Mother's Day Flower

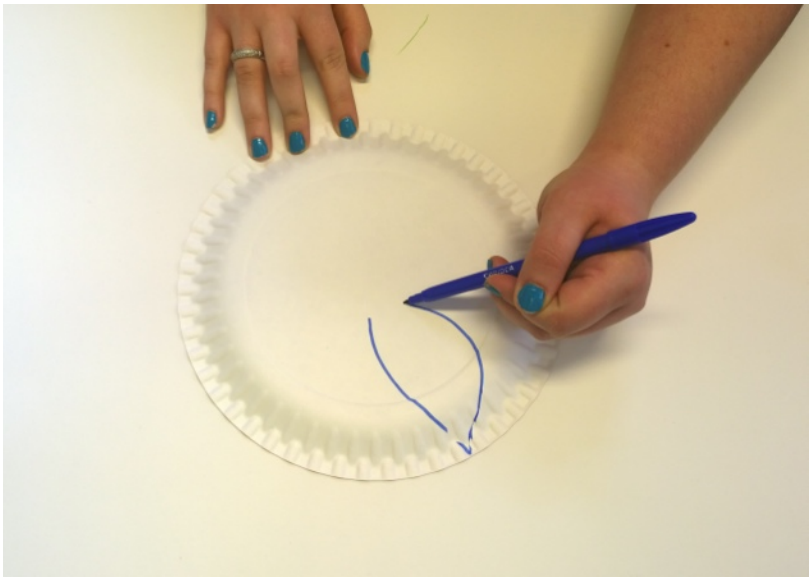

As a gift to go with your card you could create a flower for her with each petal representing a reason why she is so special!

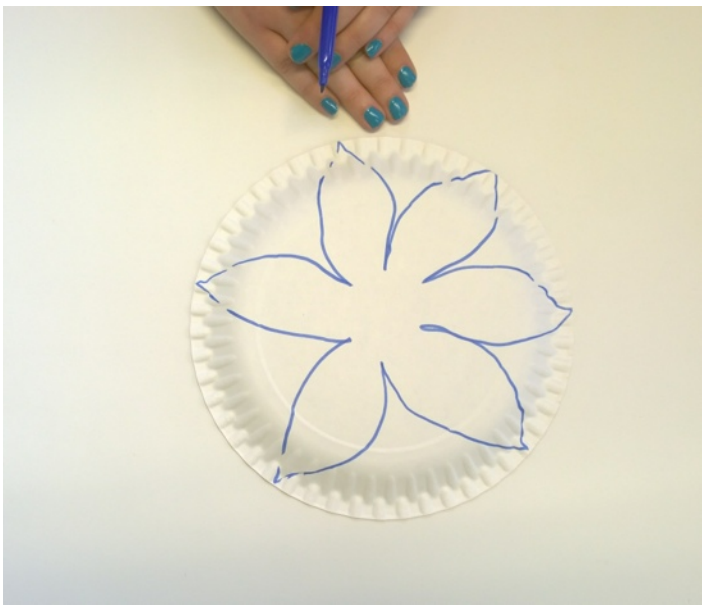

Tools and Materials:

- Coloured Paper Plates (variety of sizes)
- Sellotape
- Scissors
- Lolly Stick
- Felt Tip

