Pirate Sword

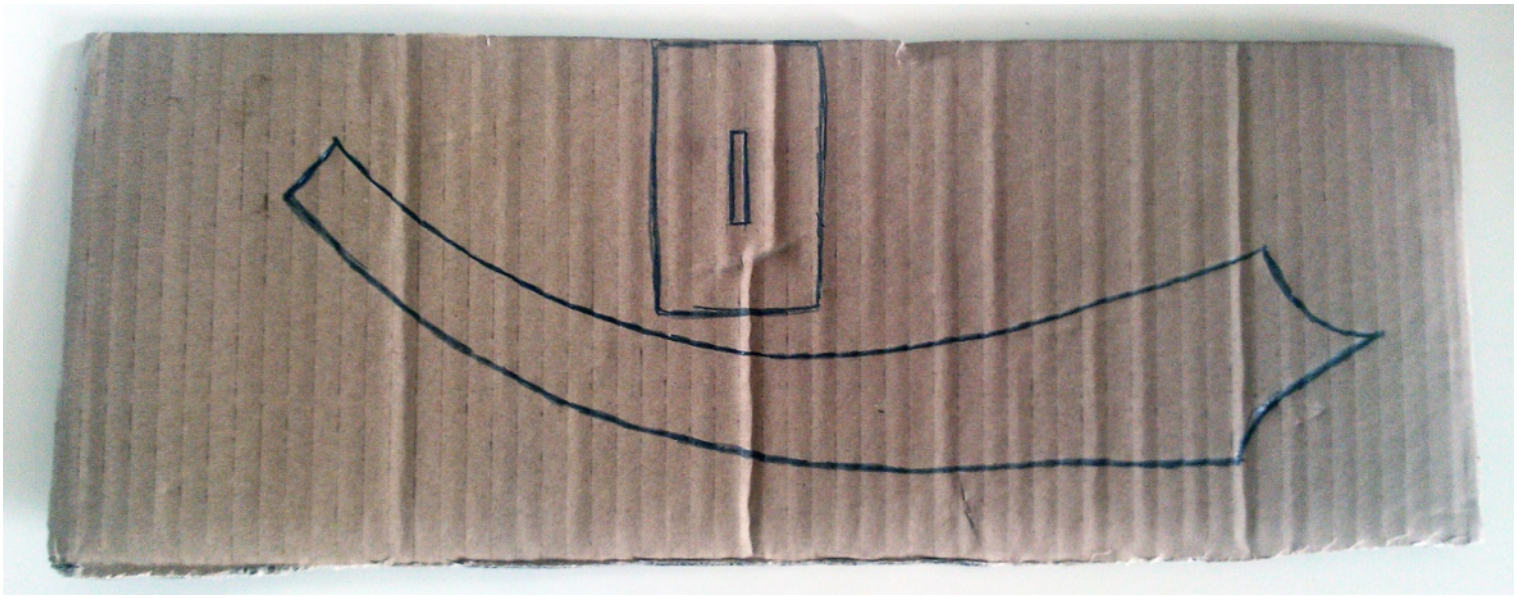

Any swashbuckling pirate in training needs a sword!!
Swords in this shape are also known as a cutlass

Tools and Materials:

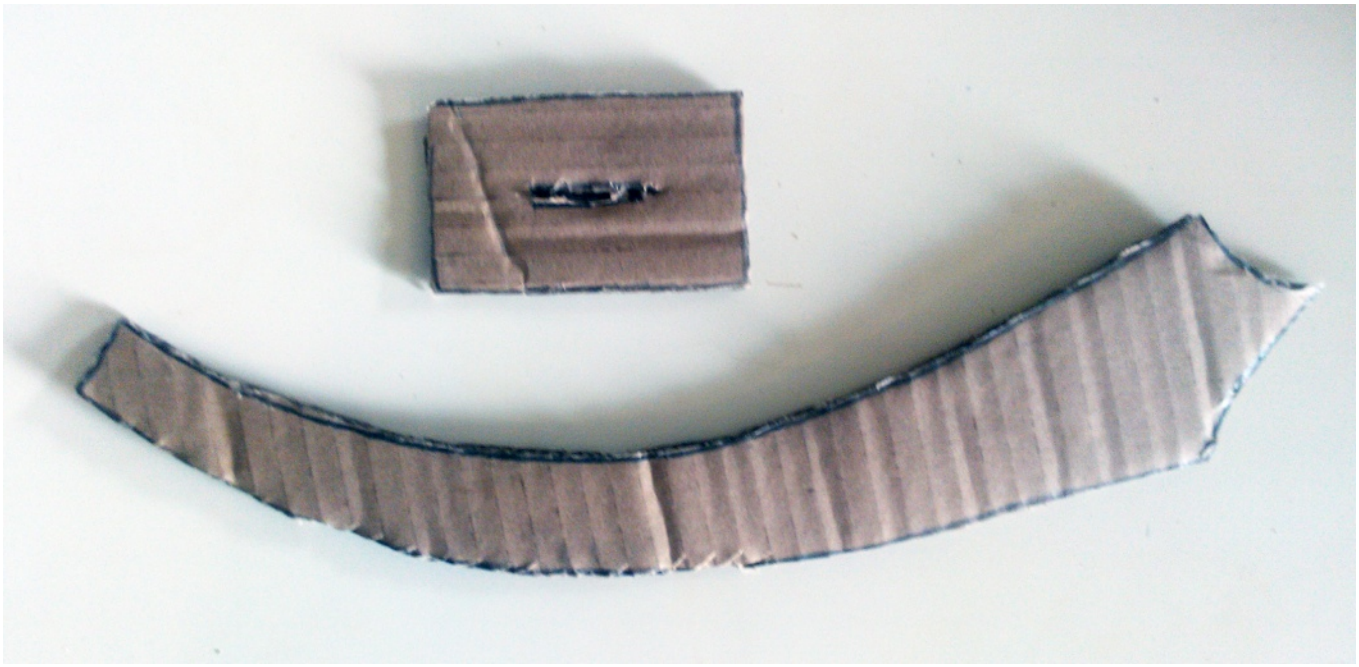

- Metallic Paint
- Scissors
- Pencil
- Cardboard
- Paintbrush

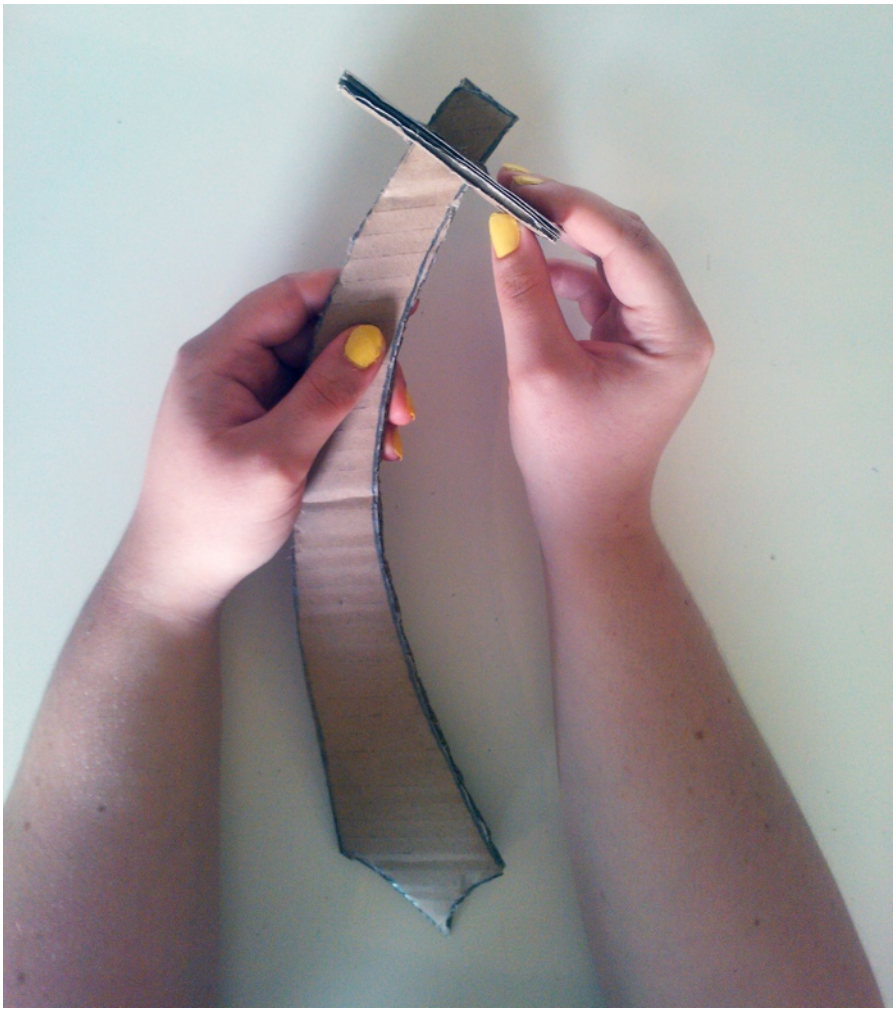

To make a sword you want to draw a blade, you can always draw another shape that you find easier if you get stuck or practice on paper first! You also want to draw a rectangle for the handle and a smaller rectangle in it to slot the sword through

