Raised Salt Paintings

This is a fun and fast way to create raised almost tie dye like paintings with salt and watercolours!

Tools and Materials:

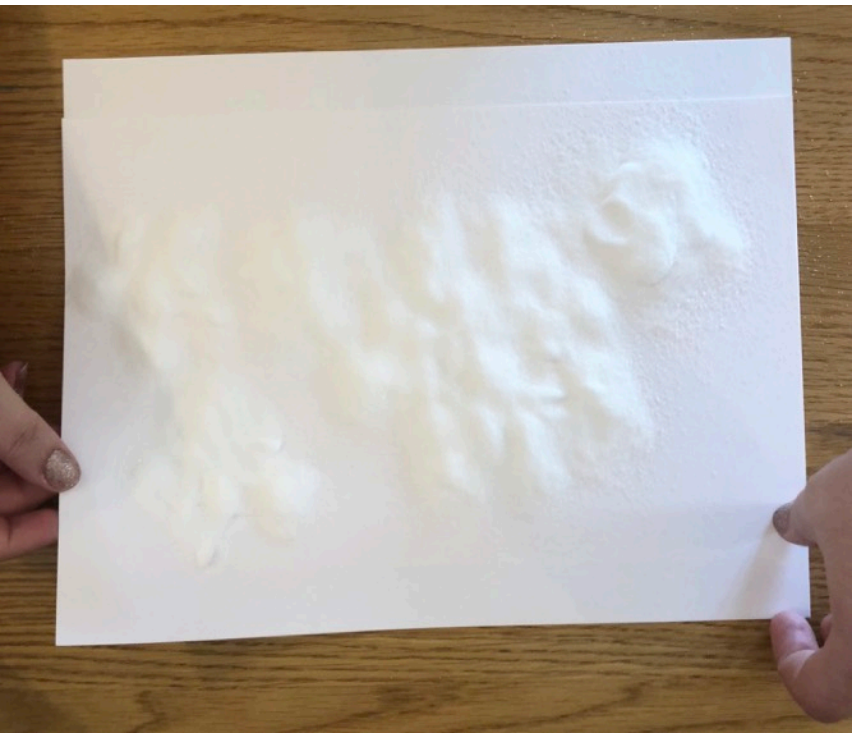

- Paper (2 pieces)
- Paintbrushes
- Glue (liquid)
- Salt
- Watercolours
- Water

Using the glue - draw out your design on your piece of paper. It is good to do it in stages so your glue doesn't dry, cover the glue line in salt then tip the excess off onto the second piece of paper so you can reuse it!

Add more details if you like repeating the process like so

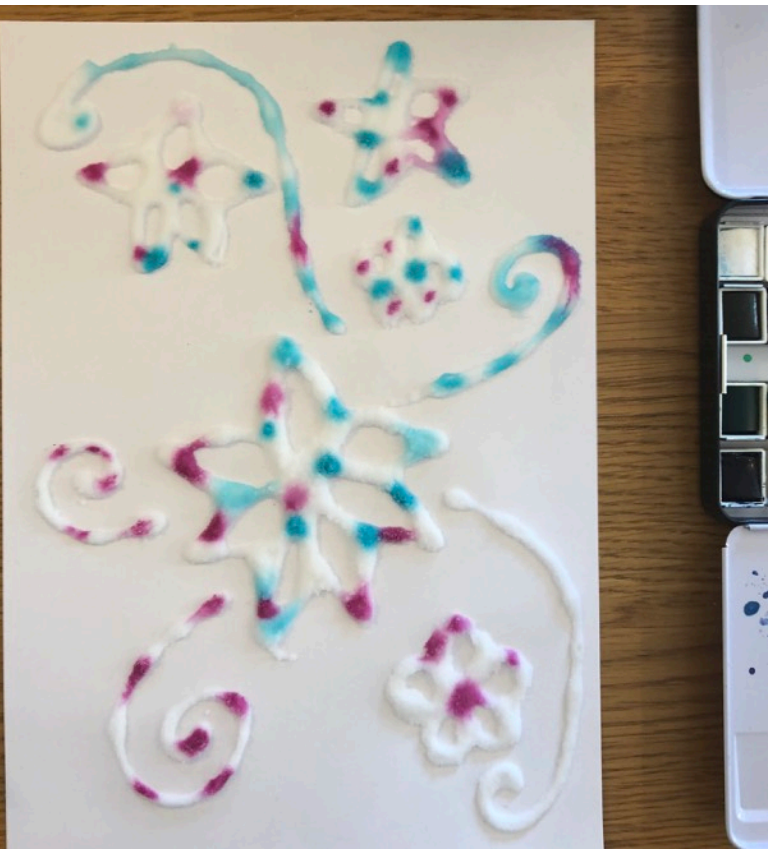

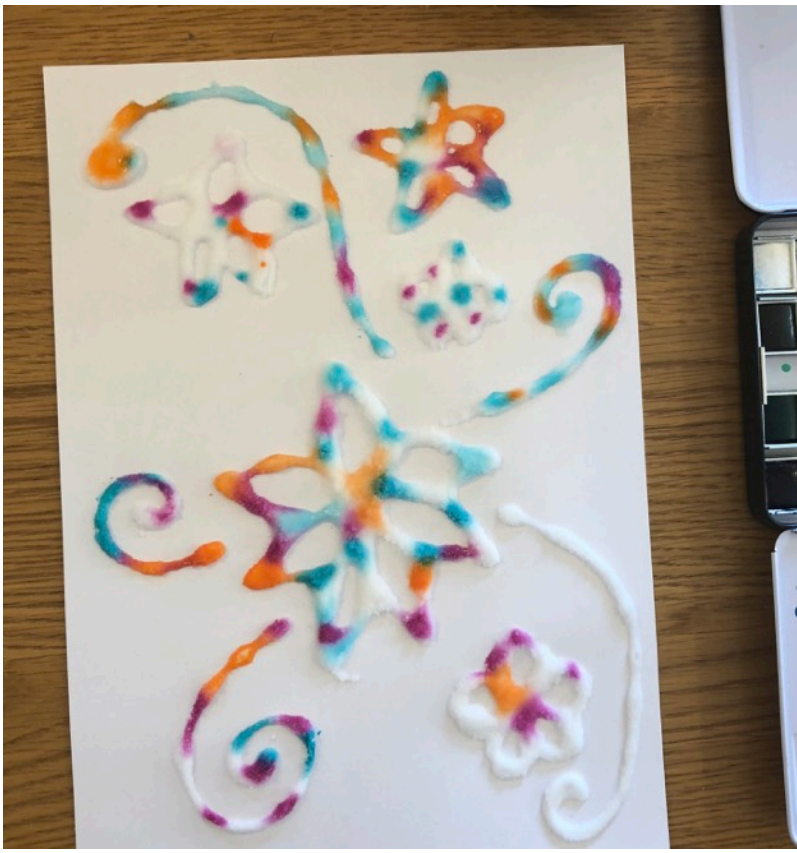

Leave it to one side to dry for at least 30 minutes - longer if you can manage it! Then you can add the colour! We found it best to dot the colour around and let it merge into the other colours but you can play around to see what you like!

There you have it your very own “Raised Salt Painting”!
