Pencil Pot & Bulletin Board

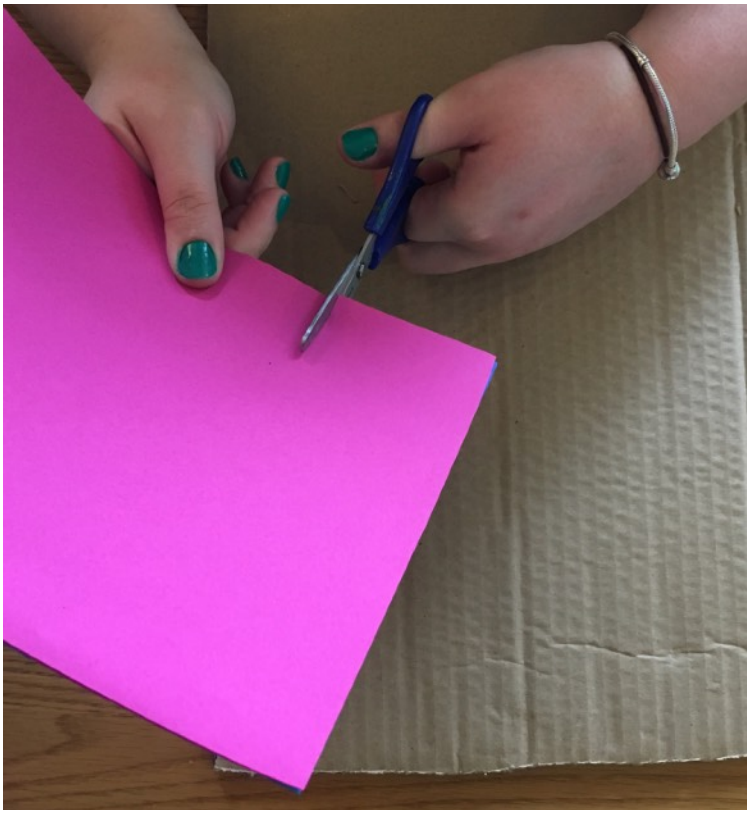

Here is a really simple but fun way to transform household junk into

Tools and Materials:

- Cardboard
- Coloured paper
- Scissors
- Ribbon
- Glue
- Clean Tin
- Sellotape

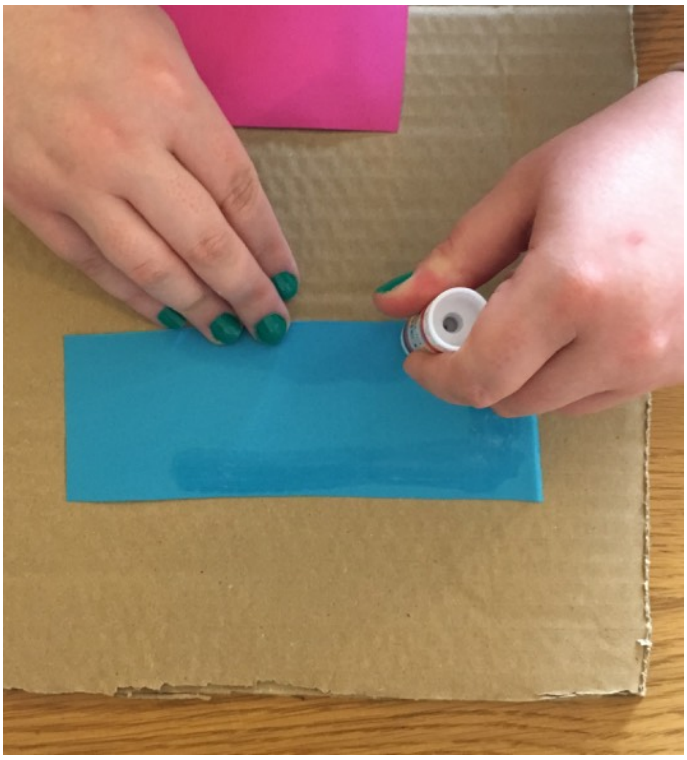

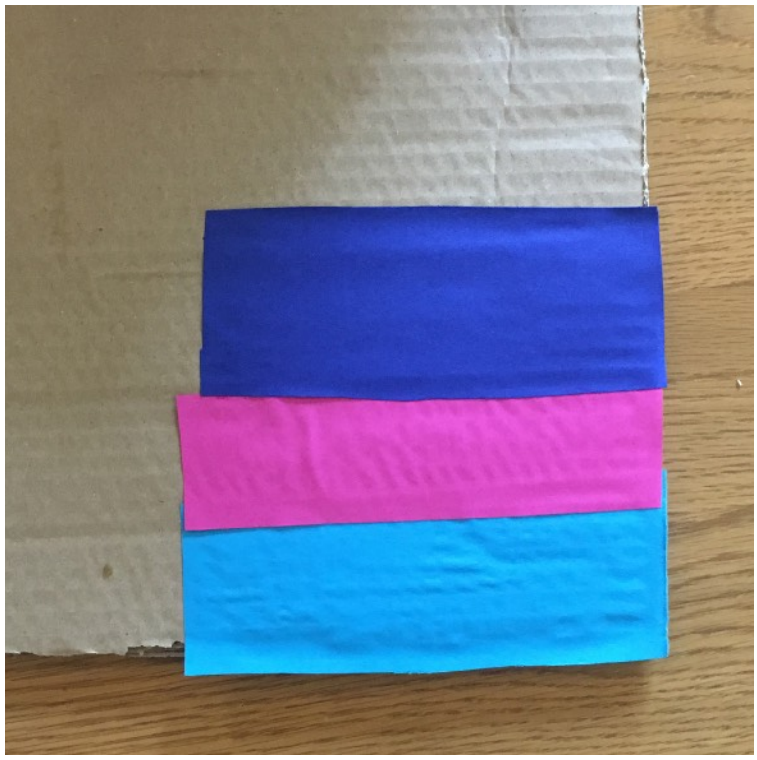

Taking your coloured paper cut out some shapes to decorate your cardboard (we cut ours from the side of a large box)