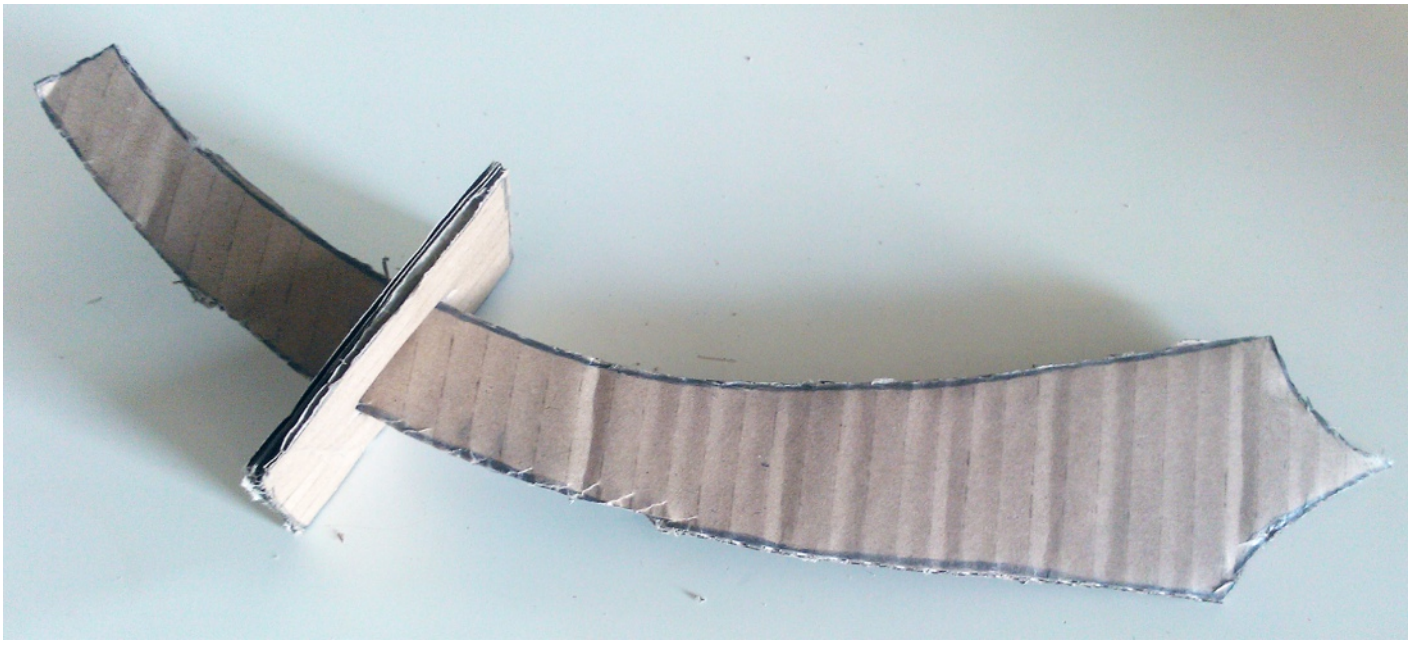

Cut the sword out and make the slit in the rectangle, you might want help from a parent with this

