CoolitArt

Sand Art

Now you can recreate your own sand art at home - messy, tactile and creative!

Tools and Materials:

- Mixing Bowls
- Food Colouring
- Salt
- Spoon
- Glue Stick
- Paper

First you need to create your coloured “sand” you can buy coloured sand but this is much more cost effective way to do it - we have chosen to use 3 colours so we needed to pour out 3 equal amounts in to the bowls.

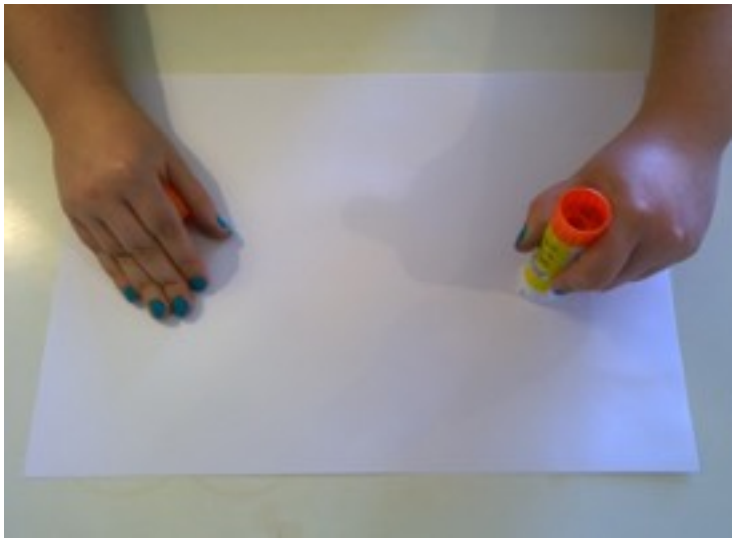

Now to add the food colouring in - we added about 7 - 10 drops to our bowl, you want enough to get a good colour but not so much that is makes your salt too wet, make sure you mix it in thoroughly!

Once you have your colours you can start to create - but as we are using glue you need to do one colour at a time - so forward planning is important!

Once you have drawn out your image with the glue start to pat it in like so

You can tip any excess back in to the bowl so you can use it later

Now to add the other colours!

There you have it your own Sand Art!

Here’s another we created to inspire you
