International Earth Day Artwork

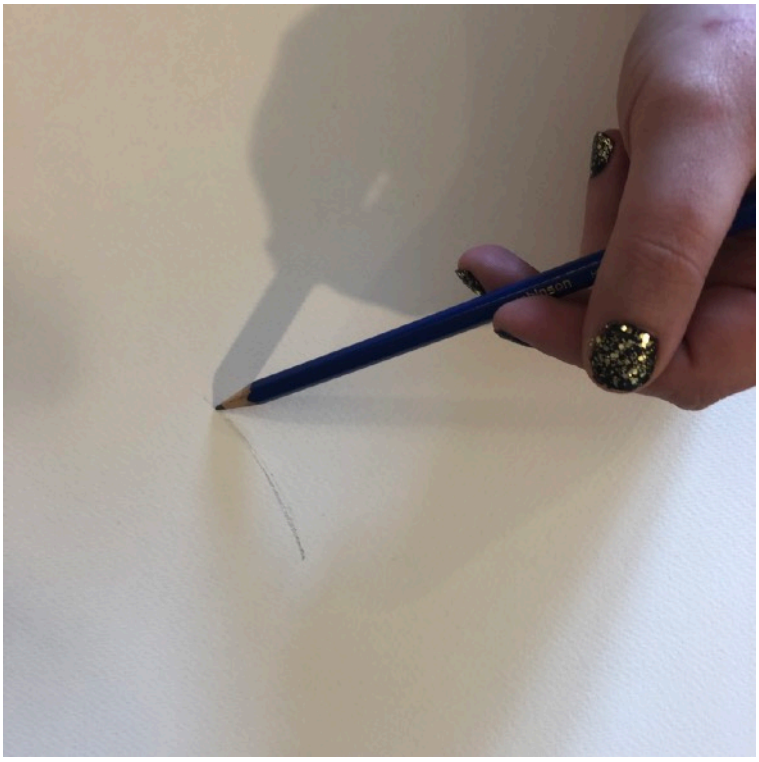

Taking inspiration from International Earth Day on the 22nd April why not create a picture representing “Mother Earth” - what do you think she could look like?

Tools and Materials:

