Picture Word Search

This is a great activity for a rainy day or to make in advance to do on a long journey or even simply to swap with friends!

Tools and Materials:

- Paper
- Pencil
- Pen
- Felt Tips
- Ruler
- Rubber

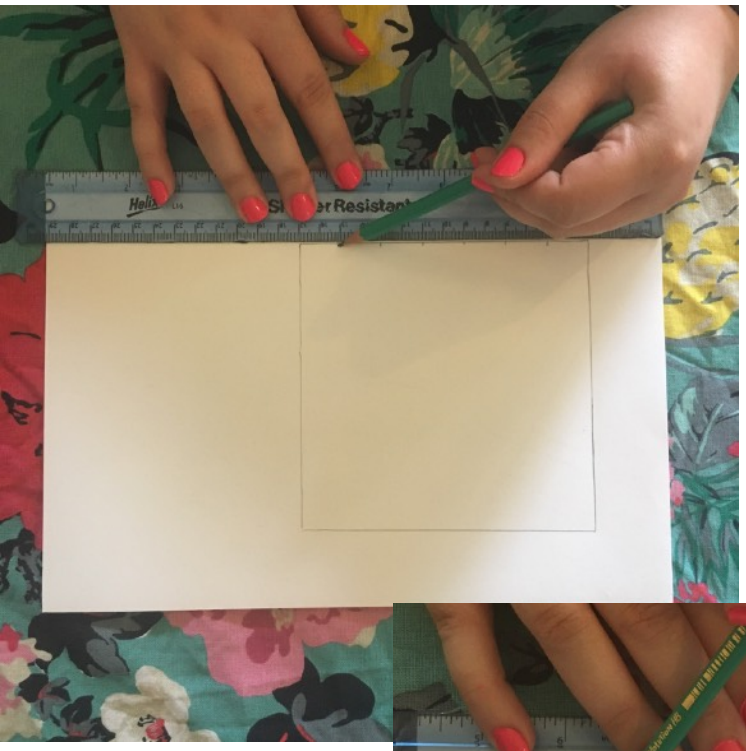

So first of all we need to create our grid to house the word search - using a piece of A4 paper mark 3.5cm from the top and 3.5cm from the sides so your square is 14x14cm

