Shooting Star Tree

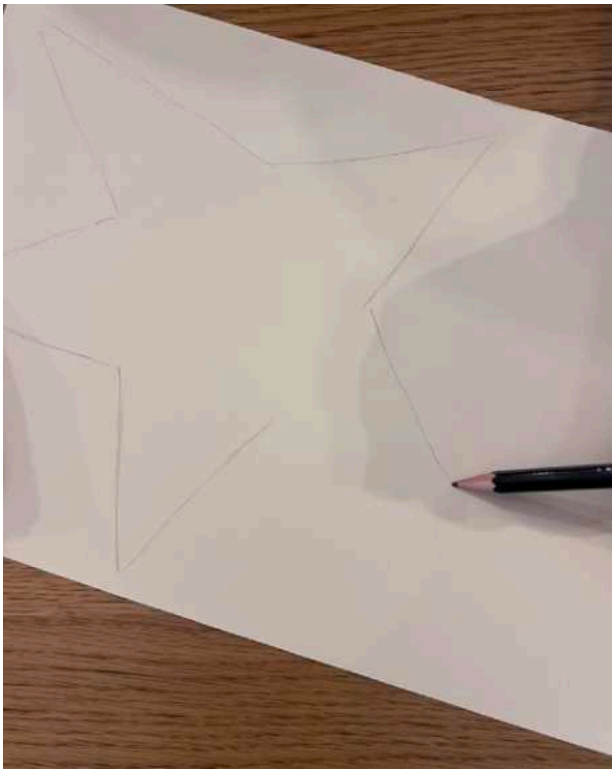

Using simple stars why not create this festive freestanding Christmas tree inspired decoration

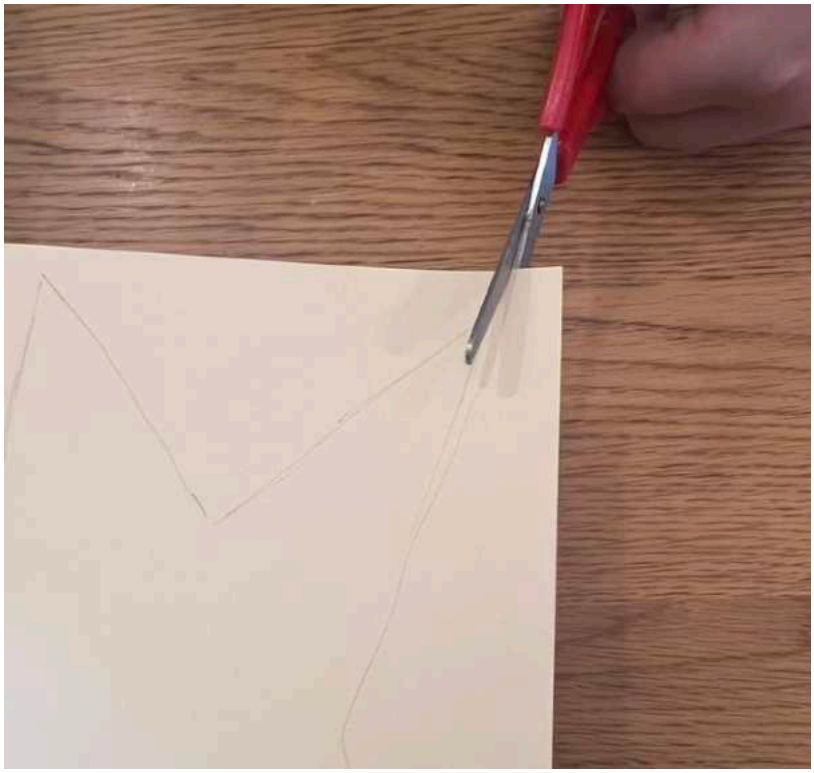

Tools and Materials:

- Coloured Paper
- Pencil
- Glue Stick
- Scissors

First of all draw a star as large as you can to fill the page, it doesn't need to be perfect, we did ours freehand you can use a ruler if you prefer! Once drawn cut it out

