Paper Airplanes

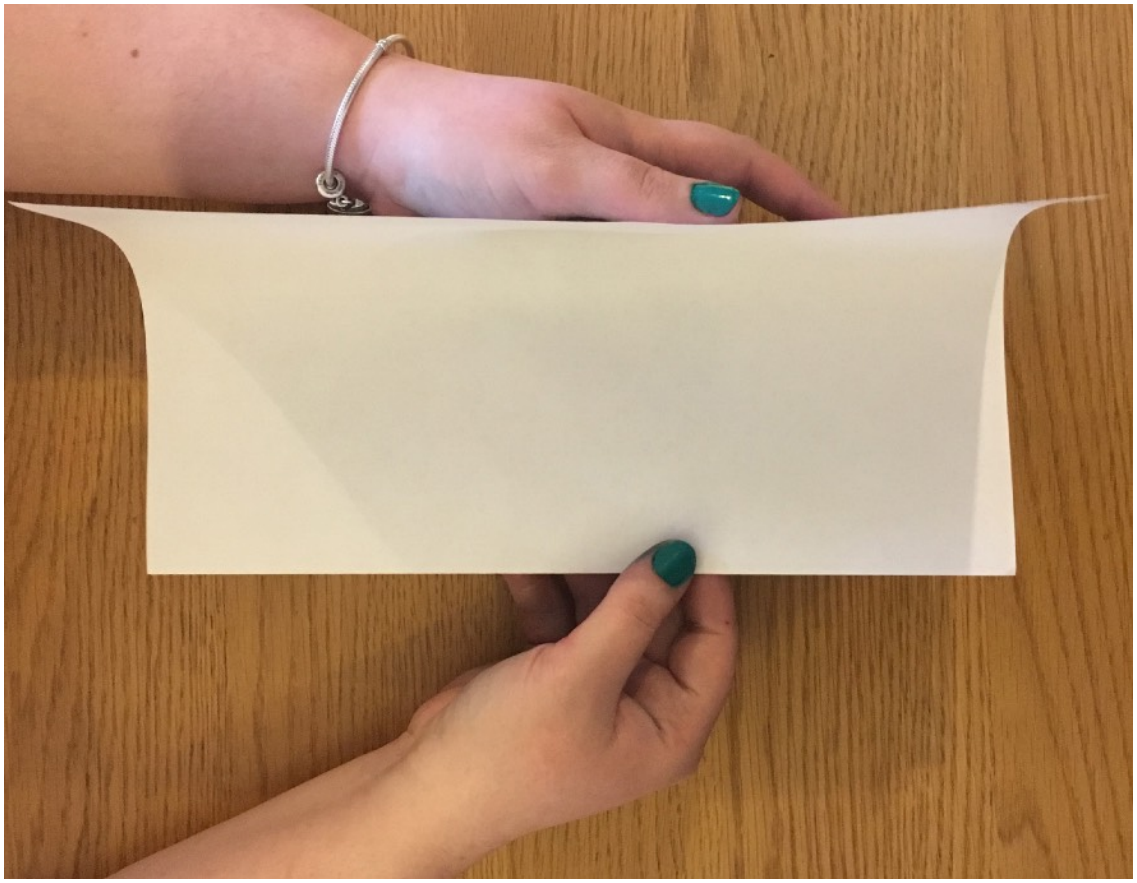

Combining science and art - you can create something to play with and that looks great - paper airplanes putting the fun in functional!

