CoolitArt

Pointillistic Painting

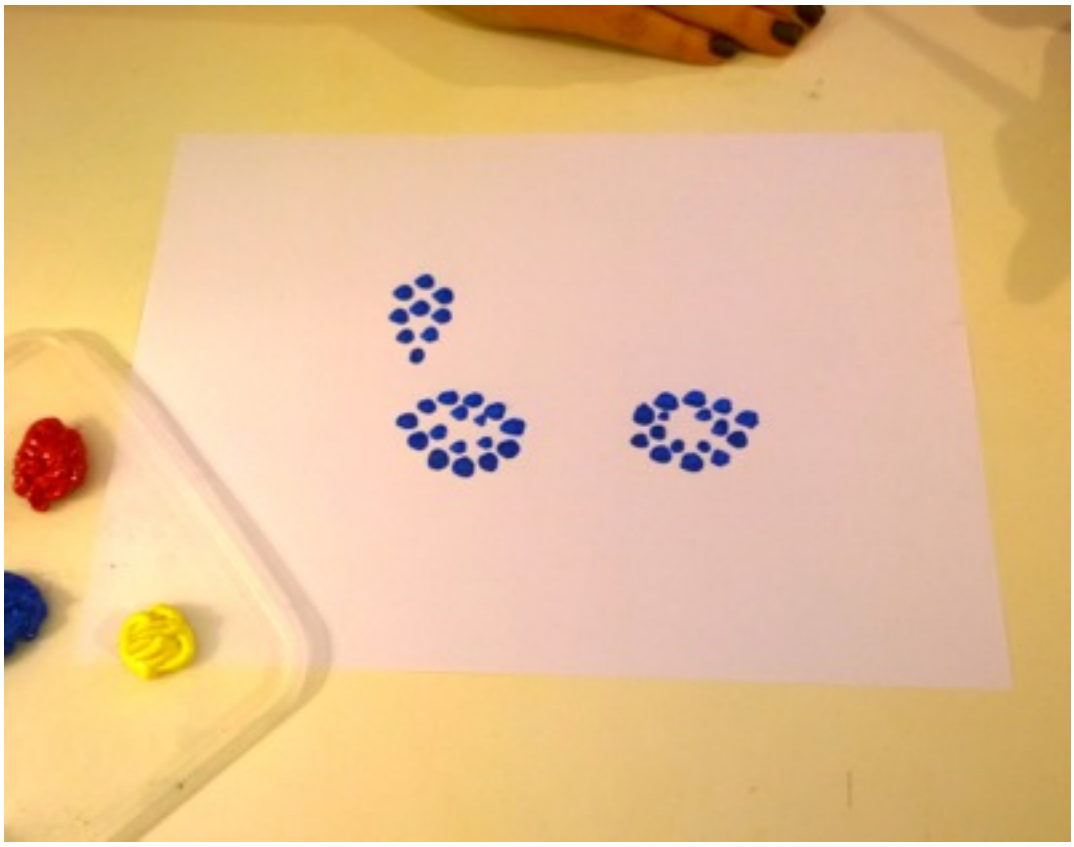

This is a fun way to create images but from different coloured dots in the style of George Seurat

Tools and Materials:

- Paint
- Paintbrush
- Water to clean your brush
- Paper

So with this just think of what you want to create and start filling it in colour by colour to give you the shapes

Once you have your shapes you can start adding colours to break up the blockiness plus outlines to define sections like so

Now you have your own “Pointillistic Painting”

Here is another we created to give you inspiration!
