Party Hat

Having a party? You and your friends can always create your own party hats for the day!

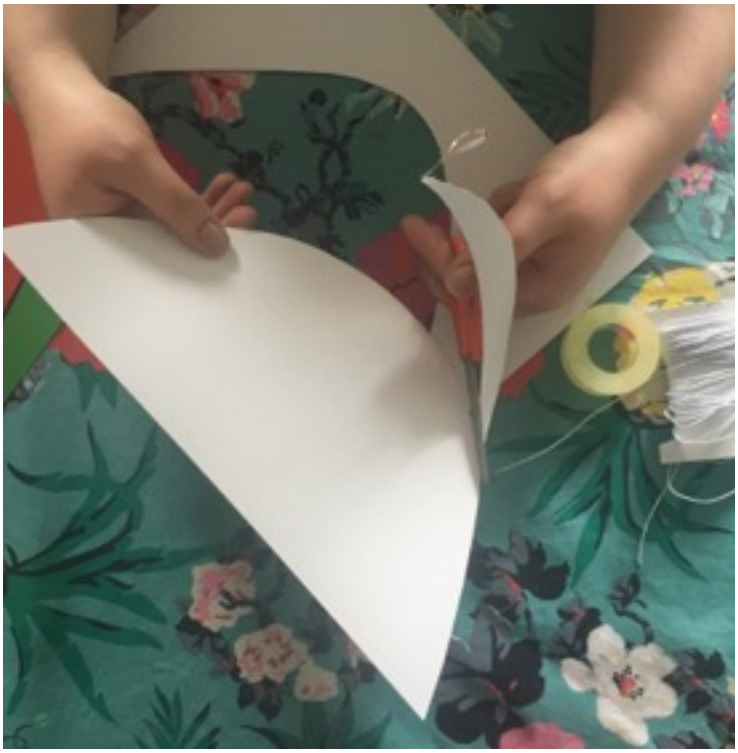

Tools and Materials:

