Penguin Pal

This is another fun wintery craft to keep you occupied, you could make your penguin to decorate your room, go on top of the Christmas tree or even as a table decoration, see what others uses you can come up with!

Tools and Materials:

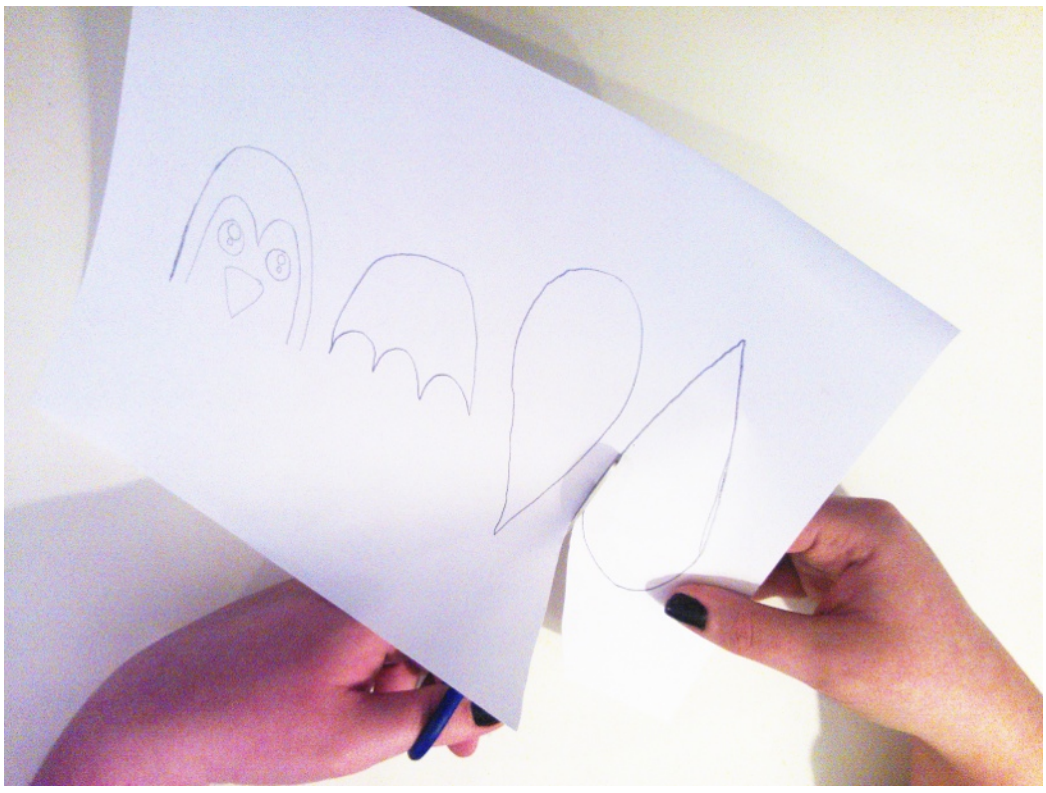

- Loo Roll Innard
- Paint
- Paintbrush
- Pencil
- Scissors
- Prittstick
- Paper
- Water to clean your paintbrush