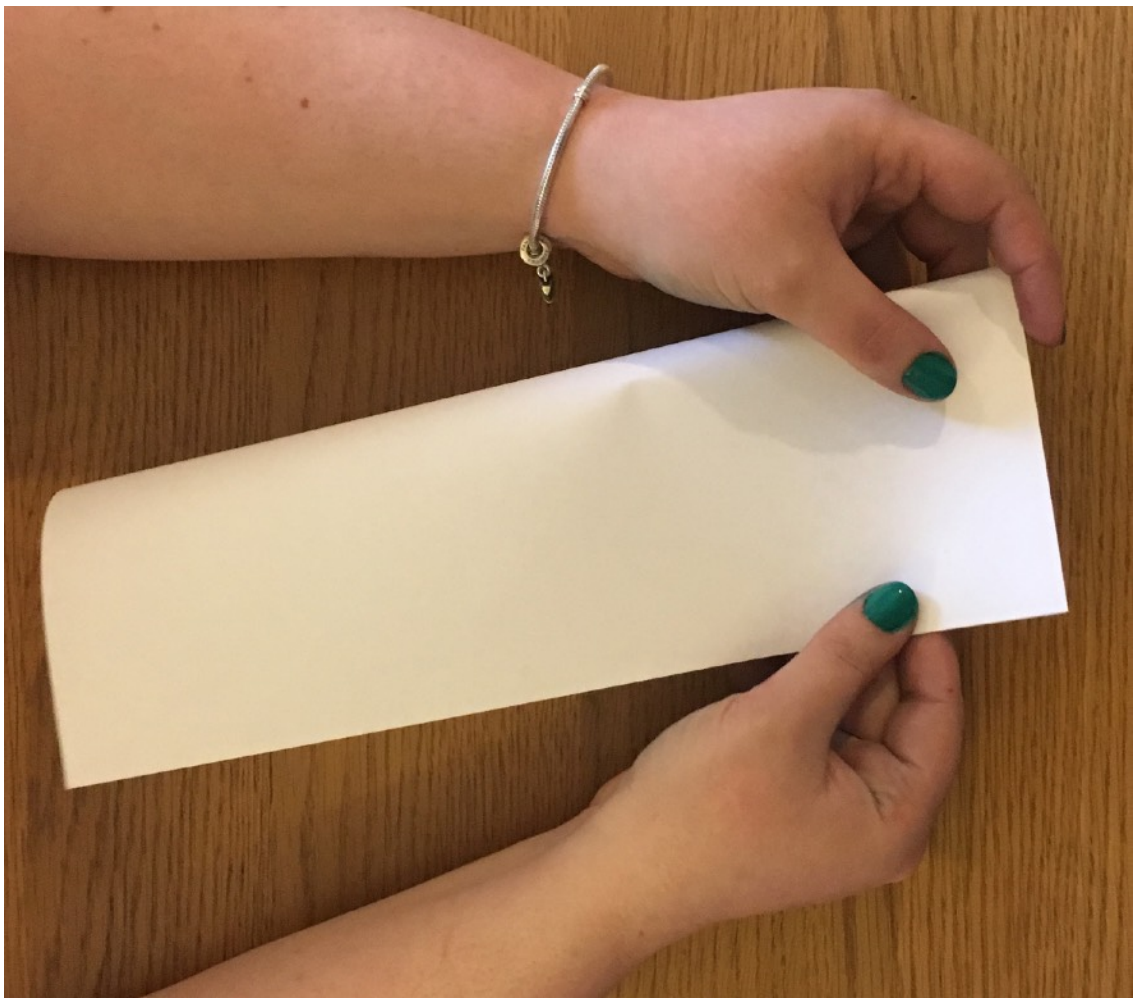

Tools and Materials:

