Rainbow Reflections

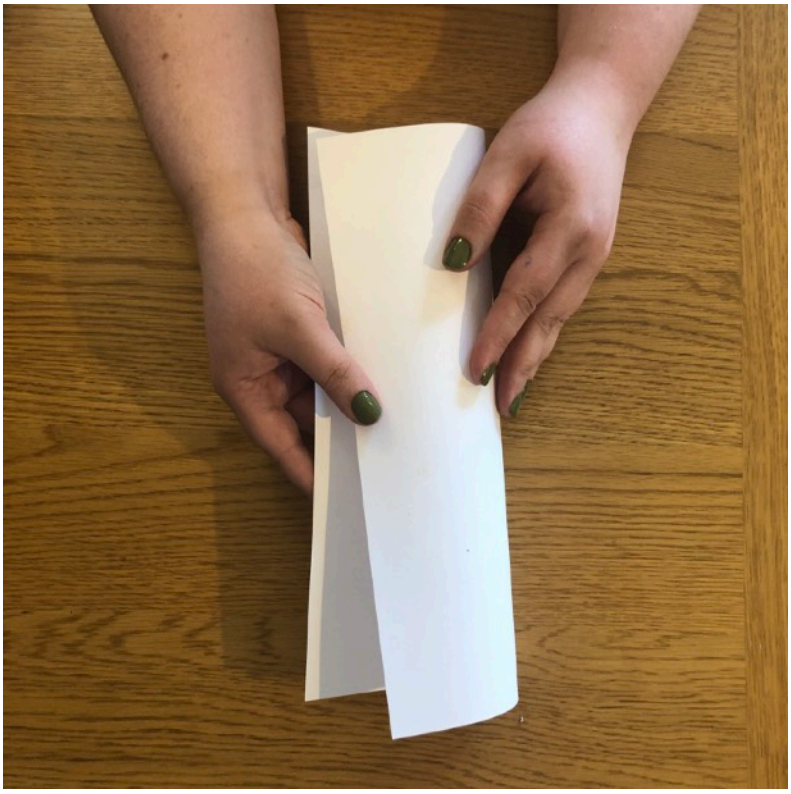

This is a fun and colourful way to improve your observational skills in drawing

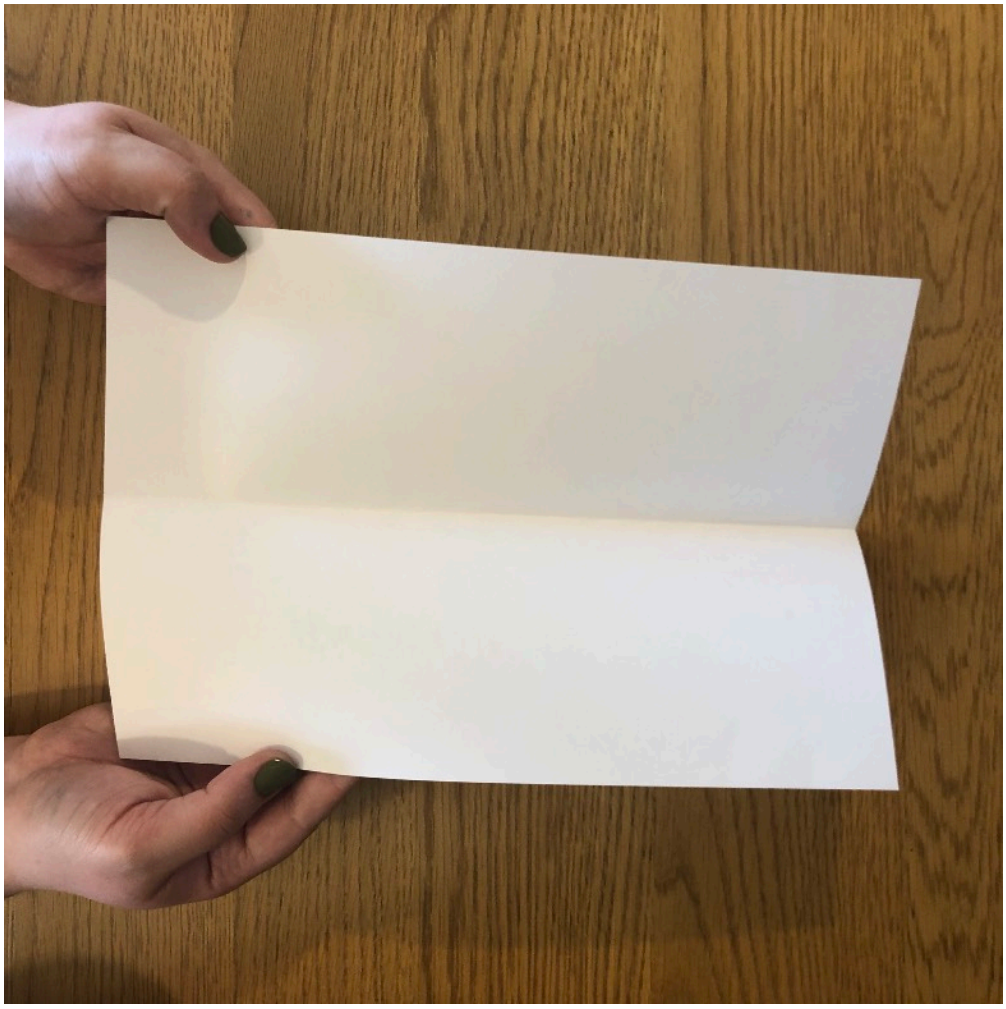

Tools and Materials:

- Paper
- Felt tips

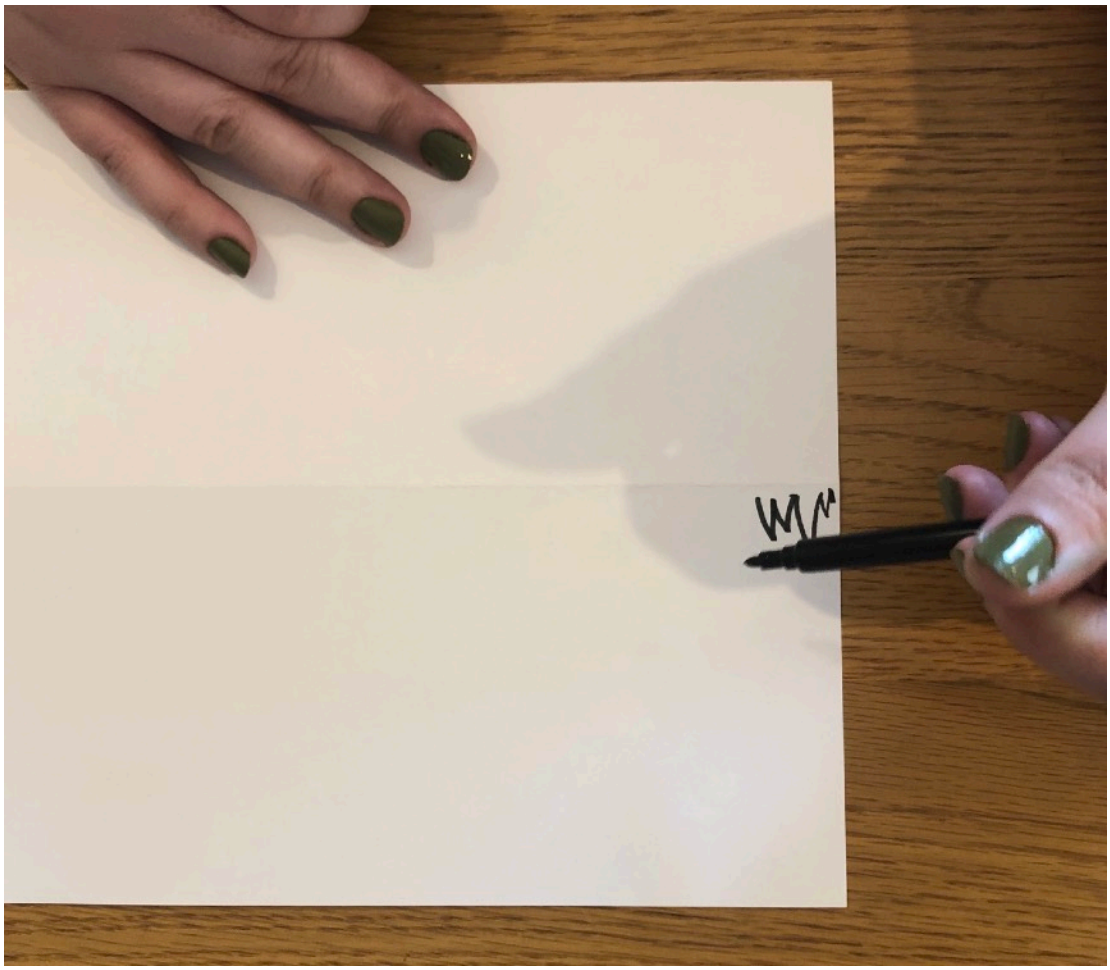

First of all to give you a guide to where your drawing shelf be fold your paper in half long ways like so

Then once your paper is ready - think about what you want to draw, don’t overcomplicate it!

Once you have your drawing think about how you are going to copy it to create the reflection using all the colours of the rainbow - if you really struggle with this you could use tracing paper

There you have it your own “Rainbow Reflection”

Here is another we made to inspire you!