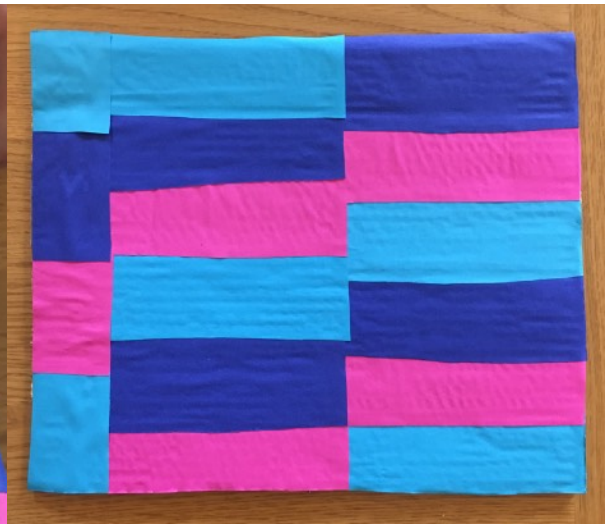

Then start gluing your paper to the cardboard in whatever pattern you desire!

Your board should end up looking like this when fully covered - you can trim it to neaten it up

Now to transform it into your bulletin board - using ribbon measure out 5 to go one way and 4 to go the other like so - sellotaping on the back to secure them

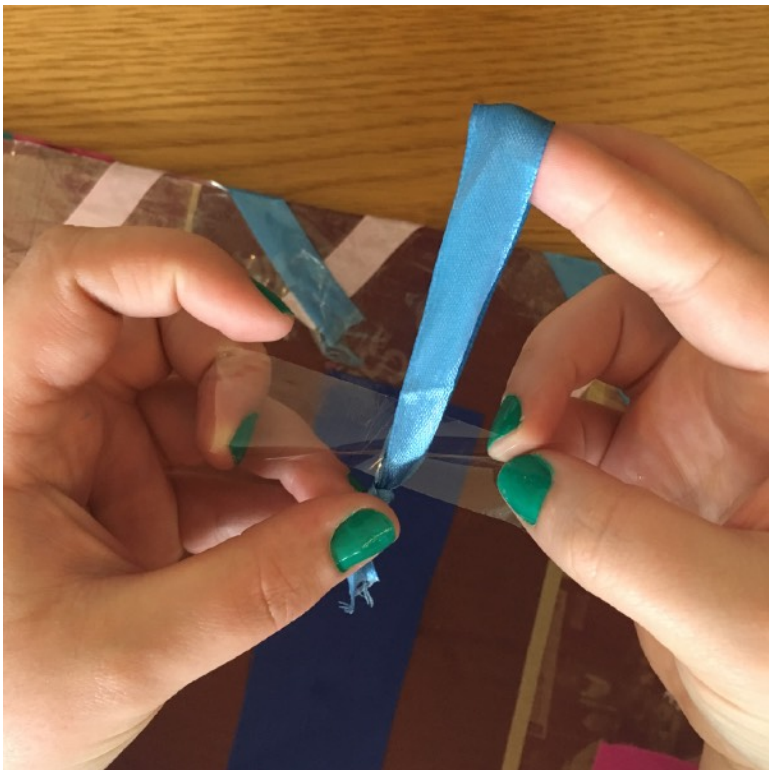

Now we can create a hook to hang it up - taking a small piece of ribbon fold the end together like so

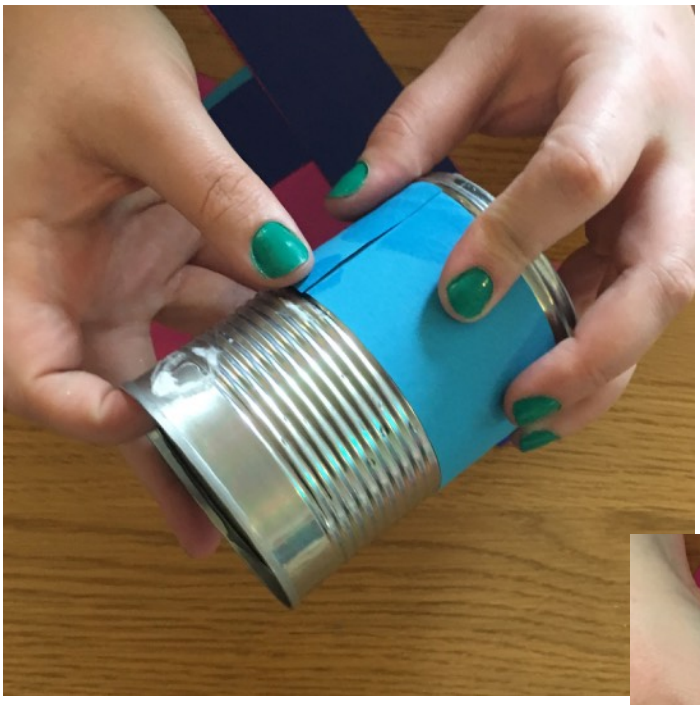

Knot it and then secure it with tape on the back

Now to create your pencil pot - taking your tin and some coloured paper stick it on to transform it like so

There you have it your very own Pencil Pot & Bulletin Board!
