Polar Bear Pictures

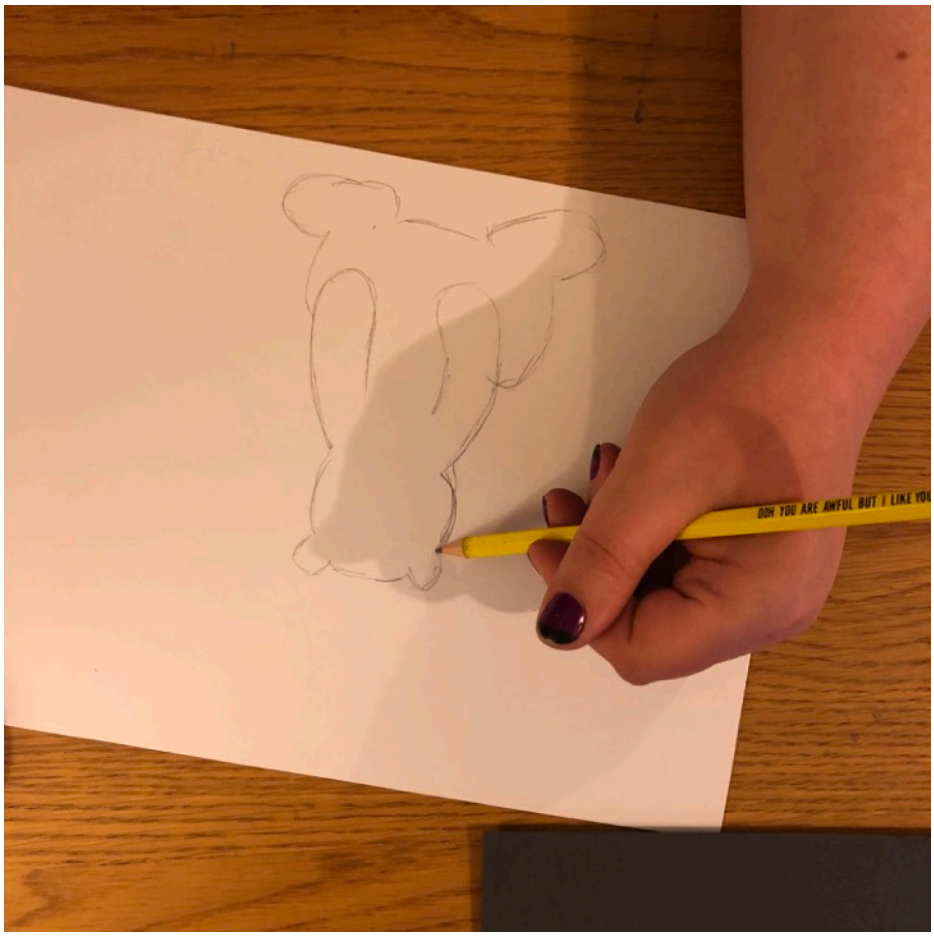

Celebrating World Polar Bear Day on the 27th February we not create your own Polar Bear Picture!