- Paper
- Pencil
- Paintbrush
- Water
- Watercolours

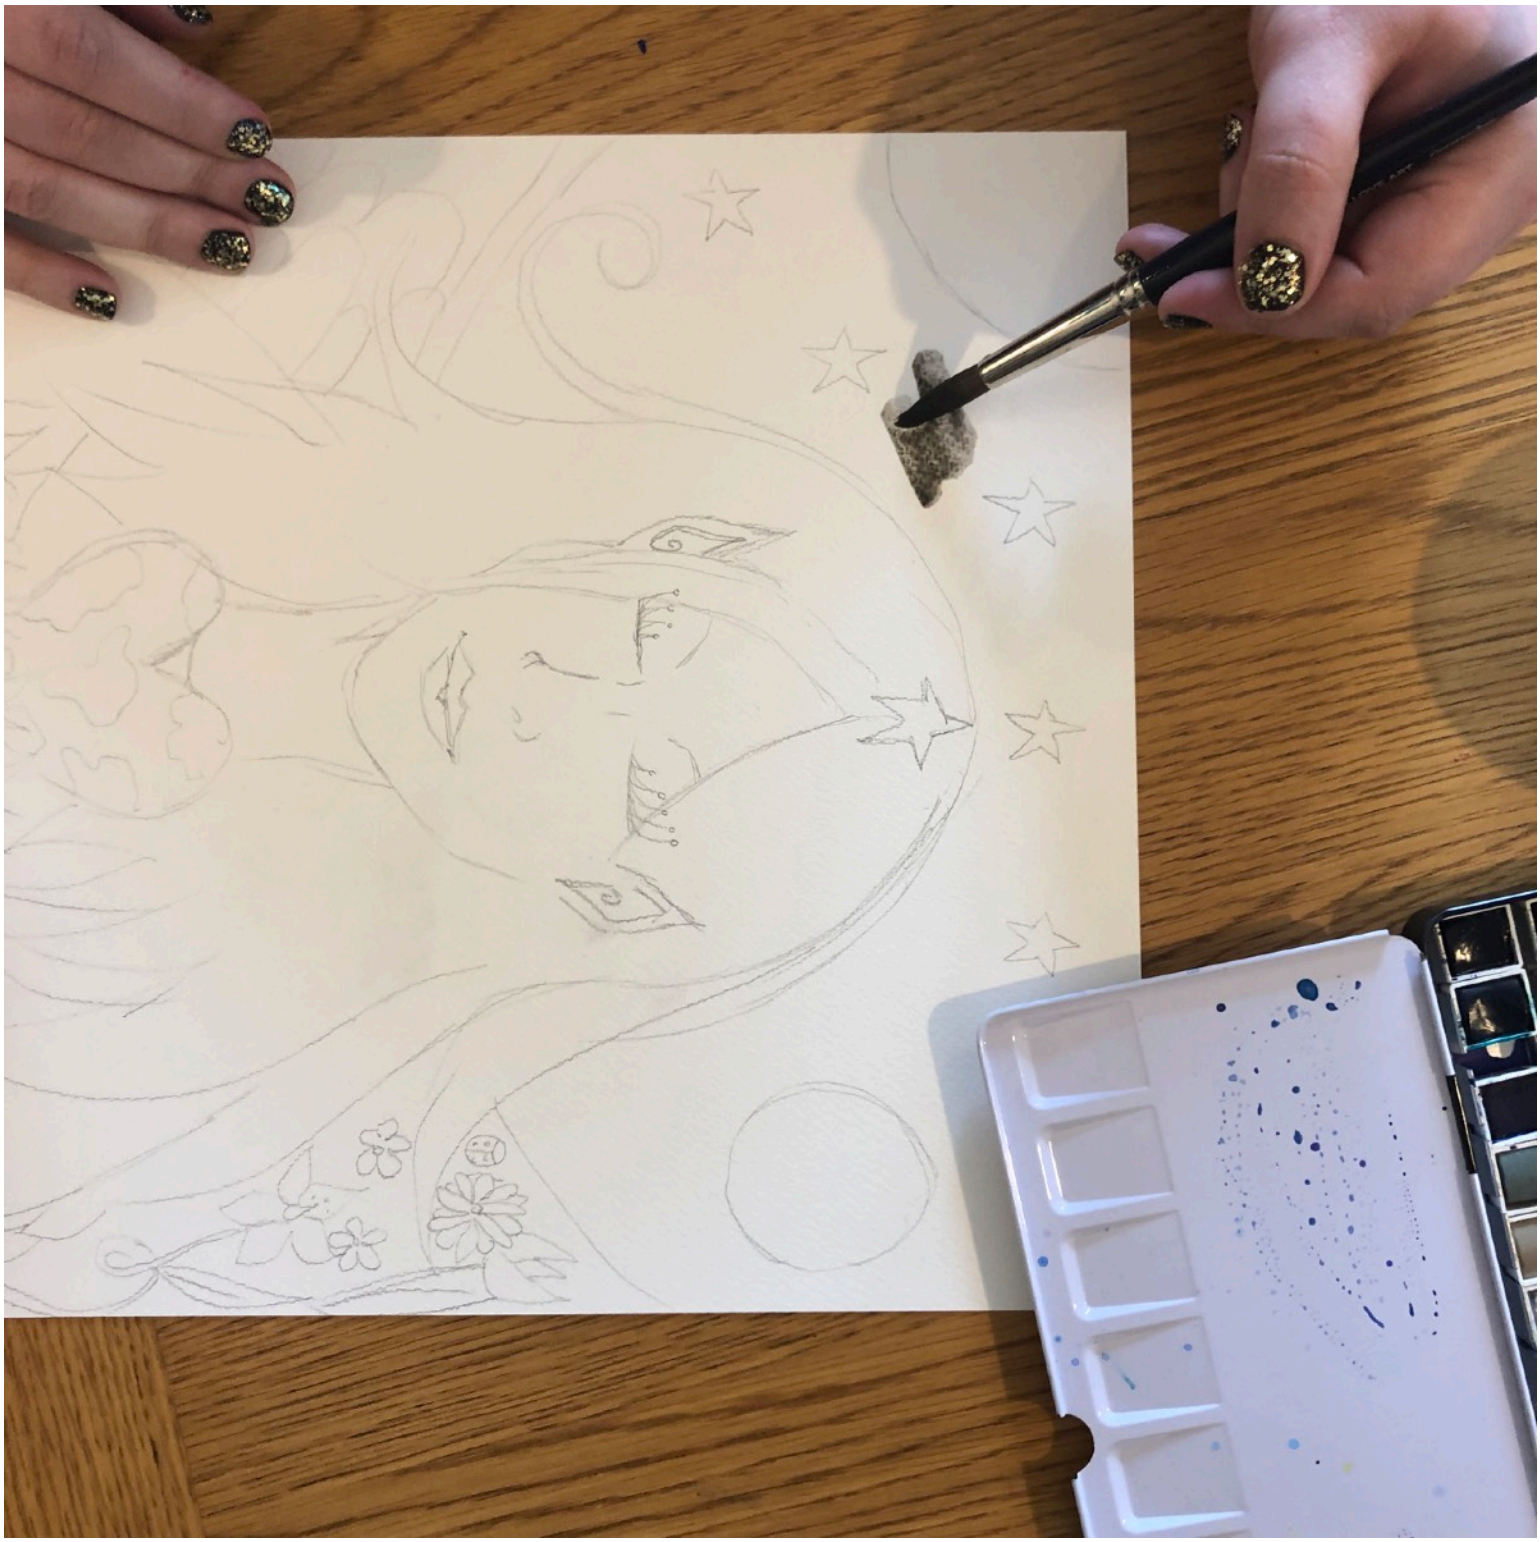

We chose to use watercolours - you could of course felt tips or colouring pencils whichever you have available! So first of all what could Mother Earth look like? Is She a Woman or could she be an animal or even the actual Earth? Start sketching out your Mother Earth

Once you are happy with your sketch you can start adding in the colour to transform it

There you have it your very own “Mother Earth” for International Earth Day!

Here is another we made to inspire you!
