Simply Surreal Portraits

This is a fun craft to get you thinking about facial features - you can do it numerous times and never end up with the same result!

Tools and Materials:

- Paper
- Magazine pages
- Scissors
- Glue
- Paintbrush for glue

Start looking through your magazine pages to see what you might want to make you face out of - I found some desert pictures which I thought would be good to make my skin out of. Cut out rough shapes to put together to form your face

When you are happy with your shapes you can start sticking them down

Now you have your basic face shape what other things do you need on there to make your portrait? Hair, eyes, mouth, nose and...?

First I added some hair, then some eyes and a nose - don’t forget to think about what shapes your facial features might be

And there you have it a Simply Surreal Portrait!

Here are some more examples we made to inspire you!