- Paper
- Felt Tips

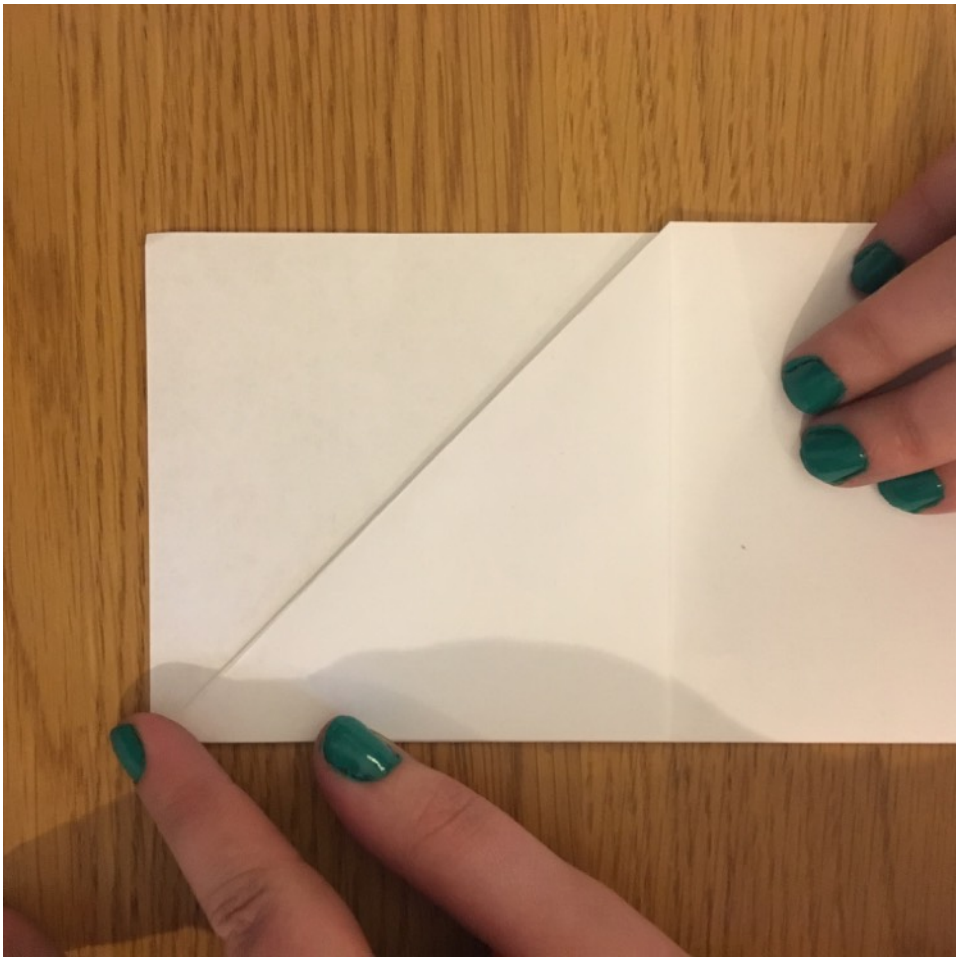

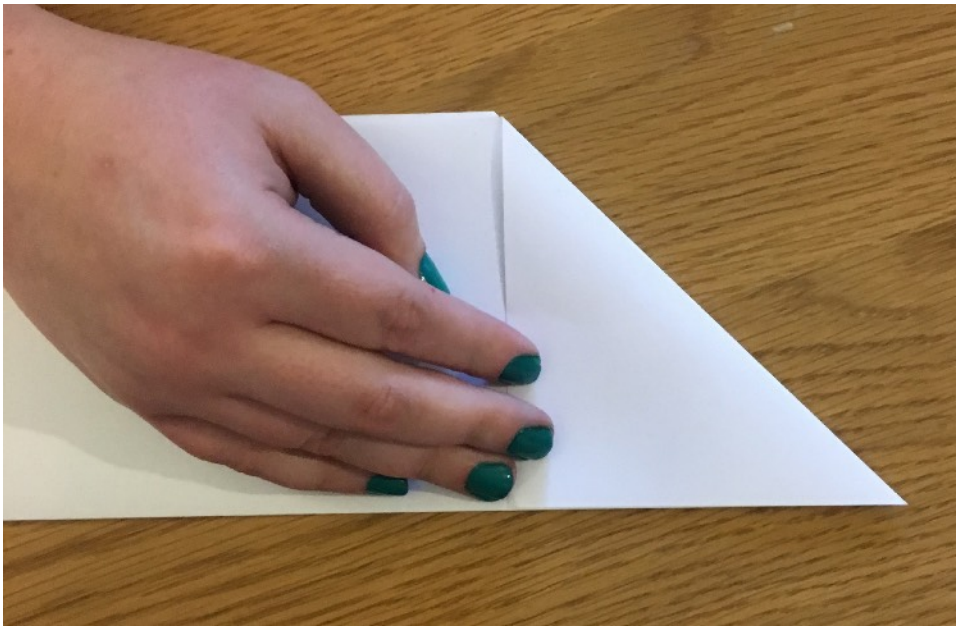

Take your piece of paper and fold it in half length ways