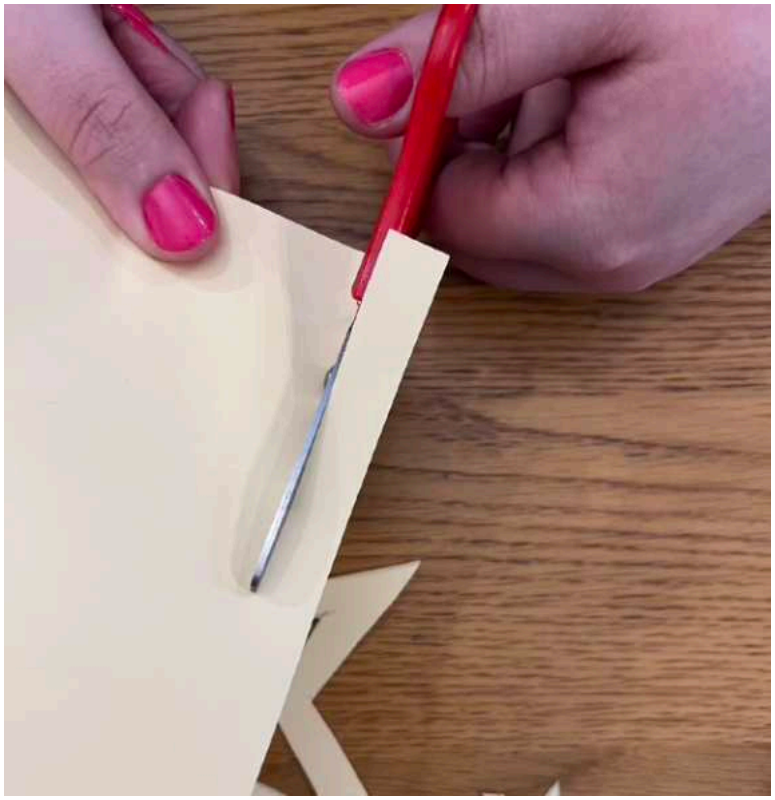

Once you have cut it out draw multiple stars inside the original star - we drew 4 stars in total - then cut them out

