above your nose - like glasses.

When you are happy with it you can cut it out

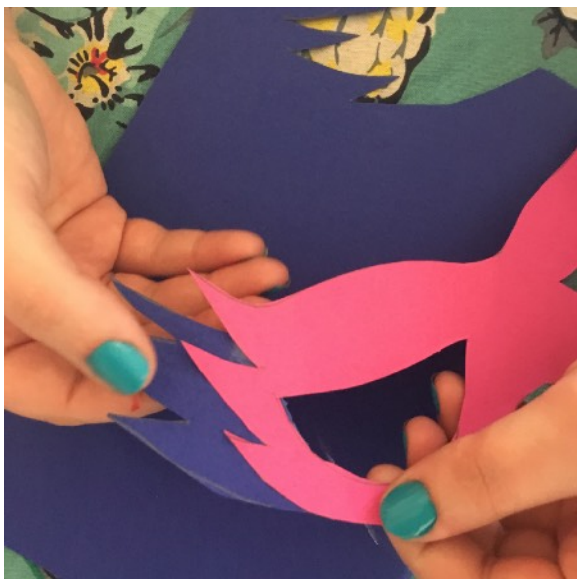

Once you have the basic mask shape you can start to decorate it - however you like, you can add different shapes and colours! Stick them together with the glue stick

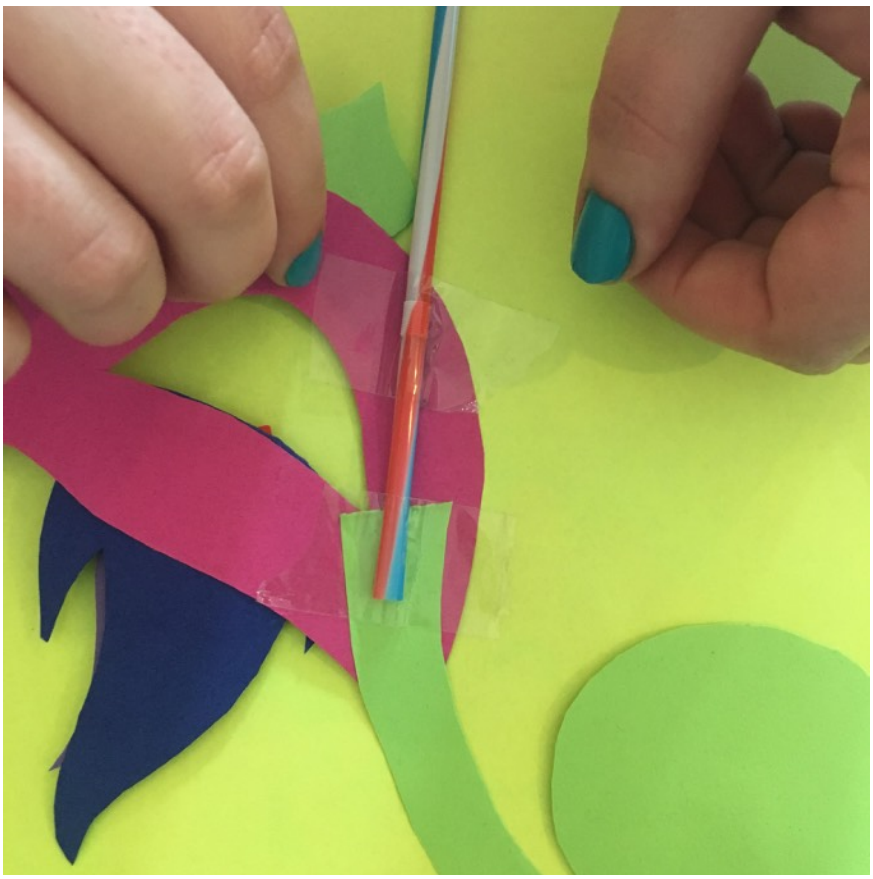

Now grab your straw to attach to the mask - using sellotape to fix it to the back like so

There you go your very own “Marvellous Mask”

Here is another we made to inspire you!