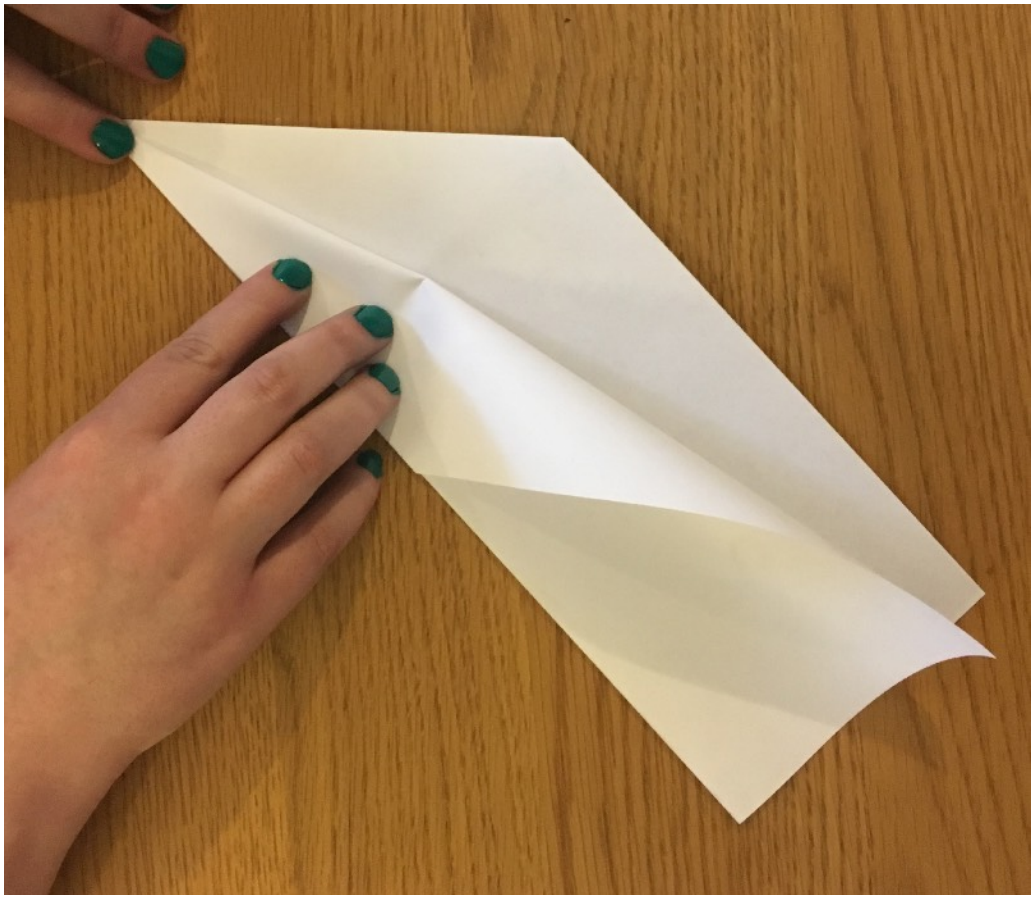

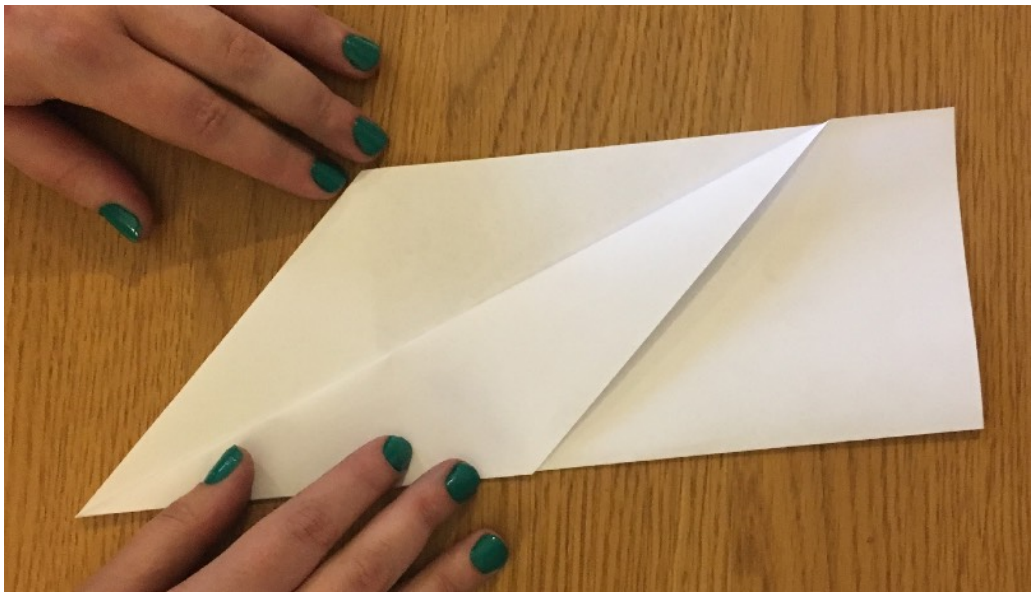

Then fold down the top corner to the bottom line to make a triangle like so, repeat on the other side too!

