Shadow Puppets

This is a great way to create characters to play out a night time story on your wall - also great on a rainy day!

Tools and Materials:

- Black Paper
- Sellotape
- Scissors
- Wooden Skewer

First of all decide what character you want to create for your story, we chose a butterfly - start sketching it out and then cut it out - just focussing on the silhouette to begin with

Then think about what bits you need to cut out to add details to your character - when you hold the puppet up in front of the light think what will add to it to make it look even more exciting!

Once you are happy with it then you can attach it to your wooden skewer with some sellotape

There you have it your very own “Shadow Puppet”

Here is another one we made to inspire you - you can create the same character doing an action using both end of your skewer to make it faster to change in the story!