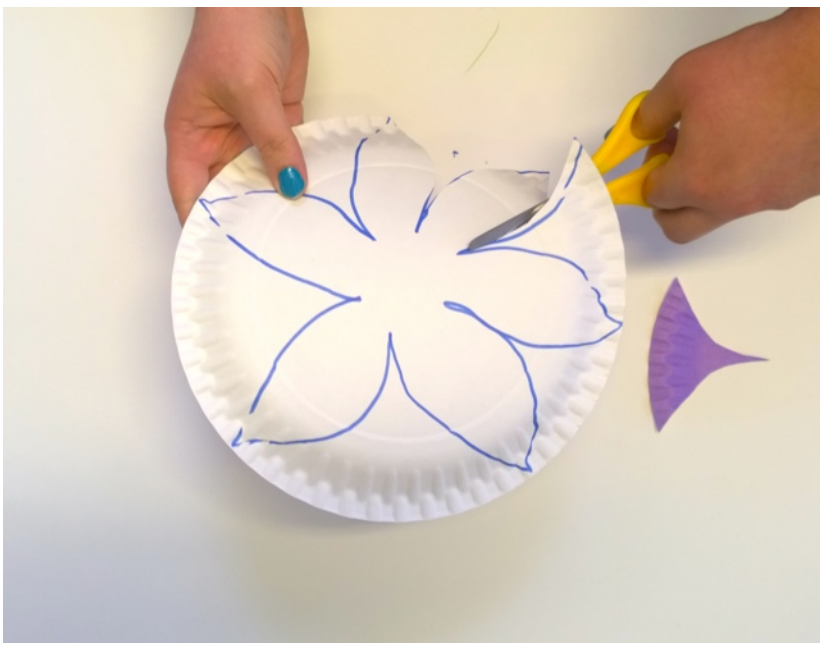

For the flower you want to draw a flower shape, I have done a pointed flower but you can do any flower you want don’t worry too much about whether or not it is a real

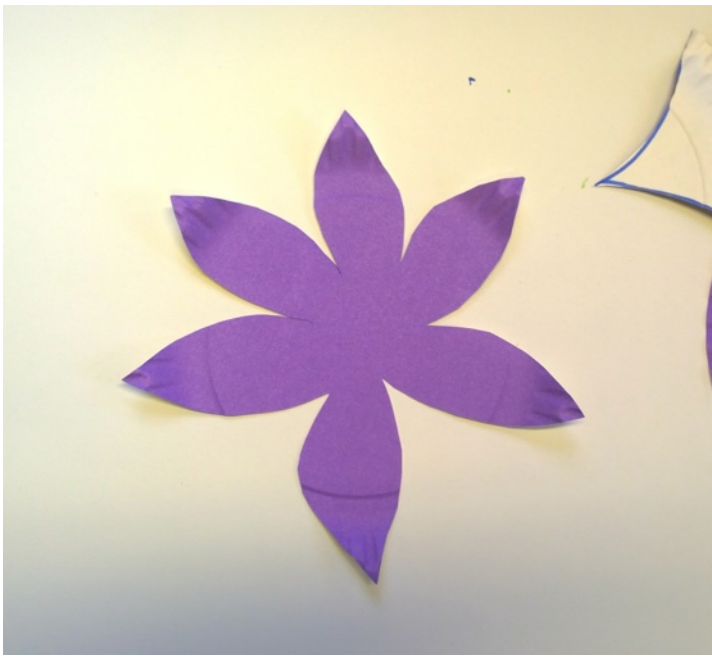

flower!