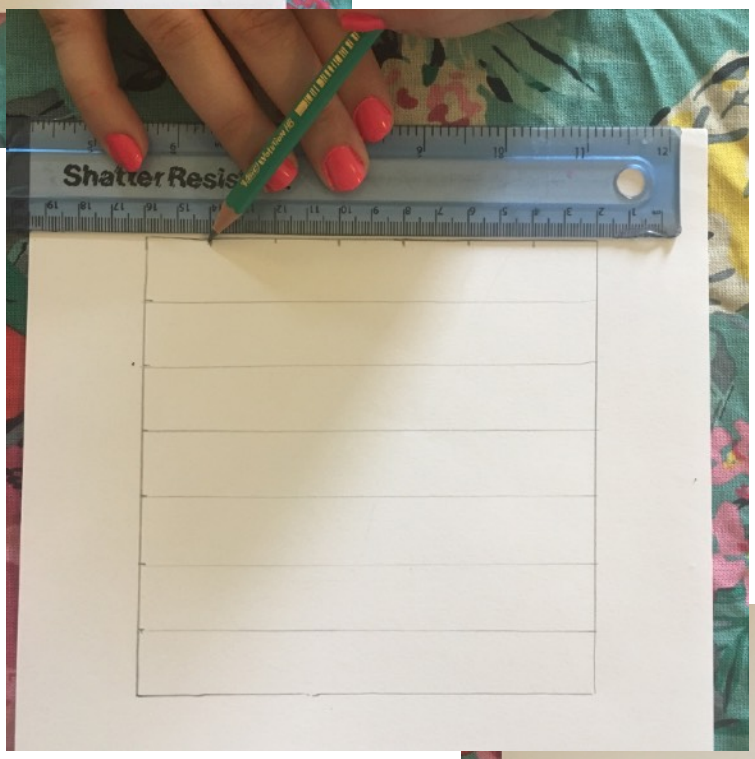

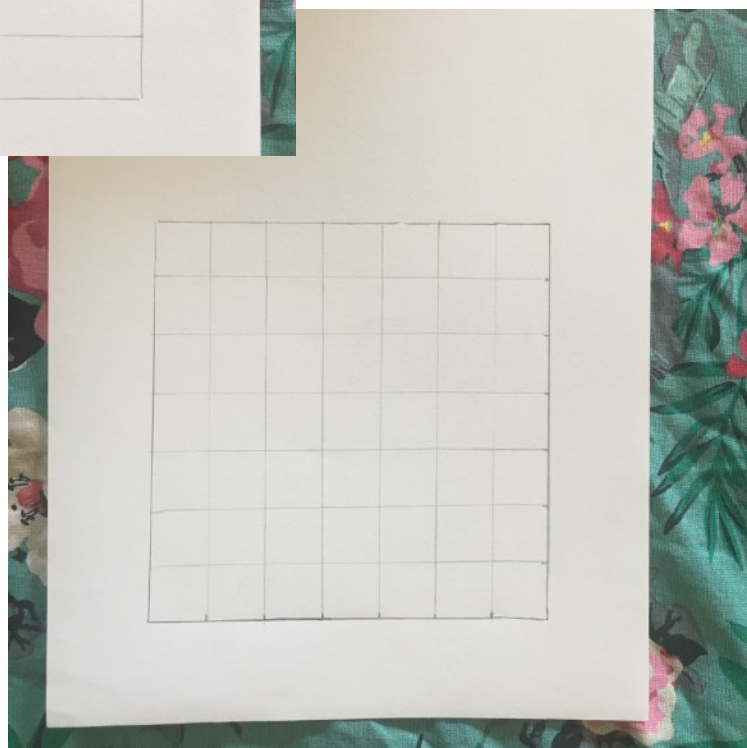

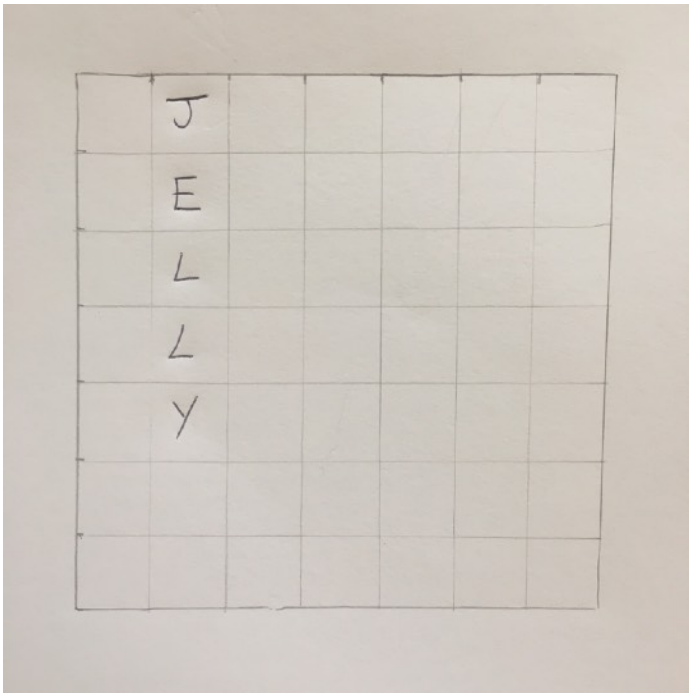

Now you have your square measure 2cm gaps to put the grid in on the top, bottom and sides