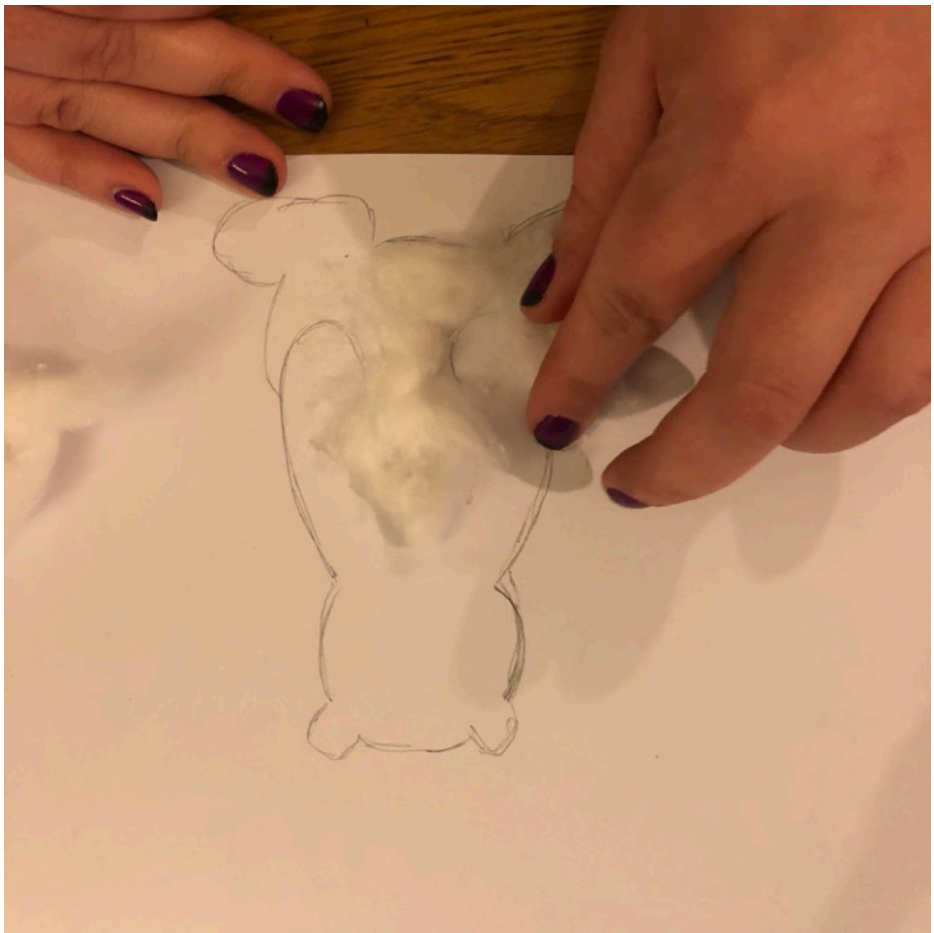

Tools and Materials:

- Coloured Paper (blue, black and white)
- Pencil
- Gluestick
- Scissors
- Cotton Wool Balls

First of all draw the silhouette of your polar bear on your white paper like so then add glue and breaking up the cotton wool balls into smaller bits to transform into fur