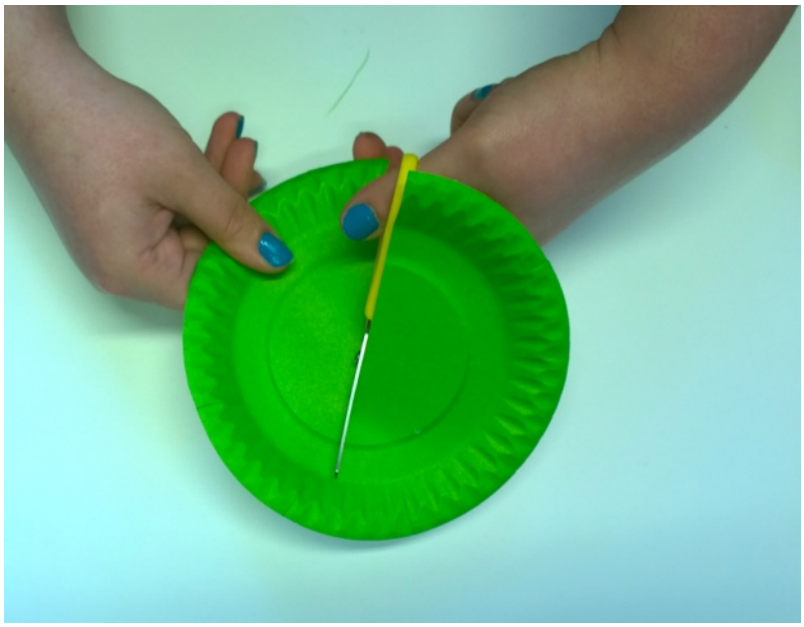

Once you are happy with it cut it out (don’t worry if it has

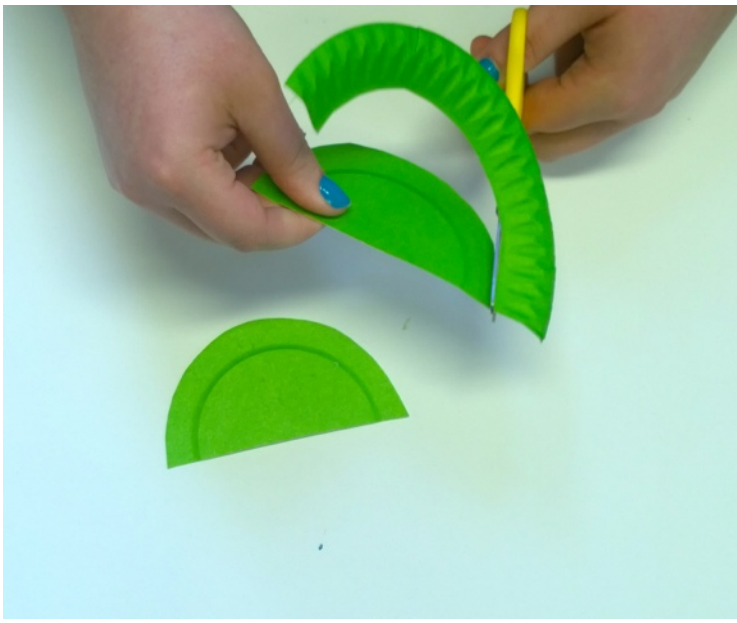

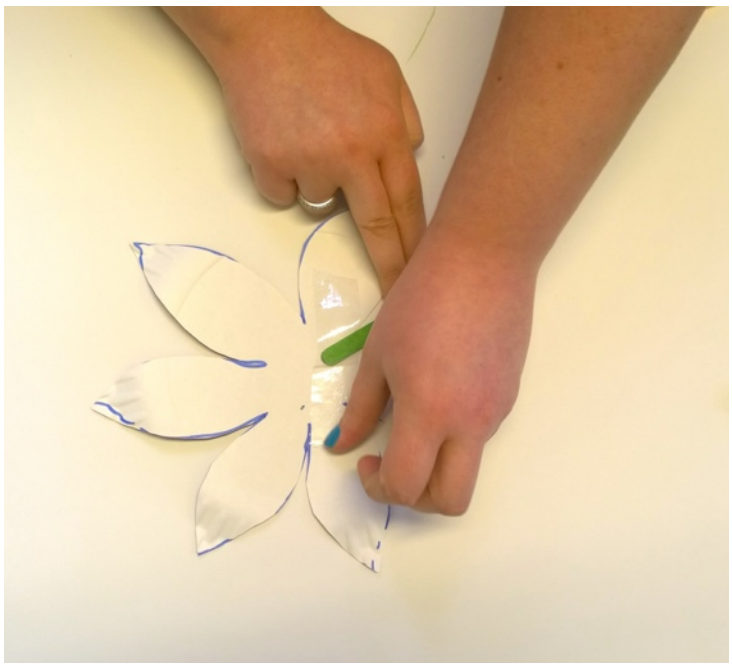

wonky petals - it is still beautiful!)

Now for added details, take your smaller green plates for the leaves, cut it in half and then cut around the inside of the ridges to make it a bit smaller