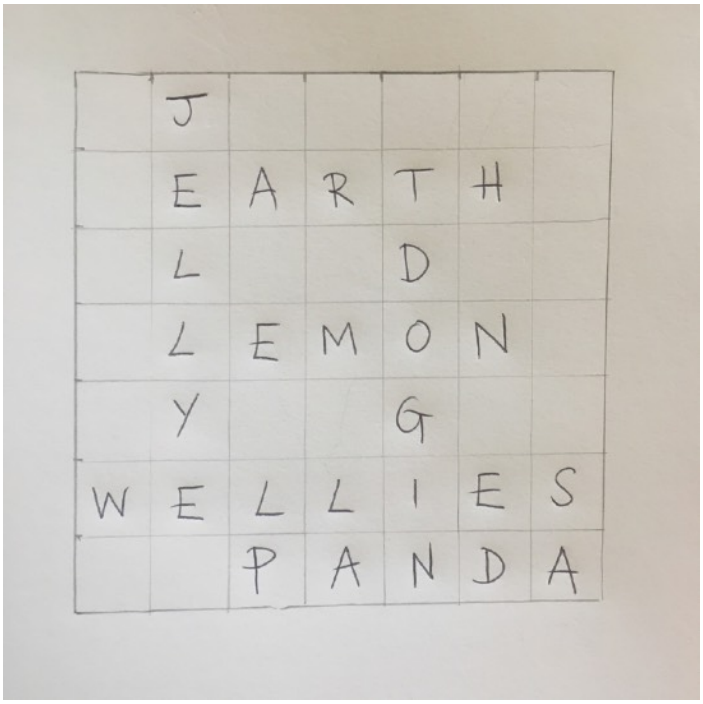

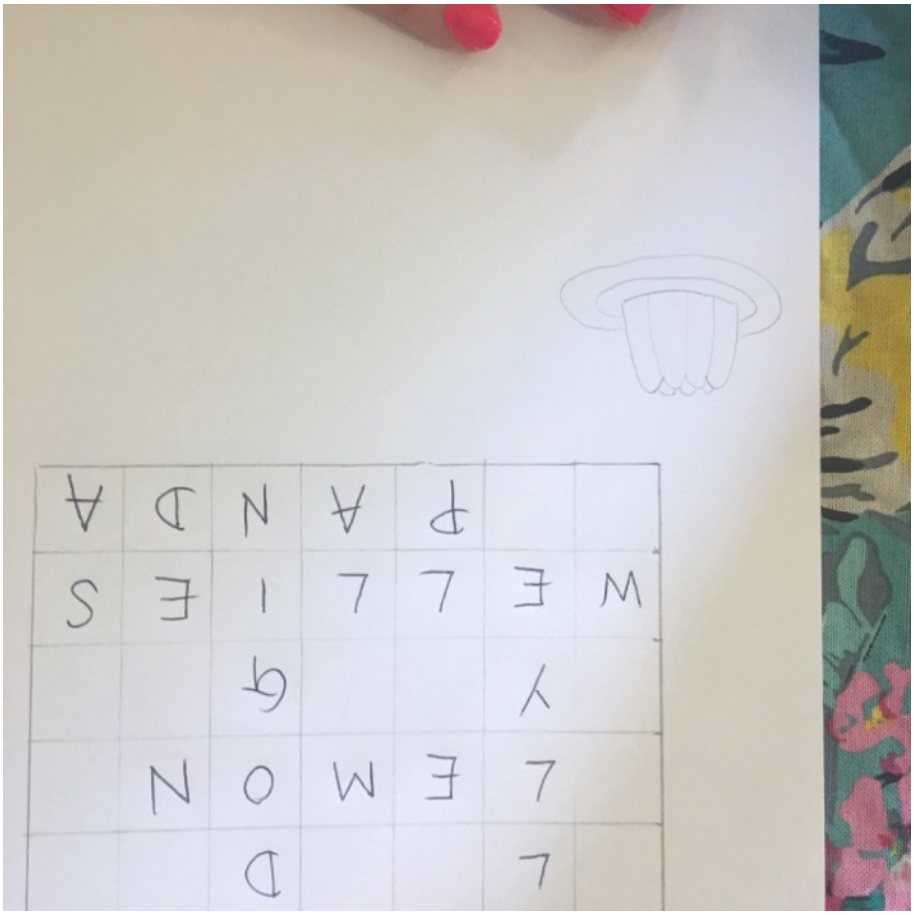

Now you have your grid you can start thinking about the words you want to put in - because our grid is 2cm gaps we have 7 boxes so you can't do words longer than 7 letters otherwise they won't fit! We have done ours in pen but it might be a good idea to start in pencil in case you change your mind as it's easier to erase!