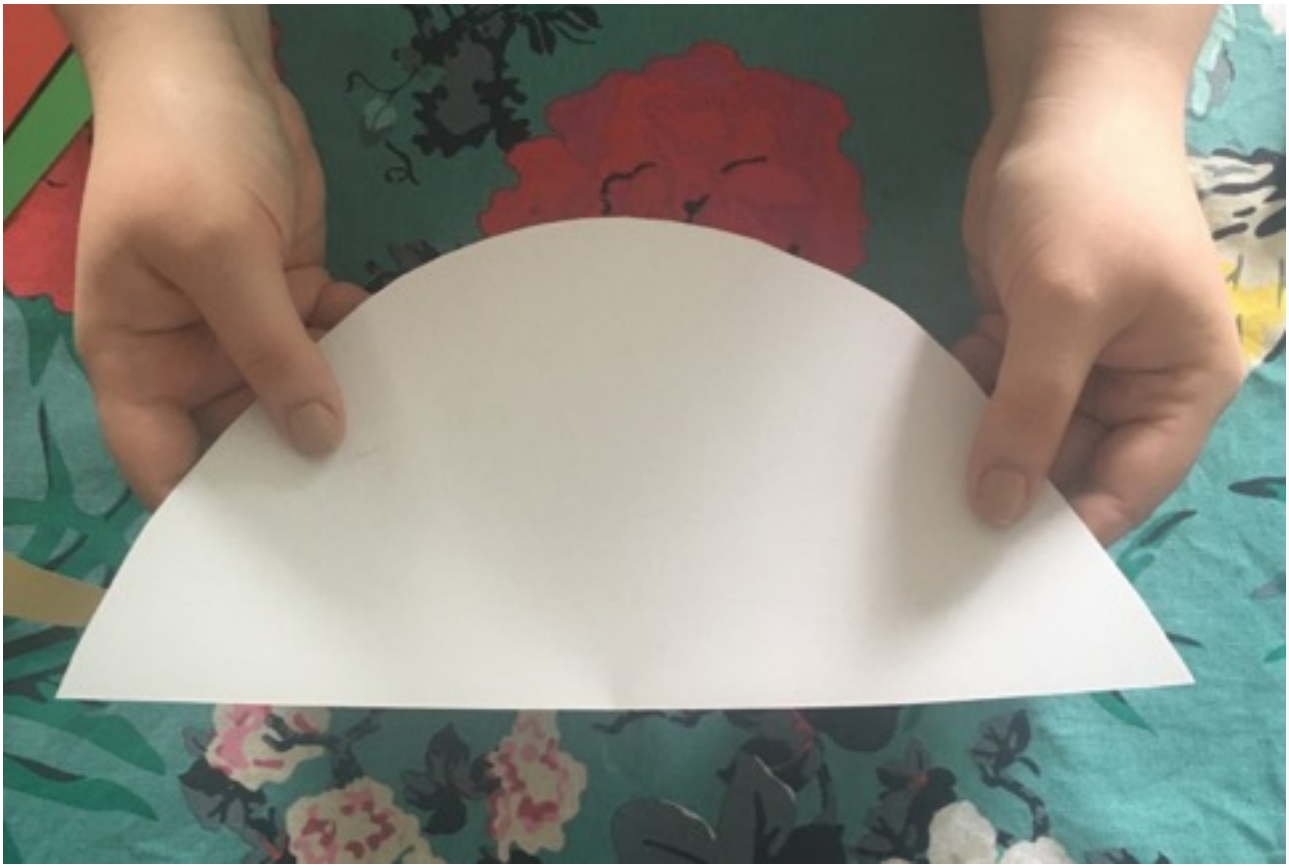

- Coloured Card
- Scissors
- Sellotape
- Glue Stick
- Elastic

Choose which colour you want for your hat; starting from one end cut a semicircle fitting the whole of the page

Taking the straight edge and fold it round to meet each other to make a cone - this it the base of your party hat!

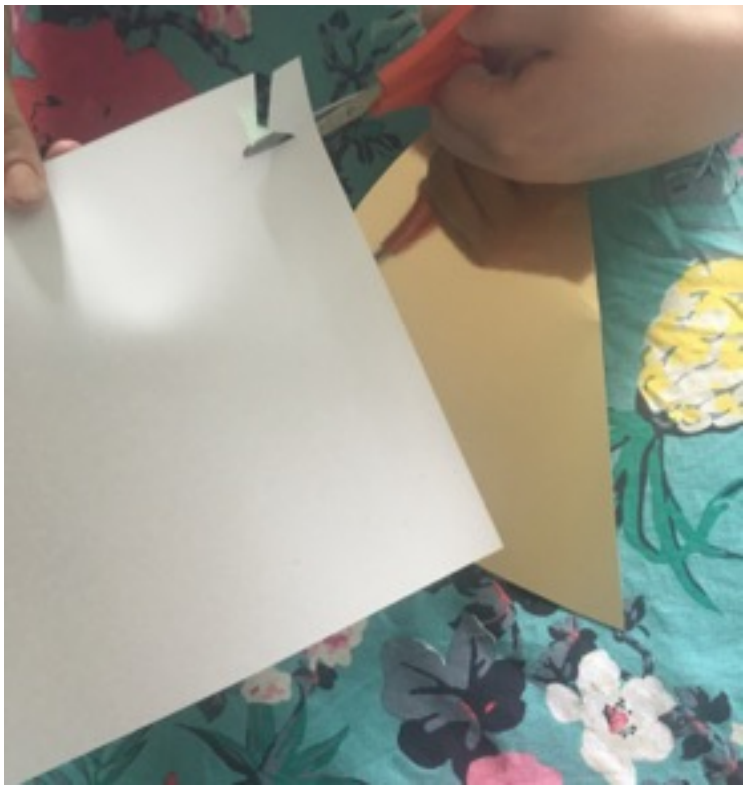

You also need to make holes in the sides of your hat for your elastic to keep your hat on your head! Cut a hole in the sides which when you unfold it looks roughly like the hat is in thirds - like so

Don’t tape it yet though as it is far easier to decorate the hat when it is flat! Choose what you want to cut out to decorate it and get cutting!

Once you are happy with your decorations you can start to stick them on to your hat like so

Now you can roll your hat back up and tape it along the edge to make your hat

Now you can cut your elastic, measure it around your face you want to make it a bit smaller than the length of going ear to ear as elastic stretches and you want it to be a bit tight say it stays on your head!

Thread the elastic through the holes you have cut and tie them in a double knot just to make sure is secure

And there you have it your very own party hat!