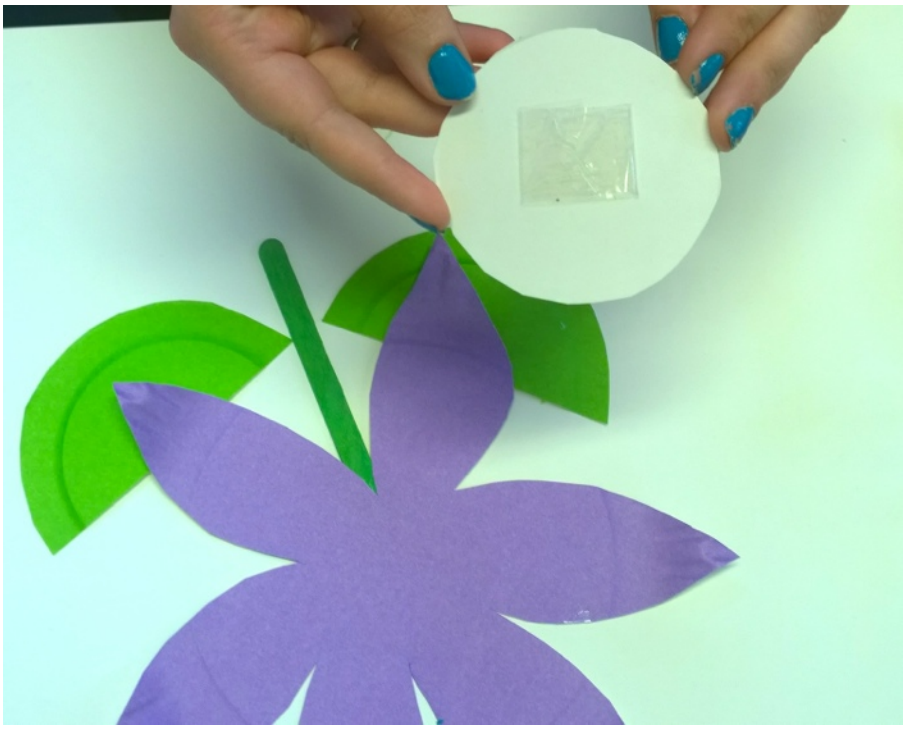

Now attach your lolly stick the stem to the back of the flower and lay out your other bits of plate to see how it looks

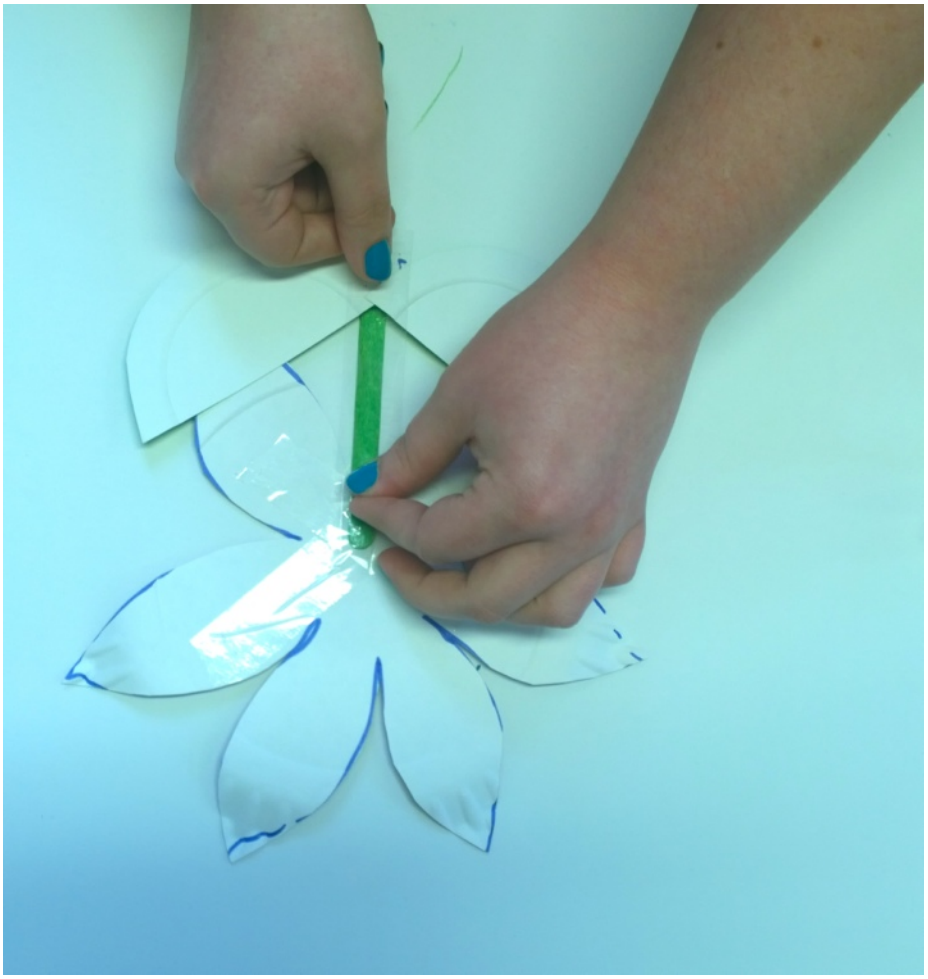

We also cut out the middle of our flower from another plate

Once you are happy with how it looks tape them all together

There you have your flower, now you can draw a face on and add the reasons why she is special to you!