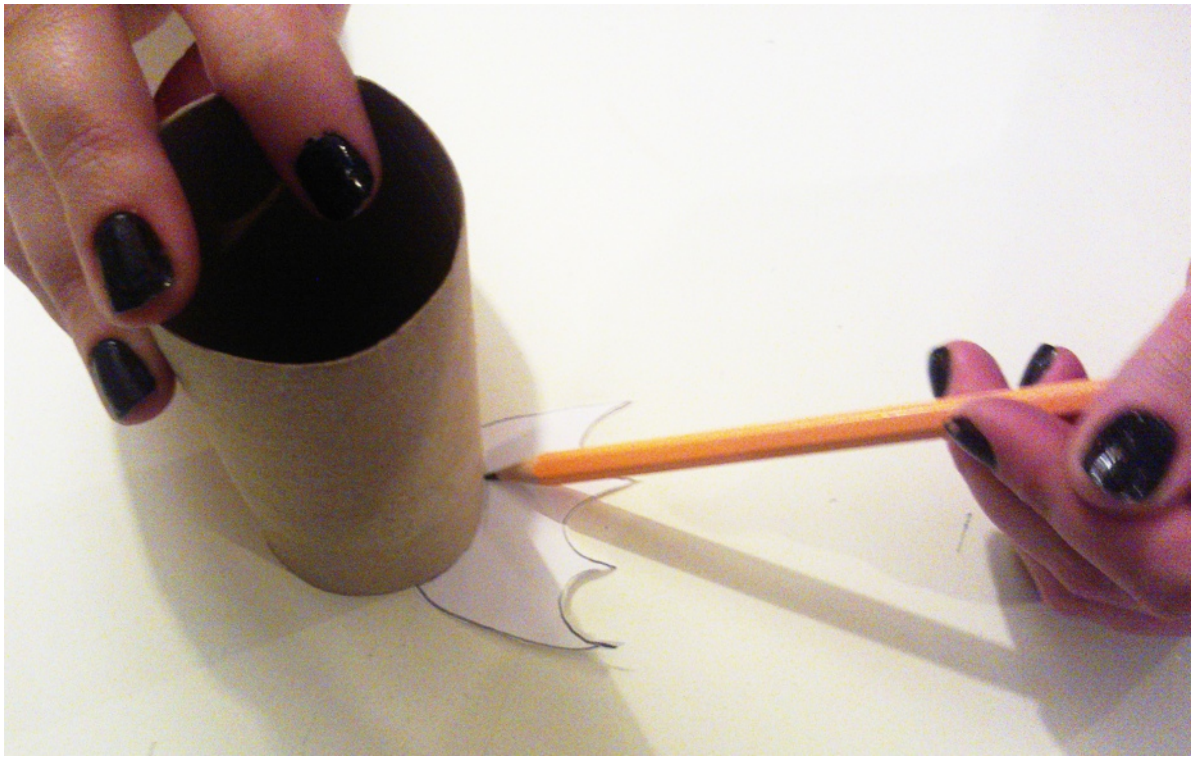

To start creating your penguin you need to draw his head, wings and feet like so

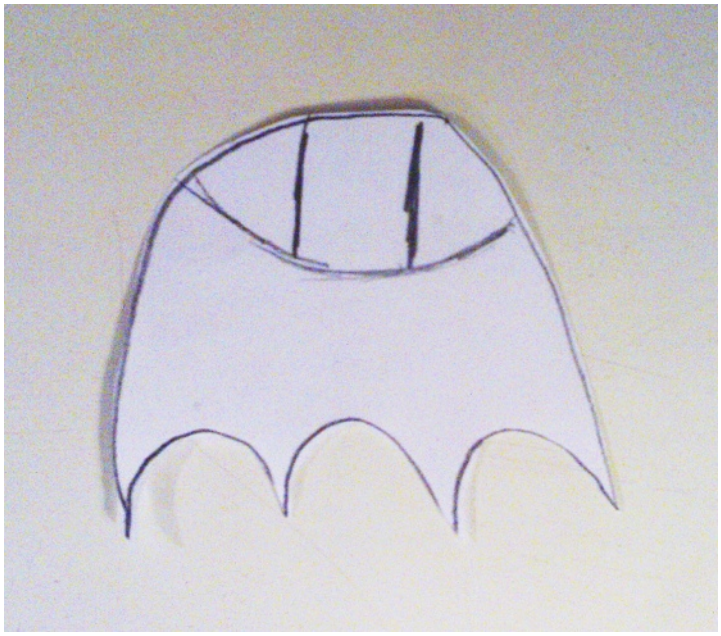

And then cut them out and see how they look against the body, are the wings the right size?

To attach the feet, sit them on the table and place the loo roll innard on top to see where the feet should go then draw a line as a guide

Once you have done this draw two line up in the middle of the semi circle to create a tab which you can cut down the sides of

Glue the tab and then push it inside of the body to secure it

Like so

Now you can figure out where the wings and face go in relation to the feet and you can start painting your penguin!

If you want to add a scarf like we have wait till the body is dry and then paint the scarf over the top otherwise the colours will all mix together and probably turn brown

So now you have yourself a penguin pal!