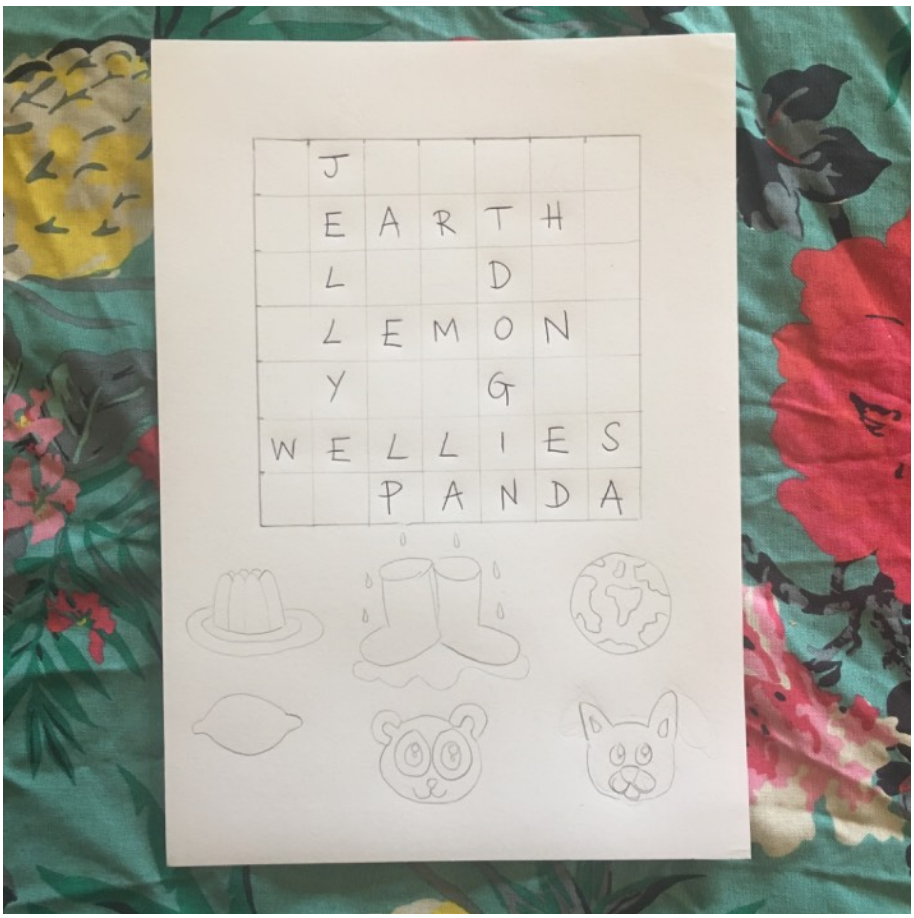

Don't forget word can overlap, go across, down, diagonally and even backwards if you like!