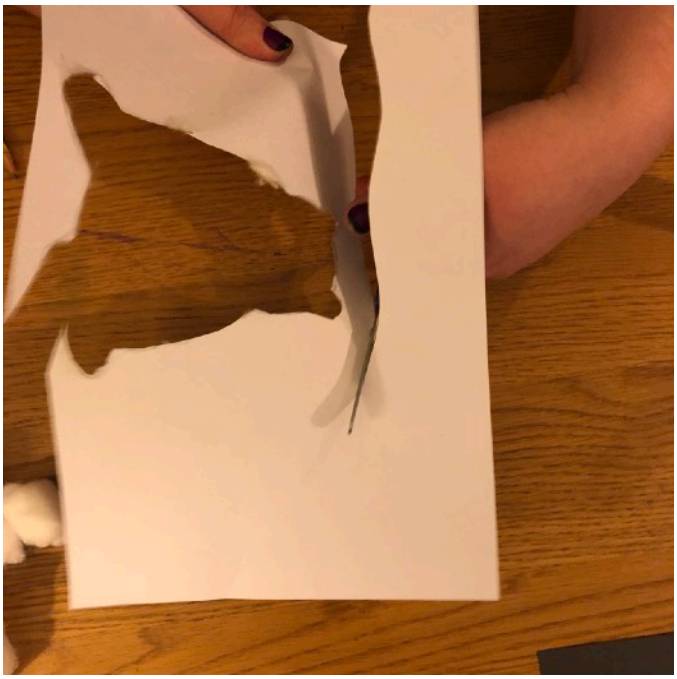

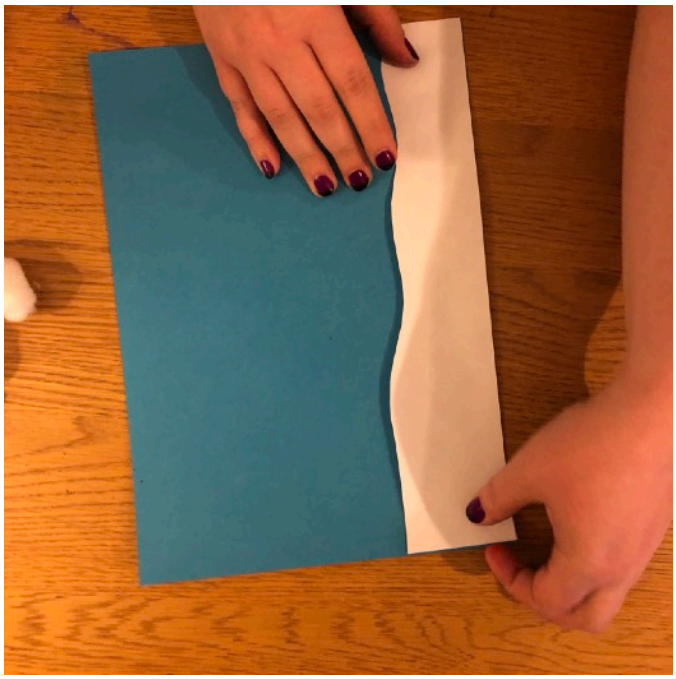

When you are happy with your polar bear you can cut him out

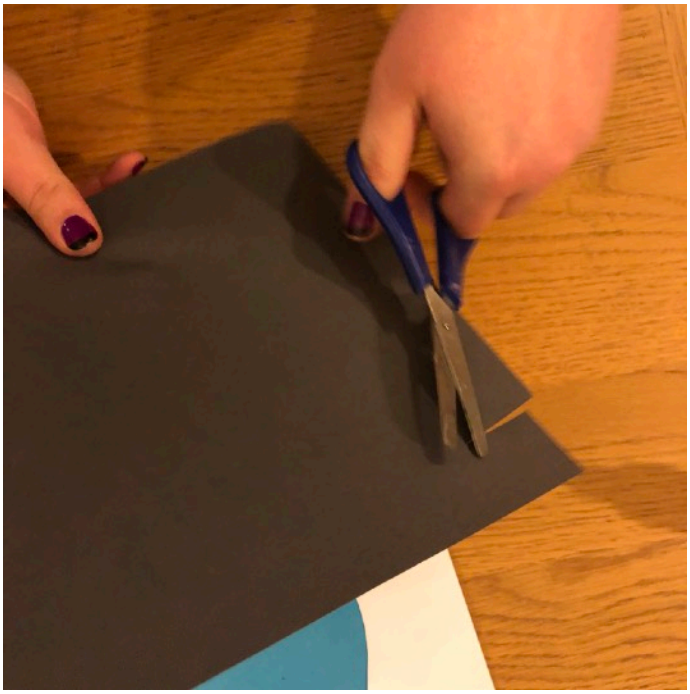

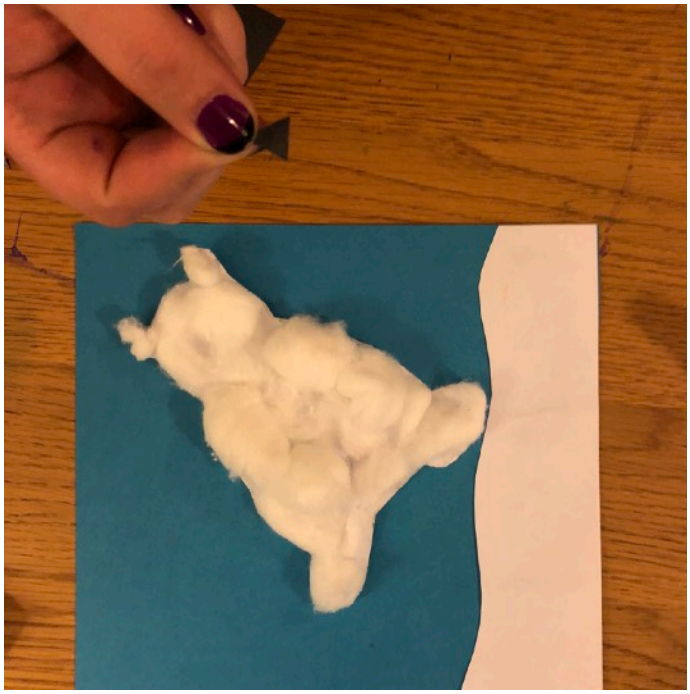

Using the leftover white paper sketch out a snowy background for the bottom of your work so the bear has something to sit on!

