Seascape Snapshots

Inspired by World Oceans Day on the 8th June we thought it would be fun to create an artwork inspired by it - creating a trio of different seascape views in one painting!

Tools and Materials:

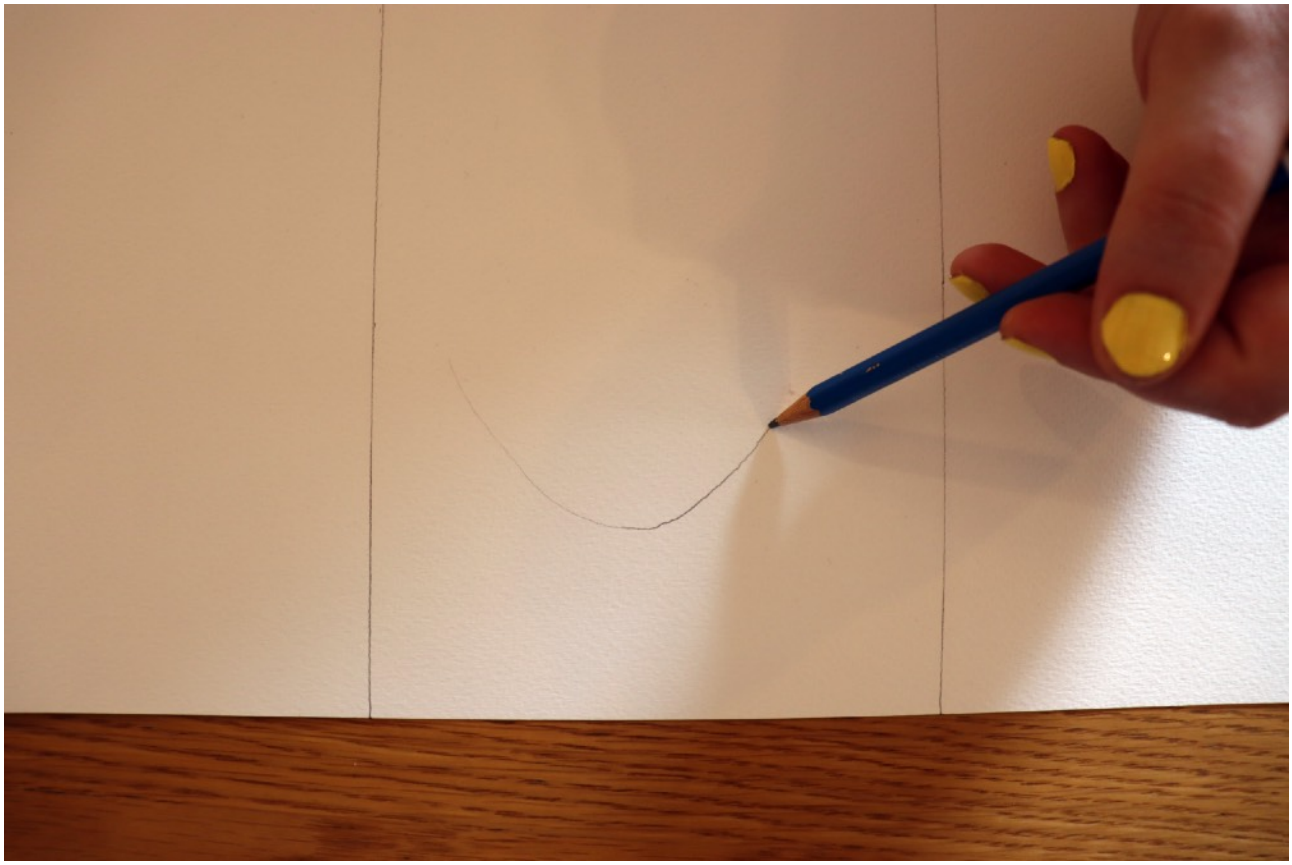

- A3 Paper
- Pencil
- Watercolour
- Ruler
- Paintbrush
- Water

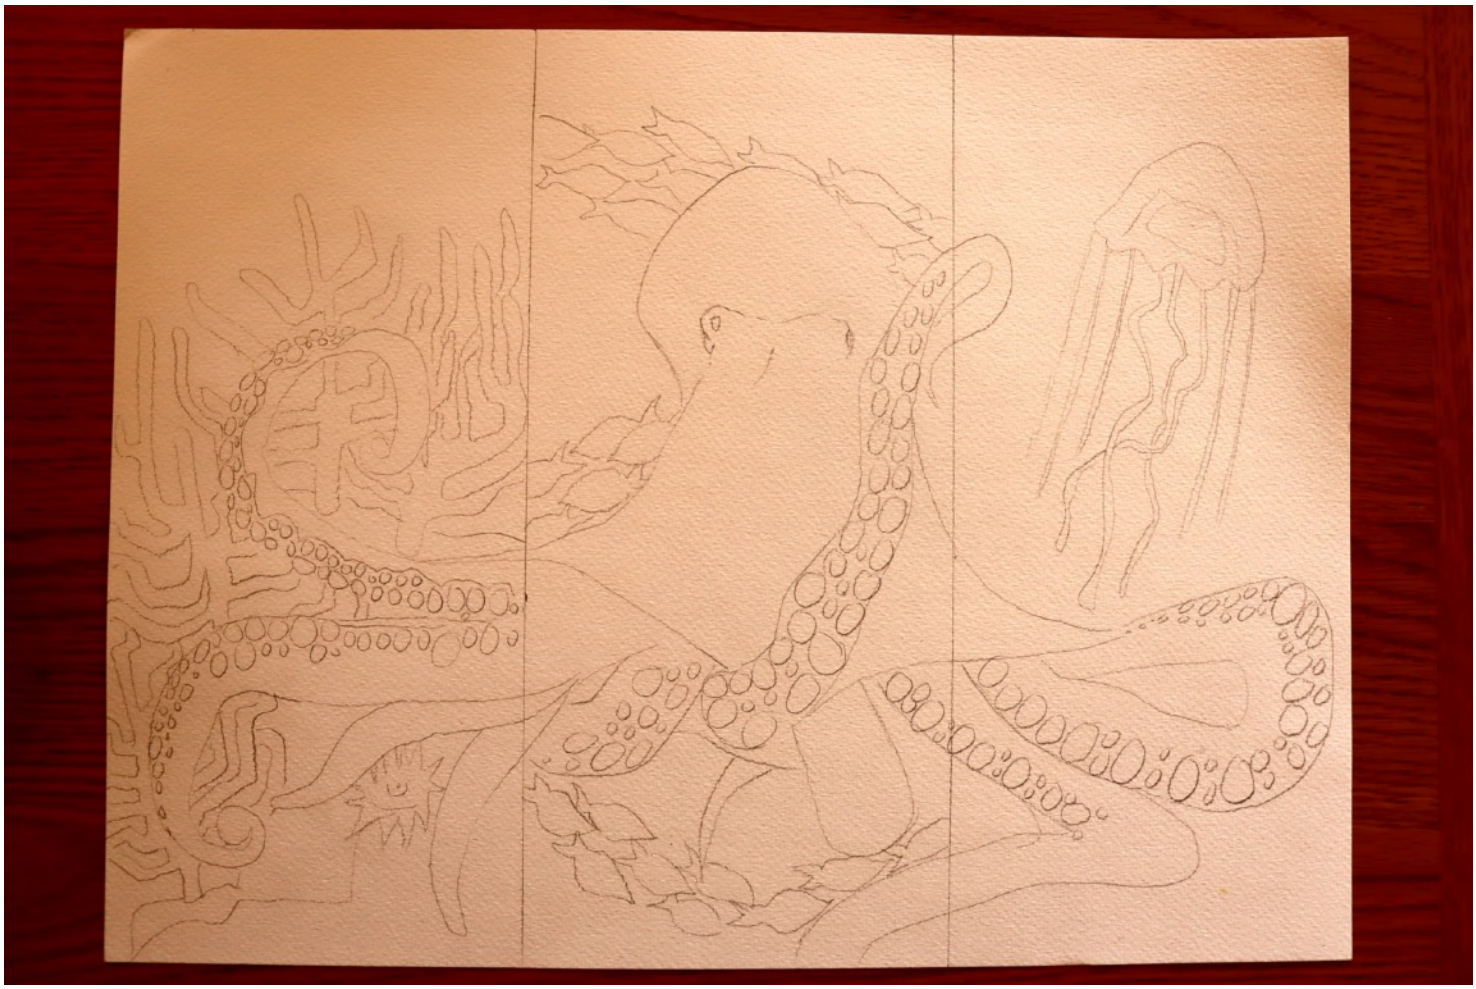

First of all separate your paper into thirds by measuring it out, our lines are vertical on a “landscape” orientated piece of paper which along its long side is 42cm - divided by 3 is 14cm per segment - make marks along the top but also measure down the paper to have a line to hit to keep it evenly spaced and straight

Once you have divided your page start to sketch out the image you like - we went for an octopus and other sea creatures like so

Once you are happy with your sketch think about the colours for the different section. We created 1 with coral, 1 with a shoal of fish and 1 with a jellyfish to try and create different distinct areas under the sea. You can also think about what colour the Octopus might be in the different settings

Paint the main elements such as the octopus, fish, jellyfish and coral first then wait for them the dry before adding in the watery background

There you have it your very own “Seascape Snapshot”!

Here is another we made to inspire you!