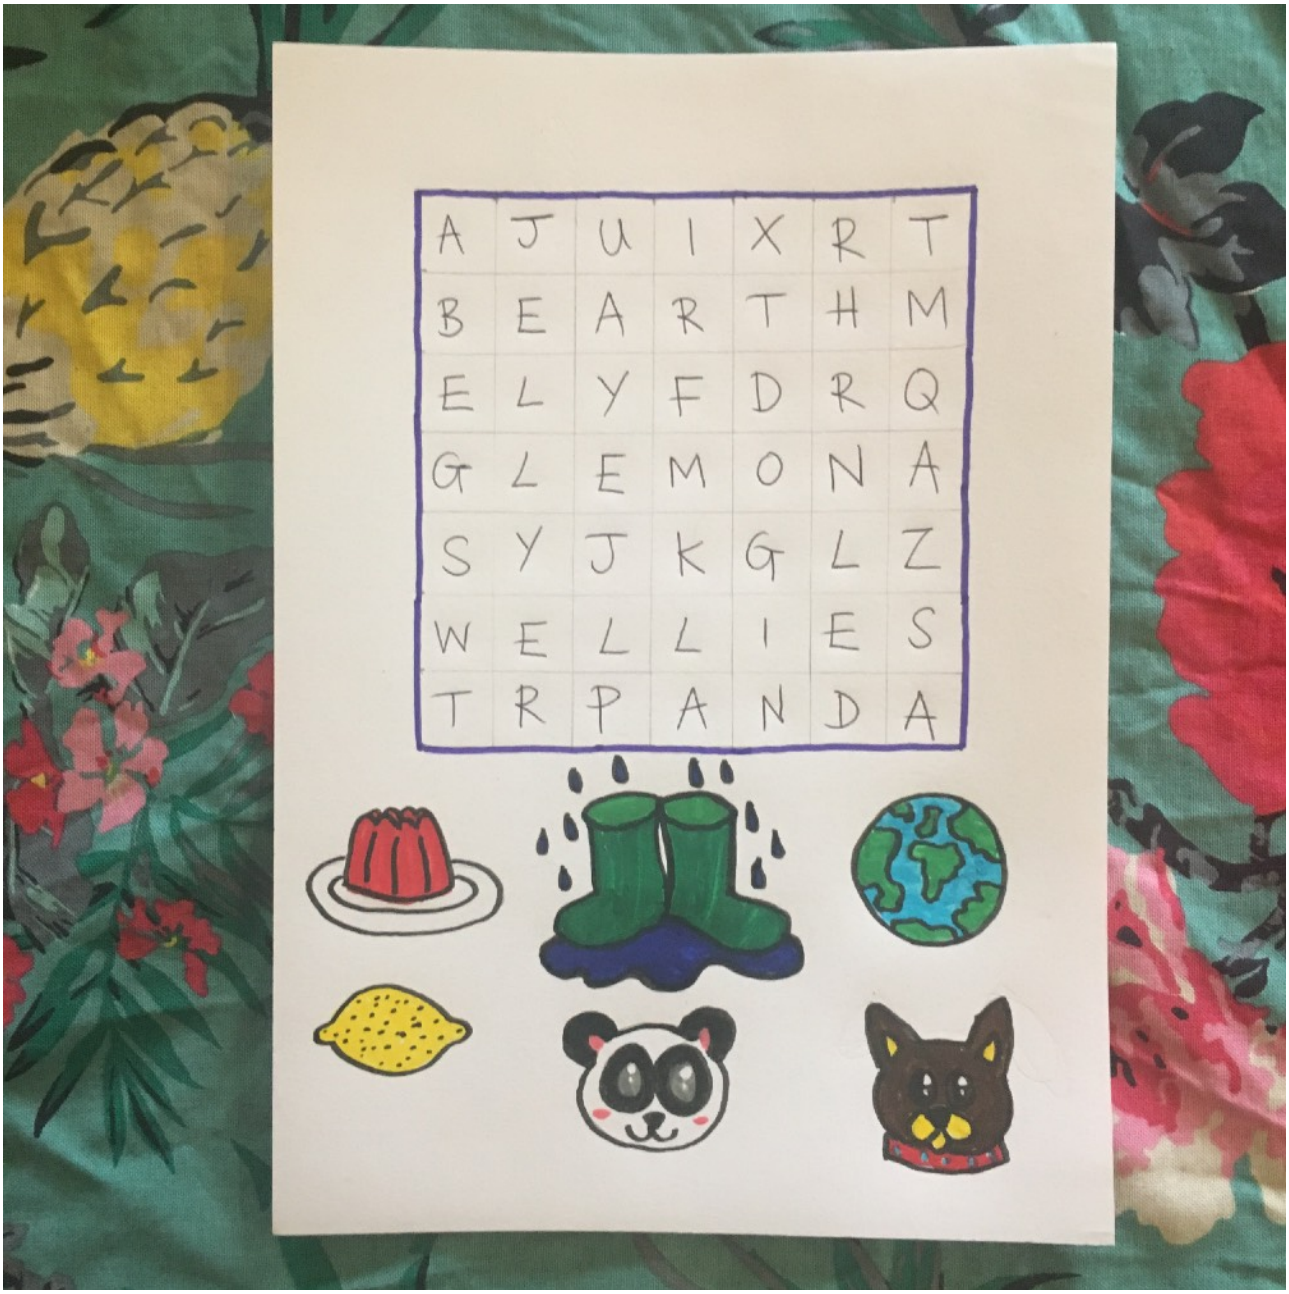

Once you have all your words in you can start illustrating them so that people know what words they are looking for!