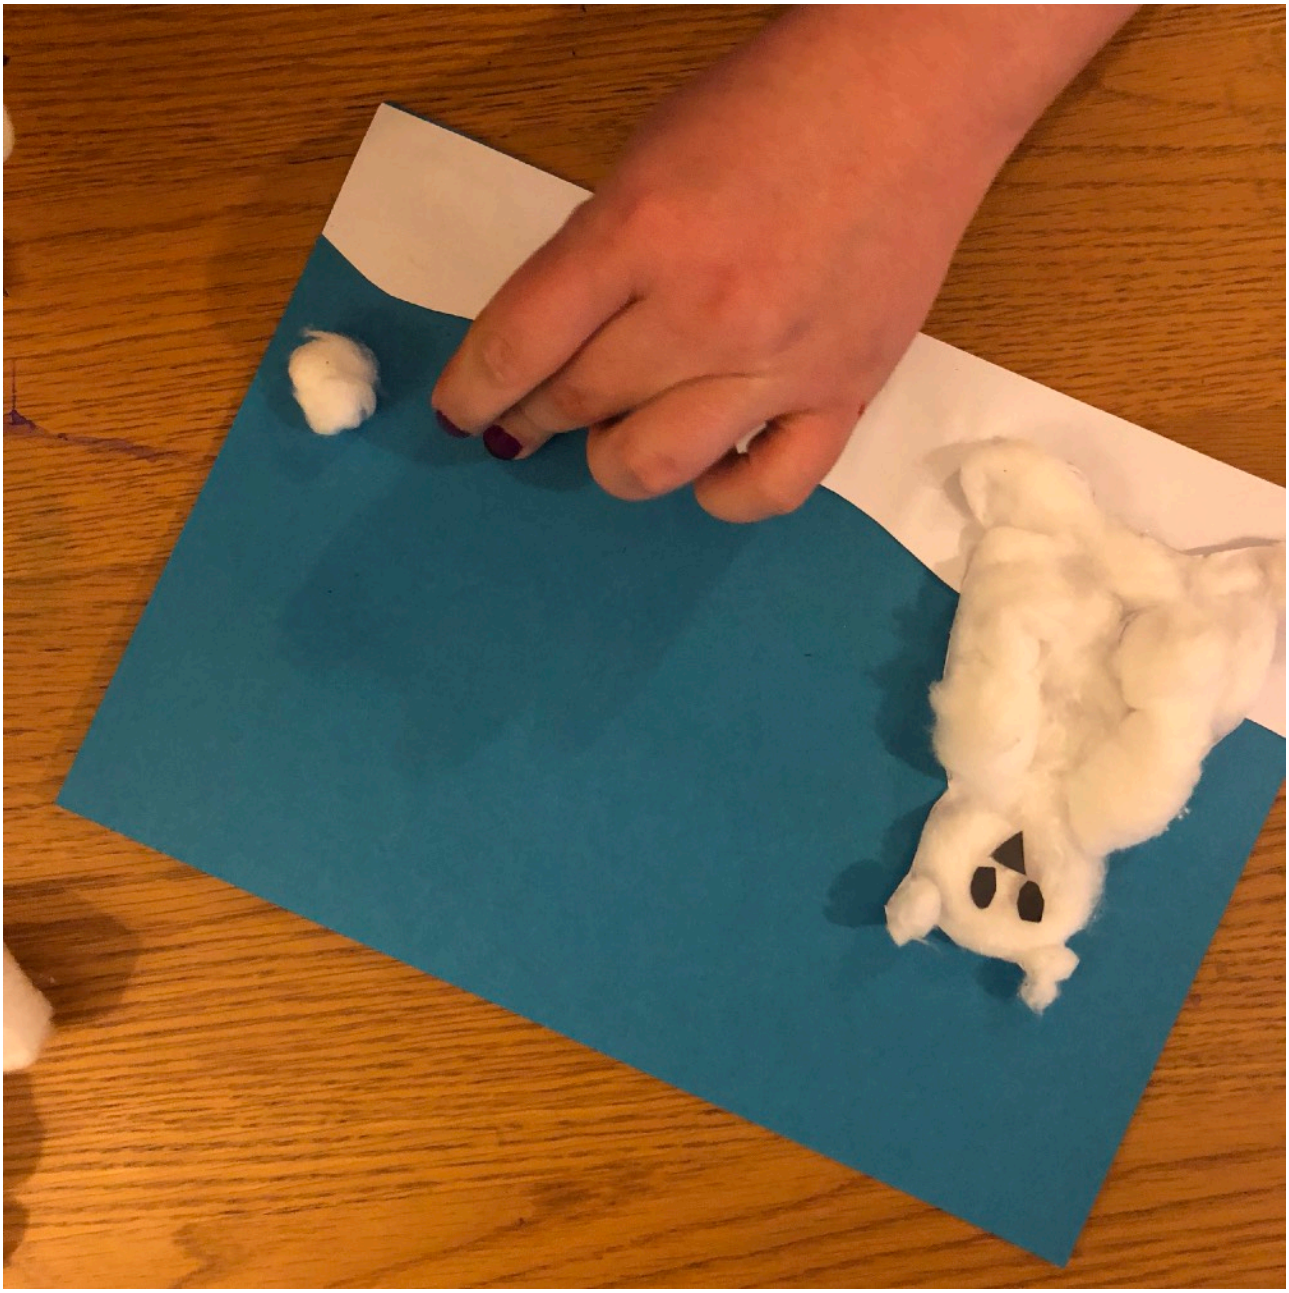

Now to create the details for your bear - taking the black paper you can create their face

Stick your polar bear to the background and start creating snowballs from the cotton wool balls to make a snowy scene

There you have it your very own Polar Bear Picture

Here is another we made to inspire you!
