Pattern Colouring Page

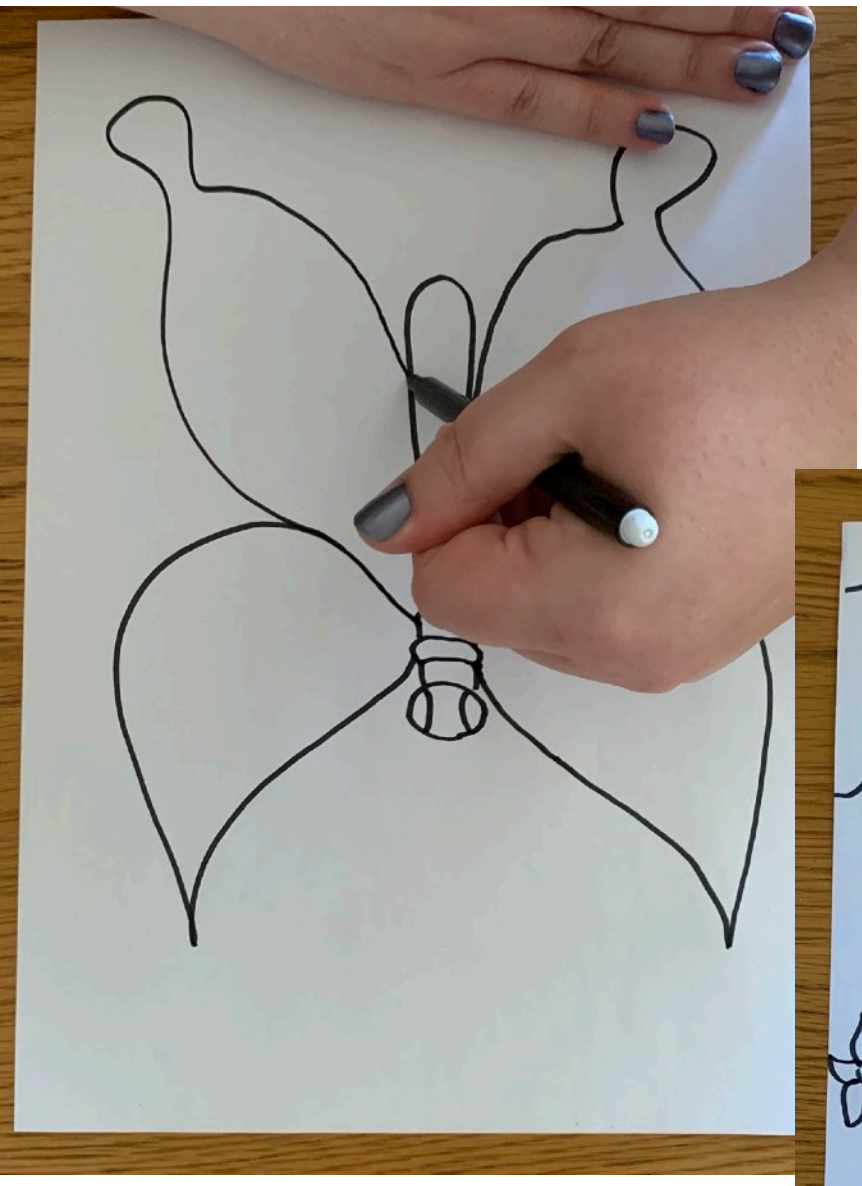

Taking inspiration from pattern, geometric or even repetition of made up shapes why not create your own pattern colouring page - we took some inspiration from Mandalas

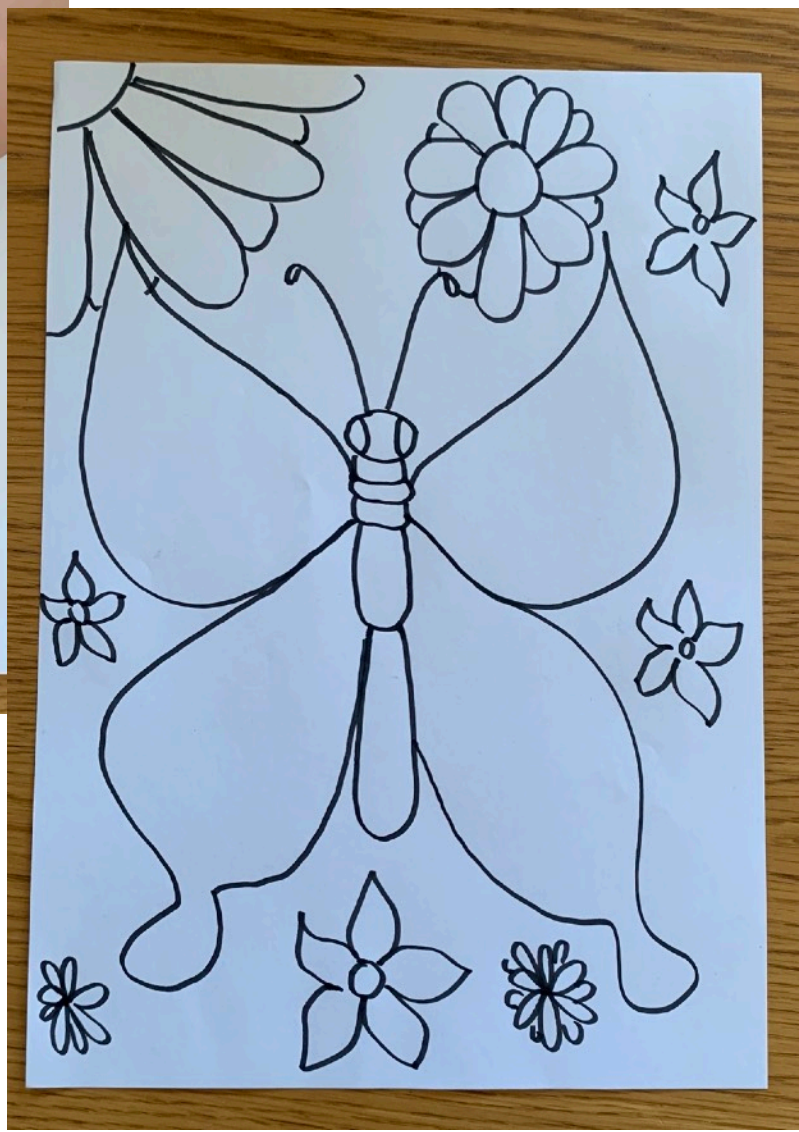

Tools and Materials:

- Paper
- Felt tip or pen (you can use a pencil to start if you prefer)

So first of all think what you want to draw - what lends itself well to pattern? Or what would you like to see on a colouring in page? We thought a butterfly would be fun to cover the wings in different patterns to make it really pop. Start by drawing the outline of what it you have chosen plus anything else you might want to add in the background. You don't have to completely fill the page it is up to you how intricate you make it

Once you are happy with your drawing you can start adding in the pattern - what shapes or lines do you want to use? You can make outlines thicker and bolder by colouring them in black to make them stand out more from the rest of the image

There you have it your very own “Pattern Colouring Page”

Here is another we made to inspire you!