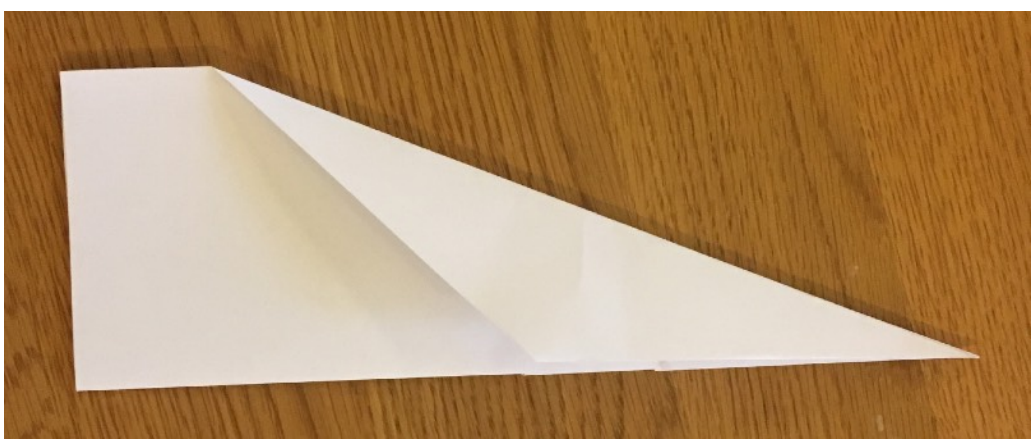

Fold down the top corner to the bottom again on both sides

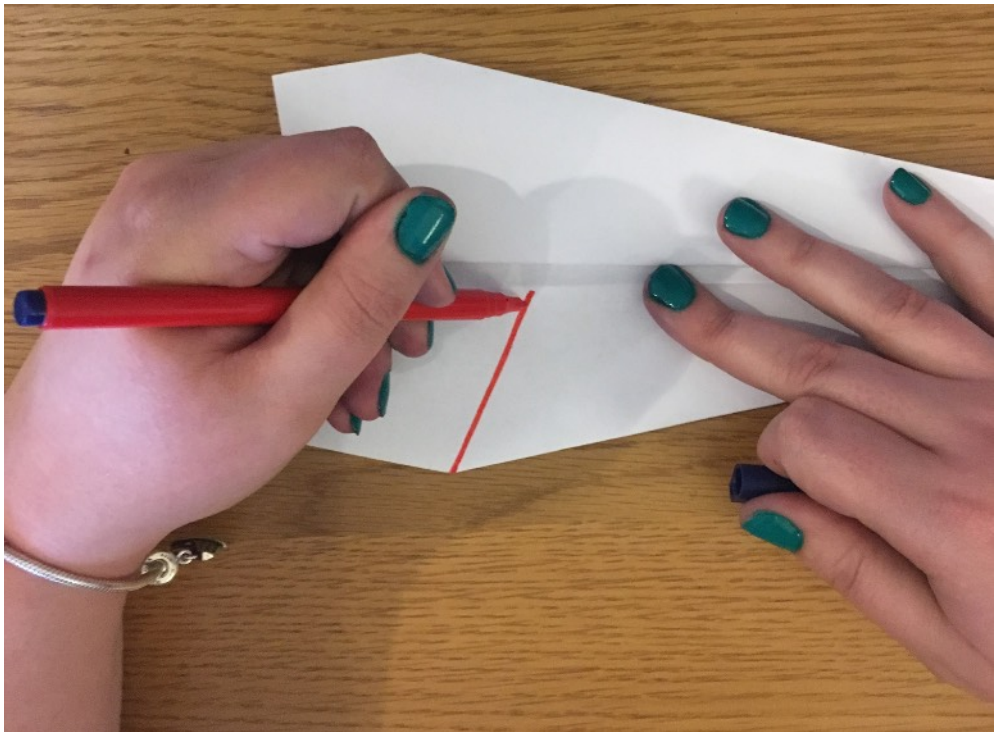

Then fold the wings down one last time so your plane looks like this

Now the fun bit - you can decorate it!

And there you have it your very own Paper Airplane!