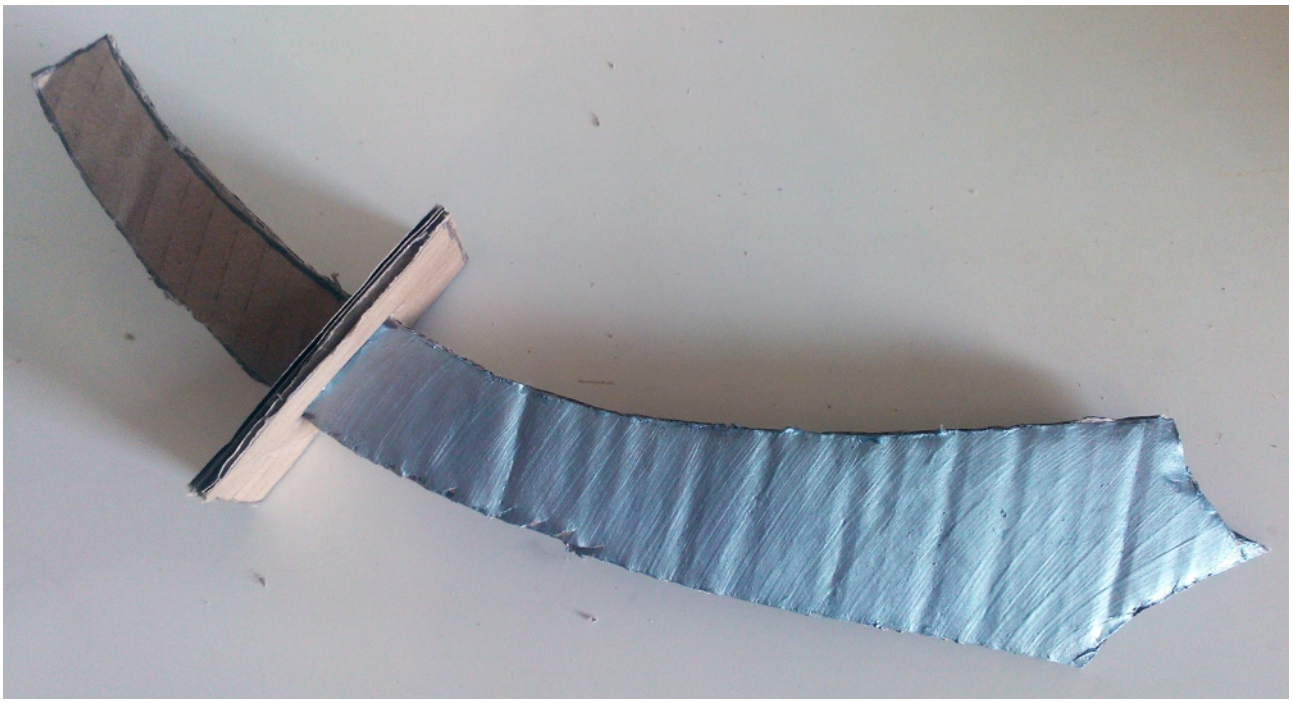

Now you can slot them together to form the the sword

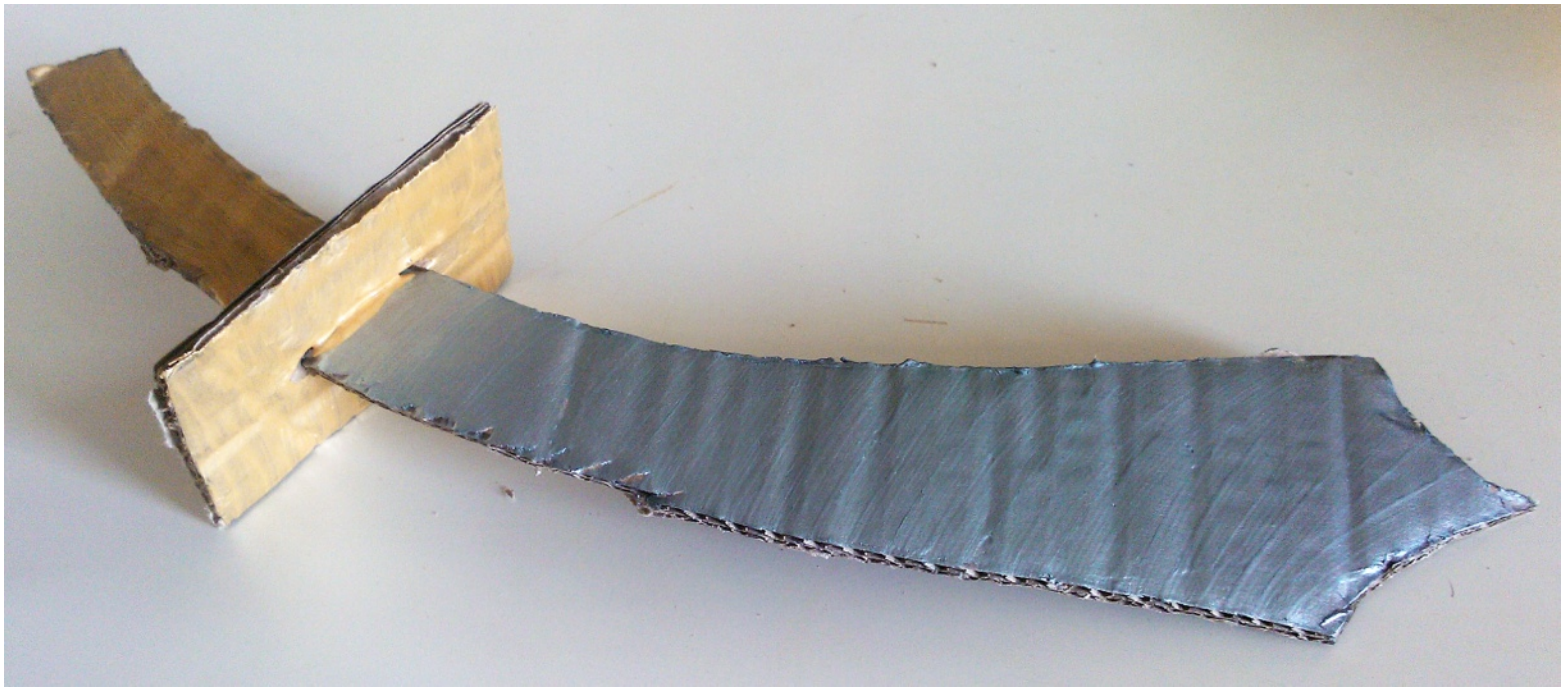

Your sword should look like this, you can decide how long you want the handle to be

Now you can start to paint it so it looks like metal, or if you don’t have metallic paint you could cover it in kitchen foil

There you have your Pirate Sword!

You can also make a Pirate Hat and Treasure Map to go with your Pirate Sword!