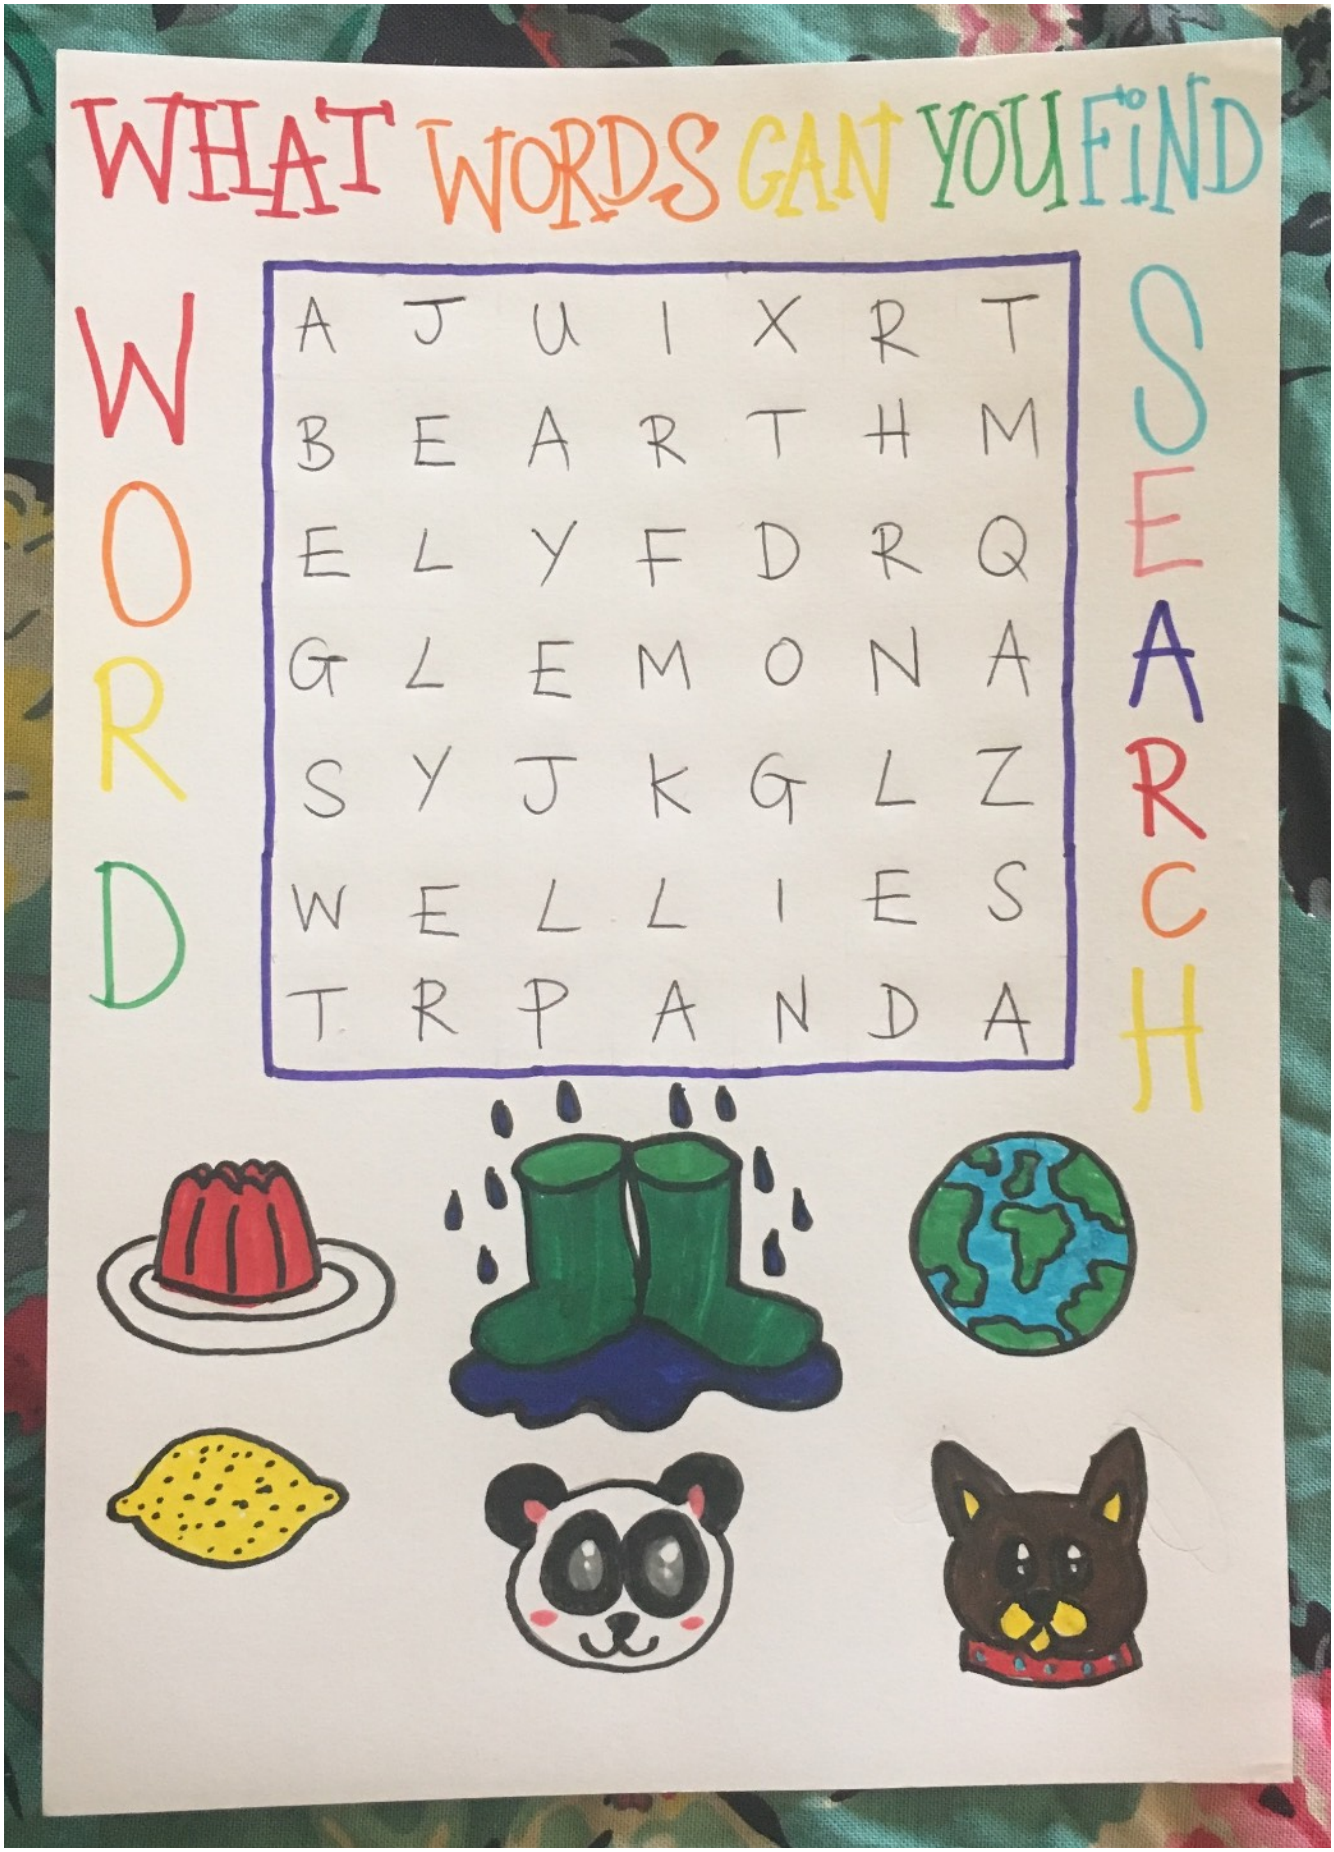

Once you are happy with your drawings then you can colour them in - plus go over your words in pen, the square outline in felt tip and rub out your pencil grid lines

You can add in any other decoration you feel like to make your word search even more fun!

And there you have it your very own “Picture Word Search”!

Here is another we created to inspire you!