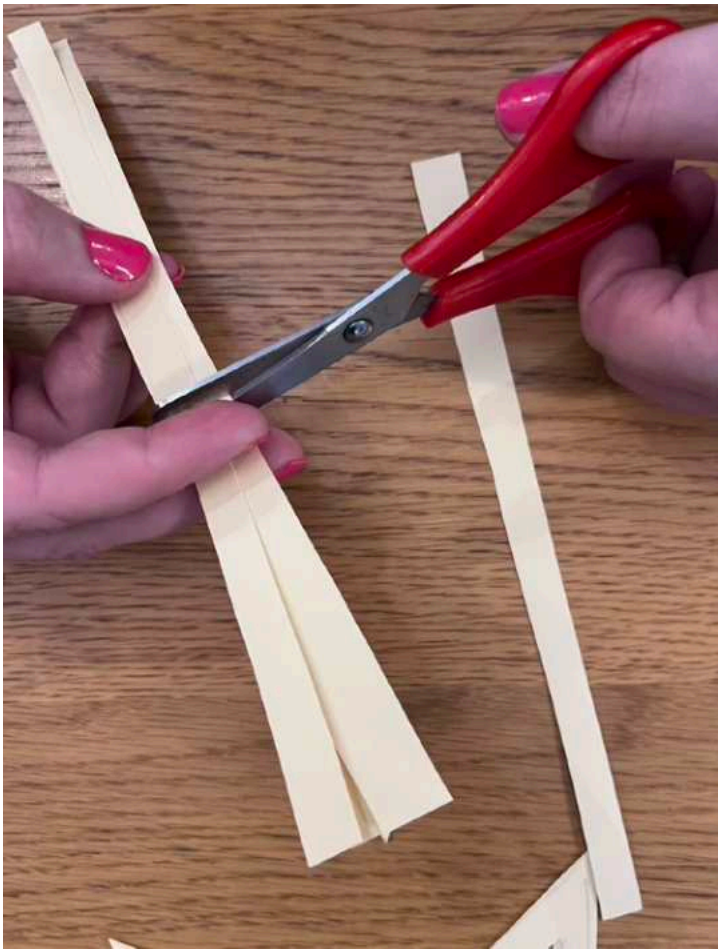

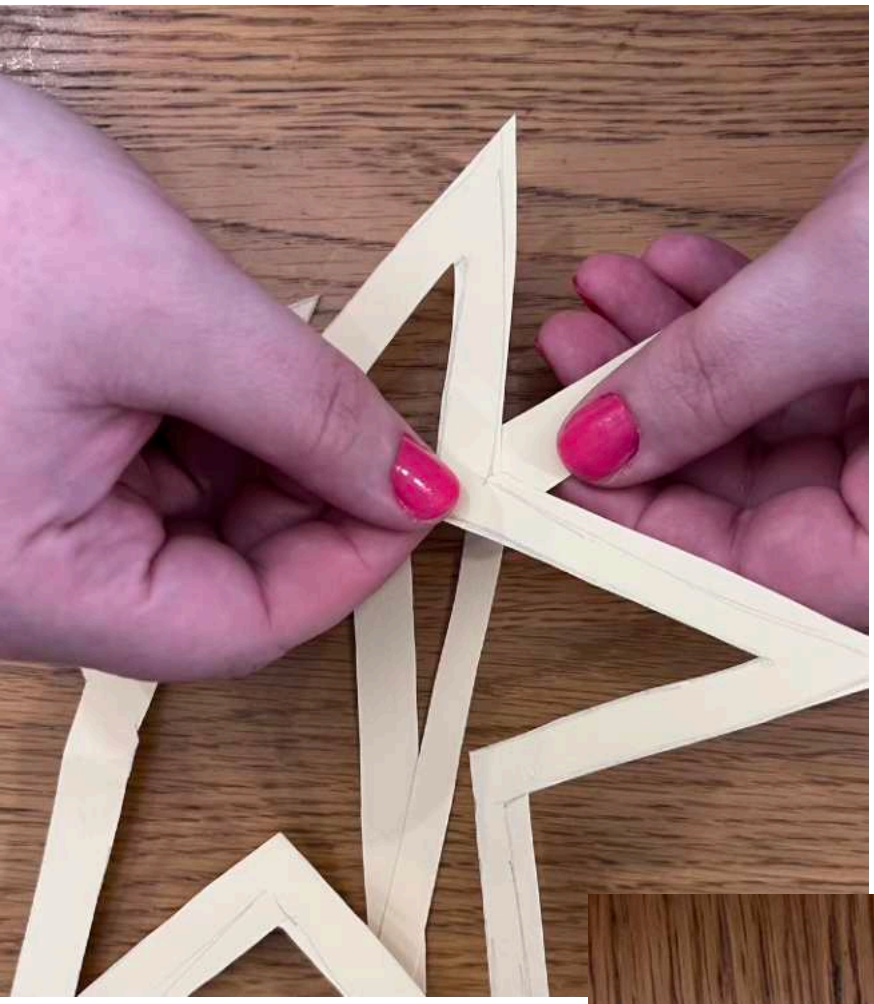

With the leftover paper cut some strips, if you don’t have enough leftover paper then use another piece - it can be a different colour if you like! Cut 5 strips like so

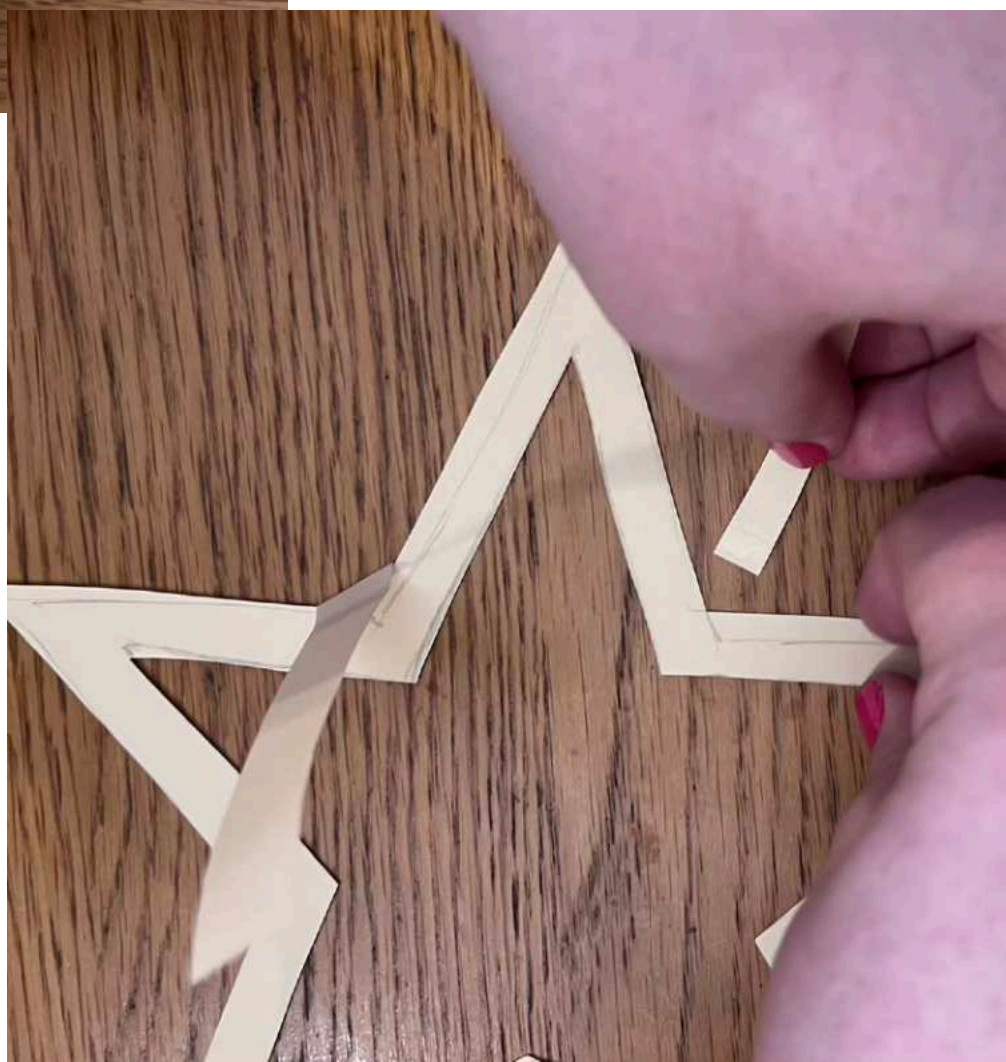

Cut 4 of the 5 strips in half - keep the long strip to one side

Taking the largest star and 5 of the short strips glue and bend the around the point of the star they naturally fit

Once it is glued it should look like this, bend the top of the strips to then glue on the under side of the next smaller star

Continue with the smaller star than that, we used 3 strips for that level and the end use the long strip folded in half to attach the small star like the point of the tree

There you have it your very own “Shooting Star Tree”!
